CALCUTTA, MONDAY, MARCH 19, 1900

MILITARY DEPARTMENT.

Fort William, the 19th March 1900.

His Excellency the Viceroy and Governor General in Council announces with the deepest regret the death of Sir William Stephen Alexander Lockhart, G.C.B., K.C.S.I., Commander-in-Chief in India, and Extraordinary Member of the Governor General's Council, which took place at 11-15 P.M. last night.

The Viceroy and Governor General in Council desires to place upon record his sense of the heavy loss sustained by the Army in India of their late Commander. In a military career of exceptional brilliancy in many parts of the Empire Sir William Lockhart had shown himself to be a brave soldier, an intrepid explorer, and a natural leader of men. Upon the frontier his name was not more widely known than it was respected, and the native soldiers of the Indian Army, no less than their British comrades, will mourn in him both the Captain of their choice, and a personal friend. The Civil unites with the Military Service in deploring the untimely death of a great soldier and a distinguished servant of the Crown.

The Governor General in Council directs that, as a mark of respect to the late Commander-in-Chief, the flag of Fort William shall be hoisted half-mast high, and that seventeen minute guns shall be fired from the Fort at the time that the funeral is taking place.

Flags are also to be hoisted half-mast high at all military and civil stations in India, and minute guns should be fired as above at each station where there is artillery.

The Governor General in Council further directs that all officers of the Army shall wear mourning for fourteen days.

The funeral will leave the late Commander-in-Chief's residence at 5 P.M. this evening, and the Governor General in Council requests that the officers of Government, Civil, Military, and Marine, will attend.

P. J. MAITLAND, *Major-Genl.*,
Secretary to the Government of India.

SANITARY.

PLAGUE.

The 7th March 1900.

No. 634.—IN cancellation of all previous notifications issued on the subject by the Governor General in Council, and in exercise of the powers conferred by section 2, sub-section (*1*), of the Epidemic Diseases Act, 1897 (III of 1897), and by the same sub-section as applied by the Notification by the Government of India in the Foreign Department, No. 413-I.—A., dated the 4th February 1897, to all territories in India which are under the administration of the Governor General in Council, but are not part of British India, including all railway lands, and the territories for the time being administered by the Agent to the Governor General in Baluchistan as such Agent, the Governor General in

Council is pleased to prohibit the bringing, taking, sending or consigning of soiled linen and used bedding (except when carried as the personal baggage of travellers), rags and waste paper into or through any other part of India to which the provisions of the said Act extend or have been applied, from :—

(i) Karachi or from the territories other than Sind administered by the Governor of Bombay in Council;
(ii) the Bellary and Salem Districts of the Madras Presidency;
(iii) the Province of Bengal;
(iv) the Allahabad District of the North-Western Provinces;
(v) the Jullundur and Hoshiarpur Districts of the Punjab;
(vi) the Nagpur District of the Central Provinces;
(vii) the Naldrug, Bidar and Lingsagur Districts of the Hyderabad State and
(viii) the Civil and Military Station of Bangalore and the Mysore State.

All orders heretofore in force prohibiting the bringing, taking, sending; or consigning of used apparel other than soiled linen within the territories to which this Notification relates are hereby cancelled.

The 8th March 1900.

No. 667.—WHEREAS the Governor General in Council is satisfied that there is a danger of an outbreak of dangerous epidemic disease at Dehra Dun in the North-Western Provinces if pilgrims or other persons from the Bombay Presidency (including Sind), the Bellary and Salem Districts of the Madras Presidency, Bengal, the Jullundur District of the Punjab, the Nagpur District of the Central Provinces, and the Mysore and Hyderabad States are permitted to assemble at that place on the occasion of the ensuing Jhanda fair:

In exercise of the powers conferred by section 2, sub-section (*1*), of the Epidemic Diseases Act (III of 1897), the Governor General in Council is pleased to direct that no tickets to travel by railway to the stations of Dehra Dun, Harrawala and Doiwala on the Hardwar-Dehra Railway shall be sold from the 10th to the 22nd March 1900 (both days inclusive) within the Bombay Presidency (including Sind), the Bellary and Salem Districts of the Madras Presidency, Bengal, the Jullundur District of the Punjab, the Nagpur District of the Central Provinces, and the Mysore and Hyderabad States to any pilgrim or other person intending or believed to be intending to proceed on pilgrimage to the Jhanda fair at Dehra Dun.

The 9th March 1900.

No. 678.—THE following Notices of the Board of Trade are published for general information:—

(F. & H. 2475.)

Board of Trade (Fisheries and Harbour Department), London, February 9, 1900.

The Board of Trade have received, through the Secretary of State for Foreign Affairs, the following copy of a Quarantine Notice issued by the Spanish Government, *viz.* :—

(TRANSLATION.)

New Sanitary Regulation.

Yesterday the new Sanitary arrangements came into force in our port.

In future, instead of the Health Officers visiting the ships arriving at our port in their boat, it will be the Captains on board who will proceed in thei boat to the Maritime Health Office. The boat will fly a yellow flag.

In the event of the ship having any sick person who might be the cause of an epidemic, the Captain will not disembark, but will hoist a yellow flag and underneath a red one, when the Health Authorities will arrange for the vessel to be put into quarantine.

It will be well then for consignees and merchant Captains to inform themselves of and put in practice these Regulations in order not to incur the corresponding fines as happened with the first ships which entered yesterday and did not know of the enforcement of the new Regulation. The new Health Regulations indicate the penalty incurred by the owners of boats mooring alongside, communicating with or receiving anything from a quarantine ship.

The fines vary from 15 to 150 pesetas.

(F. & H. 2721.*)

Board of Trade (Fisheries and Harbour Department), London, February 12, 1900.

The Board of Trade have received, through the Secretary of State for the Colonies, the following copy of a Notice issued by the Governor of the Windward Islands, *viz.* :—

Regulations made by the Governor in Council under authority of section 40 of the Quarantine Ordinance, 1895.

22nd December 1899.

1. Vessels arriving within 14 days from any port infected with bubonic plague shall be coaled and generally treated in the same manner as provided in respect of infected vessels under sections 24, 26, 28, 32, and 33 of the Quarantine Regulations passed by the Governor in Council on the 20th day of May 1896, and shall also be subject to the penalties therein provided for any breach of the said regulations.

2. Vessels arriving after less than 30 days, but not less than 14 days, from a place infected with bubonic plague, and having had no sickness or death on board from the disease during the voyage, shall be permitted by the Visiting Officer to coal in quarantine at the Rendezvous Buoy in the Castries Harbour, from lighters with the assistance of labourers from the shore, but no such labourers or any other person shall be allowed to go on board such vessel, and such vessel shall not be coaled after sunset, and every precaution shall be taken to prevent rats being conveyed from any such vessel to the shore.

3. The Regulation passed by the Governor in Council on the 30th day of October 1899 is hereby repealed.

Passed by the Governor in Council this 15th day of December 1899.

E. EVELYN, *Clerk of Councils.*

No. 679.—WHEREAS the Governor General in Council is satisfied that there is a danger of an outbreak of dangerous epidemic disease at Uchchangidurgam in the Harpanahalli Taluk of the Bellary District of the Madras Presidency if pilgrims or other persons from the Bombay Presidency and the Mysore State are permitted to assemble at that place on the occasion of the ensuing Uchchangamma festival:

In exercise of the powers conferred by section 2, sub-section (*1*), of the Epidemic Diseases Act (III of 1897), the Governor General in Council is pleased to direct that no tickets to travel by railway to the stations of Ranibennur, Chalgeri, Harihar, Davangere, and Tolahunse on the Southern Mahratta Railway shall be sold from the 23rd March to the 4th April 1900 (both days inclusive) within the Bombay Presidency and the Mysore State to any pilgrim or other person intending or believed to be intending to proceed on pilgrimage to the Uchchangamma festival at Uchchangidurgam.

No 685.—WHEREAS the Governor General in Council is satisfied that there is a danger of an outbreak of dangerous epidemic disease at Meerut in the North-Western Provinces if pilgrims or other persons from the Bombay Presidency (including Sind), the Bellary and Salem Districts of the Madras Presi-

* For previous rules relating to the Windward Islands see Home Department Notification No. 105, dated 12th January 1900, published in Part I of the *Gazette of India* of the 13th January 1900.

dency, Bengal, the Jullundur District of the Punjab, the Nagpur District of the Central Provinces, and the Mysore and Hyderabad States are permitted to assemble at that place on the occasion of the ensuing Nauchandi fair:

In exercise of the powers conferred by section 2, sub section (1), of the Epidemic Diseases Act (III of 1897), the Governor General in Council is pleased to direct that no tickets to travel by railway to the stations of Muradnagar, Begamabad, Muhiuddinpur, Meerut City, Meerut Cantonment, Sardhana and Khatauli on the North-Western Railway shall be sold from the 20th to the 30th March 1900 (both days inclusive) within the Bombay Presidency (including Sind), the Bellary and Salem Districts of the Madras Presidency, Bengal, the Jullundur District of the Punjab, the Nagpur District of the Central Provinces, and the Mysore and Hyderabad States to any pilgrim or other person intending or believed to be intending to proceed on pilgrimage to the Nauchandi fair at Meerut.

REWARDS.

ORDER OF MERIT.

No. 275.—The Governor General in Council is pleased to sanction the admission to the 3rd class of the Order of Merit of the undermentioned Native Officer:—Subadar-Major Yasin Khan, *Sardar Bahadur*, 24th (Punjab) Regiment of Bengal Infantry,—for conspicuous gallantry in action at the Malakand on the 27th July 1897, on which occasion he led a party of four men against a Sungar occupied by some of the enemy, which was taken and a standard captured.

No. 276.—In continuation of G G O. No. 275 of 1900, the Governor-General in Council is pleased to sanction the promotion to the 2nd class of the Order of Merit of Subadar-Major Yasin Khan, *Sardar Bahadur*, 24th (Punjab) Regiment of Bengal Infantry, for further acts of conspicuous gallantry at Malakand on the three occasions detailed below:—

1. On the evening of the 27th July 1897, in leading a half company up the hill commanding the camp of the 24th Bengal Infantry which was held by the enemy. On this occasion it was in a great measure due to his fearless example that the enemy were driven off with the loss of two standards.
2. On the morning of the 28th July 1897, when he preceded his company in a counter-attack towards Gallows Tree Hill, and though several times checked by superior numbers, rallied his men and routed the enemy with heavy loss.
3. On the 1st August 1897, when being sent out with a company to reconnoitre, he personally led a section against some twenty or thirty of the enemy who occupied a rocky knoll, and routed them, capturing two standards, some rifles, and other arms.

No. 277.—The Governor General in Council is pleased to admit the undermentioned non-commissioned officers and men of the 27th Bombay Infantry to the 3rd class of the Order of Merit in recognition of the gallantry and devotion displayed by them in action with an overwhelming force of Soudanese mutineers and other rebels, near Kitabu, Unyoro, on the 9th and 10th October, 1898, on which occasion they formed the rear and baggage guards of a detachment under the command of Lieutenant J. A. Hannyngton:—

No. 2627, Naick Yusuf Khan.

No. 1765, Naick Sultán Muhammad (attached from the 30th Bombay Infantry).

No. 2737, Private Núr Muhammad.

No. 262, Private Sharíf Khan.

No. 20, Private Ghulám Muhammad.

No. 1441, Private Núr Dád.

No. 2858, Private Barkatúlla.

No. 153, Private Sháh Zád Sháh.

No. 767, Private Subey Khan.

No. 959, Private Subey Khan.

No. 237 R. T.

GOVERNMENT OF INDIA—PUBLIC WORKS DEPARTMENT—RAILWAY TRAFFIC.

Calcutta, the 2nd March 1900.

READ—

Sections 3 (4), 16 (2), 47 and 148 (1) of the Indian Railways Act (IX) of 1890.

Government of India, Public Works Department, notification No. 480½, dated the 30th October 1890, and the Government of India resolution No. 736 R. T., dated the 17th October 1890, published thereunder.

Memorandum from the Consulting Engineer to the Government of India for Railways, Calcutta, No. 783, dated the 14th February 1900, forwarding letter from the Agent, East Indian Railway Company, No. 174 G., dated the 10th February 1900.

OBSERVATIONS.—The Agent of the East Indian Railway Company has applied for leave to adopt the General Rules for working railways under construction and not used for the public carriage of passengers, animals or goods, which rules were published in the *Gazette of India* of the 8th November 1890, under Public Works Department notification No. 480⅓, dated the 30th October 1890, on the colliery extension of that Railway from Sitarampur to Domohani.

RESOLUTION.—The Governor General in Council is pleased to sanction the application of the General Rules which are referred to in the foregoing observations to the colliery extension of the East Indian Railway from Sitarampore to Domohani which has been sanctioned for construction.

ORDER.—Ordered that the General Rules, which have already been published in the *Gazette of India* of the 8th November 1890, be further notified to the railway servants and to the public by a copy thereof being kept open to inspection, free of any charge, in the office of the Engineer in charge of the construction of the railway.

Ordered, also, that this resolution be communicated to the Consulting Engineer to the Government of India for Railways, Calcutta, for information and guidance, and that it be published under a notification in Part I of the *Gazette of India.*

No. 99.—The following is published for general information :—

No. 238 R. T.

GOVERNMENT OF INDIA—PUBLIC WORKS DEPARTMENT—RAILWAY TRAFFIC.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE

INVENTIONS and DESIGNS.

Calcutta, the 8th March 1900.

NOTIFICATIONS.

No. 874 P.—APPLICATIONS in respect of the undermentioned inventions have been filed, under the provisions of the Inventions and Designs Act of 1888, in the office of the Secretary appointed under that Act, during the week ending 3rd March 1900:—

No. 80 of 1900.—James Bowack, merchant, of 18 and 20, Dalal street, Fort, Bombay. *Improvements in tobacco pipes.*

No. 81 of 1900.—Alan Brebner, civil engineer, of 4, Nemoure road, Acton, London, W. *Improvements in eclipsing screens for revolving group-flashing lighthouse lights, for signalling lights, or the like.*

No. 82 of 1900.—George Falvey Beyts, District Engineer, East Indian Railway, Allahabad. *An improved lock, applicable to railway wagons, goods sheds, and such structures to prevent robbery.*

No. 83 of 1900.—Albert Cushing Crehore, Professor of Physics, of Hanover, Grafton county, state of New Hampshire, U. S. A., and George Owen Squier, Captain in the United States Army, formerly of Fortress Monroe, Elizabeth city, county, state of Virginia, but now of Washington, district of Columbia, U. S. A. *Means for generating and impressing semi-cycles of electromotive force on electric circuits for telegraphic and other purposes.*

No. 875 P.—SPECIFICATIONS of the undermentioned inventions have been filed, under the provisions of the Inventions and Designs Act of 1888, in the office of the Secretary appointed under that Act, and copies have been sent to the Governments of Madras, Bombay, and Burma, and the Director of the Department of Land Records and Agriculture, North-Western Provinces and Oudh. These and other specifications are open to public inspection, from 11 A.M. to 4 P.M., at the Secretary's office (Imperial Secretariat, Government Place, West, Calcutta), on payment of a fee of one rupee, and a certified copy of any one of them will be supplied on payment of the fixed expenses of copying:—

No. 213 of 1899.—Messrs. Ernsthausen, limited, merchants, Calcutta. *The improvement of indigo manufacture.* (Specification filed 1 March 1900.)

No. 270 of 1899.—Birney Clark Batcheller, mechanical engineer, of 1518, North 15th street, Philadelphia, Pennsylvania, U. S. A. *Improvements in pneumatic transmission systems.* (Specification filed 27 February 1900.)

No. 271 of 1899.—Gustav Nowak, apothecary, of Marktplatz 49, Bistritz, Hungary. *An acetylene generator.* (Specification filed 27 February 1900.)

No. 397 of 1899.—Ahmed Ismail, colour merchant, residing at Bapu Khote street, Jambli Mohla, Bombay. *Improvements in inking hand printing blocks.* (Specification filed 27 February 1900.)

No. 458 of 1899.—Ahmed Ismail, colour merchant, residing at Bapu Khote street, Jambli Mohla, Bombay. *An improved imitation saffron.* (Specification filed 27 February 1900.)

No. 22 of 1900.—Harry Phillips Davis, electrical engineer, of 327, Neville street, Pittsburg, and Gilbert Wright, electrical engineer, of 409 Ross Avenue, Wilkinsburg, both in the county of Allegheny, state of Pennsylvania, U. S. A. *Improvements in controllers for electric motors.* (Specification filed 26 February 1900.)

No. 876 P.—THE fees prescribed in the fourth schedule to the Inventions and Designs Act of 1888 have been paid for the continuance of exclusive privilege in respect of the undermentioned inventions for the periods shown against each :—

No. 128 of 1890.—Ellis Carr. *Improvements in tin vessels for packing biscuits and other perishable goods and instruments for opening such vessels.* (From 25 February 1901 to 25 February 1905.)

No. 162 of 1893.—Sultan Mohiaddin. *Sultan bucket and water lift.* (From 16 June 1900 to 16 June 1902.)

No. 14 of 1895.—John Frederick Duke. *Improvements in the means for automatically lighting gas.* (From 11 April 1900 to 11 April 1901.)

NOTICES.

All communications relating to Act V (the Inventions and Designs Act) of 1888 should be addressed to the "Secretary to the Government of India, Department of Revenue and Agriculture (PATENTS BRANCH), CALCUTTA."

The Office of the Secretary under the Act is open for the transaction of business from 11 A.M. to 4 P.M. on all days except Sundays and gazetted holidays.

The Government of India are advised that, as trade marks are not "designs" within the meaning of the Act, they cannot be registered under Part II.

The fees payable under the fourth and sixth schedules are now collected in cash and applicants are warned that they must be responsible for any delay in cashing cheques.

Copies of the weekly notifications, and of the quarterly lists, of applications and specifications filed in the Secretary's office are now on sale to the public at one anna and eight annas a copy, respectively.

Attention is requested to the rules made by the Government on the 10th October, 1895, in regard to the preparation of applications, specifications and drawings.

All applications made under the Inventions and Designs Act, V of 1888, will from this date (December 19th, 1895) lie in the visitor's room of the Patents Office for ten days from the date of the *Gazette of India* in which their filing may have been notified ; or, if the tenth day is a holiday, till the evening of the office day next following.

At the time of delivering or sending an application for leave to file a specification, the applicant shall cause a duplicate copy of the application to be delivered or sent therewith to the Secretary.

S. C. HILL,

Offg. Secy. under the Inventions and Designs Act, 1888.

*Although the date entered in column 2 is, as far as can be calculated, the latest safe date of posting for the next Mail steamer, full allowance being made for the steamer being in advance of her published timing, Mails for the places mentioned in column 1 are despatched daily to Colombo, so that they may proceed by any steamer that has been unusually accelerated or retarded, or by any special opportunity that may be afforded by a steamer not belonging to one of the regular lines.

The letter-box for Inland articles will be cleared for the forenoon Mails at the following hours:—

For Goalundo and Chittagong Express train at 5-30 A.M.
For Eastern districts as far as Dacca at 6-30 A.M.
For Midnapore, Orissa and Madras Presidency at 7-30 A.M.
For Bombay Mail *viâ* Nagpur at 7-30 A.M. and with a late fee of ½ anna up to 8 A.M.
For Khulna Line at 8-15 A.M.

The letter-box will be cleared for the evening Mails without late fee at the following hours, *viz.*:—

For E. I. Railway Loop Mail at 2-30 P.M. and up to 2-55 P.M. with a late fee of ½ anna.
For Darjeeling and Assam at 3-25 P.M. without late fee, and 3-50 P.M. with late fee of ½ anna.
For the Bombay Mail *viâ* Jubbulpore carrying also Mails for Ceylon at 6 P.M.
For the Punjab Mail at 7-30 P.M.
For Midnapore District only at 7-30 P.M.
For Khulna Mail at 7-30 P.M.
For Eastern Bengal Mail at 7-30 P.M.

Late letters bearing a fee of ½ anna will be received for the Bombay Mail *viâ* Jubbulpore up to 6-30 P.M. and for other Mails from 7-30 to 8 P.M., and from 8-0 to 8-45 P.M. with a late fee of 1 anna for the Punjab and Eastern Bengal Mails only.

Late registered articles will be received between the following hours:—

For Offices served by the Bombay Mail *viâ* Allahabad and Jubbulpore from 5 P.M. to 6-15 P.M.
For Offices served by the Punjab Mail from 6 P.M. to 7 P.M.
For Offices served by the Eastern Bengal Mail from 6 P.M. to 7 P.M.
For Offices served by the Khulna Mail from 6 P.M. to 7 P.M.

The late fee on each registered letter will be two annas, which must be prepaid in stamps on the letter.

Articles for Burma and for Port Blair by Sea are received without late fee up to 7-30 P.M., after which hour they are received fully prepaid and bearing an extra stamp of ½ anna up to 8 P.M.

On the latest safe day of despatch of the Mail for the Australasian Colonies *viâ* Tuticorin, the letter-box for Foreign articles will be cleared for the last time for articles without the late fee at 6 P.M., and late letters and papers fully prepaid will be received up to 6-30 P.M.

On the day of despatch of the Mail for Europe (Thursday), the letter-box for Foreign articles will be cleared for the last time for articles without the late fee at 6-30 P.M., and late letters and papers fully prepaid will be received up to 6-45 P.M. Late registered articles will be received from 5 to 6 P.M. On other days the letter-box for Foreign articles will be cleared for the last time without the late fee at 6 P.M., and late letters and papers will be received up to 6-30 P.M. for despatch by any Foreign Mails *viâ* Tuticorin, Madras, or Bombay the same night and up to 8-30 P.M., late letters and papers up to 9 P.M., for any Foreign Mails despatched by Sea. The late fee for Foreign articles is 4 annas, which must be prepaid in stamps affixed to the articles.

JOHN OWENS,

Presidency Postmaster, Calcutta.

TREASURE TROVE.

NOTICE.

It is hereby notified under Section V of the Indian Treasure Trove Act (VI of 1878) that on the 3rd day of November, 1899, treasure, consisting of the undermentioned articles valued at Rs. 30, was found hidden in a village site poramboke in the village of Pallavaram in the Arcot Taluq, North Arcot District.

All persons claiming the said treasure, or any part thereof, are hereby required to appear personally or by agent before the Collector of North Arcot at his office at Chittoor on the 10th day of September, 1900, in order to the matter being enquired into and determined in accordance with the provisions of the Act.

ROORKEE TREATISE ON CIVIL ENGINEERING IN INDIA.

Royal Octavo, with numerous Plates.

Volumes I and II are published in separate convenient sized Sections, as below, but can be bound up if required:—

VOLUME I.*

Section	I.	Building Materials (1898),	R2-0.
"	II.	Masonry (1898),	R1-4.
"	III.	Carpentry (1898,,	R1-8.
"	IV.	Earthwork (1892),	R1-4.
"	V.	Tools and Plant (never published).	

VOLUME II.*

Section	VI.	Buildings (1899),	R1-4.
"	VII.	Bridges (1897),	R4-4.
"	VIII.	Roads (1897),	R1-8.
"	IX.	Railways (1891),	R1-4.
"	X.	Irrigation Works.	(Under revision.)

ROORKEE MANUAL OF APPLIED MECHANICS.

Vol. I. Direct and Transverse Strain, principally by Analytical Methods. R7

" II. The Stability of Structures, mostly by Graphic Methods (in the Press).

MANUALS.

VII. Surveying (by Major Firebrace, R.E.) (7th edition, with Curve Table). R3.

XIII. Drawing (by Lieut. R. Pulford, R.E.). † R6.

XIIIa. Drawing, First Principles of Geometrical (by do.) R1-4.

XIV. Simple Applied Mechanics, (3rd edition), Parts I and II in one. R1-8.

Simple Applied Mechanics, Part II (1st edition). 8a.

XV. Examples of Estimating. Comprising a progressive series of Estimates (with Plans of Buildings and Bridges, worked in detail). By P. Keay, Esq., and revised by C. C. Sullivan, Esq., Head Master (5th edition). R3-12.

XVI. Earthwork Estimating, with Practical Tables and Diagrams. By Major A. M. Brandreth, R.E. R1.

XVII. Specimens of Printing used in the College Drawing Course and Entrance Examinations. 6a.

Note.—The complete Treatise forms the course of the Civil Engineer and Upper Subordinate classes at the Thomason College in Civil Engineering. The other Manuals are the complete course for both Classes in the several subjects of which they treat.

MISCELLANEOUS.

ENGINEERING WORKS.

Curve Tables, complete, for laying any curve. 4a.

Scantlings of Timber for Roofs. Tables and investigation of formulæ for determining size of timbers for Flat Roofs from 8 to 22 feet span, and for Trussed Roofs from 16 to 50 feet span (2nd edition). By P. Keay, Esq., Head Master. 12a

Notes on Chemistry of Building Materials. R1-8.

Tate's Mechanism. R1.

Barman's Descriptive Mineralogy. R2-4.

* Date of Edition on sale.

† Originally published at R15, reduced to R6.

Useful Rules and Tables relating to Measurement of Timber. Rules for computing the cubic contents of Round Logs, as well as of Sawn Timbers, with Tables, etc. By Rai Kunhya Lal. R2-8.

O'Callaghan's Earthwork Tables for India, in one large sheet. 12a.; mounted on cloth and bound. R1-12.

Tables for Computing Earthwork in Distributaries and small open Channels, in use in Irrigation Department, N.-W. Provinces. 12a.

Tyndall's Hand-Book of Specifications. (In the Press.)

The Indian Engineer's Pocket Book. R1

Wooden Bridges and Designs. By Rai Kunhya Lal. (In the Press.)

Blasting under Water (2nd edition). 10a.

Waugh's Instructions for Topographical Surveying) R1.

Analysis of Lime and Cement Stones. By Murray Thomson, Esq., M.D., F.R.S.E. 6a.

Chart, giving by a graphic method the discharges of earthen channels up to 40 feet bed width, very useful for Projects. R1-6.

SCIENCE BOOKS.

Wilson's Inorganic Chemistry. R1-8.

MATHEMATICAL.

Solleau's Tables of Wages and Rent, and of the value of goods. Tables for converting Seers and Chittacks into decimals of a Maund, and Annas and Pies into decimals of a Rupee. With a few others of general utility (4th edition). R1-8.

Solleau's Tables of Log sin² ½ P (for computing time 4a.)

Cape's Logarithms, with Tables of Squares, Cubes, etc. R1-4.

Cape's Geometry. R1-4.

Cape's Mechanics 8a.

Todhunter's Plane Trigonometry. R2-8.

Todhunter's Differential Calculus. R2-8.

Military Topography. 8a.

HINDUSTANI

Elements of Hindustani Grammar. 8a.

Technical Dialogues—English and Urdu. R1.

A Vocabulary of Common and Technical Words in English-Urdu. 12a.

History of India (*Itihas Timirnásak*), Hindi, Parts I and II. Both 6a.

Short Account of Ganges Canal (English and Urdu). Each 4a.

NOTE AND FIELD-BOOKS, etc.

Note-Books (Section paper), large. Each R1-4.

Surveying Field-Books (ruled). 12a.

Levelling Field-Books (English Pattern). R1-4.

" " (Canal "). R1-4.

" " (College "). R2-0.

P. W. D. Note-Book. R1-4.

" **Measurement Book.** R1-4.

Circular Card-board Protractors, 12 inches. R2.

MISCELLANEOUS.

Distributary, Velocity and Discharge Table. By Capt. Allan Cunningham. 8a.

J. CLIBBORN, *Lieut.-Col., I.S.C.,*
Principal, Thomason Civil
Engineering College, Roorkee.

THE INDIAN LAW REPORTS.

PUBLISHED UNDER AUTHORITY.

The Indian Law Reports, published under the authority of the Governor-General in Council, appear in monthly parts, published as soon as possible after the first of each month, at Calcutta, Madras, Bombay, and Allahabad, and comprise four series,—one for the Calcutta High Court, a second for the Madras High Court, a third for the Bombay High Court, and a fourth or the Allahabad High Court. The cases heard by the Privy Council on appeal from each High Court are reported in the series for that High Court. Cases heard by the Privy Council on appeal from Provinces in India not subject to any High Court are reported in the Calcutta Series.
The Calcutta Series is distributed by the Bengal Secretariat Book Depôt, and the Madras, Bombay, and Allahabad Series are distributed direct from Madras, Bombay, and Allahabad, respectively.
In supersession of the previous advertisements, on and from the 1st January, 1889, the terms of subscription and sale will be as follows for current issues, as well as for back numbers of the Reports from 1876 :—

Terms of subscription payable annually in advance.

For the Complete Series, *including postage* . . . R22-8

	Without postage.			With postage.		
	R	a.	p.	R	a.	p.
For the Calcutta Series	10	0	0	12	8	0
" each of the Madras, Bombay, and Allahabad Series	6	0	0	7	0	0
" a part of the Calcutta Series purchased separately, *inclusive of postage in India*	...			2	0	0
" a part of each of the Madras, Bombay, and Allahabad Series purchased separately, *inclusive of postage in India*	...			1	0	0

The following is the rate at which deductions will be made for parts out of print and at which duplicate copies will be supplied to subscribers when required in place of copies lost in transit :—

	For town.			For motussil.		
	R	a	p.	R	a.	p.
For the Calcutta Series ; per copy . .	0	8	9	0	10	0
" each of the Madras, Bombay, and Allahabad Series ; per copy . . .	0	5	3	0	5	9
" the Calcutta series. For the year . .	7	2	6	8	6	3
" each of the Madras, Bombay, and Allahabad Series. For the year . .	4	4	6	4	11	0

Persons desiring to subscribe for, or purchase, the Report should apply to—
Superintendent, Government Press, Madras.
The Superintendent, Government Central Press, Bombay.
The Curator of Government Books, North-Western Provinces and Oudh.
The Officer in charge, Bengal Secretariat Book Depôt.

Orders and subscriptions for 1894 should be at once registered and remitted by money-order payable to the Accountant and Treasurer, Bengal Secretariat, Calcutta.

Advertisements will be received for publication on the wrapper of the Indian Law Reports, Calcutta Series, at the following rates payable in advance :—

	One page.	Half page.	Quarter page.
For one issue	R 20	R 14	R 9
" three issues	" 55	" 36	" 24
" six "	" 105	" 68	" 45
" nine "	" 145	" 96	" 64
" twelve "	" 180	" 120	" 80

Several volumes of the BENGAL LAW REPORTS, from August 1868 to December 1875, and FULL BENCH RULINGS, Parts I and II, are available at the following rates :—

	Without postage.			With postage.		
	R	a.	p.	R	a.	p.
Bengal Law Reports, for one year . .	20	0	0	22	8	0
Single copies, R2 per copy.						
Full Bench Rulings, Parts I and II . .	20	0	0	22	8	3

Bengal Secretariat Book Depôt, Writers' Buildings, Calcutta, Remittances to be forwarded to the Accountant and Treasurer, Bengal Secretariat, Writers' Buildings, Calcutta.

All the wanting parts of the INDIAN LAW REPORTS (complete series) having now been reprinted, the complete Reports from 1875 to 1893 may be purchased for all the years, or for any particular year, on application to the Officer in charge of the Bengal Secretariat Book Depôt.

The subscription R22-8 per annum, should be remitted in advance to the Accountant and Treasurer, Bengal Secretariat.

NOTICE.

It is hereby notified, for general information, that subscription to the complete series of the Indian Law Reports should be registered during the first three months of each calendar year. Subscribers are therefore requested to send in their subscriptions of the complete series before the 31st March in each year. Those who register their names after that date will understand that copies will be supplied only if available.

PURE SULPHATE OF QUININE.

Manufactured at the Bengal Government Cinchona Plantation.

From 1st April, 1898, the price of this Quinine will be as follows :—

1-pound tin,	R17,	or, post-free,	R17-12.
½ „	R8-8,	„	R9-0.
¼ „	R4-4,	„	R4-12.

Analysis shows this Quinine to be of the purest manufacture ; and it is guaranteed to be free from wilful mixture with the inferior alkaloids, Cinchonine and Cinchonidine. It is for sale only to Government officers, and only for cash, and may be had from the Superintendent, Botanic Garden, Seebpore, near Calcutta.

বঙ্গদেশের গবর্ণমেণ্টের সিন্‌কোনা আবাদে প্রস্তুত বিশুদ্ধ কুইনাইন।

১৮৯৮ সালের ১লা এপ্রিল হইতে এই কুইনাইনের নিম্নলিখিত মূল্য হইবে, যথা—

১ এক পৌণ্ড টিন	১৭	বা ডাকমাশুল বিনা	১৭৸০
॥ আধ „ „	৮।০	„	৯
। সিকি „ „	৪।০	„	৪৸০

পরীক্ষা করিয়া দেখা গিয়াছে যে এই কুইনাইন অতি বিশুদ্ধ রূপে প্রস্তুত করা হইয়াছে, এবং ইহা যে সিন্‌কোনাইন ও সিন্‌কোনিডাইন নামক অপকৃষ্ট ক্ষারের সহিত ইচ্ছা পূর্ব্বক মিশান হয় নাই তাহার গ্যারাণ্টী দেওয়া যাইতেছে। ইহা নগদ মূল্যে কেবল গবর্ণমেণ্টের কর্ম্মচারীগণের নিকট বিক্রয় করা যাইবে, এবং কলিকাতার নিকট শিবপুরের কোম্পানির বাগানের সুপারিণ্টেণ্ডেণ্টের নিকট পাওয়া যাইতে পারে।

PART V.

Bills introduced in the Council of the Governor General of India for making Laws and Regulations, Reports of Select Committees presented to the Council, and Bills published under Rule 23.

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

The following Report of the Select Committee on the Bill to consolidate and amend the Law relating to the Courts in Lower Burma was presented to the Council of the Governor General of India for the purpose of making Laws and Regulations on the 9th March, 1900:—

WE, the undersigned, Members of the Select Committee to which the Bill to consolidate and amend the Law relating to the Courts in Lower Burma was referred, have considered the Bill and the papers noted in the margin, and have now the honour to submit this our Report, with the Bill as amended by us annexed thereto.

From Government of Burma, No. 187-L.—1, dated 8th February, 1900, and enclosures [Papers No. 1].
From ditto, No 443-L.—1, dated 14th February, 1900, and enclosure [Papers No. 2]
Telegram from ditto, dated 24th February, 1900 [Paper No. 3].
Endorsement from Government of India, Home Department, No. 317, dated 1st March, 1900, and accompaniment [Paper No. 4].

2. In clause 5 it seems clear that the term "barristers" is meant to denote practising lawyers, and not merely titular members of the legal profession. We have considered a proposal to insert the word 'practising,' but there is some reason to fear that the term 'practising barrister' might give occasion for doubt or controversy in individual cases. We have therefore left the language of the clause unaltered.

3. In clause 8, sub-clause (*c*), the Government Advocate has suggested that the words 'and the Court of Session' are unnecessary. The powers conferred upon the Chief Court as a High Court include those which would be conferred by constituting it a Court of Session. We have therefore altered clause 8, sub-clause (*c*), so as to make it simply declare the Chief Court to be the principal Civil and *Criminal* Court of original jurisdiction, and we have struck out clause 13, which provided that judgments of the Chief Court as a Court of Session should not be subject to appeal. By the Code of Criminal Procedure, section 206 (*2*), Magistrates are required, in cases where the Court of Session has jurisdiction, to commit to that Court. We have therefore inserted a new clause 13 providing that Magistrates in the Rangoon Town are to commit in all cases to the Chief Court.

4. With a view to the exercise of insolvency jurisdiction at Rangoon, we have added two sub-clauses at the end of clause 8. By the sub-clause numbered (*2*) we propose to enact that orders in insolvency shall have effect throughout British India, and that the provisions of the imperial statute shall apply to insolvency cases; and by the sub-clause numbered (*3*) we exclude the application of Chapter XX of the Code of Civil Procedure.

5. In clause 12 we have substituted words which refer to the jurisdiction of the Chief Court as a principal Criminal Court of original jurisdiction for those which formerly referred to its jurisdiction as a Court of Session, and we have slightly altered the form of certificate to be given by the Government Advocate in cases which ought, in his opinion, to be reviewed by the Chief Court.

6. Clause 13 of the Bill as amended is new, as we have already stated. In clause 14 we have altered the opening words so as to make it clear that an appeal is not given from judicial orders except in cases where an appeal is now permitted by law.

7. In clause 17 we have inserted words which will vest the power of appointing, suspending and dismissing the officers of the Court in the Senior Judge. We recognise that it may perhaps, as suggested by the Local Government, be expedient to appoint independent Registrars on the original and appellate sides of the Court, and we have accordingly changed 'a Registrar' into 'Registrars.'

8. Great importance attaches to the power of supervision and control to be exercised by the Chief Court over the subordinate Courts in Lower Burma. We have amplified clause 18 so as to provide for the periodical visitation of the subordinate Courts; and we have made a slight consequential alteration in clause 19, sub-clause (*1*) (*h*).

9. Clause 19, sub-clause (*1*) (*a*) of the Bill referred to us gave power to the Chief Court, with the sanction of the Local Government, to declare what persons should be permitted to practise as petition-writers, and to regulate the conduct of business by such persons. It appears to us that the effect of such an enactment would be to create a class of practitioners, possessing no proper qualification, but enjoying a kind of professional status by reason of their being licensed by the Chief Court. The petition-writer is a familiar adjunct to the Courts, in Burma and elsewhere; but we are disposed to think that litigants who deal with him should be left to make their own bargains.

We have omitted sub-clause (*2*) of clause 19. We have also struck out sub-clause (*3*) because it appears to us that no legislative recognition of the power to fine ministerial officers of the Chief Court is necessary and that to legislate concerning executive action of this nature is not only unnecessary but inconvenient.

10. We have altered clause 23, sub-clause (*1*), so as to empower the Local Government not only to divide a whole district into subdivisions, or a whole subdivision into townships, but also to constitute subdivisions within a district and townships within a subdivision.

11. We have added to clause 25, sub-clause (*c*), a provision that the District Court shall be deemed to be the Court of the District Judge as defined by the General Clauses Act, 1897. In sub-clause (*d*) of the same clause we have added words which confer on the Divisional Court the original jurisdiction of a District Court. The object of this provision is to enable the Divisional Court to enforce its own orders in the limited class of cases in which it is intended that it should exercise an original jurisdiction. This alteration renders it necessary to add a new sub-clause (*d*) to clause 28 (*1*).

12. In sub-clauses (*a*), (*b*) and (*c*) of clause 28, sub-clause (*1*), we have added the words 'or order' after the word 'decree.'

13. In clause 30, sub-clause (*1*), we have altered the proviso so as to permit of a second appeal in unclassed suits which fall within section 13, sub-clause (*1*), of the Burma Laws Act, 1898—that is, in suits regarding succession, inheritance, marriage, or caste, or any religious usage or institution, which are, in Lower Burma, governed by religious law or local custom.

14. We have slightly altered the language of clause 23, and have inserted words which will enable a Court of superior rank to dispose of a suit transmitted to it on the ground that the Judge of a subordinate Court is personally interested in the matter.

15. For the reason already given, we have struck out clause 36, by which power was given to fine ministerial officers of subordinate Courts.

16. We have amended clause 41, which provides for the transfer of pending proceedings to the new Court, and have added a sub-clause transferring criminal proceedings before the Recorder of Rangoon and the Judicial Commissioner of Lower Burma. We have also added sentences and orders of the Recorder and Judicial Commissioner to the decrees and orders described in clause 46, sub-clause (*1*).

17. At the suggestion of the Government Advocate we have made several additions to the scheduled lists of enactments, amended and repealed.

18. The publication ordered by the Council has been made as follows:—

In English.

Gazette.	*Date.*
Gazette of India	6th January, 1900.
Burma Gazette	20th January, 1900.

In the Vernacular.

Province.	*Language.*	*Date.*
Burma	Burmese . . .	3rd February, 1900.

19. We think that the Bill has not been so altered as to require republication, and we recommend that it be passed as now amended.

The 8th March, 1900.

DENZIL IBBETSON.*
T. RALEIGH.
DONALD SMEATON.*
P. ANANDA CHARLU.
J. T. WOODROFFE.*

* Subject to note.

I do not agree with the first clause of paragraph 9 of the Report, and regret the disappearance of the sub-clause which has been omitted. We cannot do without the petition-writer; and I think we should take power to control him.

DENZIL IBBETSON.

One of the most important objects of the Bill is to give to Lower Burma an efficient Appellate Court for final disposal of the difficult questions of commercial law which frequently arise in Rangoon and the other trade ports. Such questions do not arise in the Punjab, on the model of whose Chief Court Act the present Bill has been framed. This fact is, I understand, admitted by the Local Government and by the Select Committee. I think therefore that some effect should have been given to this admission by, at least, omitting the word "ordinarily" from clause 5 of tne Bill.

Subject to these remarks I sign the Report.

DONALD SMEATON.

In view of the great and growing importance of Lower Burma and of the numerous suits instituted in Rangoon and other commercial centres in that Province involving important and difficult questions of commercial law, I venture to express the opinion that section 5 of the Bill should provide that not less than one-half of the Judges of the Chief Court should be barristers of not less than 5 years' standing, who have during that period practised in one of the Supreme Courts of Justice in the United Kingdom or in a High Court or Chief Court in British India.

The difficulty anticipated by the majority of the Select Committee as to the determination of the meaning of the expression "practising barrister" cannot, I think, arise if section 5 were worded as suggested above.

Subject to these observations I sign this Report.

J. T. WOODROFFE.

THE LOWER BURMA COURTS BILL (No. II).

CONTENTS.

CHAPTER I.

PRELIMINARY.

The Lower Burma Courts Bill.

(Chapter I.—Preliminary.—Sections 1-3. Chapter II.—The Chief Court.—Sections 4-8.)

[The italics indicate the alterations proposed by the Select Committee.]

No. II.

A Bill to consolidate and amend the law relating to the Courts in Lower Burma

WHEREAS it is expedient to consolidate and amend the law relating to the Courts in Lower Burma;

And whereas the Secretary of State for India has given his previous sanction to the passing of this Act, as required by section 46 of the Government of India Act, 1833, read with section 3 of the Government of India Act, 1858;

3 & 4 Will. 4, c. 85. 21 & 22 Vict., c. 106.

It is hereby enacted as follows:—

CHAPTER I.

PRELIMINARY.

Short title, extent and commencement.

1. (*1*) This Act may be called the Lower Burma Courts Act, 1900.

(*2*) Save in so far as it applies expressly or by necessary implication to other parts of British India, this Act extends to Lower Burma only.

(*3*) This Act shall come into force on such date as the Governor General in Council may, by notification in the Gazette of India, appoint.

Definitions.

2. In this Act, unless there is anything repugnant in the subject or context,—

(*a*) "Burma" includes all the territories for the time being administered by the Lieutenant-Governor of Burma: [Cf. Burma Act I of 1898, s. 2 (7).]

(*b*) "land suit" means a suit relating to immoveable property or to any right or interest in immoveable property: [Cf. XVIII of 1884, s. 3 (2).]

(*c*) "Lower Burma" means the territories for the time being included in Lower Burma: [Cf. XIII of 1898, s. 3 (4).]

(*d*) "Rangoon Town" means the local limits of the original civil jurisdiction of the Recorder of Rangoon immediately before the commencement of this Act unless and until the Local Government, with the previous sanction of the Governor General in Council, shall otherwise direct:

(*e*) "Shan States" means the territories for the time being included in the Shan States: [Cf. ibid, s. 3 (e).]

(*f*) "Small cause" means a suit of the nature cognizable by a Court of Small Causes under the Provincial Small Cause Courts Act, 1887: [Cf. XVIII of 1884, s. 3 (1).] IX of 1887.

(*g*) "unclassed suit" means a suit which is neither a land suit nor a small cause: and [Cf. ibid, s. 3 (3).]

(*h*) "value", used with reference to a suit or appeal, means the amount or value of the subject-matter of the suit or appeal. [Cf. ibid, s. 3 (4).]

Saving of Regulations in force in Hill District of Arakan.

3. Save as expressly provided by this Act, nothing herein shall be construed to affect any Regulation in force at the commencement of this Act in the Hill District of Arakan. [Cf. XI of 1889, s. 103.]

CHAPTER II.

THE CHIEF COURT.

Establishment of Chief Court.

4. On and from the commencement of this Act there shall be established for Lower Burma a Chief Court, hereinafter referred to as "the Chief Court".

Constitution of Chief Court.

5. The Chief Court shall consist of four or more Judges, who shall be appointed by the Governor General in Council and shall hold office during his pleasure, and of whom two shall ordinarily be barristers of not less than five years' standing. [Cf. XVIII of 1884, s. 4.]

Appointment of Chief Judge.

6. The Governor General in Council may, in his discretion, from time to time, appoint one of the Judges of the Chief Court to be the Chief Judge, and may, during any vacancy of the office of Chief Judge, and during any absence of the Chief Judge, appoint one of the other Judges of the Chief Court to perform the duties of the Chief Judge until a new Chief Judge has been appointed and has entered upon the discharge of the duties of his office, or until the Chief Judge has returned from such absence, as the case may be. [Cf. ibid, s. 5, as amended by XIX of 1895, s. 1.]

Rank and precedence of Chief Judge and Judges of Chief Court.

7. (*1*) The Chief Judge (if any), whether permanent or officiating, shall have rank and precedence before the other Judges of the Chief Court. [Cf. ibid, s. 5, as amended by XIX of 1895, s. 2.]

(*2*) Save as aforesaid, the Judges shall have rank and precedence according to the seniority of their appointments as such Judges:

Provided that a Judge permanently appointed shall be deemed to be senior to, and shall have rank and precedence before, an officiating Judge.

(*3*) In the construction of this Act the expression "the Senior Judge" shall mean the Judge for the time being entitled to the first place in rank and precedence.

Civil and Criminal jurisdiction of Chief Court.

8. (*1*) The Chief Court shall be the highest Civil Court of appeal, and the highest Court of Criminal appeal and revision in and for Lower Burma, and shall—

The Lower Burma Courts Bill.

(Chapter II.—The Chief Court.—Sections 9-15.)

[Cf. XI of 1889, s. 46 (1).]

(a) be the High Court for the whole of Burma (inclusive of the Shan States) in reference to proceedings against European British subjects and persons jointly charged with European British subjects;

(b) have power, as a Court of original jurisdiction, to try European British subjects and persons charged jointly with European British subjects, committed to it for trial by any Magistrate and Justice of the Peace exercising jurisdiction in any part of Burma (inclusive of the Shan States);

(c) be the principal Civil *and Criminal* Court of original jurisdiction for the Rangoon Town; and

(d) have within the Rangoon Town such powers and authorities with respect to *the persons and property of* insolvent debtors and *with respect to* their creditors as are for the time being exercisable by a Court for the Relief of Insolvent Debtors under the Indian Insolvency Act, 1848.

11 & 12 Vict., c. 21.

(2) *Orders made by the Chief Court in the exercise of its jurisdiction with respect to insolvent debtors shall have the same force and effect throughout British India as if they had been made by the High Court of Judicature at Fort William in Bengal in the exercise of its jurisdiction under the Indian Insolvency Act, 1848, and all the provisions of the said Statute relating to the persons or property of insolvents shall, mutatis mutandis, apply to the persons and property of insolvents applying for relief to the Chief Court, and the procedure in the cases of such insolvents shall be, as far as may be practicable, in accordance with the procedure prescribed by the said Statute as amended by any enactment for the time being in force.*

11 & 12 Vict., c. 21.

(3) *Nothing in Chapter XX of the Code of Civil Procedure shall apply to any Court having jurisdiction within the Rangoon Town.*

[Cf. XVIII of 1884, s. 8 (1) (2).]

Exercise of jurisdiction by Judges of Chief Court.

9. (1) Except as otherwise provided by this Act or by any other enactment for the time being in force, and subject to any rules made under this Act, the jurisdiction of the Chief Court may be exercised by a single Judge of the Court.

(2) The Chief Court may, with the sanction of the Local Government, make rules to provide, in such manner as it may think fit, for the exercise of any of its powers by a bench of two or more Judges of the Court.

[Cf. XVIII of 1884, s. 8 (2) (3).]

Constitution of full bench and other benches.

10. (1) The Chief Court may make rules declaring what number of Judges, not being less than three, shall constitute a full bench of the Chief Court, and may by such rules prescribe the mode of determining which Judges shall sit as a full bench when a full bench sitting becomes necessary.

(2) Subject to the provisions of sub-section (1), the Senior Judge of the Chief Court may determine which Judge in each case or class of cases shall sit alone, and which Judges shall constitute any bench.

[Cf. XVIII of 1884, s. 11.]

Power to refer question to full bench.

11. Any single Judge of the Chief Court and any bench of Judges thereof, not being a full bench, may in any case refer for the decision of a bench of two Judges or of a full bench any question of law or custom having the force of law, or of the construction of any document, or of the admissibility of any evidence, arising before the Judge or bench, and shall dispose of the case in accordance with the decision of the bench to which the question has been referred.

[Cf. Letters Patent of Calcutta High Court, s. 26, and V of 1898, s. 434.]

Review in certain criminal cases.

12. Where in any case any such question as is referred to in section 11 has been decided by a Judge of the Chief Court exercising the jurisdiction of the Chief Court as a Court having power to try European British subjects committed to it for trial, *or as the principal Criminal Court of original jurisdiction for the Rangoon town*, and no reference has been made under the provisions of that section or of section 434 of the Code of Criminal Procedure, 1898, the Chief Court may, on its being certified by the Government Advocate that in his opinion the decision should be further considered, review the case or such part of it as may be necessary, and finally determine the question, and may thereupon alter the judgment, order or sentence passed by the Judge, and pass such judgment, order or sentence as it thinks right.

V of 1898.

Magistrate in Rangoon to commit to Chief Court.

13. *Notwithstanding anything in the Code of Criminal Procedure, 1898, Magistrates exercising jurisdiction in the Rangoon Town when committing prisoners for trial shall commit them to the Chief Court.*

V of 1898.

[Cf. XVIII of 1884, s. 9.]

Appeal from Judge or *Bench* of Chief Court exercising original civil jurisdiction.

14. Except as otherwise provided by any enactment for the time being in force, an appeal from any decree made by a single Judge of the Chief Court, *or from any order made by a single Judge of the Chief Court when an appeal from such order is permitted by any law for the time being in force,*—

(a) in the exercise of its original jurisdiction as the principal Civil Court of original jurisdiction for the Rangoon Town, or

(b) in the exercise of its original jurisdiction with respect to insolvent debtors and their creditors, or

(c) in the exercise of its original jurisdiction in cases withdrawn from other Courts under section 25 of the Code of Civil Procedure, or

XIV of 1882.

(d) in the exercise of any other original jurisdiction of a civil nature to which the Chief Court may by rule extend this section,

shall lie to a bench of the Chief Court consisting of two other Judges of the Chief Court.

[Cf. XVIII of 1884, s. 10.]

Rule of decision where Judges differ.

15. Except as otherwise provided by any enactment for the time being in force,—

The Lower Burma Courts Bill.

(*Chapter II.—The Chief Court.—Sections 16-19.*)

(*a*) where there is a difference of opinion among the Judges composing any bench of the Chief Court, the decision shall be in accordance with the opinion of the majority of those Judges;

(*b*) if there is no such majority, then—

(i) if the bench is a full bench, the decision shall be in accordance with the opinion of the Senior Judge of the bench;

(ii) in other cases, the bench before which the difference has arisen shall refer it to a full bench, and shall dispose of the case in accordance with the decision of the full bench.

Procedure in exercise of civil jurisdiction.

16. (*1*) The Chief Court, when sitting as a Court of Civil Judicature, shall take evidence and record judgments and orders in the manner required by the Code of Civil Procedure, unless it has, with the previous sanction of the Governor General in Council, made rules for regulating these matters. [XIV of 1882.]

(*2*) If the Chief Court has so made rules for regulating these matters, the Governor General in Council may declare that any of the provisions of the Code of Civil Procedure with respect thereto shall not apply to the Chief Court. [XIV of 1882.]

[Cf. XVIII of 1884, s. 12, and Letters Patent of Calcutta High Court, s. 8.] (*3*) So much of section 579 of the Code of Civil Procedure as requires the decree to contain the memorandum of appeal, and to be signed and dated by the Judge or Judges who passed it, shall not apply to the Chief Court in the exercise of its appellate jurisdiction. [XIV of 1882.]

Ministerial officers of Chief Court.

17. (*1*) Subject to any rules and restrictions which may be prescribed by the Governor General in Council, the *Senior Judge of the* Chief Court may appoint *Registrars* and Assistant Registrars, *an* Official Assignee, *a* Receiver and such other ministerial officers as may be necessary for the administration of justice by the Chief Court and for the exercise and performance of the powers and duties conferred and imposed on it by this Act or by any other enactment for the time being in force.

(*2*) The appointment of the Registrars, Assistant Registrars, Official Assignee and Receiver shall be subject to the sanction of the Local Government.

(*3*) The officers appointed under this section shall exercise such powers and discharge such duties as the Chief Court may direct.

(*4*) Any officer appointed under this section may be suspended or dismissed by *the Senior Judge* of the Chief Court:

Provided that a Registrar, Assistant Registrar, Official Assignee *or* Receiver shall not be dismissed without the previous sanction of the Local Government.

Superintendence and control of subordinate Courts.

18. (*1*) The general superintendence and control over all other Civil Courts in Lower Burma shall be vested in, and all such Courts shall be subordinate to, the Chief Court. [Cf. XVIII of 1884, s. 13.]

(*2*) *The Senior Judge of the Chief Court or a Judge of the Chief Court appointed by him shall from time to time visit and inspect the proceedings of the Civil Courts subordinate to the Chief Court, and shall give such directions in matters not provided for by law as may be necessary to secure the due administration of justice.*

Power to Chief Court to make rules.

19. (*1*) In addition to any other power to make rules expressly or by implication conferred by this Act, the Chief Court, with the previous sanction of the Local Government, may, by notification in the local official Gazette, make rules, consistent with this Act and any other enactment for the time being in force,— [Cf. XVIII of 1884, s. 14, as amended by XIII of 1888, s. 4.]

(*a*) providing for the translation of any papers filed in the Chief Court, and the copying or printing of any such papers or translations, and requiring from the persons at whose instance or on whose behalf papers are filed, payment of the expenses thereby incurred;

(*b*) regulating the procedure in cases where any person is entitled to inspect a record of any Court in Lower Burma or to obtain a copy of the same, and prescribing the fees payable by such persons for searches and copies;

(*c*) prescribing the travelling and other expenses to be allowed to witnesses in civil cases, and the fees to be allowed to commissioners appointed by the Courts in Lower Burma;

(*d*) determining in what cases advocates and pleaders shall be permitted to address the Courts in Lower Burma in English;

(*e*) conferring and imposing on the ministerial officers of the Chief Court and of the Courts subordinate to it such powers and duties of a non-judicial or quasi-judicial nature as it thinks fit, and regulating the mode in which powers and duties so conferred and imposed are to be exercised and performed;

(*f*) prescribing forms to be used in the Courts subordinate to it for such proceedings, books, entries, statistics, and accounts as it thinks necessary;

(*g*) providing for the *visitation and* inspection of the Courts subordinate to it and the supervision of the working thereof; and

(*h*) regulating all such matters as it may think fit, with a view to promoting the efficiency of the judicial and ministerial officers of the Chief Court and of the Courts subordinate to it, and maintaining proper discipline among those officers.

The Lower Burma Courts Bill.

(Chapter II.—The Chief Court—Section 20. Chapter III.—The Subordinate Civil Courts.—Sections 21-26.)

[Cf. XVIII of 1884, s. 15; Letters Patent of Calcutta High Court, s. 43; and XVI of 1885, s. 20.]

Registers, books, accounts, returns, statements and reports.

20. The Chief Court shall keep such registers, books and accounts as may be necessary for the transaction of the business of the Chief Court, and shall comply, in such form and manner as the Local Government may deem proper, with any requisitions which the Local Government may make for records of, or papers belonging to, the Chief Court or any Court subordinate to it, or for certified copies of, or extracts from, those records or papers, or for returns, statements or reports.

CHAPTER III.

THE SUBORDINATE CIVIL COURTS.

Grades of Courts.

[Cf. Reg. I of 1896, s. 8.]

Grades of Civil Courts.

IX of 1887.

21. (1) Besides the Chief Court, the Courts of Small Causes established under the Provincial Small Cause Courts Act, 1887, and the Courts established under any other enactment for the time being in force, there shall be four grades of Civil Courts in Lower Burma, namely:—

(a) the Divisional Court;

(b) the District Court;

(c) the Subdivisional Court; and

(d) the Township Court.

(2) Every Court mentioned in the list in sub-section (1) shall be of a lower grade than the Court mentioned immediately above it, and shall be subordinate to all Courts above it in the said list.

Superintendence and control.

22. Subject to the general superintendence and control of the Chief Court, the Divisional Court shall superintend and control all other Courts in the local area within its jurisdiction; and, subject as aforesaid and to the control of the Divisional Court, the District Court shall superintend and control all other Civil Courts in the local area within its jurisdiction.

Territorial Divisions and Establishment of Courts.

[Cf. XVII of 1884, s. 18.]

Civil divisions, districts, subdivisions and townships.

23. (1) For the purposes of this Act, the Local Government shall divide Lower Burma outside the Rangoon Town into such civil divisions, and each civil division into such civil districts, as may be approved by the Governor General in Council, and may divide each civil district into such civil subdivisions, and each civil subdivision into such civil townships, as it may think fit, *or may constitute in each civil district such civil subdivisions and such civil townships as it may think fit.*

(2) The Local Government may, with the previous sanction of the Governor General in Council, alter the limits or the number of the said civil divisions and districts, and, of its own authority, the limits or the number of the said civil subdivisions and townships.

[Cf. XVIII 1884, ss. 20.]

Establishment of Courts.

24. The Local Government shall establish—

(a) a Divisional Court for each civil division;

(b) a District Court for each civil district;

(c) a Subdivisional Court for each civil subdivision; and

(d) a Township Court for each civil township.

Jurisdiction of Courts.

[Cf. Reg. I 1896, s. 10; XIV of 1...]

Original jurisdiction of Divisional, District, Subdivisional and Township Courts.

IX of 1887.

25. Subject to the provisions of the Code of Civil Procedure, the Provincial Small Cause Courts Act, 1887, and any other enactment for the time being in force,—

(a) the Township Court shall have jurisdiction to hear and determine any suit or original proceeding of a value not exceeding five hundred rupees;

(b) the Subdivisional Court shall have jurisdiction to hear and determine any suit or original proceeding of a value not exceeding three thousand rupees;

IV of 1869.

X of 1897.

(c) the District Court shall have jurisdiction to hear and determine any suit or original proceeding without restriction as regards the value, except proceedings under the Indian Divorce Act, 1869, *and shall be deemed to be the Court of a District Judge as defined by clause (15) of section 3 of the General Clauses Act, 1897.*

IV of 1869.

(d) the Divisional Court shall have *such jurisdiction to hear and determine any suit or original proceeding as is by this section conferred upon a District Court, and shall also have* jurisdiction to hear and determine any original proceeding under the Indian Divorce Act, 1869, and shall be deemed the District Court under that Act for all districts comprised in the civil division.

[Cf. Reg. I 1896, s. 11.]

Power to invest certain Courts with Small Cause Court powers.

IX of 1887.

26. The Local Government may, by notification in the local official Gazette, invest any District, Subdivisional or Township Court with the jurisdiction of a Court of Small Causes under the Provincial Small Cause Courts Act, 1887, up to such value not exceeding five hundred rupees as it may think fit, to be exercised in cases arising within the limits of the Court's jurisdiction

The Lower Burma Courts Bill.

(Chapter III.—The Subordinate Civil Courts.—Sections 27-31.)

or in any specified area within such limits, and may withdraw any jurisdiction so conferred.

[Cf. XI of 1889, s. 83.]

Enhancement of powers of Judge of Court of Small Causes of Rangoon.

27. (1) The Local Government may by notification direct that such suits of a civil nature as are not excepted from the cognizance of a Court of Small Causes by section 15, sub-section (1), of the Provincial Small Cause Courts Act, 1887, and are of value exceeding one thousand and not exceeding two thousand rupees shall be cognizable by the Judge of the Court of Small Causes of Rangoon as if they were suits cognizable by him under the said Act, and thereupon so much of that Act as relates to—

IX of 1887.

(a) the exclusion of the jurisdiction of any other Court in such suits,

(b) the practice and procedure of Courts of Small Causes,

(c) appeals from certain orders of those Courts and revision of cases decided by them, and

(d) the finality of their decrees and orders subject to such appeal and revision as are provided by the said Act,

shall apply to such suits, and to the trial thereof, and the decrees and orders therein.

(2) The Local Government may, by notification in the local official Gazette, cancel any order made under sub-section (1), but not so as to affect any proceedings pending at the date of the order of cancellation.

[Cf. Reg. I of 1896, s. 12.] XIV of 1882, IX of 1887.

Appellate jurisdiction of the Courts.

28. (1) Subject to the provisions of the Code of Civil Procedure, the Provincial Small Cause Courts Act, 1887, and any other enactment for the time being in force, the Courts to which appeals are hereinafter declared to lie, shall respectively have authority to hear appeals from the decrees and orders of the Courts subordinate to them passed in the exercise of their original jurisdiction :—

(a) An appeal from a decree *or order* of a Township Court shall lie to the District Court :

(b) An appeal from a decree *or order* of a Subdivisional Court shall lie to the Divisional Court ;

(c) An appeal from a decree *or order* of a District Court shall, where the value of the suit in such Court is five thousand rupees or upwards, lie to the Chief Court, and in any other case to the Divisional Court :

(d) *An appeal from a decree or order of a Divisional Court when exercising original jurisdiction shall lie to the Chief Court :*

Provided that the Local Government may, by notification in the local official Gazette, direct that appeals from original decrees and orders of any specified District or Subdivisional Court shall lie to the Chief Court, in which case an appeal from any such decree or order of any Court so specified shall, so long as such notification continues in force, lie to the Chief Court.

(2) Where an order specified in section 588, clause (29), of the Code of Civil Procedure, is made by a District Court in exercise of the jurisdiction of a Court of Small Causes, an appeal therefrom shall lie to the Chief Court.

[Cf. IX of 1887, s. 24.] XIV of 1882.

Period of limitation for appeals to the Divisional Court.

29. The period of limitation for an appeal to the Divisional Court under clause (b) or clause (c) of section 28 shall be sixty days and, in the computation of that period and in all other respects, the limitation of the appeal shall be governed by the provisions of the Indian Limitation Act, 1877.

[Cf. Reg. I of 1896, s. 12 (4).] XV of 1877.

Second appeals to the Chief Court.

30. (1) In addition to the second appeals permissible under section 584 of the Code of Civil Procedure, a second appeal shall lie to the Chief Court from an appellate decree of a Court subordinate thereto on any ground which would be a good ground of appeal if the decree had been passed in an original suit whenever the decree of the Appellate Court varies or reverses otherwise than as to costs the decree of the Court below :

XIV of 1882.

Provided that no such second appeal shall lie—

(a) in the case of a small cause, *unless the value of the cause exceeds five hundred rupees*, or

(b) *in the case of an* unclassed suit, unless the value of the suit exceeds five hundred rupees *or the suit is of the nature described in sub-section (1) of section 13 of the Burma Laws Act, 1898.*

XIII of 1898.

(2) The period of limitation for an appeal to the Chief Court under this section shall be ninety days, and in the computation of that period and in all other respects, the limitation of the appeal shall be governed by the provisions of the Indian Limitation Act, 1877.

XV of 1877.

Administrative Control.

Power of Courts to transfer cases.

31. (1) The Divisional Court may exercise, as regards the Courts under its control, the same powers of withdrawal, trial and transfer as are conferred by section 25 of the Code of Civil Procedure on a District Court.

[Cf. *ibid.*, ss. 34, 35; Reg. I of 1896, s. 5.] XIV of 1882.

(2) In addition to the powers referred to in sub-section (1), a Divisional Court and a District Court may, by order in writing, direct that any case or class of cases which may be instituted in such Court, or in any Court subordinate thereto, shall be disposed of by an Additional Judge of such Court or by any other Court subordinate thereto, or by an Additional Judge of any such subordinate Court, as the case may be :

Provided that no direction under this section shall empower any Court to exercise jurisdiction beyond the pecuniary limits of its jurisdiction.

The Lower Burma Courts Bill.

(Chapter III.—The Subordinate Civil Courts.—Section 32—35. Chapter IV.—Supplemental Provisions.—Sections 36-38.)

(3) The Court trying any suit withdrawn under this section from a Court of Small Causes shall, for the purposes of the suit, be deemed to be a Court of Small Causes.

(4) When a case has been withdrawn or transferred under section 25 of the Code of Civil Procedure or under this section, any fees payable in such case under the Court-fees Act, 1870, or under rules made under this Act, shall be payable at the rates which would have been applicable in the Court from which the case has been withdrawn or transferred.

XIV of 1882. VII of 1870.

[*Cf.* XVIII of 1884, s. 38.]

Delegation of powers of District Court with respect to administrative control.

32. The District Court may, with the previous sanction of the Local Government, delegate to any Subdivisional Court in the civil district the powers conferred on the District Court by section 31 of this Act and by section 25 of the Code of Civil Procedure, to be exercised by the Subdivisional Court in any specified portion of the district within the area of the jurisdiction of the District Court.

XIV of 1882.

[*Cf.* Reg. I of 1896, s. 8.]

Judges not to try cases in which they are personally interested.

33. (1) No Judge or Additional Judge of a Court under this Act shall *hear or determine* any suit, appeal, or other proceeding to which he is a party, or in which he is personally interested.

(2) When any such suit, appeal, or other proceeding comes before any Judge *of a subordinate Court*, he shall forthwith transmit the record of the case to the Court empowered to transfer cases to which he is subordinate, with a report of the circumstances attending the reference, and such superior Court shall thereupon *hear and determine the case or* transfer *it* to some other Court.

(3) When any such suit, appeal or proceeding comes before an Additional Judge *of a subordinate Court*, he shall forthwith transmit the record of the case to the Judge of the Court, who shall hear and determine the case.

Appointment of Judges and Ministerial Officers of Subordinate Courts.

[*Cf.* XI of 1889, s. 33.]

Appointment of Judges.

34. (1) The Judges of the Divisional, District, Subdivisional and Township Courts shall be appointed by the Local Government.

[*Cf.* Reg. I of 1896, s. 18.]

(2) The Local Government may, whenever it thinks it necessary or expedient so to do, appoint an Additional Judge or Judges to any Divisional, District, Subdivisional, or Township Court, and any officer so appointed an Additional Judge shall exercise the jurisdiction of the Court to which he is appointed, and the powers of the Judge thereof subject to any general or special orders of the Local Government as to the class or value of suits or appeals which he or officers of his rank or grade may try, hear or determine, and subject also, in respect of the distribution of the business of the Court, to the control of the Judge thereof.

(3) An officer may be appointed an Additional Judge of one or more Courts, and an officer who is a Judge of one Court may be appointed an Additional Judge in another Court or in other Courts.

[*Cf.* XVIII of 1884, s. ...]

Appointment of ministerial officers.

35. (1) The ministerial officers of the Divisional Court and of the District Court shall be appointed by the Judges of those Courts respectively.

(2) The ministerial officers of the Subdivisional and Township Courts shall be appointed by the District Court.

(3) Every appointment made under this section shall be subject to such rules as the Local Government may, by notification in the local official Gazette, make in this behalf, and in dealing with any matter under this section, the District Court shall act subject to the control of the Divisional Court.

CHAPTER IV.

SUPPLEMENTAL PROVISIONS.

[*Cf.* Reg. I of 1896, s. 21.]

Place of sitting.

36. Every Civil Court shall be held at such place or places as the Local Government may, by notification in the local official Gazette, direct, or, in the absence of any such direction, at any place within the local limits of the jurisdiction of the Court.

[*Cf.* Reg. I of 1896, s. ...]

Seal.

37. Every Civil Court shall use a seal of such form and dimensions as the Local Government may prescribe on all processes and orders issued, and on all decrees passed by it.

[*Cf.* X of 1867.]

Vacations.

38. (1) Subject to the approval of the Local Government, the Chief Court shall prepare and publish in the local official Gazette a list of days to be

The Lower Burma Courts Bill.

(Chapter IV.—Supplemental Provisions.—Sections 39-42.) (Chapter V.—Provision for pending and past Proceedings.—Sections 43-44.)

observed in each year as holidays in the Chief Court and the Civil Courts subordinate thereto.

[Cf. XI of 1889, s. 94.] (2) A judicial act done by a Court on a day specified in a list published under sub-section (1) shall not be invalid by reason only of its having been done on that day.

[Cf. Reg. I of 1896, s. 35.] Language of Courts. 39. Plaints, petitions and applications to a Court may be written, and evidence may be taken down, in such language or languages as the Local Government may direct in this behalf.

Advocates of abolished Courts. 40. (1) Every person entitled immediately before the commencement of this Act to appear, plead or act in the Court of the Recorder of Rangoon or in the Court of the Judicial Commissioner, Lower Burma, shall be entitled to be enrolled as an Advocate of the Chief Court, and to practise therein and in the Courts subordinate thereto, subject to the provisions of [XVIII of 1879.] the Legal Practitioners Act, 1879, and to any rules applicable to Advocates made thereunder.

(2) Every person entitled immediately before the commencement of this Act to appear, plead or act in any Court or Courts subordinate to the Court of the Recorder of Rangoon or to the Court of the Judicial Commissioner, Lower Burma, shall be entitled to practise as a pleader in such Courts or in the corresponding Court or [XVIII of 1879.] Courts under this Act, subject to the provisions of the Legal Practitioners Act, 1879, and to any rules applicable to pleaders made thereunder.

Power to Local Government to make rules as to process-serving establishment. 41. The Local Government, with the previous sanction of the Governor General in Council, may, notwithstanding anything [VII of 1870.] in the Court-fees Act, 1870, make rules with respect to the establishments to be maintained for the service and execution of processes issued by Civil and Criminal Courts and Revenue Courts and authorities, and rules so made may be declared by the Local Government to be in supersession of all or any rules made under sections 22 and 23 of the said Act.

[Cf. Reg. I of 1896, s. 16, and Act XI of 1889, s. ...] Continuance of jurisdiction of abolished Courts. 42. (1) Where any Court under this Act has from any cause ceased to have jurisdiction with respect to any case, any proceeding in relation to the case which, if that Court had not ceased to have jurisdiction, might have been had therein, may be had in the Court to which the business of the former Court has been transferred.

(2) Nothing in this section shall be construed to apply to cases for which provision is made by [XIV of 1882.] section 623 or section 649 of the Code of Civil Procedure or by any other enactment for the time being in force.

CHAPTER V.

PROVISION FOR PENDING AND PAST PROCEEDINGS.

Pending proceedings. 43. (1) All proceedings instituted before the commencement of this Act in the High Court of Judicature at Fort William in Bengal, and arising out of any civil or criminal proceeding in any Court in Burma, shall be continued in that High Court as if this Act had not been passed.

(2) Every proceeding pending in any Civil [Cf. Reg. I of 1896, s. 23.] Court in Lower Burma at the commencement of this Act shall be deemed to be transferred to the Court *exercising the jurisdiction under this Act which corresponds to the jurisdiction of the Court in* which the proceeding was instituted, and the Court to which any such proceeding is transferred, shall proceed to try, hear and determine the matter as if it had been instituted in such Court:

Provided that nothing herein contained shall be construed to extend the period of limitation to which any suit or appeal may be subject.

(3) *Every criminal proceeding pending in the Court of the Judicial Commissioner for Lower Burma or in the Court of the Recorder of Rangoon at the commencement of this Act shall be deemed to be transferred to the Chief Court.*

(4) Every insolvency proceeding pending in the Court of the Judge of the Town of Moulmein at the commencement of this Act shall be deemed to be transferred to the District Court of Amherst, and the said District Court shall in such proceedings exercise the jurisdiction which the said Judge would have had if this Act had not been passed, and an appeal shall lie from the decision of the said District Court therein to the Chief Court.

Appeals after commencement of Act against decrees and orders passed before. 44. Appeals from decrees and orders passed [Cf. XVIII of 1884, s. 69, rep. by XII of 1891.] and not appealed against before the commencement of this Act shall lie as follows, namely:—

(a) when the appeal would before that date have lain to the High Court of Judicature at Fort William in Bengal, or to the Special Court, the Court of the Recorder of Rangoon or the Court of the Judicial Commissioner of Lower Burma—to the Chief Court;

(b) when the appeal would before the commencement of *this* Act have lain to the Court of the Commissioner—to the Divisional Court;

(c) when the appeal would before the commencement of this Act have lain to the Court of the Deputy Commissioner or to the Court of an Assistant

The Lower Burma Courts Bill.

Commissioner or of an Extra Assistant Commissioner empowered to hear appeals under section 20 of the Lower Burma Courts Act, 1889,—to the District Court:

XI of 1889.

Provided that nothing herein contained shall be construed to extend the period of limitation to which any suit or appeal may be subject.

45. (*1*) All decrees passed and orders made before the commencement of this Act by the High Court of Judicature at Fort William in Bengal ***and all sentences and orders passed in the exercise of criminal jurisdiction by the Court of the Recorder of Rangoon or by the Court of the Judicial Commissioner for Lower Burma*** shall be deemed, for the purposes of execution, to have been passed or made by the Chief Court.

Execution of past decrees and orders.

[*Cf.* Reg. I of 1896, s. 24.]

(*2*) All decrees passed and orders made before the commencement of this Act by a Court mentioned in the first column of the following table shall, for the purposes of execution, be deemed to have been passed or made by the Court set opposite to it in the second column of that table exercising jurisdiction over the area in which the Court in the first column had jurisdiction, and every decree which, before the commencement of this Act, shall have been sent for execution to a Court mentioned in the first column of that table shall be deemed to have been sent for execution to the corresponding Court in the second column exercising jurisdiction over the same area.

J. M. MACPHERSON,
Secretary to the Government of India

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

The following Bill was introduced in the Council of the Governor General of India for the purpose of making Laws and Regulations on the 9th March, 1900:—

No. 2 OF 1900.

A Bill to amend and provide for the further continuance of the Currency Conversion (Army Annual) Act, 1899.

WHEREAS it is expedient to amend the Currency Conversion (Army Annual) Act, 1899, and to provide for its further continuance; It is hereby enacted as follows:— XIX of 1899.

Substitution of a new section for section 2, Act XIX of 1899.

1. For section 2 of the said Act the following shall be substituted, namely:—

Rate of exchange fixed for calculating the equivalent in British Indian currency of sums of British currency mentioned in the Army Act.

"2. For the purposes of the Army Act or of any similar Act for the time being in force fifteen rupees of British Indian currency shall be deemed to be the equivalent of one pound of British currency and any sum of British currency mentioned in the said Act or in any similar Act as aforesaid shall be deemed to be the equivalent of a sum of British Indian currency calculated at that rate of exchange." 44 & 45 c. 58.

Repeals.

2. The following provisions of the said Act are hereby repealed, namely:—

In section 1, sub-section (1) the word 'Annual,' and section 3.

STATEMENT OF OBJECTS AND REASONS.

The object of this Bill is to continue the operation of the Currency Conversion (Army Annual) Act, 1899 (XIX of 1899), which expires on the 31st March, 1900. As the exchange between sums in British Indian and British currency has now been definitely fixed by the Indian Coinage and Paper Currency Act, 1899 (XXII of 1899), at the rate of Rs. 15 for one sovereign, it seems unnecessary to continue Act XIX of 1899 merely as a temporary measure. The Bill therefore proposes to make such amendments in that Act as will convert it from a temporary into a permanent enactment.

The 8th March, 1900.

EDWIN H. H. COLLEN,
Major-General.

J. M. MACPHERSON,
Secretary to the Government of India.

The Gazette of India.

PUBLISHED BY AUTHORITY.

Separate paging is given to this Part in order that it may be filed as a separate compilation.

PART VI.

Proceedings of the Council of the Governor General of India, assembled for the purpose of making Laws and Regulations.

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

PROCEEDINGS OF THE COUNCIL OF THE GOVERNOR GENERAL OF INDIA, ASSEMBLED FOR THE PURPOSE OF MAKING LAWS AND REGULATIONS UNDER THE PROVISIONS OF THE INDIAN COUNCILS ACTS, 1861 AND 1892 (24 & 25 VICT., CAP. 67, AND 55 & 56 VICT., CAP. 14).

The Council met at Government House, Calcutta, on Friday, the 9th March 1900.

PRESENT:

The Hon'ble Major-General Sir E. H. H. Collen, K.C.I.E., C.B., *presiding*.
The Hon'ble Sir A. C. Trevor, K.C.S.I.
The Hon'ble Mr. C. E. Dawkins.
The Hon'ble Mr. T. Raleigh.
The Hon'ble Mr. Denzil Ibbetson, C.S.I.
The Hon'ble Mr. P. M. Mehta, C.I.E.
The Hon'ble Nawab Mumtaz-ud-daula Muhammad Faiyaz Ali Khan.
The Hon'ble Mr. D. M. Smeaton, C.S.I.
The Hon'ble M. R. Ry. Panappakkam Ananda Charlu, Vidia Vinodha, Avargal, Rai Bahadur, C.I.E.
The Hon'ble Kunwar Sir Harnam Singh Ahluwalia, K.C.I.E., of Kapurthala.
The Hon'ble Mr. J. T. Woodroffe.
The Hon'ble Rai Bahadur B. K. Bose, C.I.E.
The Hon'ble Mr. Allan Arthur.

LOWER BURMA COURTS BILL.

The Hon'ble MR. IBBETSON presented the Report of the Select Committee on the Bill to consolidate and amend the law relating to the Courts in Lower Burma.

CURRENCY CONVERSION (ARMY ANNUAL) ACT, 1899, CONTINUANCE BILL.

The Hon'ble MAJOR-GENERAL SIR EDWIN COLLEN moved for leave to introduce a Bill to amend and provide for the further continuance of the Currency Conversion (Army Annual) Act, 1899. He said :—"In introducing, on the 14th July last year, the Bill to provide for the conversion into British Indian currency of sums expressed in British currency in the Army Act, I explained the reasons for proposing the measure, and I need not repeat them now. The Act was passed on the 28th July, and was to continue in force until the 31st March this year. Instead, however, of renewing the Act annually it is considered advisable, for reasons which are explained in the statement annexed to the present Bill, to continue it as a permanent measure."

The motion was put and agreed to.

The Hon'ble MAJOR-GENERAL SIR EDWIN COLLEN introduced the Bill.

The Hon'ble MAJOR-GENERAL SIR EDWIN COLLEN moved that the Bill and Statement of Objects and Reasons be published in the Gazette of India and in the local official Gazettes in English.

The motion was put and agreed to.

The Council adjourned to Friday, the 16th March, 1900.

J. M. MACPHERSON,
Secretary to the Government of India,
Legislative Department.

CALCUTTA;

APPROPRIATION REPORT
ON
THE ACCOUNTS
OF
THE GOVERNMENT OF INDIA
FOR
1898-99.

BY

A. F. COX,
COMPTROLLER AND AUDITOR GENERAL.

CONTENTS.

APPROPRIATION REPORT ON THE ACCOUNTS OF 1898-99.

GENERAL REVIEW.

Throughout the report the figures are tens of rupees (Rx. 1=R10), with the last two figures cut off for brevity, thus, 149,7 reads one hundred and forty-nine thousand seven hundred tens of rupees.

1. The Budget Estimate of 1898-99 closed with a surplus of 891,4, after providing for the full amount of the Famine Grant, 1,500,0, involving an actual charge of 773,4, and 1,406,2 for the continuance of warlike operations on the North-West Frontier. The rate of exchange taken in working out this result was 15⅞ pence. The Budget also anticipated some expenditure for the suppression of plague, and made a provision of 200,0 for improving the pay of British soldiers, in accordance with the decision of Her Majesty's Government, and looked forward to larger realisations of Revenue and Railway earning as a result of bountiful harvests.

2. The cessation of the military operations on the North-West Frontier earlier than was anticipated led to a large saving in military expenditure, and the rapid recovery of the country from the effects of the scarcity prevailing in the two preceding years led to better results than were anticipated under Customs, Provincial rates and Excise. There were also large recoveries of famine expenditure. There was a large improvement under Opium Revenue owing to better sales of Bengal opium and a revival of the demand in the China market, and under Salt owing mainly to the collections of the deferred revenue of the previous year in Madras, and large cash sales in consequence of the high price of Government securities towards the close of the year, which discouraged a resort to the credit system and under Forest due to extended operations in Burma. There was also a large increase in the Railway revenue due to the general development of traffic of all kinds, resulting from the favourable agricultural conditions of the year and the removal of plague restrictive measures on some of the lines. Irrigation showed an improvement of 25 lakhs, due to an increase in the area irrigated. The rise in the rate of exchange to 16 pence caused a saying (including Exchange Compensation) of 1,059,7. On the other hand there was a falling off under Land Revenue due to too sanguine an estimate, and under Stamps and Registration resulting from fewer monetary transactions owing to the more prosperous condition of the people, while the increase in plague led to increased expenditure on that account in almost every Province. The net result of the year's accounts is a surplus of 3,961,3, which shows an improvement as compared with the Budget of 3,069,9. This balance would have been larger but for the grants amounting to 70 lakhs made in aid of Provincial resources.

3. No changes in classification of Revenue and Expenditure requiring special notice were made during the year.

4. The following summary gives the Budget and Account figures of 1898-99, which are reviewed in this report. The details will be found in the statements on pages 160 to 172 :—

Receipts. Budget.	Receipts. Accounts.	Revenue and Expenditure.	Outgoings. Budget.	Outgoings. Accounts.

Post Office, Telegraph, and Mint	3,370,6	3,072,8	—297,8
Civil Departments	1,723,5	1,726,6	+3.1
Miscellaneous	941,0	1,051,6	+110,6
Railways	21,260,9	22,740,8	+1,479,9
Irrigation	3,569,8	3,463,1	—106,7
Buildings and Roads	667,8	705,0	+37,2
Army Services	881,9	924,5	+42,6
TOTAL	96,442,0	101,426,7	+4,984,7

6. The important variations under *Principal Heads of Revenue* are the following :—

Land Revenue	+1,775,6
Opium	+545,5
Salt	+505,7
Excise	+253,9
Provincial Rates	+198,8
Customs	+160,9
Forest	+120,4
TOTAL	+3,560,8

7. The increase under *Land Revenue* occurred chiefly in the North-Western Provinces (1,035,0), the Central Provinces (206,2), Burma (160,9), the Punjab (111,1), and Madras (100,4). These improvements were due to the very favourable conditions of the year, which admitted of prompt collections and to the recovery of revenue amounting to 667,1 suspended in previous years, as stated in paragraph 16 where the comparison with the Budget is made. The improvement under Provincial Rates was also due to these causes. Under *Opium* there was an improvement of 172,8 under Bengal Opium owing to a rise in the price obtained and the sale of a larger number of chests. There was also an improvement of 361,9 in Opium Pass Fees, owing to the failure of the opium crop in China, and the reduction in the rate of duty in October 1897 which gave an impetus to the export trade in opium. Under *Salt* the increase was mainly due to large collections in Madras on account of the credit sales of the previous year, and to a larger proportion of cash sales, but it was also partly due to the revival of trade in India on the pacification of the North-West Frontier, and in Bombay to the relaxation of plague restrictions. Under *Excise* the increase was due to the more prosperous condition of the agricultural classes. Under *Customs* the improvement occurred chiefly in Burma and Bengal and was due to larger exports of rice, which had been checked by the scarcity of the

two preceding years, and to a more active import trade. Under *Forest* the improvement was due mainly to extensive extraction operations in Burma, chiefly of the Bombay Burma Trading Company, Limited, and to the high prices realised for timber in that Province and the Punjab.

8. The increase under *Interest* occurred chiefly in the interest on loans to Presidency Corporations, but partly also to the fact that the receipts in 1897-98 were reduced by 48,7 on account of the adjustment of discount on the currency investment made in 1896-97. There was an increase of 34,9 in *Post Office* Revenue, which represents the normal growth of the revenue, reduced by a falling off, due mainly to the reduction in the rates of Inland and Foreign postage as explained in paragraph 16. There was a falling off of 228,5 in the *Telegraph* Receipts, arising from a decrease in the message traffic owing to the cessation of the military operations on the North-West Frontier and the famine. There was a decrease of 104,2 in *Mint* Receipts due to the dollar coinage for the Straits Settlements, and re-coinage of Kashmir and Bhopali rupees having been carried out on a smaller scale. The increase under *Miscellaneous* was due chiefly to the recovery of famine expenditure.

9. Under *Railway Revenue* the improvement was mainly due to the exodus from Calcutta in May 1898 on account of plague scare, to larger movements of passengers owing to the removal of the stringent quarantine measures in connection with the plague on certain lines, and for attendance at fairs and marriages, and to an improvement in goods traffic consequent on rich crops and better trade prospects. The chief contributors to the improvement were the East Indian Railway (126,6), the Rajputana Malwa Railway (311,6), the North-Western Railway (158,9), the Oudh and Rohilkhand Railway (126,7), the Bengal-Nagpur Railway (122,8), the Great Indian Peninsula Railway (809,9), and the Bombay, Baroda and Central India Railway (272,7). The decrease under *Irrigation* was mainly due to the revenue during 1897-98 having been abnormally large, owing to the exceptionally dry nature of the seasons. The decrease occurred chiefly in the North-Western Provinces (157,3), and would have been worse but for the development of irrigation from the Chenab Canal in the Punjab.

10. A comparison of the expenditure side is given below. The average rate of Exchange for the Secretary of State's drawings in 1898-99 was 15·9785*d.* against 15·3539*d.* in 1897-98. The decrease under the different heads in the exchange on the English expenditure is shown separately:—

	1897-98.	1898-99.	Difference, 1898-99, greater + or less —		
			In the Exchange, on English expenditure.	Due to other causes.	Total.
Direct Demands on the Revenues	10,816,8	10,651,5	— 1,4	— 163,9	— 165,3
Interest	3,472,3	3,032,0	— 212,7	— 227,6	— 440,3
Post Office, Telegraph, and Mint	2,869.5	2,865,9	— 26,5	+ 22,9	— 3,6
Civil Departments	15,739.6	15,731,3	— 46,7	+ 38,4	— 8,3
Miscellaneous	5,716,8	5,771,2	— 79,9	+ 134,3	+ 54,4
Famine	5,363,1	1,187,3	— 1,0	—4,174,8	—4,175,8
Construction of Railways	3,8	1,5	...	— 2,3	— 2,3
Railways	22,693,5	23,682,9	— 340,7	+1,330,1	+ 989,4
Irrigation	3,144,1	3,193,4	+ 3	+ 49,0	+ 49,3
Buildings and Roads	5,418,9	5,868,8	— 8,6	+ 458,5	+ 449,9
Army Services	26,996,8	24,010,7	— 210,3	—2,775,8	—2,986,1
Special Defence Works	23,7	1,5	— 9,5	— 12,7	— 22,2
Total	102,258,9	95,998,0	—937,0	—5,323,9	—6,260,9

11. The decrease in the charges for exchange, as shown above, requires no explanation. To this should be added the saving (208,0) under Exchange Compensation.

12. Under *Direct Demands on the Revenue* the principal decrease was that of 133,1 under *Land Revenue* due to the absence of charges on account of grain compensation and famine. *Assignments and Compensations* and *Forest* contributed 21,6 and 12,4 respectively to the decrease; and there was a decrease of 15,8 under *Opium* due to a smaller outturn of the crop. The net Opium Revenue was thus 561,3 better than in 1897-98. Under *Interest* the saving was partly due to the transfer of a larger portion (242,2) of the charges to the Railway and Irrigation Accounts, and partly to smaller payments of interest in England (73,3), counterbalanced by larger payments of interest and discount on loans in India. Under *Mint* there was a loss on copper coinage resulting from the return into Government treasuries during the year, of large quantities of the copper coin issued during the two preceding years in connection with the famine. The expenditure under Civil Departments was largely affected by the disappearance of famine, which in the previous year entailed heavy payments on account of grain compensation, and by the continuance of plague, which caused a large increase of 265,7 under *Medical.* This excess, however, was more than covered by the savings under *Law and Justice—Jails* (92,0) due to low prices of food grains and a smaller jail population; under *Law and Justice—Courts of Law* (59,7), and *Police* (53,2) due to the presence on duty of a smaller number of officers than was necessary during the famine of the previous year, and to no payments on account of grain compensation; under Marine (21,7), of which 13,0 occurred in the expenditure in England, and 8,7 in India; and under Political (30,8) due mainly to the subsidy of the Amir of Afghanistan not having been fully drawn, to smaller payments to the Khyber tribes, to the transfer of the Somali Coast Protectorate to the control of the Home Government, and to the absence of charges in connection with the frontier disturbances. The increase under *Miscellaneous* in India (28,1) was due mainly to charges in connection with special commissions of enquiry, and that in England (106,2) occurred under Civil Furlough and Absentee Allowances and Superannuation.

13. Under *Famine* there was only a small charge 40,0 on account of direct relief charges, whereas almost the entire expenditure in the previous year was on this account, but there was a large charge of 690,4 for construction of Protective Railways, and of 11,7 for Protective Irrigation works, while in the previous year there was only a charge of 37,5 on the latter account, the charges on account of the construction of Protective Railways being shown under 48—State Railways, in consequence of the large expenditure on actual Famine Relief works. There was also a charge of 445,2 under Reduction or Avoidance of Debt, being the balance of the Famine Insurance Grant after meeting the above charges, and the net charges on the revenues (312,7) on account of Protective Railways constructed through the Agency of Companies. Under *Railways* there was an increase of 784,1, under Working Expenses of State Railways owing to heavier traffic, and more relaying and repair work, of 164,3 in the charges for Interest in India and England, and of 272,0 under Surplus Profits of Guaranteed Railways owing partly to no surplus having been earned by the Great Indian Peninsula Railway in the first-half of 1897, and partly to the larger earnings of the Bombay, Baroda and Central India Railway during the year. The increase under *Irrigation* was due to the expansion of irrigation and to large Interest charges consequent on a large outlay of capital. Under *Buildings and Roads* the increase was due to the restriction of expenditure in the previous year in consequence of the famine. The decrease under *Army Services* was mostly due to the cessation of the military operations on the North-West Frontier, which resulted in a saving of 2,797,9, but higher expenditure under Special Services, chiefly in connection with the occupation of Chitral and its Communications, the Tochi Garrison, and the Kohat-Kurrum Force, counterbalanced this decrease to the extent of 303,5. Under ordinary charges, there was a saving of 281,4 which arose mainly from a decrease in the pay of British soldiers, and Exchange Compensation owing to the rise in exchange, from the absence of Native troops at Mombassa and Mauritius, from the transfer of the Barrack Department, Madras, to

the Military Works Department, from purchases of Medical and Ordnance supplies, and from the absence of expenditure on account of famine against the heavy charges on this account in the previous year, partly counterbalanced by increased charges due to the messing allowances sanctioned with effect from 1st June 1898, in consequence of the new messing rules recently sanctioned in England, to more extensive ordinary relief, of British and Native troops, and to larger purchases of remounts. There was also an increase of 97,7 in the charges in England, chiefly in the payments to Her Majesty's Government in respect of British forces serving in India, and in the charges of the Indian Troop Service. Under *Special Defence Works* the decrease was due to the approaching completion of the Secretary of State's payments in connection with armaments.

Comparison of Accounts with Budget Estimates of 1898-99.

14. The following figures exhibit the differences in the net accounts between the Budget and the Actuals, those due to the rise in the rate of Exchange being shown in a separate column. A comparison of the gross figures has been given before in paragraph 4:—

	Due to rise in exchange.	Better + Worse — Due to other causes.	Net.
Principal Heads of Revenue	+ 2,7	+1,579,7	+1,582,4
Interest	+ 161,0	+ 315,3	+ 476,3
Post Office, Telegraph, and Mint	+ 15,7	— 80,7	— 65,0
Civil Departments	+ 29,9	— 72,8	— 42,9
Miscellaneous	+ 125,8	+ 13,6	+ 139,4
Famine	...	— 88,1	— 88,1
Construction of Railways	...	+ 4,3	+ 4,3
Railways	+ 340,5	+ 815,2	+1,155,7
Irrigation	+ 1	+ 254,6	+ 254,7
Buildings and Roads	+ 7,0	+ 172,0	+ 179,0
Army Services	+ 248,5	+ 811,3	+1,059,8
Special Defence Works	...	— 1,5	— 1,5
COMBINED SURPLUS IMPERIAL AND PROVINCIAL	+931,2	+3,722,9	+4,654,1

15. To the saving in Exchange shown above must be added 128,5 on account of savings under Exchange Compensation Allowance, of which 45,5 was under Army services, and 41,3 under Civil Departments, the balance being distributed over all the other heads. The improvements, due to a rise in the rate of exchange, require no special explanation; it is necessary to explain only the differences arising from other causes.

16. The principal variations between the Budget figures and the accounts, apart from Exchange, are explained below. Under *Principal Heads of Revenue* the largest improvement occurred under Opium (678,4) the revenue of which rose by 395,5 owing to the causes mentioned in paragraph 2; while the expenditure showed a saving of 282,9, as the crop fell short of the expectation. The next largest increase occurred under Salt (425,7), where the revenue increased by 371,9, mainly in Madras, due to the causes stated in paragraph 2,

but partly also to the revival of trade in India, on the pacification of the North-West Frontier, and in Bombay, to the relaxation of plague restrictions, while less expenditure on petty construction and repairs and an over-estimate caused a decrease of 53,8 in the charges. Customs yielded an increase of 212,1 owing to larger exports of rice from Burma and Bengal, as mentioned in paragraph 7, and to large imports of liquors, articles of food and drink and kerosine oil. Under *Forest* there was an improvement of 124,3 in the revenue due to the causes named in paragraph 7, and a decrease of 59,4 in the expenditure, owing to less forest demarcation, improvement and extension in Madras and Bombay, and to restricted operations in the latter Province due to small demands and low prices. There were better results under Provincial rates (58,8) and Excise (33,2) due to the more prosperous condition of the agricultural classes. There was also a small improvement (29,2) under Assessed Taxes. On the other hand there were decreases under Stamps (49,6) and Registration (18,2) attributed to fewer monetary transactions owing to the more favourable agricultural conditions of the year; and a net decrease of 19,5 under Land Revenue. There was a decrease of 108,9 in Revenue due to an over-estimate, in Bengal and Madras, of the improvements expected from enhancements of revenue and new settlements, and to the recoveries of suspensions of previous years', revenue not having been realized in the Central Provinces and Bombay to the extent anticipated in the Budget; against this there was a decrease of 89,2 in expenditure due to less extensive survey and settlement operations, to smaller payments to Kanangos and Patwaris in the North-Western Provinces, and to savings in the grants for village officers in Madras and Bombay. Though the collections of Land Revenue fell short of the Budget, 667,1 of the revenue suspended in connection with the famine of 1895-96 and 1896-97 was collected during the year, distributed between the Provinces thus:—India 3, the Central Provinces 40,0, Bengal 1,0, the North-Western Provinces and Oudh 420,2, the Punjab 46,2, Madras 141,9, and Bombay 17,5. Under *Interest* the increase was due to large collections of interest on loans to Presidency Corporations, and to smaller payments of interest on loans in India (63,1) and England (90,3). On the other hand the discount on the loan raised in India was 12,6 in excess of the estimate, and the transfer of interest to the Railway Revenue Account was smaller by 28,4, and in England there was an excess of 7,0 on account of the creation of a sinking fund for the payment of the large discount on the loan raised during the year. There was an increase in the net receipts of the *Post Office* (65,3), due to the normal growth of the revenue, and to smaller payments to British Colonial and other Post Offices and also partly to smaller charges owing to less expenditure on establishments and in payments to Railways. The improvement would have been larger by 24,0, but for the reduction made in the rate of Inland postage, due to the adoption from the 1st October 1898 of one-and-a-half tolas in place of one tola as the unit of weight for one anna Inland postage, and the introduction of the Imperial Penny Postage (for India one anna) from the 25th of December 1898. There was a large decrease (97,5) under *Telegraph* owing to the more extensive use of deferred telegrams in place of urgent and ordinary messages, and to the cessation of Military operations on the North-West Frontier. Under *Mint* the cause of the decrease (48,5) is stated in paragraph 12. Under *Civil Departments* the excess was entirely due to charges in connection with the plague, and occurred under Medical (395,1). There were improvements under all the other heads; 109,9 occurred under Political, due to the reasons stated in paragraph 12, and to the transfer to the Military Department of the charges on account of the Military escort with the Chinese Frontier Delimitation Commission; 58,3 under Marine of which 40,9 in receipts, was due to large recoveries on account of vessels employed on the Somali Coast and in conveying troops to Mauritius, and to arrears of hire of vessels employed on Imperial service in previous years; and 17,4 in expenditure, due to the non-payment to the Admiralty of the subsidy for maintaining Indian Government Defence Vessels; 58,7 under Education due to certain provisions not having been fully used, and to over-estmates in the Local Section; 43,9 under Law and Justice—Courts of Law, chiefly in the charges of Civil and Sessions Courts. There were smaller improvements under Law and Justice—Jails (20,4) due to reduced demands for Jail manu-

factures, and consequent smaller outlay on raw materials; under Scientific and Other Minor Departments (26,3) and under Ecclesiastical (17,3); the improvement under *Miscellaneous* was due to the causes stated in paragraphs 8 and 12.

17. Under *Railways* the improvement was the result of an increase of Revenue of 917,2 and an excess of expenditure of 102,0. The increase in Revenue was due mainly to the auses stated in paragraph 9. The chief increases were on the East Indian Railway (160,8), on the North-Western Railway (291,7), on the Bombay, Baroda and Central India Railway (134,5), and on the Great Indian Peninsula Railway (633,0). These improvements were partly counterbalanced by a falling off on some lines, on which the plague restrictive measures affected the movement of passengers; the principal were the Southern Mahratta Railway (110,6), the Mysore State Railway (59,0), the Madras Railway (76,5), and the South Indian Railway (56,4), the decrease on the last was also partly due to the transfer of the Nellore-Gudur Section to the East Coast Railway. The excess under Expenditure occurred under Working Expenses of State Railways (214,8), and Surplus Profits of Guaranteed Railways (85,4), partly counterbalanced by savings under Interest (29,2), Land for Subsidised Companies (125,9), and under Miscellaneous Railway Expenditure (25,7). The excess under Working Expenses was chiefly due to the causes mentioned in paragraph 13. The most important increases were 253,9 on the East Indian Railway, and 112,9 on the Rajputana-Malwa Railway. These excesses were partly counterbalanced by decrease on some other lines, the principal of which were 84,5 on the North-Western Railway, 30,8 on the Oudh and Rohilkhand Railway, and 35,3 on the Southern Mahratta Railway. The excess under Surplus Profits arose from the improvement in the traffic on the Great Indian Peninsula and the Bombay, Baroda and Central India Railways. Under *Irrigation* there was an improvement in the revenue of 235,0 owing to the irrigation of larger areas than was expected, and a decrease of 19,6 in the expenditure, due to an over-estimate of the requirements under Minor Works and Navigation. Under *Buildings and Roads* the improvement was mainly due to the curtailment of expenditure in Madras and Bombay to provide funds for plague purposes. Under *Army Services* 354,7 of the improvement was due to the cessation of military operations on the North-West Frontier earlier than was expected, and to changes in the strength and organisation of the forces which were mobilised. There was a small excess of 19,3 under Special Services, due chiefly to the augmented strength of the Tochi Garrison having been maintained for a longer period than was expected, and to charges on account of the Burma-Chinese Boundary Commission Escort, which were not provided for in the Military Estimates. In the ordinary charges there was a saving of 470,3, of which 106,9 occurred in England, chiefly in the demand for Ordnance stores and in Pay and Pension of non-effective and Retired Officers of the Indian Service, due to an over-estimate. The saving in India was mainly due to smaller payments of Exchange Compensation Allowance (45,5), to the retention of Native troops in Mombassa for a longer period than was anticipated (28,9), to short strength of the British Army (37,0), to deputations to the Civil Department of officers and others on plague duty (24,9), to smaller purchases of transport and other animals (37,4), to a smaller consumption of malt liquor (30,0), to the lapse of the provision for an increased estalishment of officers for the Commissariat-Transport Department (20,0), to a fall in the prices of food supplies for men and animals (50,0), to the charges on account of the Native Infantry stationed at Mauritius having been borne by the Home Government (17,9), and to less non-effective charges (24,9). There was an excess of 47,2, due to the deduction made under Ordnance in the India Estimates, to adjust the excess provision in the Home Estimates.

18. The Budget provided for an increase of 774,6 of the revenue on the whole account, but a sum of 116,8, out of the Provincial and Local Expenditure, was payable from past accumulations of balances, leaving a net surplus in the Imperial accounts of 891,4. The accounts closed with a surplus on Imperial account of 3,961,3, and on Provincial and Local account of 1,467,4. The net Imperial revenue has therefore been better by 3,961,3 — 891,4 = 3,069,9, and the net Provincial and Local revenue by 116,8 + 1,467,4 = 1,584,2.

19. The details of these fluctuations are given below, the sign + meaning better, and — worse, than the estimate :—

	REVENUE SIDE.			EXPENDITURE SIDE.		
	Imperial.	Provincial.	TOTAL.	Imperial.	Provincial.	TOTAL.
Principal Heads of Revenue .	— 198,9	+ 1,221,9	+ 1,023,0	+ 399,0	+ 160,4	+ 559,4

Appropriation Audit.

22. The Budget grants have been exceeded under several heads. The excesses, distinguishing those requiring sanction from those for which extra grants have already been made, have been noticed under each head of expenditure, and the detailed reasons for the excess have been also there stated. The following table brings together the excesses under each head still requiring sanction:—

Excess expenditure over Budget Estimate awaiting sanction of the Imperial Government.

	India.		Central Prov.		Burma.		Assam.		Bengal.		N.-W. P. & Oudh.		Punjab.		Madras.		Bombay.		Total.

Section A.—PRINCIPAL HEADS OF REVENUE.

1897-98. Accounts.		1898-99. Budget.	1898-99. Revised.	1898-99. Accounts.
63,154,3	REVENUE	65,659,8	66,989,2	66,682,8

23. The revenue in this section exceeded the Budget Estimate and the actuals of the previous year by 1,023,0 and 3,528,5, respectively. The increase, as compared with the Budget, was composed of the following, *viz.*, 395,5 under Opium, due to larger sales of Bengal opium at higher prices and to a larger demand for Indian opium in China, owing to the partial failure of the crops in that country; 371,9 under Salt, due to recoveries on account of the large credit sales of the previous year in Madras, and to large cash sales during the year resulting from the fluctuations in the price of Government paper, to a revival of trade in India on the pacification of the North-West Frontier, and in Bombay to the removal of plague restrictions; 211,7 under Customs, due to larger imports of liquors, articles of food and drink, and kerosine oil, and larger exports of rice in Burma and Bengal; 124,3 under Forests, due to extensive extraction operations in Burma, and to the high prices realized for timber in that Province and the Punjab; 62,1 under Provincial Rates, due chiefly to the collection of arrears; 26,1 under Excise, due to the more prosperous condition of the agricultural classes, and 29,3 under Assessed Taxes due to more careful assessment and prompt realizations. These improvements were partly counterbalanced by decreases of 108,9 under Land Revenue, due to the improvements, anticipated in the Budget in Madras and Bengal, from new settlements and enhancements not having been realised, and to the expected recoveries of suspensions of the previous year, in Bombay and the Central Provinces, not having been effected; of 58,3 and 21,0 under Stamps and Registration, respectively, due mainly to fewer monetary transactions owing to the favourable agricultural condition of the year, and of 9,7 under Tributes.

24. Of the improvement, as compared with the previous year, 1,775,6 occurred under Land Revenue and 198,8 under Provincial Rates due to better collections consequent on the favourable agricultural conditions of the year; 545,5 under Opium, and 505,7 under Salt, due to the causes mentioned above; 253,9 under Excise, due to the more prosperous condition of the agricultural classes; 160,9 under Customs, due to larger exports of rice to foreign ports, and a more active import trade; and 120,4 under Forests, due to the reasons stated above; there were also improvements of 26,7 and 25,7 under Assessed Taxes and Tributes, respectively. There were, on the other hand, decreases of 39,4 under Stamps and 45,3 under Registration due to the causes stated above.

25. The receipts fell short of the Budget Estimate by 108,9, but exceeded the actuals of the previous year by 1,775,5. The decrease, as compared with the Budget occurred chiefly in Madras (138,5), Bombay (138,7), the Central Provinces (46,1), and Bengal (42,[illegible]), mainly under *Ordinary Land Revenue.* In the first case there was a decrease under *Ordinary Land Revenue* (38,5), due to the anticipated increase from new settlements in certain districts, and from general improvement in the collections not having been realized, partly counterbalanced by a receipt of 14,7 not provided for on account of land taken over by the South Indian Railway and of 18,7 on account of sale-proceeds of waste lands under the Periyar Project transferred from the head *Sale of Proprietary Rights, etc*, under which there was a decrease of 60,2, due partly to the above transfer, and partly to the stoppage of sales of land under the Periyar Project in consequence of the low prices realized in the earlier months of the year. In the three other Provinces named above the decrease occurred mainly under the first head, and was due in Bombay to the smaller recovery of suspensions of previous years than anticipated, and by grants of postponements of Land Revenue due to plague, late harvests and a fall in the price of cotton in the Northern Division; in the Central Provinces the expected recovery of suspended revenue was not effected, and in Bengal the increase anticipated from enhancements was not fully realized. These decreases were partly counterbalanced by increases in Burma (150,2), North-Western Provinces (86,8), and Punjab (19,0). In Burma the improvement was due to larger collections of *Ordinary Land Revenue*, due to extension of cultivation and growth of the assessed area (81,1), and to better collections of Capitation and Thathameda Taxes (58,8); in the North-Western Provinces it was due to the general agricultural prosperity of the year and to an increase under *Sale of Proprietary Rights, etc.*, on account of the capitalised value of abatement of land revenue on lands taken over by Railway Companies; and in the Punjab it was due to increased realization under the last-named head, on account of sales of lands in the Chenab colony, partly counterbalanced by a decrease under *Ordinary Land Revenue*, owing to the collection of arrears having fallen short of anticipations, and to postponements in some districts. The improvement, as compared with the previous year, was due chiefly to better collections consequent on a general improvement in the agricultural condition of the year. Under *Assessment of Alienated Lands less Quit Rents* the decrease in Bombay was due to the lapses of *inams* on the deaths of Jaghirdars in the Karachi and Hyderabad Districts, and to the postponement of revised settlements. Under *Sale of Proprietary Rights, etc.*, the receipt in Burma represents chiefly the capitalised value of the abatement of land revenue on land made over to the Burma Railway Company; in Bengal the increase was due to abnormally high receipts from the redemption of land tax, and the sale by auction in the Sunderbunds of leases under the new waste land lease rules; the other variations under this head have been explained above. The excess over the previous year was due to the larger sales mentioned above. Under *Capitation Tax, etc.*, in Burma the increase under Capitation Tax (14,6) was due partly to growth in population, and partly to the raising of the rate of assessment in certain villages, which are no longer considered to be in so backward a condition as to justify the continuance of the lower rate hitherto in force, and that under Thathameda (44,2) was due to an increase in the number of households assessed in consequence of the return

Section A.—PRINCIPAL HEADS OF REVENUE—*continued*.

I.—Land Revenue—*continued*.

of cultivators from Lower Burma, whither they had emigrated during the scarcity in 1896-97 in Upper Burma, and to the imposition of an uniform rate of R10 per household. The increase over the actuals of the previous year was due partly to the reasons stated above, and partly to the fact that considerable reductions in the rates were allowed in the previous year owing to the impoverished condition of the people. Under *Miscellaneous* the improvement in Burma (3,5) was due to an increased demand for leased fisheries consequent on better prices obtained for fish-paste and cured fish of all kinds, and to larger issues of fishing licenses, owing to the steady demand for fresh fish resulting from the prosperous condition of the people, partly counterbalanced by the remission of 20,0 of the Ruby Mines rent. The increase in the Punjab was the result of several variations under heads of a fluctuating nature, the most important being the increases under mutation fees (2,8), fees, fines, etc., (2,0), and other items (3,7). In Madras the receipts under Village Service Funds fell owing to an unfavourable season and plague.

26. The explanation of the variations in the *Portion of Land Revenue due to Irrigation* is given in the Public Works portion of this Report under the head of Irrigation—*vide* para. 260.

27. The following tables A and B give the usual particulars regarding the distribution of the Land Revenue between Imperial and Provincial:—

A.—Transactions affecting the Distribution of Land Revenue in 1898-99.

Provinces.	Credits + Debits – to Provincial.

28. From the details of the recurring and special transfers which are given in the Appendix to this Report on page 173, it will be seen that the Government of India, in consequence of the loss to Provincial Revenue and enhancement of Provincial Expenditure, owing to the agricultural distress and plague, was compelled to make a grant to Bombay of 74,2 to prevent that Government from closing the year with a debit balance, and 263,3 in aid of plague expenditure, and to Assam (80,0) for earthquake expenditure. Besides these the Government of India made free grants to the amount of 70 lakhs in aid of Provincial Resources as detailed in the Appendix mentioned above.

Section A.—PRINCIPAL HEADS OF REVENUE—*continued.*

II.—Opium.

1897-98. Accounts.			1898-99. Budget.		1898-99. Revised.		1898-99. Accounts.
3,991,0		Sale of Bengal Opium		3,900,0		4,164,0	4,163,8
967,0		Bombay Opium Pass Fees . . .		1,200,0		1,283,6	1,328,9
		Excise Opium—					
	20,3	Central Provinces	20,6		21,5	21,1	
	23,4	Burma	25,5		25,5	24,5	
	45,3	Assam	46,1		45,7	45,6	
	70,9	Bengal	74,0		74,0	74,1	
	47,3	North-Western Provinces and Oudh	50,0		51,0	51,1	
	6,7	Punjab	7,3		6,9	6,6	
213,9				223,5	224,6		223,0
7,9		Miscellaneous		6,3		7,2	9,6
5,179,8		TOTAL		5,329,8		5,679,4	5,725,3

29. Under *Sale of Bengal Opium* the actuals exceeded the Budget Estimate by 263,8. The number of chests sold exceeded the Estimate (39,000) by 450 chests, and the average price realized was R1,055 per chest against an Estimate of R1,000 per chest. Under *Bombay Opium Pass Fees* there was an increase of 128,9, as compared with the Budget Estimate, due chiefly to the partial failure of the opium crop in China, and partly to the spurt given to the export trade by the reduction in the rate of the pass fee duty. Under *Excise Opium* the receipts fell short of the Estimate by 5. The principal variations were decreases in Burma (1,0) due to an over-estimate, and in the Punjab (7) due to larger sales, anticipated as a result of the additional tax on Malwa opium, not having been realised, partly counterbalanced by an increase in the North-Western Provinces (1,1) due to larger sales of opium. Under *Miscellaneous* the increase was due chiefly to the realisation of 2,3 on account of the sale in England through Messrs. Burgoyne, Burbridges & Company of Morphia manufactured at the Ghazipur Factory.

30. The following table gives the usual statistics for the last ten years of the produce and sales in Bengal, and the exports from Bombay :—

Year.	BENGAL. Produce of season. For export.	Produce of season. For Excise.	Produce of season. Total.	Chests sold.	Average price per Chest.	Total price.	BOMBAY. Chests.	Rate.	Amount.

31. The actuals for the past nine years, during which no change in the rates of duty has occurred, have been as follows :—

	India.	Burma.	Bengal.	Madras.	Bombay.	TOTAL.
1890-91	1,930,5	158,8	2,319,5	1,951,8	2,162,8	8,523,4
1891-92	1,971,2	161,0	2,404,5	1,772,9	2,326,6	8,636,2
1892-93	2,118,1	162,2	2,410,1	1,721,2	2,244,5	8,656,1
1893-94	1,838,7	167,6	2,374,1	1,629,8	2,218,7	8,228,9
1894-95	1,894,3	119,0	2,458,2	1,795,4	2,398,8	8,665,7
1895-96	1,905,3	156,0	2,488,6	1,997,5	2,314,4	8,861,8
1896-97	1,848,7	140,9	2,500,1	1,694,2	2,237,8	8,421,7
1897-98	1,947,8	156,7	2,463,3	1,727,0	2,299,4	8,594,2
1898-99	2,040,7	158,2	2,512,4	1,998,4	2,390,2	9,099,9

32. The receipts under this head exceeded the Budget Estimate by 371,9, and the actuals of the previous year by 505,7. The increase was due chiefly to the improvement under *Excise on Local Manufacture* (386,2), contributed by all the Provinces, especially Madras (230,4), where it was owing to realisations on account of the unusually large credit sales that occurred in the latter half of 1897-98, and to large cash sales during the closing months of the year. The improvement in India (64,7) occurred chiefly in the Mines due to the briskness of the demand following the revival of trade on the cessation of hostilities on the North-West Frontier ; in Bombay (78,4) it was due to large removals of Baragora and sea salt and large consignments to other Provinces, owing to the removal of plague restrictions, and in Bengal (11,4) to the reduction in the rate of duty. Under *Sale of Government Salt* the increase was chiefly in India (2,2), due to a brisk demand. The increase of 65,5 under *Miscellaneous* was the net result of an improvement in Bombay (66,6), due to larger sales of salt at the Sukker Depôt, and in Bengal (2,6) to larger rents from ware-houses, and of a fall in India (1,2) and in Madras (2,5), chiefly under fees and cesses. Under *Duty on Imported Salt* the decrease of 82,3 occurred principally in Bombay (77,7), due to the falling off in the import of Goa salt. The other variations were decreases in Burma (3,1), due to the quantity of imported salt released from bond being less than was anticipated, and in Bengal (1,9) to an over-estimate, and a small increase in Madras (4) due to larger imports of duty-bearing salt.

33. The improvement over last year's actuals was spread over all the Provinces. In India (92,9) it was attributed to the revival of trade after the pacification of the North-West Frontier, in Bengal (49,1) to general prosperity, and in Madras (271,4) and Bombay (90,8) to the causes explained above. The increase in Burma was unimportant.

34. The actuals, as compared with the Budget Estimate and the actuals of the previous year, fell off by 58,2 and 39,1, respectively. The decrease occurred under *Commercial and other Stamps*, and was contributed by all the Provinces except Burma. In India (10,1) the decrease occurred chiefly in Ajmere, due to the export of stamps to Bombay having ceased. In the Central Provinces (8,5) it was due to fewer monetary transactions owing to the tightness of the money market, the enactment of the Tenancy Act, and the prevalence of plague and famine. In Bengal (49,5) the Estimate proved to be too sanguine. The decline in the North-Western Provinces (16,5), the Punjab (9,7), Madras (13,6), and Assam (1,9) was due to fewer monetary transactions owing to favourable agricultural conditions, and that in Bombay (12,9) to the dull state of the money and share markets. The increase in Burma (6,4) was due to commercial activity resulting from the prosperous condition of the people and the extension of railways. Under *Court-fee Stamps* there was an increase of (43,4), the largest improvement occurring in Bombay (26,1), due to increased litigation in the District Courts, and partly to larger recoveries of probate duties. The improvement in Assam (8,7) and the North-Western Provinces (7,0) was attributed to the increase of law-suits for recovery of loans and rents owing to rich harvests; in Bengal (13,8) the Estimate did not allow sufficiently for the growth of the revenue; the decrease in the Central Provinces (9,9) is accounted for by the smaller number of law-suits, by the outbreak of plague, and the passing of the Tenancy Act; while in the Punjab law-suits are said to have been reduced by the improved condition of the year. Under *Fines and Penalties and Miscellaneous* the improvement occurred mainly in Bengal (8,2), due to a special receipt in the Purnea Treasury on account of probate duty on a will, in Bombay (4,3) owing to a larger business done by Assurance Companies, and in the North-Western Provinces (1,6) to unexpected receipts from duty on unstamped paper in the Gonda and Kheri districts.

Section A.—PRINCIPAL HEADS OF REVENUE—*continued.*

V.—Excise—*continued.*

35. The revenue under this head exceeded the Budget Estimate and the actuals of the previous year by 26,1 and 253,9, respectively. The improvement, as compared with the Budget, occurred chiefly under *License and Distillery Fees, etc.*, in all the Provinces except Madras, where there was a falling off of 164,7 due to the improvement anticipated in the Budget not having been realised, owing mainly to high prices of food, plague restrictions, and heavy rains. The increase in India (7,3) was due mostly to larger rents from retail shops for the manufacture and sale of country spirits in Bangalore (15,[illegible]) and realisation of arrears in Baluchistan (1,2), partly counterbalanced by a falling off under Still-head Duty in Coorg (4,1), and Bangalore (3,0), due to a depression of trade and to scarcity, and to duty provided for on account of rum having been adjusted in the Military Department. The improvement in the Central Provinces (3,1) was attributed to the disappearance of famine, in Burma (42,4) to keen competition at the auction sales of shops, and in Assam (11,6) to more successful settlements. In Bengal the Estimate was pitched too low. In the North-Western Provinces the improvement was chiefly under still-head duty on country spirits (50,4), and on liquors made according to European methods (12,7), and larger sales of drugs (10,1), owing mainly to the agricultural prosperity of the year. In the Punjab the increase was owing to an under-estimate of the receipts from the duty on beer (3,0) and *charas* (6,0). In Bombay the improvement of 28,9 was due to larger receipts from the triennial auction sales of retail shops and from still-head duty owing to larger issues of liquors and collection of arrears.

36. Under *Opium* the decline of 13,5 was the result of variations in all the Provinces, due generally to the causes explained under II.—Opium—Excise Opium. The only other noticeable points are the decreases in the Punjab (1,2), due to smaller imports of Hill States and Kashmir opium, and to a contracted cultivation of poppy; and in Madras (5,1) and Bombay (5,7) due to smaller imports of the drug, owing in the latter to plague and the depressed condition of trade. The absence of provision under *Duty on Ganja* in Madras was due to this head being opened after the Budget was framed. Under *Other Receipts* the fall of 9 in Burma was due to an over-estimate, and the rise of 6 in Bombay, chiefly to larger recoveries of contributions for Abkari establishments at the Uran and Bombay distilleries.

37. The exceptionally large increase, as compared with the actuals of the previous year in all the provinces except Madras, was due generally to better harvests. In Bengal the increase was also due partly to the increased rate of duty on rum manufactured according to European methods and on rum imported from the Shahjehanpur Distillery. The fall in Madras was attributed to an increase in the price of spirits, high prices of food-grains, the plague, and smaller receipts from the tree-tax.

38. The revenue under this head showed an improvement of 62,1 as compared with the Budget Estimate, and of 198,8 as compared with the actuals of the previous year. The improvement was spread

Section A.—DIRECT DEMANDS ON THE REVENUE—*continued.*

VI.—Provincial Rates—*continued.*

over all the minor heads as well as all the Provinces, except the Central Provinces, the decrease in which was nominal. Under *District and Local Rates and Cesses* the increase in India (1,6) and the North Western Provinces (11,8) was due to the collection of arrear revenue; in Burma (5,5), the Punjab (1,3), and Bombay (7,5), to the causes mentioned under I.—Land Revenue; in Madras (9,9) and Bengal (18,3) to an under-estimate in the Local section, and in the latter partly also to re-valuations. Under *Village Service, Patwari and Choukidari Cesses* the rise in the North-Western Provinces (4,9) was due to larger receipts resulting from the extensive reforms in the Rural Police system of Oudh; in the Punjab (4,5), to realizations on account of the Patwaris' Fees Fund in the Chenab Colony; in Bombay (1,9) to improved receipts under Village Officers' Cess Fund owing to favourable inundation of the Indus, and partly to an under-estimate, and in the Central Provinces (6) to the collection of revenue suspended in 1897-98. The fall in Madras (8,9) was due to the causes mentioned under I.—Land Revenue. Under *Famine Insurance, etc.*, the cause of the increase in the North-Western Provinces (2,2) was the same as that mentioned under the first minor head. Under *Rate on Wards' Estates* the increase in Bengal (2,2) was owing chiefly to the Bettiah and Hutwa estates having been brought under Government management.

39. The revenue under this head showed an improvement of 211,7 over the Budget Estimate, and of 160,9 over the actuals of the preceding year. The improvement was principally in Burma (179,3), and Bengal (51,9), partly counterbalanced by a decrease in Madras (30,9), the variations in the other Provinces being small. Of the increase in Burma, 65,6 was under *Import Duties* and 111,4 under *Export Duties*, the former being due, chiefly, to larger imports of liquors, kerosine oil, and manufactured goods, the result of a steady exchange, of increased facilities for trade with the interior, and of the opening up of the country beyond Mandalay by railway, and the latter to large shipments of rice to Europe, the Straits Settlements, and Japan. Of the improvement in Bengal 17,6 occurred under *Import Duties*, mostly in the duties on Liquors (12,2) and Articles of Food and Drink (27,3), partly counterbalanced by a fall under cotton goods (19,4), and 33,7 under *Export Duties*, due to larger exports of rice consequent on better harvests. The improvement, as compared with the previous year, was also chiefly in these two provinces, and was due to larger shipments of rice to dutiable ports and a more active import trade, partly counterbalanced by a falling off in Madras due to smaller exports of rice to Ceylon, Bengal having resumed the supply, and in Bombay owing to a diminution in the imports of silver, sugar, and oils.

40. Under *Import Duties* the decrease in Madras (15,9) was due chiefly to a falling off under spirits, liquors, and cotton manufactures. The fall in Bombay (24,7) was owing to the general depression of trade on account of the plague, and occurred chiefly under Articles of Food and Drink (8,6), Cotton Manufactures (51,1), Metals and Manufactures of Metals (17,3), Manufactured Articles (37,6), and Raw Materials and Unmanufactured Articles (18,4), partly counterbalanced by increases under Silver Bullion and Coin (21,7), Oils (55,2), and Spirits and Liquors (32,6), the last due to the larger consumption of brandy and whisky as preventives against plague. Under *Export Duties* the increase in Bombay (15,7) was due to large exports of rice to Zanzibar, Muscat, and Persia. The fall in Madras (12,0) was due to smaller exports of rice to Ceylon and a falling off in exports generally. Under *Excise*

Section A.—PRINCIPAL HEADS OF REVENUE—*continued.*

VII.—Customs—*continued.*

duty on Cotton Manufactures the improvement in the North-Western Provinces (1,1) was due to general prosperity, in Madras (3,9) to the increased manufacture of cotton piece goods owing to demands from Calcutta and Rangoon, and in Bombay (17,6) to a large reduction in the quantity of free stocks and to an increased outturn in the mills. The decrease in the Central Provinces (6) was due to the check to the trade with Bombay caused by plague. Under *Land Customs and Miscellaneous* the decline was the net result of a decrease in Madras (6,9), due to an over-estimate, and increases in Burma, Bengal, and Bombay of 2,3, 1,0, and 2,3, respectively, owing to overtime fees realised from merchants being taken for the first time under this head, and partly, in Bombay, to amendment fees and sale-proceeds of unclaimed goods.

VIII.—Assessed Taxes.

1897-98. Accounts.		1898-99. Budget.	1898-99. Revised.	1898-99. Accounts.

41. The receipts under this head showed an improvement of 29,3 over the Budget Estimate, and of 26,7 over the actuals of the preceding year. The improvement occurred in Burma (10,6), Bengal (19,1), Madras (9,8) and Assam (2,7), due generally to under-estimates; in Burma it was also due partly to the adjustment in the Civil Books of Income-tax (4,1) realised from Railway employés, and in Assam to the collection of arrears and to greater trade prosperity. These increases were partly counterbalanced by a falling off in the other Provinces. In India the decrease occurred, chiefly in deductions from interest on Government Securities (4,5). In Bombay the deficit was the net result of a decline in the recoveries on profits of Companies (6,0) and other sources of income (7,1), owing to a falling off in the profits of the mills, and to the prevalence of plague in Bombay, and an improvement in the tax on the Surplus Profits of Railway Companies (7,8), due chiefly to arrear collections from the Great Indian Peninsular Railway (5,6), and under deductions from salaries and pensions (3,3), due to the large number of officers and establishments on famine duty.

42. The *India* figures include, in addition to the collections made in the Districts directly administered by the Government of India, the recoveries by the non-Civil Departments from the salaries of Government officers. The details are given below:—

43. The revenue under this head showed an improvement over both the Budget Estimate and the actuals of the previous year by 124,3 and 120,4, respectively. The improvement occurred mainly in Burma and the Punjab, and was due in the former to abnormally high prices and large extractions of timber, and in the latter to favourable rates and larger sales of timber and other produce. These increases were partly counterbalanced by decreases, chiefly in Bombay, due to a great extent to failure of timber sales and a general depression in the trade in timber, firewood, and other forest produce in consequenese of plague, and in Madras to too sanguine an estimate. The improvement, as compared with the previous year, was mainly the result of the variations in Burma, Punjab, and Bombay, due to the reasons stated above as affecting the variations from the Budget. There were also improvements of 21,5, and 18,1 in the Central Provinces and the North-Western Provinces respectively, which were covered by decreases of 18,3 and 21,7 in India and Bengal.

44. *Under Timber, etc., removed by Government Agency,* the increases in Burma (63,1) and the Punjab (7,1) were due to the reasons stated above, the larger sales of timber and fuel in the Punjab being to the North-Western Railways and other public departments at favourable rates; in the North-Western Provinces and Oudh (4,5) it was due to the sales of railway sleepers, resin, and turpentine. The principal decreases occurred in Bombay (41,3), Madras (4,1), and India (1,5); in the first two provinces the variations were mainly due to the causes stated above, and in the last the falling off was in Coorg, due to a smaller demand for timber by the Ordnance Department, Madras, as well as by the public on account of the plague in the Mysore Province (2,4), partly counterbalanced by better sales of Andaman timber both in India and in London.

45. *Under Timber, etc., removed by consumers or purchasers* the largest increase was in Burma (160,5), due to larger extractions of timber consequent on favourable floods; in Bengal the increase (3,6) was due to large demands for timber in the Sunderbuns and Chittagong Divisions, attributed in the former to immunity from famine, and in the latter to the reconstruction of houses destroyed by the cyclone of 1897. In the Punjab the increase (2,0) was due to better receipts on account of grazing and to the leasing of several rakhs which were opened to free grazing in the previous year, and in the Central Provinces it (1,8) was due to an under-estimate. The falling off in Bombay, as compared with the Budget, (55,9) and the previous year (4,7), was mainly due to the failure of the sales of coupes of fuel to the glutted state of the timber market and low prices consequent on the prevalence of plague; in the North-Western Provinces the decrease (9,1) was due to smaller receipts than was anticipated from sales of bamboos and improvement fellings; in Madras it (18,4) was due to an over-estimate, and in Assam (15,1) to a decline in receipts from Waste Land grants and low receipts from traders.

46. Under *Other Receipts* the most marked improvement was in Burma (24,5). Of this 12,0 represents the amount of fines imposed by Government on the Bombay, Burma Trading Corporation, Limited, for the malpractices committed by their employés in the Pyinmana forests, the balance being due to better receipts from drift operations. These causes also account for the improvement over the previous year. The increases in other provinces were mainly due to the realisation of more fines and to better receipts from the sale of confiscated timber and other forest produce. The falling off in the Central Provinces was due to the writing off of the value of wood taken by Plague officers and treated as an outstanding against them, as well as to short receipts under Drift wood and confiscated forest produce and Miscellaneons revenue which fluctuate considerably. In Madras the decrease was on account of delay in payment of rent due by the lessees of forest lands.

47. The revenue under this head fell short of the Budget Estimate by 21,0, and of the actuals of the previous year by 45,3. The falling off occurred in all the Provinces except Burma and Madras. Under *Fees for registering documents* the decline in the Central Provinces (2,1), Bengal (3,9), the North-Western Provinces (6,8), and the Punjab (4,9) was due, chiefly, to a decrease in the number of registered documents, owing to good harvests having kept agriculturists and distressed landlords from resorting to money-lenders. The fall in Bombay (4,9) and India (4) was occasioned by the prevalence of plague. The improvement in Burma (6) was attributed to the normal growth of the operations of the Registration Department, and in Madras (1,9), to the larger number of registrations. Under *Other Receipts* the increase occurred mainly in Madras (2,2), due to a larger number of certificates of previous non-encumbrance of land having been granted in connection with State loans.

48. The receipts under this head are for the most part fixed. The variations that occur arise generally from the non-payment of dues, or from advance or arrear collections. The receipts fell short of the Estimate by 9,7, but exceeded the actuals of the preceding year by 25,7. Under *Tributes* the decrease in India was due chiefly to the tributes from the States of Oodeypore (20,0) and Ajaigarh (7), and an instalment of the Sailana Tribute (1,1) not having been recovered during the year. The increase in the Central Provinces was the result of an arrear payment by the Khairagarh State, and that in Bombay of arrears realised from petty States in Kâthiáwar and the Akalkot State. Under *Contributions for Special Military Forces* the fall in the case of the Bhopal Levy (Bhopal) and the Malwa Contingent (Dewas, Jowrah) was due to loss by exchange, while the increase under Southern Mahratta Horse was owing to arrear payments. Under *Fees on Succession to Native States* the increase in Bombay of 12,2 was due to a larger recovery (18,2) from the Jámkhandi State, partly counterbalanced by the non-recovery of 7,0 from the Akalkot State.

49. The excess over the previous year was due chiefly to the arrear and, special recoveries in Bombay and the Central Provinces already mentioned, and a recovery of 6,1 in the latter on account of Nazarana on the Nandgaon succession, partly counterbalanced by the non-recoveries in India noted above.

Section A.—DIRECT DEMANDS ON THE REVENUE.

1897-98. Accounts.		1898-99. Budget.	1898-99. Revised.	1898-99. Accounts.
10,816,8	EXPENDITURE . . .	11,210,9	10,712,3	10,651,5

50. The expenditure in this section showed a saving of 559,4 as compared with the Budget Estimate, and of 165,3 as compared with the actuals of the previous year. Of the saving, as compared with the Budget Estimate, 282,9 occurred under Opium, owing to the outturn of the crop having fallen short of the Estimate; 89,3 under Land Revenue, due chiefly to less extensive Survey and Settlement operations, to smaller payments in the North-Western Provinces to Kanangos and Patwaris, and to savings in certain provisions in Madras and Bombay, mainly on account of the village Accountants, and Tapedars; 49,3 under Assignments and Compensations, chiefly in India and Bombay; 53,9 under Salt, due chiefly to an over-estimate in Madras, to less expenditure on petty construction and repairs in India, and on establishments in Bengal, and 59,8 under Forest, due chiefly to less expenditure on forest demarcation, improvement and extension in Madras and Bombay, and to restricted operations in the latter Province, owing to small demands and low prices. The principal savings under the other heads were 6,4 under Refunds and Drawbacks, 10,8 under Stamps, and 7,2 under Excise. The only excesses were 3,3 under Provincial Rates and 1 under Assessed Taxes.

51. Of the decrease, as compared with the previous year, 133,0 occurred under Land Revenue, due to the absence of expenditure on account of grain compensation and famine; 21,6 under Assignments and Compensations, chiefly in salt compensations in India; 15,8 under Opium, due to smaller payments to cultivators owing to smaller outturn of the crop; 11,0 under Forest, and smaller decreases under Salt and Stamps, counterbalanced by an increase of 20,0 under Refunds and Drawbacks, chiefly in Bengal and Bombay, and small increases under Excise, Provincial Rates, Customs, Assessed Taxes, and Registration.

1.—Refunds and Drawbacks.

52. The expenditure under this head was less than the Budget Estimate by 6,4, and more than that of the previous year by 20,0. Considering the fluctuating character of the charges the differences are not large. The decrease, as compared with the Budget, occurred chiefly under *Customs Refunds* (32,3) in Bombay, where there were large savings under Drawbacks, due mainly to less exports of green tea, ivory and cotton goods, owing to restriction of credit and the dislocation of trade in consequence of plague. In Burma and Bengal the Estimates proved too low. This saving was partly counterbalanced by excesses under all the other heads except *Assessed Taxes Refunds*, where there was a small saving.

53. Under *Land Revenue Refunds* the excess in Bombay, over the Budget and actuals of the previous year, was due to unusually large refunds in the Shikarpur District on account of canal revenue, and to special payments to the Southern Mahratta Railway, on account of the refunds of the cost and the capitalised value of the loss of assessment on lands relinquished by the Company. Under *Salt Refunds* the excess in Burma was due to much of the English salt, imported during 1898-99, having been shipped when fresh and insufficiently dried, with the result that large allowances had to be made on account of wastage on the voyage. The excess in Bengal was due to exceptionally high payments. Under *Other Refunds* the excess was contributed by all the Provinces except Bombay, where there was a saving of 3,1 under Excise Refunds, due to an over-estimate in the Budget, which was fixed with reference to the actuals of the previous year, which included special refunds of Still-head duty; in Burma there was a special refund of 3,1 on account of Tributes from Native States, which was not foreseen when the Budget was framed; and in Madras the excess of 4,7 was due almost entirely to Excise refunds. The excesses shown above as unsanctioned were not foreseen before the end of the year.

54. The expenditure under this head fell short of the Budget Estimate and the acuals of the previous year by 49,3 and 21,6, respectively. The savings occurred chiefly in India (21,0) under *Salt Compensations*, mainly due to the amount (20,4) payable to the Meywar Durbar not having been drawn before the close of the year, and in Bombay (17,3) under *Land Revenue Compensations*, due to non-payment of the grant to Shahaji Raji Bhosle Akalkotkar pending settlement of the claim for heirship (1,1), to non-payment to small inamdars and other grantees (6,6), and to savings in the adjustment on account of alienated Land Revenue (6,9).

55. The other variations which call for remarks are the savings in Bengal (3,4), and the North-Western Provinces and Oudh (1,0), and the excess of 1,6 in Madras under *Land Revenue Compensations*. In Bengal the saving was due to compensations payable during the year not having been claimed, and that in the North-Western Provinces and Oudh chiefly to the annulment of the settlement of the Gursarai estates in the Jhansi District, in consequence of which only half the allowance to the ex-ubaridars was paid during the year. In Madras the excess was due to arrear payments under Malikana Allowances. The decline under *Excise Compensations* in the Central Provinces was due to the payment of only 2 against a provision of 6,1 for compensation to Zemindars on account of resumption by Government of Abkari rights, and in Bombay to the compensations to certain Native Chiefs not having been paid. The savings under *Miscellaneous Compensations* in Assam occurred under Allowances to Frontier Hill Tribes and other compensations which were irregularly drawn, and that in Bombay was due chiefly to the non payment of the grant to the Chief of Akalkot pending the settlement of the claim for heirship. The actuals for 1897-98 in Bombay included an arrear payment of 1,1 to the Nawab of Radhanpur. The savings, as compared with the actuals of the previous year, occurred chiefly in India under *Salt Compensation* due to the reason stated above, and in Bombay under *Excise Compensations* owing to large payments of arrears in 1897-98, and *Miscellaneous Compensations* as explained above. The excess in Madras was more than covered by an additional grant of 3,8 sanctioned by the Government of India, Financial Department, in its letter No. 5721-A., dated the 31st December 1898. An excess of 5 (Imperial) in Bengal and 1 (Imperial) in Burma await sanction.

56. The Indian expenditure showed a decrease of 89,8 compared with the Budget Estimate, and of 133,5, as compared with the previous year. The saving, as compared with the Budget, occurred under all the heads except *Commission on Collection,* where there was a small excess; the principal savings being under *Survey and Settlement* 22,2, due to Settlement operations not being as extensive as anticipated; 39,0 under *Land Records and Agriculture* due, in the North-Western Provinces, chiefly to savings in the pay and allowances of Kanungos and Patwaris, in Madras to the provision for raising the pay of Village Karnams having been only partially utilised, and in Bombay to the grants for Village Accountants, Tapedars, and the Agricultural School at Hyderabad not having been fully spent; and 15,7 under *Allowances to District and Village Officers* in Madras and Bombay. The decrease, as compared with the previous year, was mainly due to the absence of expenditure on account of famine and grain compensation; in Bengal, however, the decrease was due to smaller expenditure on *Survey and Settlement* operations. The increase in Burma was due to the further extension of the system of collecting revenue by village headmen, to increased charges on account of patta surveys, and to larger payments under *Commission on Collections* consequent on an increase in Land Revenue collections, partly counterbalanced by a smaller outlay on professional surveys.

57. Under *Charges of District Administration* the saving in Burma (4,1) was due chiefly to the absence on furlough of a larger number of officers than was anticipated, and to less Exchange Compensation Allowance; that in the Punjab (8,6) was due mainly to the provision of 8,5 for the Hoshiarpur "Chos" not having been utilised, and to that for the revision of menial and district office establishments having been only partly used (1,5), and to payment of less Exchange Compensation Allowance (1,0), partly counterbalanced by an excess of 1,5 owing to fresh appointments of Civil and Military Officers as Assistant Commissioners, and of 8 owing to higher travelling allowance charges; and that in Bombay (4,6) was due to the absence of a large number of officers on leave, and to less Exchange Compensation Allowance (3,1) and to a reduction under Supplies and Services (3,7) (ordered in Government of India, Home Department, No. 233, dated 16th May 1898), counterbalanced by an increase of 2,1 on account of postage and telegram charges in connection with the plague. These savings were partly counterbalanced by excesses in Bengal (4,4), the North-Western Provinces (1,9), and Madras (3,4). In Bengal the excess was due chiefly to too high a deduction on account of probable savings (2,5), and to increased expenditure under Establishment (3,7), Supplies and Services (3,3), and Allowances (8), counterbalanced by savings under Process-serving establishment (1,5), and Record-room establishment (3,3); that in the North-Western Provinces was due chiefly to the grant of personal allowances to certain officials of the District offices, consequent on the introduction of a new scale, and to extra temporary establishments (1,9), and to more expenditure on contingencies (8) and Record-room establishment (7), partly counterbalanced by savings under sub-divisional establishment (8), and Process-serving establishment (1,0); and that in Madras was due chiefly to the

Section A.—DIRECT DEMANDS ON THE REVENUE—*continued.*

3.—Land Revenue—*continued.*

entertainment of temporary establishments in connection with the famine in the Nellore District (3,2), to the grant of privilege leave to Tahsildars (1,2), to larger remunerations to copyists and examiners (1,2), and to higher charges for postage and telegrams (1,0), partly counterbalanced by a decrease of 1,9 in permanent and temporary sub-divisional establishments, and of 1,2 under Amini Devi charges in *coir* charges.

58. Under *Survey and Settlement* the principal saving (15,6) was in Burma, 10,0 being under Survey of India charges, and 5,6 under Local Surveys, due chiefly to the programme of settlement operations not having been fully carried out during the year. The saving in the North-Western Provinces (10,9) was due partly to an over-estimate of the cost of Settlement operations, and partly to certain appointments of Settlement and Assistant Settlement Officers having remained vacant during the year. Of the saving in the Punjab (4,2), 2,1 was under salaries and Exchange Compensation Allowance, and the balance occurred under several heads. The decrease in Madras (5,0) was chiefly due to vacancies and the deputation of the special Settlement Officer on other duties, and to savings in establishment charges of Settlement parties, counterbalanced by increased expenditure on professional surveys (1,0), owing to re-surveys in the Kistna and Kurnool Districts of waste lands likely to be taken up for cultivation. These savings were partly counterbalanced by excesses in Assam (5) due to the extension of the Settlement operations beyond the period provided for; in Bengal (10,9) due mainly to more extensive Settlement operations (10,1), including 6,3 in Behar; and in Bombay (?,5) due to the charges connected with the demarcation survey and colonisation of the Jamrao Canal, (6,1), sanctioned after the Budget was framed, counterbalanced by larger recoveries from Native States for survey establishments lent to them, and a large reduction in the expenditure of the Survey Department in view of its early extinction.

59. Under *Land Records and Agriculture* the principal savings occurred as stated above, in the North-Western Provinces (13,7), Madras (1?,2), and Bombay (6,1). In the first of the Provinces named, 8,8 of the saving occurred in the pay and allowances of Kanungos and Patwaris, and 3,4 in the Land Record Survey charges, and 1,9 was due to the transfer to 26—Scientific and other Minor Departments, of Traffic Registration charges (para. 163). The savings in Madras and Bombay have been explained above. There were savings in all the other Provinces except the Punjab, where there was an excess of 1,1 due to no provision having been made for payments from the Patwaris' Fees Fund, on account of the Chenab Colony. The saving in the Central Provinces (2,8) was chiefly in the pay and allowances of Patwaris; that in Burma (2,7) was due to the provision for the reorganization of the Land Record Department having been only partially utilised, and that in Assam (2,8) chiefly to the establishment of District Mandals having been below the sanctioned strength. Under *Management of Government Estates* the savings in Bengal and the North-Western Provinces were due to less outlay on improvements; in the former the saving (5,0) due to this cause was reduced by increased expenditure (2,3) for collection of revenue. Under *Commission on Collections* the excess in Burma (1,3) was due to the growth of revenue. The increase, as compared with the previous year, was also chiefly due to this cause, but partly also to the deputation of an officer in connection with the question of the administration of Inland fisheries in the Irrawaddy Division for the whole year against a similar deputation for only a portion of the previous year. Under *Allowances to District and Village Officers* the saving in Madras was due to the Estimate having been placed too high, and in Bombay to the allowances not having been fully claimed, and to a falling off in the adjustments of the rents of alienated lands, owing to the transfer of some charges to the head 20—Police (para. 146). Of the excess of 12,1 in Bengal, 8,4 were sanctioned by the Local Government and 3,7 by the Government of India.

60. In England the excess was due to *Law Charges* in connection with appeals from India being more numerous than was anticipated.

4.—Opium—*continued.*

61. The Indian expenditure showed a saving, in comparison with the Budget Estimate and the actuals of the previous year, of 83,0 and 15,2, respectively. As usual these differences were the results mainly of variations in the outturn of the crop which in the year under review amounted to 84,323 maunds against 100,000 maunds in the Estimate and 85,176 maunds, the actual production of the previous year. The *Payments to Cultivators*, which form the bulk of the charges, fell short of the Estimate in both Agencies. The charges for temporary establishment, for which no provision was made in the Budget, chiefly account for the increase under *Superintendence* in the Benares Agency. Under *Opium Factory* the savings in both Agencies, as compared with the Budget Estimate, were due to less freight and manufacturing charges, and in the Behar Agency partly also to less charges on account of timber. In 1897-98 freight and manufacturing charges were higher in both Agencies. Under *District Staff* the excess in the Behar Agency was due to the reorganisation of the staff, and that in the Benares Agency to increased expenditure of 2,3 on temporary establishment, counterbalanced by a saving of 1,6 under Salary charges. The variation between the actuals of the two years in the Benares Agency was due to large expenditure for temporary establishment. In Bombay the excess (3) as compared with the Estimate was due to payments to officers of other provinces; the charges on this account were however smaller than in the previous year. This excess requires sanction of the Government of India.

62. In England the demand for stores was larger than was indicated in the Estimates received from India. The saving under Exchange Compensation Allowance amounted to 4.

63. The Indian charges under this head showed savings of 53,7 and 7,7 as compared with the Budget and the actuals of the previous year, respectively. The largest saving occurred in Madras (24,6) due to the estimate having been pitched too high in view of the continued expansion of departmental operations. The saving in India (12,8) was due to a smaller outlay on petty construction and repairs and smaller demands for salt from Sambhar and Didwana, and that in Bengal (11,7) was due to the partial use of the provision for Salt Preventive Establishment in Orissa. The decrease in Bombay (4,4) occurred under *Purchase and Freight*, and was the net result of a saving of 5,4 in the Presidency Salt Department and an increase of 1,0 in Sind, which was covered by an additional grant sanctioned by the Government of India, Finance and Commerce Department, No. 277-A, dated 20th January 1899. Compared with the actuals of the previous year there was an excess of 5,9 in India under *Manufacture and Excavation* charges, which was more than counterbalanced by savings of 6,6 and 5,9 in Madras and Bombay respectively, due in the latter to large payments having been made in 1897-98 on account of grain compensation allowance.

64. The saving under Exchange Compensation Allowance amounted to 4 in Bombay, counterbalanced by an excess of 3 in India and 1 in Madras.

65. The saving in England was due to smaller demands for stores than were anticipated.

* Includes a lump deduction of 4.

66. The expenditure in India under this head showed savings of 4,9 and 3,2 as compared with the Budget Estimate and the actuals of the previous year respectively. The saving of 4,3 under *Charges on sale of Stamps including discount* was due to smaller discount paid owing to the decline in the sale of general stamps; and that of 6 under *Superintendence, etc.*, was due in Bengal to smaller expenditure than anticipated for a punching machine and on account of landing, freight and packing charges. Under *Stamps supplied from Central Stores* the Budget Estimate was pitched too high in all the Provinces except Assam and Madras, where the demands were higher than provided for. The excesses in Assam and Madras have already been sanctioned.

67. The saving in the expenditure in England was due to demands being smaller than was anticipated in the Budget.

7.—Excise.

Section A.—DIRECT DEMANDS ON THE REVENUE—*continued.*

7.—Excise—*continued.*

68. The charges were less than the Budget Estimate by 7,0, but more than the actuals of the previou year by 2,7. The saving, as compared with the Budget, occurred chiefly in Madras (3,8), owing to th Estimate being pitched too high in consideration of the continued expansion of departmental operation: The saving in the Central Provinces (1,0) was chiefly under Petty Construction and Repairs of distiller buildings, and in Bengal (1 2), and Bombay (1,7) in establishment charges; the excess of 1,4 in Burm was due to larger payments on account of rewards in consequence of the adoption of rigorou measures for the suppression of illicit trade. The excess was covered by reappropriation sanctioned b the Local Government The excess of 2,7, as compared with the actuals of the previous year, occurre chiefly in Burma, and was due to the liberal payment of rewa ds for b ringing to justice offenders agains Excise laws. The excess of 2 in India awaits sanction. The saving under Exchange Compensatio Allowance amounted to 1 only.

8.—Provincial Rates.

5,8	Bombay	6,1	6,1	5,5
52,5	TOTAL	52,4	55,7	55,7

69. The charges were higher than the Budget and the actuals of the previous year by 3,3 and 3,2, respectively. The excess occurred chiefly in Bengal (3,6), and was due to large expenditure on account of process-serving charges and temporary establishment. The excess of 5 in Burma, owing to larger payments of commission due to increased collections was counterbalan ced by the saving of 6 in Bombay which was due to the decrease in collections. The excesses in Bengal and Burma were covered by reappropriation sanctioned by the Local Governments.

9.—Customs.

70. The total charges showed a saving of 4 as compared with the Budget, and an excess of 3,6 over the actuals of the previous year. The saving in Bengal occurred chiefly in establishment charges (2,7), partly counterbalanced by an excess of 2,2 due to insufficient provision for payments to

Section A.—DIRECT DEMANDS ON THE REVENUE—*continued.*

9.—Customs—*continued.*

Customs officers on account of overtime and holiday fees. In Madras the saving was chiefly due t the provision for Petty Construction and Repairs not having been fully utilised. The excess in Burma which was met by reappropriation sanctioned by the Local Government, was chiefly due to th provision for the payments on account of overtime and holiday allowances to the Customs establishmen for clearing vessels having proved insufficient. The excess, as compared with the previous year, wa chiefly due to the charges on account of overtime fees having been shown in the accounts of 1897-98 for only a part of the year, and partly also to the more flourishing state of trade. In Bombay the accounts for 1897-98 included payment for grain compensation. The savings under Exchange Compensation Allowance were 1 in Bengal and 1 in Bombay.

10.—Assessed Taxes.

1897-98. Accounts.		1898-99. Budget.	1898-99. Revised.	1898-99. Accounts.

Savings under Exchange Compensation Allowance		3	5	3	3	4	1	1	5	4	2,9

72. The expenditure in India was less than the Budget Estimate by 61,4, and than the actuals of the previous year by 15,6. The saving was spread over all the Provinces except Burma, where there was an excess (8,6) due chiefly to larger extractions of timber. This excess was covered by an additional grant of 10,7 sanctioned by the Local Government.

73. The increase under *General Direction* represents mainly the charges in connection with the deputation of an officer on special duty for the compilation of a book on Forest Mathematics for the Imperial Forest School at Dehra. Under *Timber, etc., removed by Government Agency,* the expenditure exceeded the Estimate by 10,5. Burma showed an increase of 15,4 due to larger extraction of timber. The excess in the Central Provinces (1,3) was on account of extensive departmental operations, and that in the North-Western Provinces and Oudh (2,6) was due to the return to the practice of supplying firewood to the Naini Tal Settlement by departmental agency. In Madras the Budget was under-estimated. The decrease of 8,7 in Bombay was due chiefly to the slackness in timber operations on account of the fall in prices and small demand for loco-fuel by the Southern Mahratta Railway Company. The saving in India of 1,1 was due to the charges on London cargoes being below the Estimate. The decrease of 7 in the Punjab was attributed to contractors failing to complete their work within the year. Under *Timber, etc., removed by consumers or purchasers,* the saving was contributed chiefly by the Central Provinces (3,6) and Bombay (1,3); the decrease in the former was due to savings effected by the substitution of salaried Forest stamp vendors for vendors paid by commission on revenue collected, and the transfer of temporary watchers to the permanent establishment, and that in the latter to low expenditure on temporary establishment. Under *Other charges* there was an aggregate saving of 41,4 as compared with the Budget, India being the only province which showed a small increase of 7. The largest savings occurred in Bombay (18,6) and Madras (10,8), mainly due to less charges for demarcation, improvement and extension of forests, and partly to the transfer of funds to the Public Works Department for the construction of roads. The difference of 5,2 in Bombay between the actuals of the two years was on account of heavy charges for grain compensation and charges in connection with the famine grass operations during the previous year. The variations in the Central Provinces, Burma and Bengal were mainly due to works of construction and improvement not having been carried out to the extent estimated. The decrease in the North-Western Provinces and Oudh was due to curtailment of expenditure, while that in the Punjab was due to the postponement of works on account of scarcity of labour and dearness of grain.

74. Under *Establishment* the decrease amounted to 23,3, and was spread over all the Provinces. The savings were chiefly due to the absence of officers on leave, to the low rate of Exchange Compensation Allowance, as also to savings in the salaries of subordinate establishments.

75. The excess in England was due to certain stores provided for in the Estimate for 1899-1900 having been paid for during the year.

76. The charges were less than the Budget Estimate by 2,8 and more than those of the previous year by 6. The only excess over the Budget Estimate occurred in Bengal (1,2) and was due to larger payments of commission to rural Sub-Registrars (2,4) in consequence of the expansion of the operations of the department, counterbalanced by savings (9) in the payments to special Sub-Registrars. The excess of 1 2 has been covered by re-appropriation sanctioned by the Local Government. The payment in the previous year was higher in consequence of famine, which led to the registration of a larger number of bonds, deeds, etc. The savings in the North-Western Provinces and Oudh occurred under both *Superintendence* and *District Charges*, due in the former to the delay in the appointment of Registration Inspectors, and in the latter to the grant for Commission to Sub-Registrars not having been utilised in full, and those in the Punjab and Bombay were due to smaller payment of Commission to Sub-Registrars owing to the falling off in revenue.

Section B.—INTEREST.

	1897-98. Accounts.		1898-99 Budget.	1898-99 Revised.	1898-99 Accounts.
	872,2	RECEIPTS	929,8	970,1	1,059,5

77. The receipts in this section exceeded the Budget Estimate and the actuals of the previous year by 129,7 and 187,3, respectively. Of the improvement, as compared with the Budget, 100,4 occurred in India, and was due chiefly to an increase of 91,6 on account of Interest on Loans to Presidency Corporations and of 8,9, under Interest on Advances to Cultivators and Advances under Special Laws. The increase of 19,9 in England, excluding exchange, was due to the investment of cash balance at a higher rate of interest during a portion of the year.

78. The increase of 187,3, as compared with the actuals of the previous year, was due partly to the causes mentioned above, and partly under the Interest on Currency Investment, as the discount on the currency investment 1896-97 was adjusted by deduction from the interest credited in 1897-98, as well as to a larger investment of the cash balance in England.

79. As explained in previous reports the receipts under this head in India arise from the Paper Currency Investment and from loans granted by Government to Municipalities and other public bodies, Native States and cultivators. No alteration has been made in the Paper Currency Investment during the year, and the variation in the interest between tne two years was due to the adjustment in 1897-98 of 48,7 on account of discount on the investment made during 1896-97 by deduction from the interest.

80. The following statement shows the balances of the different kinds of loans during the last five years:—

	31st March 1895.	31st March 1896.	31st March 1897.	31st March 1898.	31st March 1899.

81. The interest paid in 1898-99 by Local Governments to the Government of India on account of loans held on the Provincial account amounted to 157,1, while the actual sum realized by them and credited to Provincial Revenues amounted in the aggregate to 191,6.

82. The fluctuations under the different heads are explained below.

83. Under *Interest on Loans to Native States* the small receipts in India, which were on account of loans granted to the Baoni State and the Sultan of Muskat, closely agree with the Budget Estimate. In Bengal the increase was due to the realization of arrear interest on the Cooch Behar Railway Loan, which was not provided for in the Budget, the payment having been deferred till 1901-1902 under orders of the Government of Bengal as explained in last year's report.

84. Under *Presidency Corporations* the increase in Bengal, in comparison with the Budget, was partly due to the penalty realized from the Calcutta Corporation on its failure to pay the interest on due date, and partly to the realization of interest on the additional loan granted to it during the year to meet plague expenditure. In Madras the decrease of 5, as compared with the actuals of the previous year, was on account of reduction of the outstanding balance of the loan taken by the Madras Harbour Trust Board. The large receipts in Bombay, as compared with the Budget and with the actuals of the previous year, were due to the payment of the interest on the Capital Debt of the Bombay Port Trust in March 1899 instead of on the 1st April 1899.

Section B.—INTEREST—*continued.*

XII.—Interest—*concluded.*

85. Under *Interest on Loans to Municipal and other Public Corporations*, the decrease of 2,7 in India, in comparison with the Budget Estimate, was due to a change in the date of payment of interest on the Secunderabad Water-works Loan which was paid in April 1899 instead of in March as hitherto. In Bengal the payment of interest by the Port Commissioner of Chittagong was deferred under the orders of the Government of Bengal No. 2001-F., dated 30th March 1899. The low receipts in the North-Western Provinces were partly due to the default in payment of interest by the Agra (4) and Naini Tal (1,4) Municipalities, and partly to smaller advances to Municipalities than anticipated. The decrease in Bombay (1,3) was the result of postponement under the orders of Government of payment of the instalments due by the Ahmednagar and Hubli Municipalities.

86. Under *Interest on Loans to Landholders and other Notabilities*, the increase was chiefly due to the realization of arrear interest on the loans to Prince Jahan Kader Mirza in Bengal.

87. Under *Interest on Advances to Cultivators*, the receipts exceeded the Budget Estimate and the actuals of the previous year by 8,9 and 38,1, respectively, owing chiefly to the good harvests, in consequence of which the cultivators were able to pay the interest on the large advances made to them during the famine in the two previous years. In Bengal and Bombay the Budget proved too high.

88. The increase under *Interest on Securities of Provincial Funds* was on account of the credit of the interest on the securities belonging to the Prince of Wales Reception Fund. Under *Other Items* the increase in Bengal and Madras was chiefly under interest on arrears of Revenue. The large receipts in India and Bombay in previous years included interest on some special advances to the Banks of Bengal and Bombay.

89. The increase in England was due to the investment of cash balance at a higher rate of interest during a portion of the year.

Section B.—INTEREST.

1897-98. Accounts.		1898-99. Budget.	1898-99. Revised.	1898-99. Accounts.
3,472,3	EXPENDITURE	3,378,6	3,076,8	3,032,0

90. The total charges in this section showed savings of 346,6 and 440,3 compared with the Budget and with the actuals of the previous year, respectively. Of the former, exchange accounts for a decrease of 209,4. The decrease of 137,2 in the other heads was chiefly due to smaller payments of interest on loans in India (63,1) and England (90,3), and was partly counterbalanced in the former case by the large discount (12,6) on the new loan and a smaller transfer (28,4) to interest on Railways, etc., owing to a reduction in Railway Capital expenditure. The decrease in England, which was due to smaller payments of interest on India 2½ per cent. Stock (35,4); on India Bills (44,9,), and on temporary loans from the Bank of England (10,0), was partly counterbalanced by an increase of 7,0 on account of the Sinking Fund created for payment of the large discount on the new loan.

91. As compared with the previous year 154,3 of the decrease occurred in India, and was due to the transfer of a larger portion (242,2) of interest charges in India to Railway and Irrigation Works, consequent on an increase in the capital expenditure on State Railways, partly counterbalanced by larger payments of interest on loans and discount on the new loan; 286,0 occurred in England, of which 212,7 was in exchange, due to the rise in the rate of exchange, and the balance in payments of interest as stated above.

13.—Interest on Ordinary Debt.

92. The following figures give the particulars for 1897-98 and 1898-99 of loans raised or discharged during the years :—

1897-98. Accounts.		1898-99. Budget.	1898-99. Revised.	1898-99. Accounts.

Section B.—INTEREST—*continued.*

13.—Interest on Ordinary Debt—*continued.*

93. The Budget in India provided for a public loan of 3,000,0. Subsequently, owing to a general improvement in revenue prospects, the Secretary of State considered a loan of 1,200,0 would be sufficient, and this sum was raised in August, 1898 at 3½ per cent., at an average rate of 94-12-5·8 per cent. Of the balance of the loans previously advertised for discharge, 103,2 were paid, consisting of 1, 3,9. 45,1 and 54,1 on account of 5½, 4½, 4. and 3½ per cent. loans respectively. Besides these 17,7 outstanding for more than 20 years, from the date of the notice of discharge, were written off, subject to payment on the establishment of claims. Of the loans bearing interest 12c,0 was paid on account of the Gwalior loan in accordance with the terms of the agreement with the Durbar under which the loan was originally taken.

94. In England 6,000,0 India 2½ per cent. stock was issued as provided for in the Budget Estimate for the discharge of India debentures bearing interest at 3½ per cent. and Oudh and Rohilkund 4 per cent. debenture stock. As the loan was taken up at the heavy discount of £11 9*s*. 7*d*. per cent., which amounted to £702,3, it was decided to create a Sinking Fund for the discharge of this sum by annual payments for 50 years at an interest of 2½ per cent per annum, and 5,297,7 the amount actually raised was credited as debt incurred during the year. In the Budget 6,000,0 was provided for temporary Loans on the security of India bills, but in consequence of larger drawings on the Secretary of State's bills, only 4,500,0 of the temporary debt had to be replaced, and the balance was discharged by a reduction in the cash balances.

95. The total Interest on debt paid in India and in England is shown below:—

1897-98. Accounts.	Rate. DEBT IN INDIA ON 31ST MARCH 1898.	Principal.	Interest due.	1898-99. Budget.	Revised.	Accounts.

97. The payment in India was less than the Budget Estimate by 78,9. The decrease occurred in payment of interest on the 3½ per cent. loans. There was an increase of 9,4 in the interest on 4 per cent. loans on account of an arrear payment of interest on the Rampur Railway Loan. The unfavourable state of the money market affected the result of the new loan, which was taken at a heavier rate of discount than was anticipated. In England there was a decrease of 35,4 in the interest on India 2½ per cent. stock, of 44,9 in the interest on India Bills, and of 10,0 on account of temporary loans from the Bank of England, no such loans having been required. These decreases were partly counterbalanced by an increase

Section B.—INTEREST—*continued.*

13.—Interest on Ordinary Debt—*continued.*

of 7,0 on account of the first investment in respect of the Sinking Fund above referred to. The decrease in exchange, compared with the Budget Estimate and the actuals of the previous year, was due to the rise in the rate of exchange. The savings of 50,5 in India under *Interest on Ordinary Debt* was chiefly due to the decrease of 78,9 in the payment of interest on loans, partly reduced by a smaller transfer (28,4) to Interest on Railways and Irrigation works consequent on a reduction in the Capital expenditure mainly on Railways. The saving in India over the actuals of the previous year was due to the larger transfer (242,2) to interest on Railways and Irrigation Works, consequent on the increase in the Capital expenditure on State Railways, partly counterbalanced by the arrear payment of interest, referred to above, and the heavy discount on the new loan. The savings in England was due to the causes stated above, and to the rise in the rate of exchange.

98. The expenditure in India was less than the Budget Estimate by 3,3 and more than the actuals of the previous year by 1,5. The saving, as compared with the Budget, occurred chiefly under *Savings Bank Deposits* in India, in the interest on Post Office Savings Banks (5,5), due to larger withdrawals than were anticipated. This saving was partly counterbalanced by increases under *Treasury Notes and Service Funds* in Bombay (1,0), owing to an increase in the balance of the Uncovenanted Service Family Pension Fund, and under *Miscellaneous* in Bengal (5), due to larger payments on account of interest on Land Revenue collections refunded, and in Bombay (9) due to the correction of an erroneous classification in the previous year.

99. An excess of 3 in the Punjab under Provincial was sanctioned by the Local Government; the excess of 8 in Bengal, 3 out of 4 in Madras, (3 Imperial and 1 Provincial) (due to payment of interest on the Deposits in State Railway Institutions), and 1,5 out of 2,4 in Bombay (1,5 Imperial and 9 Provincial) still require sanction.

Section B.—INTEREST—continued.

+149,7	POST OFFICE (NET)	+116,9	+165,1	+188,7
+257,8	TELEGRAPH (NET)	+142,3	+36,9	+53,8
+93,6	MINT (NET)	+12,7	—38,5	—35,6

101. The net receipts in this section fell short of the Budget Estimate by 65,0, and of the actuals of the previous year by 294,2. The decrease occurred chiefly in the Telegraph Department, and was mainly due to the more extensive use of deferred telegrams in place of urgent and ordinary messages, and to the cessation of military operations on the North-West Frontier.

102. Under Post Office there was an improvement, due mainly to largely increased sales of Postage Stamps, to smaller payments to English, Colonial, and other Post Offices, owing to the reduction in the rates of Continental transit and to non-payment of certain amounts during the year, and partly also to a decrease in expenditure, mainly in the Presidency and District Post Office Establishments and in the payments to Railways, partly counterbalanced by a reduction in the rates of inland postage from 1st October 1898 by the adoption of one-and-a-half tola instead of one tola as the unit of weight for one anna postage, and in foreign postage by the introduction of the Imperial Penny Postage (for India, one anna) from the 25th December 1898.

103. The gradual improvement in the net results of the transactions of the Postal Department for the last five years is shown by the following figures:—

	Net Receipts.
1894-95	25,5
1895-96	69,7
1896-97	80,4
1897-98	149,7
1898-99	188,7

104. The decrease in the net receipts of the Mint, as compared with the Budget, was due to the loss on copper coinage, resulting from the return into Depôts of large quantities of the copper coin issued in the previous two years in consequence of the famine.

10,0	TOTAL	9,8	10,6	9,3
1,879,2	GRAND TOTAL	1,893,2	1,896,2	1,914,1

105. The total revenue exceeded the Budget Estimate by 20,9, and the actuals of the previous year by 34,9. The improvement over the Budget Estimate occurred chiefly under *Sale of Ordinary Stamps* (22,3), owing to the increase in sales being much above the normal; and under *Payments to English, Colonial, and other Foreign Post Offices* (24,5), owing to a large decrease in the net payments arising from a reduction in the rates for continental transit, and the non-payment during the year of certain amounts to colonial and other post offices. This improvement was partly counterbalanced by a decrease under *Parcels and other Postage collected in cash* (24,0), owing chiefly to a reduction in the rates of Inland and Foreign postage. There was also a small falling off (2,4) under *Mail Cart, Parcel Van, Passenger and Goods Service*, chiefly on the Simla-Kalka line.

106. The improvement, as compared with the previous year, was chiefly in the *Sale of Ordinary Stamps* (37,3), owing partly to increased sales due to the collection in stamps of the prepaid postage on "registered" newspapers, but chiefly to the normal growth of the revenue; and in the reduced deduction (19,5) under *Payments to English, Colonial, and other Foreign Post Offices*, as explained above. These improvements were partly counterbalanced by a decrease of 25,4 under *Parcel and other Postage collected in cash* for the reasons stated above.

Section C.—POST OFFICE, TELEGRAPH, AND MINT—RECEIPTS—*continued.*

XIV.—Telegraph—*continued.*

Indian Telegraphs.

107. The receipts during 1898-99 fell short of those of the previous year by 204,9. The decrease was mainly due to a falling off in State messages, consequent on the cessation of military operations on the North-West Frontier; the number of such messages having fallen from 870,278] in 1897-98 to 669,030 in 1898-99. It was also due, to some extent, to smaller receipts from Foreign message traffic owing to a reduction in the tariff for messages sent to Europe and to a falling off in private messages from 4,842,949 in 1897-98 to 4,779,570 in 1898-99, which resulted largely from the decrease of famine and plague. The increase of 5,6 in the rent of wires and instruments leased to railways and canals was due to the extension of railway and canal lines of Telegraph. The decrease of 118,8 in comparison with the Budget Estimate was due chiefly to the use of deferred telegrams in the place of ordinary and urgent messages being more extensive than was anticipated, and partly to the military operations on the North-West Frontier having closed earlier than was expected.

Indo-European Telegraphs.

108. The decrease was due to the message traffic transferred from the Indian Telegraph Department having been smaller than in the previous year and than that provided for in the Budget Estimate. The receipts in 1897-98 were abnormally high.

XV.—Mint.

1897-98. Accounts.		1898-99. Budget.	1898-99. Revised.	1898-99. Accounts.
48,7	Seignorage on Silver	40,0	47,5	49,0
42,6	Gain on Copper Coinage	30,0	...	...
	Other Receipts—			
23,0	Calcutta	3,2	5,1	4,7
67,8	Bombay	5,6	23,9	24,2
182,1	TOTAL	78,8	76,5	77,9

109. The revenue under this head fell short of the Budget and the accounts of the previous year by 9 and 104,2, respectively. The principal cause of the decrease was the return into Depôts, during the year, of large quantities of the copper coin issued during the famine in the two previous years, which resulted in a loss instead of the gain anticipated in the Budget (para. 118). This loss was partly counterbalanced by an increase of 9,0 under *Seignorage on Silver* and of 20,1 under *Other Receipts*. The former increase was due to a larger dollar coinage, and the latter, chiefly (18,6) to re-coinage at Bombay for the Kashmir and Bhopal Darbars having continued during the earlier part of the year, contrary to expectation, and partly (1,5) at Calcutta to larger orders for War Medals.

110. The difference between the actuals of the two years was due to re-coinage of Kashmir and Bhopali rupees, and the coinage of dollars and cents for the Straits Settlements on a larger scale during the previous year.

111. The expenditure in India showed a saving of 50,9 as compared with the Budget Estimate, and of 4,1 as compared with the actuals of the previous year.

112. The saving of 3,1 under *Chief Office, Calcutta*, as compared with the Budget, was due chiefly to leave arrangements and temporary vacancies in the Account Office (2,0), and to no additional establishment having been entertained (6). Under *Presidency and District Offices* the saving of 15 3 was due chiefly to the provisions for revision of establishment and temporary establishments not having been fully utilised (9,5), to gain in the working of the combined Offices (3,3); to smaller charges under Salaries, owing to leave arrangements and changes in the permanent incumbents of supervising appointments (1,9); to less Exchange Compensation Allowance (4), and to savings under contingencies, due mainly to excessive provisions (6 4), partly counterbalanced by larger payments of salaries due to the entertainment of three additional Inspectors and privilege leave arrangements (9), by larger payments of compensation for dearness of provisions, and by petty excesses under contingencies (5,4). The excess under this head over the actuals of the previous year (9,5) was chiefly due to the normal expansion of the Post Office Establishment (13,7), partly counterbalanced by less payments of grain compensation (3,8) Under *Road Establishment and Contingencies* the saving, as compared with the Budget, was due chiefly to the abolition of certain lines in the Punjab, and to the provision for the revision of mail lines, not having been fully appropriated (1,7), and to excessive provisions for rainy season and miscellaneous charges (2,7), partly counterbalanced by larger payments for grain compensation (7). The savings under this head, as

Section C.—POST OFFICE, TELEGRAPH, AND MINT—EXPENDITURE—*continued.*

15—Post Office—*continued.*

compared with the actuals of the previous year (4,7), was chiefly due to smaller payments for grain compensation (6,3), partly reduced by larger expenditure on the extension of runners' lines (1,6). The saving of 10,5 under *Railway Charges* occurred chiefly in the payments to the East Indian, North-Western, Eastern Bengal, and the Great Indian Peninsula Railways (11,9), partly counterbalanced by larger payments on account of special train service (1,4). The excess of 2,5 over the actuals of the previous year occurred chiefly in the payments for special train service. Under *Mail Cart, Parcel Van, Passenger and Goods Service Establishment and Charges*, the saving, compared with the Budget (4,6), was due chiefly to an over-estimate for contingent charges; and that compared with the actuals of the previous year was due to the non-payment of grain compensation. The saving (1,4) under *Subsidies* was due chiefly to the non-payment to the Tigris and Euphrates Steam Navigation Company, Bombay, of the amount due for the second-half of the year. The saving under *Stationery and Printing* (1,8) was due to an over-estimate for stationery, and, as compared with the previous year, to smaller supplies of stationery, and less printing work done for the Department. The excess under *Miscellaneous*, both over the Budget and the actuals of the previous year, was chiefly due to the heavy payments on account of compensation for insured articles lost in the wreck of the Steamers *China* and *Mecca*. The excess under *Miscellaneous* was covered by a re-appropriation sanctioned by the Director General of Post Office.

113. Under *District Post Offices* the saving in Burma was due to establishments not being entertained to the extent anticipated and to smaller outlay on contingencies. In Bengal the saving occurred chiefly in the charges for establishments (1,7), purchase of stationery (8), and petty construction and repairs (6). In the North-Western Provinces and Oudh the saving occurred mainly in establishment charges. The excess in Burma, as compared with the previous year, was due to the revision of District Post Office establishments, and the decrease in the other Provinces was mainly due to the large payments in 1897-98 on account of compensation for dearness of grain. The excesses in the Punjab and Bombay were sanctioned by the Local Governments. The saving under Exchange Compensation Allowance was 6.

114. The decrease in the expenditure in England was in *Payments to the English Post Office*, due to the contract having expired on the 31st January 1898; the payment of 56,0 is subject to adjustment when the new arrangements are settled. The excess under *Stores* was due to larger indents than was anticipated.

16.—Telegraph—*continued.*

Indian Telegraphs.

115. The total expenditure of the year was only 1,1 more than that of the previous year; but there were large differences between the expenditure of the two years taking India and England separately. The increase of 15,7 in the expenditure in India was due to the growth of operations of the Department and to the special repairs and renewals of some of the older lines of telegraph. The decrease of 5,8 in the expenditure in England was due to the demand for stores from England not being so large as in the previous year, and to payments not being fully made during the year. Of the short outlay of 47,7, as compared with the Budget Estimate, 13,5 occurred in India and 34,2 in England, including exchange. The decrease in the expenditure in India was mainly due to short outlay on railway telegraph lines. The decrease in the expenditure in England was due to the purchase of a smaller amount of stores than was provided for in the Budget Estimate. The decrease of 15,2, as compared with the Revised Estimate, was principally due to short payments on account of English stores.

Indo-European Telegraphs.

116. The decrease of 13,1 in the expenditure in England was mainly due to smaller payments in respect of message revenue, owing to an increase in the outward traffic as compared with the homeward traffic.

117. The Indian expenditure fell short of the Budget and Revised Estimates by 6,6 and 4,2, respectively, the decreases being chiefly due to over-estimates of the expenditure of the year. The saving under Exchange Compensation Allowance was 1,6.

17.—Mint.

1897-98. Accounts.		1898-99. Budget.	1898-99. Revised.	1898-99. Accounts.
	ESTABLISHMENTS			
25,3	Calcutta	23,8	22,3	20,7
22,3	Bombay	19,9	23,0	23,8
	LOSS OF WEIGHT IN COINAGE—			
5,5	Calcutta	3,5	7,8	8,8
15,6	Bombay	5,0	9,6	9,7
	LOSS ON COPPER COINAGE—			
	Calcutta	...	40,0	38,6
	OTHER CHARGES—			
6,6	Calcutta	3,5	3,0	2,5
4,9	Bombay	5,0	4,0	4,0
37,4	TOTAL Calcutta	30,8	73,1	70,6
42,8	" Bombay	29,9	36,6	37,5
80,2	" India	60,7	109,7	108,1
5,3	" England	3,5	3,5	3,6
3,0	" Exchange	1,9	1,8	1,8
88,5	GRAND TOTAL	66,1	115,0	113,5

118. The charges under this head exceeded the Budget and the actuals of the previous year by 47,4 and 25,0, respectively. The principal factor in the excesses was the loss on copper coinage (38,6), which was not anticipated (para. 109).

119. The saving of 3,1 under *Establishment* in Calcutta was due to the provision for extra establishment not having been fully utilised, to vacancies, and to the appointment of officers on lower pay in place of retired officers. The increase of 3,9 in Bombay was due to heavy expenditure for temporary establishment (3,0), for overtime allowances (4) in connection with dollar coinage and under contingencies (5).

120. The increase under *Loss of Weight in Coinage* was due to larger orders for War medals in Calcutta, and in Bombay, to larger dollar coinage, and to the recoinage carried out for the Kashmir and Bhopal Durbars. Under *Other Charges* the expenditure fell short of the Budget Estimate, due to smaller local purchases of stores.

121. As compared with the actuals of the previous year the excess in Calcutta was chiefly due to the loss on copper coinage, and the decrease in Bombay, to smaller re-coinage than in the previous year.

122. In Bombay, out of the excess of 7,6 over the Budget Grant, 6,3 were sanctioned by re-appropriation from savings under the Major head 1 Refunds and Drawbacks (Imperial) under the orders of the Government of India, in their No. 925-A., dated 27th February 1899. The balance 1,3 and the excess of 39,8 in India require sanction of the Government of India. The saving under Exchange Compensation Allowance was 2.

Section D.—RECEIPTS BY CIVIL DEPARTMENTS.

1897-98. Accounts.		1898-99. Budget.	Revised.	Accounts.
1,723,5	RECEIPTS	1,733,0	1,748,4	1,726,6

123. The receipts in this section showed a falling off of 6,4 as compared with the Budget Estimate, and an improvement of 3,1 as compared with the actuals of the previous year. As compared with the Budget there was a decrease of 26,8 under Law and Justice—Jails, due mainly to a smaller demand for Jail manufactures in the Central Provinces and the North-Western Provinces; and 14,2 under Police, due chiefly to the non-recovery from the Poona Municipality of the cost of the additional Police entertained at Poona after the murders on Jubilee day; there were also small decreases under Law and Justice—Courts of Law (1,2), Education (5,0), and Medical (3,3). These decreases were partly counterbalanced by an improvement of 40,9 under Marine, due to larger recoveries on account of vessels employed on the Somali Coast, and in conveying troops to Mauritius, arrear hire of vessels employed in previous years on Imperial service, and to larger Pilotage receipts in Bengal, and by a small improvement (3,2) under Scientific and other Minor Departments.

124. As compared with the previous year the increase occurred under Law and Justice—Courts of Law, due chiefly to larger receipts from magisterial fines, and under Education (13,4), due to increased receipts of fees from Schools and Colleges, partly counterbalanced by a falling off under Police (12,1), due chiefly to the large recovery in the previous year from the Burma Railway Company on account of its share of the cost of the Railway Police, and of 10,0 under Marine due to smaller recoveries on account of hire of vessels employed on Imperial service.

125. The receipts under this head fell short of the Budget Estimate by 1,2, but exceeded the actuals of the preceding year by 12,0. Under *Court-fees realised in cash* there was a large decrease of 10,0 as compared with the Budget Estimate, chiefly in the North-Western Provinces, due to a change in the system of realisation of Kurk Amins' fees, by which a large portion of these fees is now realised in stamps instead of in cash. Under *Sale-proceeds of Unclaimed and Escheated Property* there was

Section D.—RECEIPTS BY CIVIL DEPARTMENTS—*continued.*

XVIA.—Law and Justice—Courts of Law—*continued.*

a decrease of 4,8, chiefly in India, due to an over-estimate of the lapses of estates in the hands of the Administrator General, Bengal. These receipts are necessarily of a fluctuating character. Under *General Fees, Fines, and Forfeitures*, there was an improvement of 5,8 ; the variations occurred mainly under Magisterial fines, which form the major portion of the receipts under this head. The improvement of 9,3 in Madras was also partly due to increased receipts on account of Printing and Translation executed by the High Court, and partly to the transfer to this head from XXV.—Miscellaneous of fines realised by Bench Magistrates under the Police Act. In Burma the Estimate included 4,5 on account of copying fees, which in the accounts was taken against *Other Receipts*. Deducting this item from the Estimate, there was an improvement of 4,0, of which 2,2 occurred under Fines in Criminal cases and 1,6 in Opium cases. The decrease of 5,2 in Bombay was due partly (3,0) to fees from the Insolvency Debtors' Court not having been credited to Government, owing to the reorganization proposed not having been accepted by the Secretary of State. Under *Other Receipts* there was an increase of 7,8, of which 4,8 occurred in Burma, due to the transfer to this head of copying fees, as explained above. In Bengal the receipts include Pleadership examination fees, which have shown a progressive annual increase since 1893-94. The increase of 1,0 in the Punjab appears chiefly in the Local receipts.

126. Under *Sale-proceeds of Jail Manufactures*, the decrease of 27,5, as compared with the Budget Estimate, was contributed by all the Provinces except Burma and Assam. The falling off occurred chiefly in the Central Provinces (13,1) and in the North-Western Provinces (12,1), due to a smaller demand for Jail manufactures, mainly from Government departments. The decline in India was due to the competition of a private concern with the Jail bakery in Coorg. In Bengal the receipts were over-estimated. In Madras the fall was attributed to the employment of a large number of convicts on building operations in the Vellore Central Jail, and to the suspension of manufacturing operations in Rajahmundry Central Jail owing to the outbreak of an epidemic. The falling off in the Punjab was due to the employment of a larger number of prisoners on extra-mural labour, and to a reduction in the rates for Jail-made papers, and that in Bombay was due to the restricted employment of prisoners on manufacture, in consequence of plague. The increase of 3,5 in Burma was due chiefly to Jail-made articles being more largely used by Government Offices and Departments. The net receipts under this head, after deducting the corresponding charges under 19B, are given below :—

Section D.—RECEIPTS BY CIVIL DEPARTMENTS—*continued.*

XVIB.—Law and Justice—Jails—*continued.*

127. The improvement of 1,6 under *Other Receipts* was, chiefly, the result of increases in Burma, the Punjab and Bombay, due to the employment of a larger number of prisoners on extra-mural labour, and a decrease in the North-Western Provinces due to lower receipts from the Dairy Farm at Lucknow. The falling off of 9 under *Convict Receipts at Port Blair* was due mainly to a decrease under Tea Garden Receipts (3,0), owing to a smaller demand from the Commissariat Department in Burma, counterbalanced by an increase of 1,5 under Hire of Convicts, and of 3 under Jail manufactures.

128. The receipts under this head fell below the Budget Estimate by 14,2, and the actuals of the previous year by 12,1. Of the decrease of 17,1 under *Police supplied to Public Departments, Private Companies and Persons*, 16,4 occurred in Bombay and 2,2 in Burma; the former was due to the non-recovery from the Poona Municipality of 21,6 on account of the cost of additional police entertained at Poona after the murders on Jubilee day, partly counterbalanced by larger receipts on account of additional police in other districts; and the latter, to the inclusion in the Estimate of 3,0 on account of contribution from the Rangoon Port Trust towards Police expenditure, which, however, was not realised, as the scheme which provided for it did not come into force in 1898-99. The deficiency in Burma was partly counterbalanced by larger contributions on account of Punitive Police realised during the year. The small increase of 1,3 in Bengal was due to the recovery on account of Police supplied to the Bengal-Nagpur Railway. Under *Fees, Fines, and Forfeitures* the decrease of 11,0 was due to a falling off in the receipts from Cattle Pounds in all the Provinces, except Burma and Bengal. In the former the increase was due partly to the large receipts from Cattle Pounds, and

Section D.—RECEIPTS BY CIVIL DEPARTMENTS—*continued.*

XVII.—Police—*continued.*

partly from fines for gambling and slaughter-house licenses. The small decrease in India was due to a change of classification whereby tribal fines levied in Baluchistan are now classified under XVIA.—Law and Justice—Courts of Law. Under *Police supplied to Municipal, Cantonment and Town Funds,* the increase of 2,3 was due chiefly to the recovery, in Burma, of 1,4 from the Mandalay Municipality on account of arrears of contribution for 1897-98. Under *Presidency Police* the increase in Bombay (2,6) was due to larger receipts from the employment of private watchmen and ramoshis in the Presidency Town, and in Bengal (9) to the credit to Government of malikhana and miscellaneous deposits held by the Commissioner of Police, and to larger receipts on account of Police supplied to private persons. Under *Other Receipts* the increase of 8,0 was the net result of variations in all the Provinces, the chief being increases of 6,0 in Bengal, due to exceptionally large recoveries on account of Village Police; of 3,0 in Burma and of 1,1 in Madras, due to larger adjustments than anticipated on account of stores, ammunition, and a large number of carbines returned to the arsenals; and a decrease of 2,3 in Bombay, which occurred under superannuation and miscellaneous receipts.

	Accounts	1898-99	37,8	34,2	112,2	6,5	190,7

129. The receipts under this head exceeded the Budget by 40,9, but fell short of the actuals of the previous year by 10,0. Of the improvement, as compared with the Budget, 22,8 occurred under *Dockyard Services, etc.,* due chiefly to recoveries on account of hire of vessels employed on the Somali Coast, and in conveying troops to Mauritius (12,0), and on account of arrears of hire of vessels employed in the conveyance of troops on Imperial Service in previous years (10,9), being the difference between the rates at which the recoveries were originally effected, and those subsequently decided on; *Pilotage Receipts* in Bengal, which are of a fluctuating character, contributed 12,2 to the improvement. Active foreign trade brought a large number of vessels into Burma ports, and resulted in an increase of 4,2 under *Coast Light Dues,* 2,8 occurred under *Sale-proceeds of Vessels and Stores,* due to sales of vessels not anticipated in the Budget, and large sales of obsolete stores. The decrease (10,0), as compared with the previous year, was due to smaller recoveries on account of hire of vessels employed on Imperial Service.

130. The receipts under this head fell short of the Budget by 5,0, but exceeded the actuals of the previous year by 13,4. Under *Fees from Schools and Colleges*, where the decrease chiefly occurred (4,2), the principal variations were a decrease of 5,1 in Bombay, due to the falling off in the attendance at schools owing to the prevalence of plague; a decrease of 2,2 in Madras due to an over-estimate in the fees from the Law College; and an improvement of 1,8 in the North-Western Provinces due to increased receipts from Professional Colleges (5) and District Schools (1,2). Under *Other Receipts* the decrease of 5 was the result chiefly of a fall of 2,9 in Bombay due to fewer sales of books at the Book Depôts, and an increase of 1,5 in the North-Western Provinces due to the fees realized from the new Lower and Middle Examination, and of 8 in Bengal due to larger receipts in the Shibpur Engineering College.

131. The Indian receipts under this head fell short of the Budget Estimate by 3,3, and the actuals of the previous year by 3,7. Under *Contributions* the decrease of 8,0 was due in the Central Provinces and the North Western Provinces, to over-estimates of contributions towards local dispensaries and village sanitation, and in Bengal and Bombay to the non-payment of contributions by the Municipalities. Under *Medical College and School Fees* the decrease in Bengal was due to an over-estimate, and the improvement, in Bombay, to the larger attendance of students at the Grant Medical College. Under *Lunatic Asylum Receipts* the receipts in Bengal were exceptionally low during the year. These decreases were partly counterbalanced by an improvement under *Hospital Receipts* (2,1) due to an under-estimate in Bengal, and to larger receipts from paying patients in Bombay; and under *Other Receipts* (3,3), contributed chiefly by Madras (1,4), owing to the transfer to this head, from XXV.—Miscellaneous, of private scavenging fees and sale-proceeds of manure and street sweepings, and by Bombay (1,4), owing to the adjustment of the value of medicines returned to store after completion of the Famine Relief Works.

132. The Indian receipts under this head were in excess of the Budget Estimate by 3,0, and of the actuals of the previous year by 1,7. Under *Cinchona plantations* there was a decrease of 2,5 in Bengal due to smaller receipts from the sale of sulphate of quinine, and of 9 in Madras owing to a smaller demand for supplies of febrifuge from the Medical Store Depôts of Madras and Bombay and to smaller sales through the Postal agency. Under *Labour and Emigration* the fall of 3,3 occurred chiefly in Assam and Bengal, due to a smaller number of labourers having been imported under the Emigration Act. A set-off against these decreases was the improvement under *Other Receipts* of 6,3, attributed in India (4) to the transfer to this head from *Sale of Maps, Instruments, etc.*, of sale-proceeds of Archæological Paintings, and in Madras (5,9) to the receipts from sales of aluminium ware not anticipated in the Estimate The improvement under *Receipts on account of Public Exhibitions and Fairs* occurred chiefly in the North-Western Provinces (1,9), and was due to larger attendance at fairs.

Section D.—SALARIES AND EXPENSES OF CIVIL DEPARTMENTS.

1897-98. Accounts.		1898-99. Budget.	Revised.	Accounts.
15,739,6	EXPENDITURE	15,694,8	15,715,9	15,731,3

133. The expenditure in this section showed an excess of 36,5 as compared with the Budget Estimate, and a decrease of 8,3 as compared with the actuals of the previous year. Though the former difference in the aggregate was not large, the variations under the several heads were considerable. The increase occurred entirely under Medical where there was an excess of 391,1, due to charges connected with the bubonic plague in all the Provinces except Burma and Assam. This excess was largely counterbalanced by savings under all the other heads. There was a saving of 111,4 under Political, due chiefly to the subsidy of the Amir of Afghanistan not having been fully drawn, to smaller payments to the Khyber Tribes, and for guarding Hill Passes, to the transfer to the Military Department of charges on account of the Military escort with the Chinese Frontier Delimitation Commission and to the transfer of the Somali Coast Protectorate to the control of the Home Government. There was a decrease of 53,7 under Education contributed by all the Provinces except Madras, due chiefly to loose estimating in respect of Local charges, and to certain provisions not having been fully utilised; 45,2 occurred under Law and Justice—Courts of Law, chiefly under Civil and Sessions Courts; 47,2 under Law and Justice—Jails, due to reduced purchases of raw materials, consequent on a reduced demand for Jail manufacture; 20,9 under Police, due mainly to the scheme for the reorganization of the District Executive Police in the North Western Provinces having been only partially carried out; 25,3 under Marine, chiefly in the expenditure in England, due partly to exchange and partly to the non-payment of the subsidy to the Admiralty for maintaining Indian Government Defence Vessels; 17,3 occurred under Ecclesiastical; 24,3 under Scientific and other Minor Departments, chiefly in Survey of India charges and Other charges, and 5,3 occurred under General Administration.

134. The decrease of 8,3, as compared with the previous year, was the result of large variations under the several heads. The principal savings were 93,1 under Law and Justice—Jails due mainly to a decrease in jail population and low prices of food grains; 59,9 under Law and Justice—Courts of Law, and 53,2 under Police, due chiefly to the absence of payments of grain compensation, and to the presence on duty of fewer officers than was necessary during the famine of the previous year, and to the reduction of the police force in Burma; 35,4 under Marine, of which 26,7 occurred in the expenditure in England, and 8,7 in India, due chiefly to less expenditure on repairs to Her Majesty's Warships in Indian waters, and 30,8 under Political, due partly to the causes stated above, and partly to the absence of expenditure in connection with the frontier disturbances. These decreases were nearly covered by excesses of 261,3 under Medical, due to charges connected with the plague; of 17,5 under Education, and of 18,6 under Scientific and other Minor Departments.

Savings under Exchange Compensation Allowance	12	3	5	4	1,0	9	4	6	1	5,4

135. The expenditure in India exceeded the Budget Estimate by 13,7, but fell short of the actuals of the previous year by 6,6. The excess over the Budget occurred chiefly in India and Bombay; there was also an excess of 2,5 in the Punjab, and a saving of 3,3 in Bengal. In the other Provinces the variations were small. The excess in India was mainly due to an unexpected payment under *Durbar Fund* and to higher *Tour-charges* owing to the more extended tours of the late Viceroy, and to a larger outlay on camp furniture for the Viceregal household. In Bombay the excess occurred chiefly under *Staff and Household*, *Secretariat* and *Commissioners*, and was mainly due to expenditure in connection with the Plague, as explained below.

136. Under *Salaries of Governor-General, Governors, etc.*, the excess in the North-Western Provinces (2,5) was due to the absence of the Lieutenant-Governor on six months' medical leave, for four months of which he drew full pay as a famine concession. Under *Staff and Household* the saving in India (2,2) occurred chiefly in telegram charges, the Estimate for which was pitched high in consequence of the unsettled condition of the North-West Frontier, and in the North-Western Provinces in contract contingencies; against these savings there was an excess of 2,2 in Bombay due to heavy expenditure on telegrams in connection with the plague. The saving, as compared with the actuals of the previous year in India, occurred chiefly in Telegram and Hill Journey charges, and that in Bombay in charges for telegrams in connection with the plague and famine. Under *Executive Council* the excess in India (1,7) was due mainly to the salary of members of the Council having been raised to R80,000 per annum (1,5), *vide* Finance Department No. 1952-Ex., dated 30th April 1896, and to the late Finance Member having drawn his salary for March 1899 in that month prior to resigning office (6); in Madras the excess (7) was due to the increased rate of salary, and that in Bombay (1,5) to the payment of the leave allowance of a Member of Council. Under *Legislative Council* the saving in Burma was due to the provision for travelling allowances of non-official members and contingencies not having been fully utilised, and that in Madras to the non-payment of 5 provided for the Member of the Viceregal Council. The excess in Bengal was due to the increase in the rate of the Secretary's salary.

137. The Secretariat charges exceeded the Budget by 7,7, of which 1,5 was in India, 6 in the Central Provinces, 1 in Assam, 4,7 in Bengal, 9 in the Punjab, and 2,6 in Bombay, partly counterbalanced by savings of 2 in Burma, of 1,1 in the North-Western Provinces, and of 1,4 in Madras. The details of the India Secretariat charges are given below:—

1897-98. Accounts.	*Secretariat (India).*	1898-99. Budget.	1898-99. Revised.	1898-99. Accounts.
29,3	Financial Department	28,9	29,9	30,5
7,8	Statistical Department	7,4	6,6	6,6
28,9	Home Department	23,7	29,8	30,7
20,6	Legislative Department	16,0	16,1	16,1
44,8	Foreign Department	43,1	42,7	42,6
27,5	Revenue and Agriculture	18,8	19,1	18,7
8	Translator's Department	7	7	7
31,9	Public Works Department	30,7	28,2	27,7
3,3	Government Record Department	3,7	3,5	3,5
55,9	Military Department	49,2	48,1	46,5
250,8	TOTAL	222,2	224,7	223,7

138. The excess in the Financial Department (1,7) was chiefly due to privilege leave arrangements (1,0), and to high payment on account of Hill Journey allowances (8). The excess over the previous year

Section D.—SALARIES AND EXPENSES OF CIVIL DEPARTMENTS—*continued.*

18.—General Administration—*continued.*

was chiefly in Hill Journey allowances and Telegram charges. The excess in the Home Department (7,0) was due chiefly to high expenditure on telegrams in connection with the bubonic plague (3,8), to revision of establishment (2,1), and to privilege leave arrangements (9). The excess over the previous year was chiefly in Establishment charges and Hill Journey allowances. The saving in the Statistical Department was due to the deputation of the Director General to England in connection with the Currency Commission. The saving in the Foreign Department (5) occurred mainly in telegram charges (2,9) owing to the large provision made in the Budget in view of the complications on the frontier, partly counterbalanced by privilege leave arrangements (1,1), by payment of arrears of Exchange Compensation Allowance (4), by large outlay on Hill Journey allowance (4), and on purchase of furniture at Simla (7). The decrease, as compared with the previous year, was chiefly in telegram charges. The saving under Public Works Department (3,0) occurred chiefly under Establishment (1,6), Allowances (1,4), and Contingencies (8), owing to the office having remained at Simla all the year, in consequence of which the pay for March 1899 was not drawn in advance as in the previous year, and consequently only 11 months' pay was adjusted during the year. This cause also chiefly accounts for the decrease as compared with the previous year. The saving in the Military Department (2,7) was partly due to the office having remained in Simla all the year, and partly to the privilege leave allowance of the Secretary having been drawn in Bombay (1,1). The decrease, as compared with the previous year, was partly due to the reasons stated above, but chiefly to a decrease (6,4) in the telegram charges. In the Central Provinces the excess (6) was due to the appointment of second Secretary having been held by an officer of a class higher than that provided for. In Bengal it was chiefly due to privilege leave arrangements and appointment of officers on special duty (3,6) and to larger contingent charges (7). In the Punjab it was chiefly due to larger contingent charges, and in Bombay to the appointment of an additional Secretary and temporary establishments in connection with famine and plague, and to larger payments to officers of other Provinces. The decrease in Bombay, as compared with the previous year, was due to the high expenditure in connection with famine in 1897-98. The saving in the North-Western Provinces occurred chiefly in establishment charges. In Madras the saving was due to the provision for an officer on special duty not having been fully utilised (1,9), counterbalanced by additional expenditure due to plague (4). Under *Tour charges* the excess in India has been explained above; that in Bengal, the North-Western Provinces and the Punjab was due to the high tour expenses of the respective Lieutenant-Governors. Under *Board of Revenue and Financial Commissioner* the excesses in the North-Western Provinces, the Punjab and Madras were due chiefly to privilege leave arrangements ; the excess in the North-Western Provinces was partly counterbalanced by savings under establishment and supplies and services, while that in the Punjab was enhanced by payment to an officer from Bengal. The charge in India represents the salary of the Financial Commissioner, Burma, drawn in Calcutta, while on deputation as additional Member of the Viceregal Council. Under *Commissioners* the excesses were chiefly due to privilege leave arrangements. The excess in Burma (2,5) due to this cause was counterbalanced to the extent of 1,6 by petty savings under several heads; in the Punjab it was reduced by a saving of 7 due to recoveries from District and Municipal Funds being brought to account by deduction from expenditure instead of by credit to XXV—Miscellaneous, and by 4 due to saving in contingent charges, while in Bombay it was enhanced by payments to officers of other Provinces. In Bengal the saving of 3,0 was due to less expenditure on acting arrangements (2,0), and to smaller outlay on Marine stores and repair of steamers (1,0), and in the North-Western Provinces the provision for leave allowances proved too large. Under *Inspector-General of Stamps, Registration, etc.*, the saving in the Central Provinces was due to a second Secretary having held the appointment of Inspector-General in addition to his own duties for a part of the year, and in Bombay it was due to the absence of the Inspector-General on long leave.

The total charges for *Account* and *Currency Offices* are shown below.—

		Civil Account.	Currency Offices.	Total Civil Account and Currency Offices.	Office of A. G., P. W. Dept.	TOTAL.
Accounts	1897-98 .	214,1	30,4	244,5	23,5	268,0
Budget .	1898-99 .	223,0	29,9	252,9	24,8	277,7
Revised .	1898-99 .	218,6	29,8	248,4	21,6	270,0
Accounts .	1898-99 .	220,4	29,3	249,7	21,4	271,1

139. The savings in the Civil Account and Currency Offices occurred chiefly in establishment charges owing to vacancies and deputations, partly counterbalanced by excesses due to privilege leave absences. Under Public Works Office of Account there was a saving 1,2 under salaries due to vacancies, of 1,0 under establishment, 1,0 under allowances, and 2 under contingencies, due chiefly to the office having remained at Simla throughout the year, owing to which there was a reduction in the charges for Presidency house-rent, Hill Journey allowance, and establishment, as the pay for March was not drawn in advance as usual. The excess in India under *Allowance to Presidency Banks* occurred in the payment for Public Debt duties. Under *General Establishment of Local Fund Offices* the saving in Bengal was due to the method of adjusting recoveries from Incorporated Local Funds towards the cost of controlling and account office under "Contributions from Local to Provincial;" in Madras the increase expected with the establishment of additional Punchayat Unions was over-estimated, and in Bombay the Budget included a provision for account establishment, the charges were, however, shown against *Account Offices.*

140. The saving in England (2,8) was due chiefly to a decrease of 2,4 in salaries and of 5 in stores.

Savings under Exchange Compensation Allowance	1	1,3	1,2	5	3,3	3,4	3,0	1,9	3,7	18,4

141. The expenditure in India fell short of the Budget Estimate and the actuals of the previous year by 45,5 and 59,7 respectively. Of the saving, as compared with the Budget, 32,7 occurred under *Civil and Sessions Courts*, and was contributed by all the Provinces except Assam, where there was an excess of 6, due partly to the appointment of officers of grades higher than those provided for, and partly to leave arrangements. The saving in the Central Provinces, (8) was chiefly due to less expenditure on Exchange Compensation Allowance (4) and on travelling allowance (3), owing to the post of one Additional Sessions Judge having been vacant; in Bengal it was due to savings under Exchange Compensation Allowance (14), Process-serving Establishments (17) and Contingencies (9), counterbalanced to the extent of 2,5 by increased expenditure on account of remuneration to copyists and process-serving charges. The higher charges in 1897-98 were due to large payments of grain compensation; in the North-Western Provinces it was chiefly due to the absence of a large number of officers on long leave (5,3), to savings in establishment charges of Subordinate Judges and in the provision for the reorganisation of establishments of Civil Courts (1,1), and to less outlay on diet money (4), process-serving (2,0), and record-room establishments (3). These causes mainly explain the decrease as compared with the previous year; and in the Punjab, Madras, and Bombay it was mainly due to the absence of officers on long leave and temporary

Section D.—SALARIES AND EXPENSES OF CIVIL DEPARTMENTS—*continued.*

19A.—Law and Justice—Courts of Law—*continued.*

vacancies Under *High Court, etc.*, the principal savings occurred in Bengal (5,4) and, Bombay (3,1). The difference in Bengal was chiefly due to three appointments of Judges having remained vacant for a part of the year (4.0), and to savings in the establishment charges of the Commissioner for taking accounts and Taxing Master (5), and in the provision for commission payable to the Official Receiver (5). The decrease as compared with the previous year, was mainly due to the first of these causes. In Bombay it was chiefly due to temporary vacancies, to the retirement and absence on leave of officers whose successors drew less pay, and to the postponement of the proposed conversion of the appointment of the clerk of the Insolvent Debtor's Court into an appointment with a fixed salary. The first two reasons account for the decrease as compared with the previous year. In India the saving was the result of a change of classification by which the Judicial establishment of the Revenue Commissioner in Baluchistan was shown under 25—Political, instead of under this head as formerly; and in the North-Western Provinces it was due to the pay of the late Chief Justice for March 1898 having been drawn in that month on his retirement. In Punjab the excess over the previous year was chiefly due to the appointment of a sixth Judge. The excess in Madras (5) was chiefly due to increased expenditure on printing and translation work executed by the High Court on behalf of suitors (2,0), partly counterbalanced by savings due to the absence of the Chief Justice and the Crown Prosecutor on leave out of India (1,4). The variations under *Law Officers* are chiefly due to higher payments of pleaders' and barristers' fees in civil and criminal cases in the Punjab (2,4), Madras (3,0) and Bombay (8), counterbalanced by smaller charges on this account in Bengal (4), and the North-Western Provinces (9), and by savings in Burma (1,2), due to the absence on leave of the Government Advocate, and to vacancies in District Government Prosecutorships. Under *Courts of Small Causes* the principal differences are the savings in Bengal (9) and the Punjab (1,2), and the excess in the North-Western Provinces (5); the saving in Bengal was due to officiating arrangements, and that in Punjab to the employment of Extra Assistant Commissioners as Small Cause Court Judges, their salaries being debitable in moieties to Land Revenue and Criminal Courts, while the excess in the North-Western Provinces was mainly due to the absence of officers on privilege leave. The total difference under *Criminal Courts* is small (1,5), but the variations under the several Provinces are considerable; there were savings in India (6), Central Provinces (1,8), Burma (5,2), Assam (1,8), and Bombay (3,7) chiefly under Salaries; in Burma the difference was enhanced by savings under Judicial Establishment (1,7), and Allowances and Contingencies (1,1), partly counterbalanced by an excess of 9 under diet and travelling allowance of witnesses, and in Bombay the saving was reduced by excesses under Supplies and Services and diet and road money of witnesses. The decrease in Bombay, as compared with the previous year, was due to the large number of officers on duty in 1897-98 on account of the famine. These savings were almost covered by the excesses in Bengal (5,6), the North-Western Provinces (7), Punjab (1,9), and Madras (3,4) which occurred chiefly under salaries; in Bengal the increase due to this cause was enhanced by larger charges under travelling allowances (1,3), under diet and road money of witnesses (6), and under remuneration to copyists (8); in the North-Western Provinces by famine concessions to officers; in the Punjab by the posting of additional Civil and Military officers to the Province, and in Madras by insufficient provision for the Hill Tracts Agency establishment. The higher expenditure in the North-Western Provinces in the previous year was due to the unusually high strength of the district staff during that year owing to the famine. Under *Other Courts of Justice* the savings in Madras and Bombay were due to the absence of Presidency Magistrates on leave out of India. Under *Other Charges* the excess in Madras was due to larger remunerations to examiners owing to an increase in the number of examinees. Under *Refunds* the charges are of a fluctuating nature, and proved high in India owing to large refunds of lapsed estates in the hands of the Administrator General, Bengal; the decrease in Bombay was due to a falling off in the receipts under Law and Justice on account of plague.

142. The Budget Estimate in England provided for the outfit allowance of one Judge, but two Judges came out.

143. The expenditure in India was less than the Budget Estimate and the actuals of the previous year by 46,2 and 89,0, respectively. The saving occurred almost entirely under *Jail Manufacture* (43,4), and was due chiefly to smaller purchases of raw material consequent on a falling off in the demand for manufactured articles; in Burma the saving was augmented by the provision for temporary establishment not being fully used, while in Madras it was reduced by the cost of new weaving machinery obtained from Europe for the Coimbatore Jail (1,4), and a large order for tents for the Ordnance Department undertaken by the Penitentiary. Under *Other Jail charges* the decrease in the Central Provinces, as compared with the previous year, was due to the large Jail population and high prices paid for rations in 1897-98. In Burma the saving (10,8) was due to low Jail population; the excess over the previous year being due chiefly to the release in 1897-98 of 2,021 prisoners in commemoration of Her Majesty's Jubilee, and the large stocks of grain brought over from 1896-97. The saving in the North-Western Provinces (18,9) was due to a decrease in Jail population and the closure of the temporary overflow Jail at Chunar, and occurred mainly under dietary charges (12,9) and salaries and establishment (3,3). The high expenditure of the previous year was due to the large increase in Jail population during the famine and to high prices of food-grains. In the Punjab the saving (2,1) was due chiefly to the cheapness of grain (7,7), counterbalanced to the extent of 5,6 by the opening of a new central Jail in the Gujrat District in connection with the construction of the Jhelum Canal. These savings were almost covered by excesses in Assam (2,4), Bengal (13,0), Madras (11,5), and Bombay (5,7). The excess in Assam was due to an increased scale of diet of convicts, to discontinuance of paddy cultivation by convicts, and to purchase of provisions for storage; that in Bengal occurred chiefly in dietary charges (11,4), and clothing and bedding (1,9); the decrease, as compared with the previous year, was due to smaller dietary and hospital charges, to less charges for moving prisoners, and to non-payment of grain allowances; that in Madras was due to increased charges for moving prisoners and for diet in consequence of an increase in Jail population, to construction of cells in the Vellore Central Jail, to additions and alterations to the Rajahmundry Central Jail, and to laying in stocks of provisions; that in Bombay was due to the high prices of food-grains in the early part of the year, and an increase in Jail population, partly counterbalanced by savings in establishments owing to the lower rate of pay drawn by a Superintendent, and to the provision for temporary establishment not being fully utilised; the decrease, as compared with the previous year, was due to the high cost of diet and the grant of concessions to Jail-ration contractors in 1897-98. The saving under *Convict charges at Port Blair, etc.*, was due chiefly to smaller expenditure under salaries, establishment, and contingencies owing to the absence and deputation of officers, and vacancies in the police establishment (1,9), to smaller outlay on Marine and Forest Supplies (3,6), and to less payment of passage money (2,2), partly counterbalanced by increased charges under Commissariat Supplies (3,6), owing to purchase of provisions, and under Tools and Implements (1,5), owing to the purchase of a husking and winnowing machine.

144. The demand for stores from England was smaller than was expected.

Savings under Exchange Compensation Allowance	2	4	2,0	1	1,1	6	10	9	[illegible]	7,2

145. The expenditure in India showed a saving of 20,9 as compared with the Budget Estimate and of 53,3 as compared with the actuals of the previous year. The saving, as compared with the Budget, occurred chiefly under *District Executive Force* ([illegible]), and *Cattle Pounds* (7,3); the former is more than

Section D.—SALARIES AND EXPENSES OF CIVIL DEPARTMENTS—*continued.*

20.—Police—*continued.*

accounted for by the saving of 24,9 in the North-Western Provinces, due mainly to the reorganization scheme having been only partially carried out, and late in the year, and the saving in Madras (8,9) due to too small an allowance for probable savings (2,6), and to less expenditure on travelling allowances (2,3) and clothing and uniforms (3,2), partly counterbalanced by excess chiefly in Bengal (13,3) and the Punjab (65,), which occurred mainly under pay of the Police Force and allowances. The decrease, as compared with the previous year, occurred chiefly under *District Executive Force,* due mainly to the heavy payments in 1897-98 in Bengal on account of grain compensation, and in Bombay on account of temporary establishment and additional police due to the famine and payments of grain compensation, and under *Special Police* due chiefly to the reduction of the Police Force in Burma; these decreases were partly counterbalanced by increases under *Government Railway Police* and *Village Police,* the latter occurred chiefly in the North-Western Provinces, due to the revision of the Rural Police system in Oudh, and in Bombay owing to the transfer to this head of certain charges from 3—Land Revenue.

146. Under *District Executive Force* the saving occurred chiefly in the North-Western Provinces (24,9) and Madras (8,9); there were also small savings in Burma (8), and Bombay (4). These savings were largely counterbalanced by excesses in India (1,3), Central Provinces (1,9), Bengal (13,3), and the Punjab (6,5). The savings in the North-Western Provinces and Madras have been explained above; the excess in the former, as compared with the previous year, was due to the introduction of reforms in the Police Force, while in Madras the decrease from the previous year occurred mainly in charges due to famine and plague and payments on account of Exchange Compensation Allowance. The saving in Burma was due to absences on leave, temporary vacancies, lower rate of Exchange Compensation Allowance, short strength of the force, and the non-amalgamation of the Port Trust Police with the District Police, partly counterbalanced by excess expenditure, due to the amalgamation of the Mandalay Cantonment and Municipal Police with the District force from 1st August 1898. In Bombay the saving was the net result of considerable variations in the detailed heads. There were savings of 3,5 in salaries, 2,0 in clothing charges, 8 in ammunition, 1,4 in the carriage of constabulary, and 4,9 in the additional police at Poona owing to reductions in the staff; and excesses of 7,9 on account of Plague Police, 3,3 for allowances and 1,0 on account of rewards paid to informers in connection with the Poona murders on the Jubilee Day. The excess in India was due chiefly to the entertainment of additional police in connection with the plague at Bangalore (1,1) and to a short recovery of 5 from the Mysore Durbar, due to the State having been exempted from the payment of its share of police charges on the Railways in Bangalore, by the Government of India in Financial Department letter No. 2759-A., dated 22nd June 1898. The excess in the Central Provinces was due chiefly to a large supply of police clothing from the Jail Department; the decrease, as compared with the previous year, was due to the employment in 1897-98 of a large number of police owing to famine, and payment of compensation for dearness of grain; in Bengal the high expenditure was due chiefly to too large a deduction in the Budget for probable savings (6,2), to increased payments of travelling allowance and arrear payments of grain compensation (5,1), and to charges on account of police supplied to private individuals and corporate bodies (1,7); the decrease, as compared with the previous year, occurred chiefly under payment of grain compensation allowance. In the Punjab the excess was due chiefly to expenditure in connection with the plague. Uunder *Municipal and Cantonment Police,* the decrease in Burma, as compared with the Budget and the actuals of the previous year, was due to the amalgamation of the Mandalay Cantonment and Municipal Police with District Police Force as stated above. Under *Village Police* there was a saving in the North-Western Provinces of 5,7, of which 3,5 was due to the slow progress made in carrying out reforms in the Rural Police system of Oudh; and an excess in Bombay of 4,8 due to the transfer to this head of certain charges connected with the assessment of alienated lands, from 3 — Land Revenue (6,2), partly counterbalanced by a saving due to the grant for village watchman in Sind not having been fully utilised. Under *Special Police* the saving in Assam was due to less payments of compensation for dearness of provisions (6,5) owing to lower prices of food-grains, and to vacancies in the Police Force (9), partly counterbalanced by an excess of 4,1 under supplies and services, consequent on the transfer of the South Lushai Hills from Bengal to Assam, which also explains the excess over the previous year; in the Punjab the transfer of charges in connection with the Bhittani service in Dera Ismail Khan District to 25 — Political accounts for the savings both as compared with the Budget and the actuals of the previous year, and in Bombay the saving was due to the reduction of certain special police forces by absorption into the regular Police Force, and to savings under supplies and services, counterbalanced to the extent of 1,1 by the non-recovery of a contribution from Kathiawar. There were excesses in Burma (1,4) and Bengal (1,9); the former was due to too low an estimate for rations, and the latter to insufficient provision for clothing, purchase of accoutrements and contingencies. The decrease in Burma, as compared with the actuals of the previous year was due to the reduction of the strength of the Police Force, and to less outlay on Exchange Compensation Allowance, travelling allowances, and arms and accoutrements, and that in Bengal to the transfer of the South Lushai Hills to Assam. The saving under *Cattle Pounds* was chiefly due to over-estimate;

Section D.—SALARIES AND EXPENSES OF CIVIL DEPARTMENTS—*continued.*

20.—Police—*concluded.*

in the North-Western Provinces the saving was in the cost of feed of cattle, and in Bombay in allowances and supplies and services; the low expenditure in Bombay in the previous year was due to the freedom allowed in the grazing of cattle owing to the scarcity. Under *Other Charges* the saving in India was chiefly due to the short strength of the Thuggee and Dacoity Police Force (8), and to less outlay on Secret Service Contingencies (6) and Special Police scheme (3).

147. The excess under *Presidency Police* in Bengal (1,1) was due to arrear payments of grain compensation (9), to payments of law charges and rewards not provided for (9), and to increased charges on account of Police supplied to private individuals (1,0), partly counterbalanced by savings of 1,1 in establishment charges of the Calcutta Police Force, and of 5 due to the Commissioner Police drawing the minimum pay of the appointment; in Bombay the excess was due to charges for Sanitary Police, for which no provision was made (1,1), to charges on account of private watchmen and Ramosis (1,0), and to short recovery of the Municipal contribution (1,1), which is adjusted by deduction from charges, partly counterbalanced by savings under salaries, Exchange Compensation Allowance, and allowances of the Municipal Police. The excess under *Superintendence* was due chiefly to the grant of privilege leave; in the North-Western Provinces the excess was also partly due to increased expenditure under establishment and allowances (4) and contingencies (6). Under *Government Railway Police* the excess in India (8) was due partly to high expenditure on account of the Rajputana-Malwa Railway Police (4), and partly to the adjustment, for the first time, under this head of the Mysore State share of Police charges on Railways in Bangalore, owing to the State having been exempted from the payment under Financial Department No. 2759-A., dated 22nd June 1898; in Burma the absence of expenditure in 1897-98 was due to the adjustment of arrear contributions from the Burma Railways Company; in Assam the excess both over the Budget and the previous year was due to the entertainment of additional Police for the Assam-Bengal Railway; in the North-Western Provinces the entertainment of extra police for plague preventive measures explains the excess over both the Budget and the actuals of the previous year; in the Punjab the saving was due to an over-estimate of the charges on account of the Southern Punjab Railway Police, and in Madras chiefly to the provision of 2,6 for the Railway Police scheme not having been utilised.

Savings under Exchange Compensation Allowance		7	1	...	2	...	...	1,0

148. The Indian expenditure exceeded the Budget Estimate by 2,9, but was less than the actuals of the previous year by 8,7. The excess over the Budget occurred chiefly under *Marine Stores and Coal, for Building and Repairs of Ships,* due mainly to smaller recoveries for coal supplied to Her Majesty's ships of war in Indian seas, and for stores and work done for other Departments (12,1), and partly to larger purchases of coal for the Muscat and Bhushire Depôts (1,9), and under *Pilotage, Pilot Establishment, etc.,* in Bengal, partly counterbalanced by a saving under *Other Charges,* due to less expenditure than anticipated on repairs and supply of coal to Royal Indian Marine vessels at out-stations and to Her Majesty's ships of war in Indian seas.

149. Under *General Supervision and Accounts* and *Marine Survey and Establishment* the variations were due mainly to the absence of officers on leave and to the lower rate of Exchange Compensation Allowance. Under *Dockyards* there was an excess in the Bombay Dockyard under wages of artificers and labourers (1,6), owing to an increase in the work done for other departments and private individuals, which was counterbalanced by larger recoveries from Other Departments for work done (1,6); the recoveries for work done in the Kidderpore Dockyard fell short of the Estimate by 1,0, but the excess due to this was partly counterbalanced by savings in the wages of artificers and labourers and in the Constructor's Department. Under *Salaries and Allowances and Victualling of officers and men afloat* the saving in Burma was due to the provision for the pay of officers for the *McIvor* and *George* not having been fully utilised and to steam-launches having been temporarily lent to other Departments; that in Bengal occurred chiefly in salary charges of Pilot vessels. Under *Marine Stores and Coal for Building and Repairs of Ships* the minus entry in India was the result of the system of adjusting recoveries by deduction from charges. The excess has been explained above; the saving in Burma (1,9) was due to smaller purchases of fuel and stores for inland vessels and steam-launches. In Bengal the charges were exceptionally low. The charges under *Pilotage, Pilot Establishment, etc.,* which depend on the tonnage of vessels visiting and leaving the port, were exceptionally high in Bengal during the year. Under *Other Charges* the saving in India (9,1) was due chiefly to less expenditure on repairs and coal supplied to Her Majesty's warships in Indian seas (3,0) owing to the *Sphinx* not having come to Bombay at the end of the year for her usual repairs, to less outlay on repairs to Royal Indian Marine Vessels at out-stations (3,2), owing to the loss of the *Pagan* and to repairs to other vessels not having been undertaken to the extent provided for, and to over-estimate for freight on Europe stores (1,3), miscellaneous charges (8), and passage and conveyance of officers and men (2). The saving, as compared with the previous year, occurred chiefly in the charges for repairs to Her Majesty's warships in Indian seas, and

Section D.—SALARIES AND EXPENSES OF CIVIL DEPARTMENTS—*continued.*

21.—Marine—*concluded.*

Royal Indian Marine Vessels at out-stations for the reasons stated above, in freight on Europe stores due to a smaller quantity of stores having been imported during 1898-99, and in miscellaneous charges due to smaller outlay. In Burma the saving (2,5) was due to the provision (1,5) for the subsidy for the Arakan Coasting Service not having been utilised, to less expenditure on account of the stern-wheeler in course of construction in the Kidderpore Dockyard (1,5), and to a smaller outlay on the conservancy of the Irrawaddy and Chindwin rivers (8), partly counterbalanced by an excess of 1,3 due to expenditure (7) on a house boat for the Deputy Commissioner, Bassein, and to excess outlay (6) on the maintenance of Light-vessels. In Bengal the provision for purchase and hire of vessels was only partially utilised.

150. The saving in England (13,0) was due to the last quarterly instalment of the subsidy to the Admiralty for manning and maintaining Indian Government Defence Vessels (13,8) not having been paid pending the settlement of the deduction to be made in respect of the cost of passages, counterbalanced to the extent of 8 by larger demands for stores.

Section D.—SALARIES AND EXPENSES OF CIVIL DEPARTMENTS—*continued.*

22.—Education—*continued.*

151. The Indian expenditure showed a saving of 54,3 as compared with the Budget Estimate, and an excess of 17,0 as compared with the actuals of the previous year. The saving was contributed by all the Provinces except Madras, and occurred chiefly in Bengal (15,5), Bombay (13,5), Burma (8,4), the Central Provinces (6,5), and the North Western Provinces (6,3). The excess of 1,6 in Madras has been sanctioned by the Local Government. An excess of 1 in India (Local) awaits sanction.

152. Under *Inspection* the savings occurred mainly under Salaries, Establishments, and Contingencies; in Burma three Assistant Inspectorships provided for, were not filled up till 1st August 1898; the excess in Madras was due to an under-estimate and to the grant of privilege leave. The saving under *Government Colleges* in Bengal, was due to an under-estimate of probable saving under Arts Colleges, and in Bombay to the absence of officers on leave, and the separation of the Maharajah Takhatsingji Observatory from the College of Science, Poona, and the transfer of the charges connected with it to 26.—Scientific and other Minor Departments. These savings were partly counterbalanced by an excess of 2,2 in Madras due to charges for providing fittings in the Physical Laboratory and class room in the Presidency College (1,6), and to under-estimate on account of the Engineering College, the Teacher's College, and College of Agriculture (1,2), reduced by a saving of 6 under salaries. Under *Government Schools* the saving (19,8) was contributed by all the Provinces, except India and Burma where there were small excesses. The saving in the Central Provinces was due to less outlay on petty construction and repairs; the decrease in Bengal occurred chiefly in salaries of District Schools (2,0), boarding charges of the Kurseong Girls' and Victoria Schools (1,3), and under unforeseen charges (2,5); that in the North-Western Provinces and the Punjab was chiefly due to over-estimates by District Boards; that in Madras to an over-estimate in the Local Section for Secondary and Primary Schools (3,3), partly counterbalanced by an excess of 9 in the Provincial Section under Primary Schools, and that in Bombay was due to too large a provision by Local Boards for establishments and contingencies (2,6), to smaller payments in support of Municipal Schools and in the salaries of Masters (9) in the Provincial Section, and to grants for establishment and contingent charges for the School of Art and the Industrial School not having been fully utilised (1,2). Under *Grants-in-aid and Payments by Results* all the Provinces, except the Punjab and Madras, contributed to the saving of 15,2. In the Central Provinces the grants-in-aid to Provincial Secondary School were less by 1,2, and Local payments by results by 1,4; the saving in Burma (7,6) and Assam (1,0) were due to over-estimate; in Bengal it was chiefly in the grants to Primary Schools, in the North-Western Provinces the grants provided by District Boards for Primary Schools were not fully utilised (1,2), and there was a saving in the Provincial grants of (1,1); in Bombay the saving was entirely in the Provincial Section, 1,7 occurred in payments by results, 7 in grants to Primary and indigenous Local Schools, and 4 in other directions. In Madras the excess, which is almost entirely in the Provincial Section, occurred chiefly under payments by results. Under *Scholarships* the saving in the North-Western Provinces occurred in scholarships in Professional Colleges (8) and Primary Schools (7), and in the Punjab the saving was due to over-estimates by Departmental Officers and District Boards. Under *Other charges* the saving in India (7) was in the grants for buildings and furniture for Bangalore, in Bengal the provision for the Eden Hostel was only partially utilised (1,7), and there were savings under Boarding Hostel charges (6); in Madras the saving was due to the provision for the Students' Hostel not being fully utilised (1,5), and to a provision of 1,3 in the Local Section for purchase of books not being required, the charges on this account being debited to Incorporated Local Fund Debt Accounts; and in Bombay the saving was due to less charges for printing, purchase, and publication of books both at the Sind and Government Central Book Depôts.

153. The excess in England was due chiefly to the payment of 3 in connection with the third Quinquennial Review of the Progress of Education in India.

154. The Indian expenditure was less than the Budget Estimate and the actuals of the previous year by 17,9 and 3,9, respectively. The fluctuations under this head are due mainly to variations in the number of senior and junior chaplains on duty or on leave, and in the rate of Exchange Compensation Allowance. In India, however, the larger portion (3,9) of the saving was due to vacancies in the appointments of the Bishop of Calcutta and his Domestic Chaplain. The excess of 5 in the Central Provinces requires to be sanctioned.

155. The excess in England was due to the passage and outfit allowances of the Bishops of Calcutta and Bombay, partly counterbalanced by a saving due to a smaller number of chaplains having come out to India than was provided for.

156. The Indian expenditure exceeded the Budget Estimate and the actuals for the previous year by 386,1 and 272,3, respectively These excesses occurred entirely under *Grants for Medical Purposes*, and were due to charges in connection with the plague in all the Provinces, except Burma and Assam.

157. The saving under *Medical Establishments* was contributed to by all the Provinces except India and Madras, and was due chiefly to the deputation of officers on plague duty and absences on leave out of India. In Burma the saving was enhanced by 1,0 owing to the provision for the proposed appointment of Deputy Inspector General not having been required. The excess in India was chiefly due to charges in connection with the deputation of Dr. Ross for the investigation of malaria and kala azar, and that in Madras to the transfer to this head of charges of the District Medical and Sanitary Officers' establishments hitherto shown under *Government Hospitals and Dispensaries* (2,8), and to indirect charges due to plague (1,9), partly counterbalanced by too small a deduction on account of probable savings. Under *Government Hospitals and Dispensaries* the saving in the Central Provinces (2,9) was chiefly due to deputation of officers on plague duty (1,2), to the scheme for bettering the prospects of the Hospital Assistants not having been brought into force during the year (1,4), and to smaller grants to hospitals and dispensaries; in Burma (4,4) it was due to the number of Hospital Assistants on duty having been below the sanctioned strength (2,8), to deputation of Assistant Surgeons as Officiating Civil Surgeons (6), and to the provision for two new dispensaries not having been required, and to smaller outlay on Europe medicines and surgical instruments (1,5); in Bengal (8,1) it was due chiefly to smaller purchases of medical stores and instruments for the Medical College (1,7), to less outlay for dieting, clothing, and bedding (1,8), and for contingencies (6) of the Campbell Hospital, to savings in salaries and other charges of Mofussil hospitals (1,0), to smaller grants to hospitals and dispensaries (6), and to lower charges on account of supplies and services of District Fund

Section D.—SALARIES AND EXPENSES OF CIVIL DEPARTMENTS—*continued.*

24.—Medical—*concluded.*

Hospitals and Dispensaries; in the North-Western Provinces (3,9), it was due chiefly to less charges for salaries (1,4) and establishments (8), due in some measure to the deputation of Assistant Surgeons and Hospital Assistants on plague duty, to less expenditure on travelling allowances (5), diet (4), and contingencies (3) of District Boards' Hospitals, and smaller grants to hospitals and dispensaries (3); in the Punjab (4,0) it was due partly to deputations on plague duty and partly to an over estimate by District Boards; in Madras (5,9) it was due to less charges for salaries and medicines for Presidency Hospitals and Dispensaries (1,5), to the transfer of 2,8 to *Medical Establishments* as stated above, and to less outlay in the local section of medical stores and contingencies (9); and in Bombay (3,5) it was chiefly due to lower cost of dieting in the Mofussil and to smaller grants to hospitals and dispensaries. The higher expenditure in the previous year in Madras was on account of medicines supplied by the Military Department to Mofussil hospitals and dispensaries, and that in Bombay on account of medical relief in connection with the famine. The only excess under this head was in Assam (1,2), where it was due to increased grants to dispensaries (7) and to the charge to this head of expenditure amounting to 5 in connection with certain dispensaries in the Lushai Hills, provided for under *Medical Establishments.* Under *Vaccine Establishments and Sanitary Commissioner* the saving in India was due chiefly to the provision for cholera inoculation experiments (9) not having been used and to the absence of an officer on furlough; in the Central Provinces (5,8) it was due chiefly to less expenditure on village sanitation owing to local subscriptions not being fully realised; in Burma (6) it was due to smaller payments of travelling allowance for vaccinators; in the North-Western Provinces it was due to grants for village sanitary improvements not having been utilised by the District Boards (2,1), to the provision for the establishment of a Bovine Lymph Depôt not having been used (4), to one officer having held two appointments for a part of the year (5), and to savings under travelling allowances and vaccination establishment (6), partly counterbalanced by an excess of 2,7 due to recoveries from Municipalities for the Sanitary Engineer's Office having been credited to Advances Recoverable against the outstanding debit under that head, which was the result of the former practice of transferring the charges on this account to Advances Recoverable, instead of being deducted from the charges for the year, and the transfer to this head of the debit outstanding against the Debt head at the end of the year; in the Punjab the saving (8) was due partly (3) to leave vacancies, and partly (5) to over-estimates by District Boards, and that in Madras (9,4) was due partly (5) to the absence of the Sanitary Commisssioner on leave, and the deputation of the Deputy Sanitary Commissioner to Calcutta on plague duty, and partly (8,7) to an over-estimate in the local section. The excess in Bombay (3,0) was due chiefly to the appointment of additional officers and establishment under the Port Health Officer, in connection with the medical inspection of passengers, the grant of privilege leave to the Sanitary Commissioner, and the appointment of an officer of a higher grade as Sanitary Engineer. Under *Medical Schools and Colleges* the savings were due chiefly to the absence of officers; but in the Punjab and Bombay they were partly due to less expenditure under supplies and services. Under *Lunatic Asylum* the only difference worthy of notice was the saving of 1,1 in Bengal, which occurred almost entirely under contingencies. Under *Other Charges* the saving in Bengal (8) occurred under salary of the Chemical Examiner.

158. The excess in England was due to larger payments on account of pay, passage, etc., of medical officers and lady nurses in connection with the plague.

159. The Indian expenditure was less than the Budget Estimate and the actuals of the previous year by 112,9 and 29,7, respectively. The saving, as compared with the Budget, was chiefly in India (73,0), and occurred mainly under *Political Subsidies* (64,8), due to the subsidy of the Amir of Afghanistan not having been fully drawn; Punjab contributed 15,3 to the saving, Burma 13,0, and Bombay 12,3; the North-Western Provinces added 9, while there were excesses in the Central Provinces (1), Assam (1), and Bengal (1,4). The saving in the Punjab was due chiefly to smaller payments to the Khyber Tribes, and to saving under Chitral Frontier charges, and charges for guarding Hill Passes; that in Burma was due chiefly to the transfer to the Military Department of the charges for the escort with the Chinese Frontier Delimitation Commission, and that in Bombay to the transfer of the Somali Coast Protectorate to the control of the Home Government from 1st October 1898. The saving, as compared with the actuals of the previous year, occurred chiefly in the Punjab and Bombay, being due in the latter to the transfer of the Somali Coast Protectorate mentioned above; and in the Punjab to the high expenditure in 1897-98 in connection with the frontier disturbances.

160. The variations under *Political Agents* occurred chiefly under salaries. Under *Charges on the North-Western Frontier*, 3,0 of the saving in India occurred in Baluchistan, and was due to vacancies in the Tribal Levies and Zhob Levy Corps, owing to the full strength not having been entertained, and 3,1 in Khorasan, due chiefly to the absence of the Agent to the Governor-General and his Assistant, and to vacancies in the establishment (6), and to smaller charges on account of Secret Service (9), hire of transport (6), and contingencies (4); the saving in the Punjab occurred in the payments to the Khyber Tribes (7,3) and for Chitral Frontier charges (3,6), owing partly to certain allowances not having been paid, and partly (1,0) to the transfer to the head *Entertainment of Envoys and Chiefs* of charges provided for under this head, and in the charges for guarding Hill Passes (4,3), counterbalanced to the extent of 1,3 by the transfer to this head from 20—Police, of charges in connection with Bhittani Service in the Dera

Section D.—SALARIES AND EXPENSES OF CIVIL DEPARTMENTS—*continued.*

25.—Political—*concluded.*

Ismail Khan district (para. 146). The saving in India under *Political Subsidies* has been explained above, that in the Punjab (6) was due to the non-payment of the subsidy due to the Mehtar of Chitral. Under *Refugees and State Prisoners* the saving in Bengal (7) was due to the reduced allowance payable to the successors of the late Prince Mintha Nyongoke; that in the North-Western Provinces (5) was due to the death of the widow of Sirdar Wali Muhammad Khan, and the departure of Prince Moung Pyu to Burma; and that in the Punjab (1,3) chiefly to the death of General Daod Shah. The decrease in Bombay, as compared with the previous year, was due to the special payments in 1897-98 in connection with the debts of ex-King Theebaw and Sardar Shere Ali Khan, ex-Wali of Kandahar. Under *Other charges* the saving in Burma (8,6) was due chiefly to the transfer to the Military Department of charges for the Military escorts accompanying the Chinese Frontier Delimitation Commission (para. 293), and to other charges in connection with the Commission not being as high as expected; in the Punjab (1,2) it was chiefly due to a saving of 3,1 in contingent charges, and of 6,7 in the provision made for the Tirah Expedition, partly counterbalanced by increased expenditure on account of the Mohmand Expedition (4,5), Malakand Field Force (6), Tochi Expedition (1,5), and the Khyber Force (1,8); the higher charges of the previous year were due to the frontier disturbances; and in Bombay the saving, as compared with both the Budget and the actuals of the previous year, occurred in the expenditure against the Revenues of Berbera and Bulhar and of Zaila, and was due to the transfer of the Somali Coast Protectorate to the Home Government as stated above; these savings were counterbalanced to the extent of 3,3 by an excess in India due to the Foreign Secretary's deputation for the settlement of relations with the Afridi Tribes (5,1), reduced by a saving of 1,9 under charges for organising Imperial Service Troops. The excess in India under *Entertainment of Envoys and Chiefs* was due chiefly to the visit to Calcutta of the Prime Minister of Nepal. Under *Durbar Presents and Allowances to Vakeels* the excess in Bengal was due to exceptionally high expenditure, and in the Punjab partly to the transfer to this head of 1,0 on account of charges provided for under *Charges on the North-West Frontier* as stated above, and partly (8) to larger expenditure on Durbar presents in connection with the frontier disturbances. In India the Estimate was pitched too high. The excesses in the Central Provinces, Assam, and in Bengal have all been sanctioned.

161. The excess expenditure in England was due to the payment of 2,2, being a moiety of the expenditure in connection with the mission to Abyssinia, and 1,0 as a contribution towards the expenses of the Momein and Busreh Consulates, counterbalanced by the non-payment to the Secretary of State of 1,0 provided for Secret Service.

Savings under Exchange Compensation Allowance.	1,8	1	—1	...	2	1	1	1	...	2,3

162. The Indian expenditure showed a saving of 14,3 as compared with the Budget Estimate, and an excess of 27,7 as compared with the actuals of the previous year. The principal savings occurred under *Survey of India* (6,6), *Other Scientific Departments* (3,3), *Veterinary and Stallion charges* (4,0), and *Other charges* (12,1). The excess over the actuals of the previous year occurred chiefly under *Survey of India* (8,0), *Other Charges* (4,2), and *Miscellaneous* (9,0).

163. Under *Survey of India* there was a saving of 6,6, of which 3,9 was under Head-Quarters Offices, due chiefly to the employment of a smaller number of officers in the Correspondence and Drawing Offices (1,2), to smaller demands for maps from other Governments (1,4), and to smaller expenditure in the Mathematical Instrument Manufactory on salaries and charges for the conversion of levels (8), increased by an excess deduction of 2,5 on account of instruments supplied to Head-Quarter Offices and Survey Parties and counterbalanced to the extent of 2,5 by increased salary and travelling allowance charges to the Trigonometrical Office, Dehra, owing to the deputation of a larger number of officers to Dehra. There was a saving of 19,5 in the charges of Survey Parties, but this was reduced by 15,0 in consequence of smaller recoveries from other Governments; the saving was further reduced by an excess of 1,6 under Controlling and Administrative Staff, owing chiefly to an excessive deduction on account of probable savings. As compared with the previous year, there was a decrease of 8,8 in the expenditure of Survey Parties, but, on the other hand, there was a decrease of 17,6 in the recoveries from other Governments, the net result being an excess of 8,8, which was increased by 1,4 by higher charges under Controlling and Administrative Staff, and counterbalanced to the extent of 2,4 by savings under Head-Quarter Offices, due to less salary charge in the Correspondence and Drawing Branch (9), and to larger deductions on account of cost of instruments supplied to Head-Quarters Offices and Survey Parties. Under *Geological and other Surveys* the saving in Burma occurred in the expenditure of the Archæological Department. Under *Other Scientific Departments* the saving in India (6) was due to the absence on furlough of the Reporter on Economic Products and to shorter tours made by his *locum tenens* (8), partly counterbalanced by charges in connection with the collection of Economic products for the Imperial Institute, London, met out of the grant for Experimental Cultivation included under *Other charges*; in Burma the saving was chiefly due to less expenditure on the exploration of petroleum, coal, and minerals; in Bengal the saving, both as compared with the Budget and the actuals of the previous year, was due to the grants for the preservation and translation of ancient manuscripts, and for the Agri-

Section D.—SALARIES AND EXPENSES OF CIVIL DEPARTMENTS—*continued.*

26.—Scientific and other Minor Departments—*concluded.*

Horticultural Society not having been utilised; and in Bombay the saving was due to the non-payment of the grant (1,7) to the Reay Industrial Museum, Poona, counterbalanced to the extent of 4 by the charges in connection with the Maharajah Takhatsingji Observatory at Poona, transferred from 22—Education (para. 152), and to payment of charges connected with the Solar Eclipse of January 1898. The excess in Madras was due to expenditure on account of Botanical Survey and Kodaikanal Observatory not provided for in the Budget. Under *Veterinary and Stallion Charges* the saving occurred chiefly under salary and travelling allowance charges; in the Central Provinces it was due to the post of Veterinary Superintendent having been vacant for the greater part of the year; in Burma the number of Veterinary Assistants was below the sanctioned strength, the saving was also partly due to less cost of feed and keep, owing to new pony stallions not having been purchased till near the close of the year; in the North-Western Provinces also the saving was partly due to less expenditure on feed and keep; in the Punjab there was an over-estimate of 8 in the Local Section; and in Bombay the provision for maintenance and stabling of stallions was not fully utilised. There was an excess in India due chiefly to higher contingent charges of the Inspector-General (6), and larger expenditure on the purchase of stallions (6), and pay of syces (6), partly counterbalanced by savings under salaries owing to the grant of leave, and to certain appointments being held by junior officers (4), to less travelling allowance (2), and smaller purchase of bullocks (2). Under *Other charges* the saving in India was due chiefly to the appointment of the Agricultural Chemist having remained vacant throughout the year, but partly also to the transfer of certain charges to the head *Other Scientific Departments* as stated above; in the Central Provinces (8) it was chiefly due to less contingent expenditure on the garden and menagerie of the Horticultural Gardens, Nagpur, and to less outlay on the purchase and feed of cattle and repairs of wells and roads of public gardens; that in Burma (1,0) was due chiefly to the provisions for experimental farms, and purchase of agricultural instruments not having been fully utilised (7), and to less expenditure on agricultural shows (2); in Bengal (4,6) and Madras (1,5), the saving was due chiefly to less expenditure on the purchase of cinchona bark than was anticipated; in Madras it was also partly due to petty savings under Botanical and other Public Gardens; and that in Bombay (7) chiefly to less outlay on agricultural and dairy experiments (4), and on Horse shows (4), partly counterbalanced by an excess of 3 under Botanical and other Public Gardens. The excess in the North-Western Provinces over the previous year was due to larger expenditure on account of public Exhibitions and Fairs. These savings were partly counterbalanced by excesses under the remaining heads. The excess under *Meteorological Department* (8) was chiefly in telegram charges (1,3), partly counterbalanced by a saving of 3, mainly in the provision for special storm observations and investigations. Under *Labour and Emigration* the excess in Assam (8) was due to an under-estimate of the deficit in the transactions of the Inland Labour Transport Fund recoverable from the Assam Administration. The excess over the previous year was partly (1,2) due to the deficit in the transactions of the same Fund, and partly (5) to larger payments of fees for inspecting tea gardens. The saving in Bengal (8) was due to the larger realisations from the Assam Administration mentioned above. The excess in Burma under *Statistics* was due to expenditure in connection with the Upper Burma Gazetteer having been incurred throughout the year instead of for six months only as anticipated in the Budget. The actuals in the North Western Provinces represent Traffic Registration charges transferred to this head from 3.—Land Revenue para. 59). The excess under *Miscellaneous* in India was due partly (1,2) to the creation of the office of the Inspector of Explosives and partly (2,4) to the enlargement of the scheme for the Linguistic Survey, for which a provision of 2 was made under *Other Scientific Departments*; in Madras (5,4) it was due chiefly to the charges on account of aluminium ware manufactured at the School of Arts (4,4), but not provided for, and an increase of 1,0 in examination charges, owing to an increase in the number of examinees; and the saving in Bombay (7) was due to the Provincial Civil Service Examination not having been held during the year. The excesses in the North-Western Provinces, Bombay, Assam and Madras have been sanctioned by the Local Governments.

164. In England there was a fall of 2,5 in the value of stores sent out, a decrease of 1,8 in grants for objects of a literary, scientific, or antiquarian character, and of 1,3 in the purchase of stallions.

Section E.—MISCELLANEOUS.

1897-98. Accounts.		1898-99. Budget.	1898-99. Revised.	1898-99. Accounts.
941,0	RECEIPTS	918,6	984,7	1,051,6

165. The receipts under this head exceeded the Budget Estimate by 133,0 and the actuals of the previous year by 110,6. The increase, as compared with the Budget, occurred chiefly under Miscellaneous (164,8), due almost entirely to recoveries of famine expenditure, counterbalanced by a decrease of 24,6 under Exchange, and of 12,4 under Receipts in aid of Superannuation, Retired, and Compassionate Allowances, of which 8,3 occurred in India. Of the improvement, as compared with the previous year, 102,3 occurred under Miscellaneous due to the cause stated above, and to recoveries of plague charges from Municipalities in Bengal, and 31,4 under Exchange. There was, however, a falling of 30,2 under Receipts in aid of Superannuation, Retired, and Compassionate Allowances entirely in India.

XXII.—Receipts in aid of Superannuation, Retired, and Compassionate Allowances.

166. The receipts in India under this head fell short of the Budget Estimate by 8,3, and of the actuals of the previous year by 32,5. *Subscriptions to the Military, etc., Funds* and *Subscriptions to the Civil Fund* are declining every year owing to retirement of old subscribers, the Funds being closed to new entrants. In Bengal the decrease under the former head was also partly due to the small receipts from the Orphanganj Bazar at Kidderpur owing to the large outlay on its building works. The increase in India under both these heads was due to donations on account of marriage, which could not be foreseen. Under *Subscriptions under the Indian Civil Service Family Pension Regulations* the decline was due to the absence of a large number of officers on furlough. Under *Contributions for Pensions and Gratuities* the increase of 7 in Bengal was due to the contributions from the officers of the Assam-Bengal Railway for which no provision was made in the Estimate, and that in Bombay (1,2) to certain advance recoveries.

Section E.—MISCELLANEOUS—*continued.*

XXII.—Receipts in aid of Superannuation, Retired, and Compassionate Allowances—*continued.*

167. The decrease, as compared with the actuals of the previous year, was due to the recovery of arrear contributions from officers in Berar, to the large number of officers on duty during the famine, and to payments by officers commuting on retirement. In England the increase was in the receipts on account of the Bengal Civil Service Annuity Fund.

	Accounts . 1898-99 .	12,6	3,2	3,5	5	23,0	10,1	6,7	14,1	13,4	87,1

168. The variations under this head were small. Under *Receipts from Sale of Stationery* the variations depend largely on the supplies of stationery to the State Railways; but in Bombay the increase of 1,3 was due to the recovery of the value of English Stores supplied to the Presidency and Sind Mathematical Instrument Depôts, and in Bengal the improvement (1,0) under this head and the still greater improvement (2,5) under *Other Press Receipts* were due to the value of forms supplied to and the cost of printing undertaken for private and Wards' estates, for which no provision was made in the Estimate. Under *Sates of Gazettes and other Publications* the decrease in Madras was due to a fall in the sale of Acts and Books.

Section E.—MISCELLANEOUS—*continued.*

XXIV.—Exchange—*continued.*

169. It is somewhat difficult to compare the Budget Estimate and the accounts owing to the lump reduction on the total of the Budget Estimate. Taking, however, the detailed figures as they stand, apart from the lump deductions, the principal changes are explained below. Under *Guaranteed Companies* the reduction was mainly due to larger repayments in India from sales of stores to foreign Railways and issues of stores to Revenue by the Great Indian Peninsula and Bombay, Baroda and Central India Railways, and to lapse of a large portion of the provision for the Madras Railway Extension. The principal variation under *Subsidised Railways* occurred on the Southern Mahratta (including Mysore) Railway, and was due to the annual indents for open line stores not having been submitted to the extent for which provision was made, and also to restriction of expenditure in India. Under *Remittance Account* the better result against the East Indian Railway advance was due to a reduced charge for loss at the average rate in consequence of the improvement in that rate. As compared with the actuals of the previous year the largest difference occurred in respect of the East Indian Railway advance owing to the payment in England in 1897-98 having to a large extent (592,5) been met from funds raised by the issue of debentures. The gain would have been much larger had it not been for the improvement in the official rate of exchange at which the East Indian Railway advances are adjusted.

Section E.—MISCELLANEOUS—*continued.*

XXV.—Miscellaneous—*continued.*

170. The Indian revenue under this head exceeded the Budget Estimate by 135,1, and the actuals of the previous year by 73,3. The large increase, as compared with the Budget Estimate, occurred mostly under *Other Items* (109,6), due almost entirely to Recoveries of Famine expenditure. The figure in Burma represents the adjustment of the cost of construction of the Meiktila-Myingyan Railway, which was undertaken by the Public Works Department as a famine relief work; of the increase (41,3) in Madras, 39,6 represents the sale-proceeds of cloths manufactured at Government expense, to afford relief to weavers during the late famine, and the rest chiefly arises from larger receipts from sale of avenue clippings. The difference between the Revised and the actuals in India was owing to 32,1 having been provided for the recoveries of famine expenditure, which, however, were adjusted provincially. Similarly 29,1 and 37,5 were provided in Burma and Madras respectively, but proved insufficient. The improvement in Bengal was chiefly in Miscellaneous Receipts (5,6), and Sale-proceeds of Durbar presents (2,0). In the Punjab it was due to an under-estimate of the receipts from the Copying Agency Account (4 4), and partly to toll receipts on the Khyber road (5). The decrease of 10,3 in Bombay was due to the transfer, from the 1st October 1898, of the Somali Coast Protectorate to the control of the Home Government.

171. Under *Gain by Exchange* the increase in India (7) was due to special transfers of Hali Sicca rupees from the Haiderabad Political to the Civil Treasury, and that in Bombay (9) to gain on the purchase of Austrian dollars at Aden for the payment of stipends to Political Chiefs. Under *Unclaimed Deposits* the improvement was due mainly to large receipts from the lapses of deposits in Bengal (15,7), Bombay (2,0), and the Punjab (2,0), partly counterbalanced by a decrease in the North-Western Provinces (6,4), due chiefly to the special refund of a lapsed deposit of about 5,4 on account of interest on Government Promissory Notes payable to the heirs of the late ex-King of Oudh, and of 3,4 in Assam due to an over-estimate. Under *Contributions* the increase in Bengal (5,1) was due to the recoveries of plague charges from Municipalities. Under *Rents* the improvement (8,8) was chiefly in Choultry rents in Madras The absence of receipts in the Punjab was due to the transfer of Serai receipts from this head to XXXII.—Civil Works. Under *Extraordinary Items* the increase (6,4) was almost entirely contributed by the Punjab from a large number of fines realised from the frontier tribes. Under *Miscellaneous, Fees, Fines, and Forfeitures* the fall occurred in Bengal (3,8), due to no fees for the survey of tea lands having been realised, and in Madras (3,2) to the transfer to XVIA—Law and Justice —Courts of Law, of fines realised by Bench Magistrates. There were also slight improvements in India (1,2), chiefly from the fees for patents, and in Burma (1,0) from fines imposed by Political Officers.

172. In England the increase occurred mainly in Fines and Penalties incurred by Contractors in providing stores.

5,716,8	EXPENDITURE	5,777,6	5,774,2	5,771,2

173. The total expenditure in England and India fell short of the Budget Estimate by 6,4, but exceeded the actuals of the previous year by 54,4. Apart from Exchange to which the saving is chiefly due, the expenditure in India exceeded the Budget Estimate and the actuals of the previous year by 41,5 and 28,1, respectively, and the sterling charges were more respectively by 54,2 and 106,1. Under Civil Furlough and Absentee Allowances the sterling charges exceeded the Budget by 33,0; under Superannuation the sterling expenditure exceeded the Budget by 17,2, while that in India fell short by 6,3; under Stationery and Printing there were excesses of 26,1 and 2,5 in India and England respectively, and under Miscellaneous there was an excess of 20,0, of which 19,3 occurred in India due to expenditure on special commissions of enquiry. The excess in India over the previous year was mainly due to the last-named cause, while that in England occurred chiefly under Civil Furlough and Absentee Allowances (71,3) and Superannuation (41,2).

174. The Indian expenditure exceeded the Budget Estimate by 1,5, but was less than the actuals in the previous year by 14,2. Under *Territorial and Political Pensions* there were variations in all the Provinces. The largest variation was the excess of 14,5 in Bengal, due partly to arrear payments of 8,7 to Fyzally Khan and 2,0 to members of the Nizamut and Oudh families, and partly to the large deduction (7,2) in the Estimate on account of probable savings. This excess was all but counterbalanced by savings in Bombay (7,1), the North-Western Provinces (4,5), the Punjab (1,7), and India (8). The savings in Bombay were due to the reduction (3,3) in the amount payable to Ziaul Nissa Begum owing to the capitalisation of a portion of her pension, to postponement of the payment (1,8) to the Angria family pending settlement of the claim for heirship, and to lapses by death (2,0). The savings in the North-Western Provinces were due to the non-drawal of the full amount of his pension by the Maharajah of Benares (2,5), to the death of a pensioner (6), and to lapses, and those in the Punjab and India, to certain pensions not being claimed during the year. Under *Charitable Allowances* the increase in the Punjab (1,2) was due partly to the payment of arrear allowances, and partly to allowances sanctioned after the Estimate was framed. The decrease, as compared with the previous year, in the North-Western Provinces and Bombay, was mainly due to the reasons given above, and in Bombay partly to the payment in 1897-98 of the capitalized value of a portion of the pension of Ziaul Nissa Begum. The excesses in the Central Provinces (2) and Bengal (14,5) require to be sanctioned.

Section E.—MISCELLANEOUS—*continued.*

28.—Civil Furlough and Absentee Allowances.

105,7	Exchange	126,5	131,1	130,0
294,1	TOTAL, INCLUDING ENGLAND	353,2	395,1	390,6

175. The charges incurred in this country depend on the number and grade of officers lent to foreign service, who happen to be on leave. The excess of 6 in Madras and of 3 in India were respectively due to the payment of leave allowances of the Collector of the Vizianagram Zemindary, and of the Tutor to the Maharajah of Jodhpur. In England the excess was due to the exceptionally large number of officers on furlough The excess of 6 in Madras was, sanctioned by the Imperial Government, and the excesses of 3 in India and 1 in the Punjab require to be sanctioned.

Section E.—MISCELLANEOUS—*continued.*

29.- Superannuation Allowances and Pensions—*continued.*

176. The saving under this head was almost wholly in consequence of the rise in exchange.

177. The Indian expenditure fell short of the Budget Grant by 6,3. Under *Superannuation and Retired Allowances* the decrease of 8,9 was the result of savings in all the Provinces except in the Central Provinces, Burma, and Bengal. The savings were due to lapses having exceeded the new pensions, and the excesses were due to an under-estimate of the growth of the expenditure under this head. The following statement shows this growth during the last six years :—

1893-94	863,5
1894-95	899,1
1895-96	925,1
1896-97	963,2
1897-98	998,3
1898-99	1,018,7

178. Under *Compassionate Allowances* the excess in the Punjab was on account of arrear payments, and, in Bombay, on account of new allowances sanctioned. Under *Gratuities* the saving in Bombay was due to an over-estimate. The excess in Madras under *Pensions of the Civil Funds* was due to the payment of passage money and a marriage donation, and, under *Other charges*, to bonuses paid to Provident Funds. The charge in Bombay under the latter head represents the refunds of contribution recovered in excess from certain officers in foreign service. The excess of 1,1 in the Central Provinces, 6 in Burma, 1,5 in Bengal, and 1,8 in Madras (Imperial) have been sanctioned, the excess of 1 in Imperial in the Punjab requires to be sanctioned.

179. In England the excess occurred in the pensions of the officers of the Uncovenanted Service, and in the payments on account of the Civil and Military Funds.

180. The Indian expenditure under this head exceeded the Budget Estimate by 26,1, and the actuals of the previous year by 2,9. The excess occurred almost entirely under *Purchase of Stationery* in Bengal (26,2) due to an under-estimate; the increase was more than met by an additional grant of 27,6 sanctioned by the Government of India, Finance and Commerce Department, in letter No. 995-A., dated the 2nd March 1899. The increase of 1,8 in Madras was due to the Budget not having provided for special water-marked paper. The saving in the Punjab (1,3) was due to a reduction in the price of jail made paper, and that in Burma (5) to an over-estimate.

181. Under *Government Presses* the increase of 6,6 in India was due chiefly to higher expenditure in the Central Press (3,6) on the contract for Printing Stock Forms, Postage and Out-door Printing, and in the Branch Press at Simla to Temporary Establishment (2,2), and Overtime Allowance (1,7) partly counterbalanced by savings under Supplies and Services (6). To meet the excess in the Branch Press an additional grant of 3,4 was sanctioned by the Government of India, Finance and Commerce Department, in letter No. 521-A., dated the 6th February 1899. There were increases in Bengal (1,8) on account of piece-work establishment and contract printing, and in Assam (1,0) and Madras (5) owing to increased work. The savings in Burma (4,4) were due to an over-estimate, chiefly on account of extra and overtime establishment (2,5), and purchase of materials, stores, and stock from England (1,6); in the North-Western Provinces (1,9) to smaller purchases of materials and plant, in the Punjab (1,1) to reduced charges on account of Lithography, and in Bombay (1,9) to smaller payments to piece-work establishment. Under *Stationery Supplied from Central Stores* the excess occurred in all the Provinces, except Burma, due to under-estimates. In the North-Western Provinces, however, the excess was due to higher demands for printing at the Government Press, and was partly covered by a re-appropriation of grant (1,0) sanctioned by the Local Government. Under *Other Charges* there were savings in the Punjab (8) due to certain publications provided for in the Estimate not having been issued during the year, and in Madras (9) to an over-estimate.

182. In England the increase was due to larger demands for stores than was anticipated, partly counterbalanced by smaller charges on account of printing.

Section E.—MISCELLANEOUS—*concluded.*

32.—Miscellaneous—*concluded.*

183. The Indian expenditure exceeded the Budget Estimate by 19,3, and the actuals of the previous year by 21,1. The largest excess in both cases occurred under *Special Commissions of Enquiry* and was due chiefly to the charges in India on account of the Famine Commission, the Currency Committee, the Frontier Tribes' Arms Committee, and the Plague Commission. In Bengal the charges were on account of the Plague Commission, while those in the North-Western Provinces and the Punjab were in connection with Commissions appointed to enquire into the conduct of Raja Chitpal Singh and Sardar Gurdial Singh Man, respectively.

184. Under *Remittance charges* the largest excess occurred in Madras (5,1), due to the despatch of several large remittances to other parts of the Empire. Under *Rents, Rates, and Taxes* the increase in Bombay (1,0) was due to the enhancement of Municipal rates on buildings. Under *Allowances and Rewards* the excess in Burma (1,7) was on account of an unusually large number of officers having qualified for language rewards during the year. Under *Irrecoverable Loan written off* the excesses were on account of writes-off in the Central Provinces (3) of advances under the Agriculturists' Loan Act, and in the North-Western Provinces (3) of Takavi advances and of the loan made to Raja Mohammed Salamat Ali of Azamgarh under Act XII of 1884. Under *Extraordinary Items* the actuals in India (1,6) represented cash and stores plundered from No. 24 Survey Party in the late Mekran disturbances, written off under the orders of Government. Under *Charitable Donations* the saving of 1,1 in Bengal was due to a smaller donation paid to the Calcutta Nurses' Institution, and partly to an over-estimate, and of 6 in the Central Provinces, to payments for the support of famine children being now made from the Indian Famine Charitable Relief Fund. Under *Petty Establishments* the savings in Madras (2,4) and Burma (6) as well as the excess in the Punjab (3,0) were in the local section. The excess in the Punjab was due to an under-estimate on account of the copying Agency Account (4,1), partly counterbalanced by savings (9) owing to the transfer of serai charges to 45—Civil Works. Under *Other Items* there were savings everywhere except in Assam. The principal savings were in the Central Provinces (1,0), due to no adjustment having been made for the rent of Telegraph lines, in Burma (7) to these adjustments being less than the amount estimated, and in Bengal (1,2), the net result of savings under rent of Telegraph lines and an excess under miscellaneous refunds.

185. The excess expenditure in England was due to increased charges on account of the Indian Plague Commission (4,4) and the Indian Currency Committee (2,7), partly counterbalanced by very small payments in respect of stores lost in transit to India.

Section F.—FAMINE RELIEF AND INSURANCE.

1897-98. Accounts.		1898-99. Budget.	Revised	Accounts.
5,363,1	EXPENDITURE	1,099,2	1,176,1	1,187,3

186. In consequence of agricultural distress in the two preceding years, the charges for actual Famine Relief works exceeded in those years the limits ordinarily fixed for the Famine Insurance Grant, and the charges for construction of Protective Railways were shown under 48—State Railways; but as the famine had practically ceased and relief works had in most cases closed, before the Budget was framed, both the Budget and the Revised Estimates, provided for the full amount of 1,500,0 of the Famine Insurance Grant, including the net charge on the revenues, on account of the Protective Railways constructed through the agency of companies, which, though shown under the Railway Revenue account, is chargeable to this grant. As the year was expected to close with a surplus, the unspent balance of the grant was shown under Reduction of Debt

187. The following statement shows the total amount chargeable to this grant, and its distribution :—

Famine Relief and Insurance.

1897-98. Accounts.		1898-99. Budget.	Revised.	Accounts.
5,325,6	Famine Relief	85,1	44,6	40,0 *
...	Construction of Protective Railways . . .	668,3	695,4	690,4

1,7	England	...	...	...
1,0	Exchange	...	...	...
5,325,6		85,1	44,6	40,0

188. In the Budget Estimate only 85,1 was provided for charitable relief, chiefly in Madras. Subsequently the Government of India sanctioned additional grants in India (4,5) and Bombay (24,8), which were included in the Révised Estimates. In India the grant was not fully utilised, while

Section F.—FAMINE RELIEF AND INSURANCE—*continued.*

33.—Famine Relief—*concluded.*

in Bombay it was exceeded by 3. The excess in the Central Provinces was due partly to adjustment of expenditure incurred in previous years, and partly to the charges incurred by the Public Works Department during 1898-99. In Bengal the charge was incurred in the Patna Division. The expenditure in Madras was due to relief works which had to be maintained for a few months in the Nellore District only.

189. The excess of 1,4 in India and 24,8 of the excess in Bombay were covered, as stated above, by additional grants, and 7,0 of the excess in the Central Provinces and 2,9 of that in Bengal and the balance, 3, in Bombay were sanctioned by the Local Governments and the balance 1, 1 in the Central Provinces, together with the balance of 3 (Imperial) in Bengal, 1 in the Punjab and 1 in Burma still await the sanction of the Imperial Government.

34.—Construction of Protective Railways.

1897-98. Accounts.		1898-99. Budget.	1898-99. Revised.	1898-99. Accounts.
...	EXPENDITURE	668,3	695,4	690,4

190. The increase in the actuals, as compared with the Budget Estimate, is due to work having been pushed on vigorously on the Bezwada-Madras Railway.

35.—Construction of Protective Irrigation Works.

1897-98. Accounts.		1898-99. Budget.	1898-99. Revised.	1898-99. Accounts.
...	INDIA	4,1	...	...
	N.-W. PROVINCES AND OUDH—			
2,0	Betwa Canal	1,4	4	—1
	PUNJAB—			
2,1	Swat River Canal	...	3,1	3,1
	MADRAS—			
14,4	Rushikulya project	9,9	6,8	5,4
	BOMBAY—			
4	Nira Canal	4	9	1,0
...	Mhasad tank	5	2	2
2,1	Chankapur tank	3,7	2	1
16,5	Other Works	...	1,9	2,0
37,5		20,0	13,5	11,7

191. The decrease of 25,8, as compared with the previous year's expenditure, was due partly to the approaching completion of the Rushikulya project, and partly to fewer adjustments of normal value of famine outlay having been made in 1898-99 than in the previous year. The actual expenditure of the year fell short of the Budget Estimate by 8,3. The decrease was due chiefly to savings on the estimates for works on the Surada reservoir of the Rushikulya project, and partly to works on the Chankapur tank not having been commenced during 1898-99.

36.—Reduction or Avoidance of Debt.

1897-98 Accounts.		1898-99 Budget.	1898-99 Revised.	1898-99 Accounts.
...	EXPENDITURE	325,8	422,6	445,2

192. The charge under this head represents the balance of the Famine Insurance Grant left after meeting the expenditure on the relief of famine and the construction of Protective Works (including the net charge for Protective Railways constructed through the Agency of Companies). The actual balance exceeded that anticipated in the Budget by 119,4, owing to the net charges on account of the Protective Railways constructed through the agency of Companies having fallen short of the Estimate.

Section G.—37.—CONSTRUCTION OF RAILWAYS (charged against Revenue in addition to that under Famine Insurance).

1897-98. Accounts.		1898-99. Budget.	1898-99. Revised.	1898-99. Accounts.
3,8	EXPENDITURE	5,8	4,2	1,5

193. The following are the details of the amount spent under Provincial, nothing having been charged to this head under Imperial:—

PROVINCIAL.

1897-98. Accounts.		1898-99. Budget.	1898-99. Revised.	1898-99. Accounts.
	ASSAM—			
7	Jorhat Railway	5,2	4,5	1,5
—5	Cherra-Companygunj Railway	...	...	1
2	TOTAL	5,2	4,5	1
	MADRAS—			
2,8	Mayavaram-Mutupet Railway	6	—3	—2
	BOMBAY—			
8	Hyderabad-Shadipalli Railway	...	...	1
3,8	GRAND TOTAL, PROVINCIAL	5,8	4,2	1,5

194. The decrease on the Jorhat Railway, as compared with the Budget and Revised Estimates, was due to the abandonment of the construction of a bungalow for the Manager, and to the non-arrival of English stores.

Section H.—RAILWAYS.

195. The following is a general statement of the Revenue Account, taking the gross figures for Guaranteed Railways instead of the net figures shown in the Finance and Revenue Accounts:—

1898-99.	State Railways.	Guaranteed Railways.	Subsidised Companies.	Miscellaneous.	TOTAL.
GROSS RECEIPTS	19,613,9	6,381,0	44,2		26,039,1
WORKING EXPENSES	9,456,4	3,298,3			12,754,7
Surplus Profits	528,9	361,8			890,7
Interest	7,309 8	3,256,4			10,566,2
Annuities	2,574,5	...			2,574,5
Land and Supervision	...	36,4	104,4	...	140,8
Miscellaneous Railway Expenditure	...	...	...	54,3	54,3
TOTAL CHARGES	19,869,6	6,952,9	104,4	54,3	26,981,2
NET GAIN OR LOSS TO GOVERNMENT—					
1898-99	— *255,7*	—*571,9*	—*60,2*	— *54 3*	— *942,1*
1897-98	— *15,7*	—*1,301,9*	—*98,8*	— *16,2*	—*1,432,6*
1896-97	—*1,096,7*	—*1,438,4*	—*61,0*	— *63,9*	—*2,660,0*
1895-96	— *493,9*	—*1,061,8*	+ 7,0	— *71,6*	—*1,620,3*
1894-95	— *737,5*	—*1,535,7*	+25,0	—*100,3*	—*2,348,5*

196. These figures show that for *State Railways* the net result was less favourable than in 1897-98 by 240,0. Under *Receipts* there was an increase of 569,4 due generally to the movement of passengers having been less restricted in consequence of the withdrawal of the stringent quarantine measures in connection with the plague, and to the opening of new sections of railway lines.

197. The total charges were more by 809,4. There was an increase of 743,0 in *Working Expenses* due to increased train mileage run, and heavier repairs and renewals of permanent-way and rolling stock, and a small increase of 25,3 for *Interest* and *Annuities;* also an increase of 41,1 in the surplus profits paid to Companies consequent on increased earnings.

198. The working of the *Guaranteed Railways* resulted in a loss of 571,9 which was less by 730,0 than the loss of the preceding year. There was an increase of 881,3 in the *Net Traffic receipts*, and the charge for *Interest* was less by 120,7 by reason of the rise in exchange. On the other hand, the charges under *Surplus Profits* and *Land and Supervision* exceeded those of the previous year by 251,5 and 20,5, respectively.

199. The net loss to Government on the Revenue Account of Railways, as shown above, has been considerably affected by the fluctuations in the rate of exchange, which are eliminated in the following figures, showing in each year the net loss or gain for State and Guaranteed Railways if the rate of exchange had not varied from that of 1886-87:—

	State Railways.	Guaranteed Railways.	TOTAL.
1898-99	+ 211,9	—*299,5*	— *87,6*
1897-98	+ 674,0	—*898,8*	— *224,8*
1896-97	— *63,1*	—*823,0*	— *886,1*
1895-96	+ 882,2	—*232,4*	+ 649,8
1894-95	+ 896,7	—*553,4*	+ 343,3
1893-94	+ 316,6	—*188,9*	+ 127,7
1892-93	— *234,1*	—*321,7*	— *555,8*
1891-92	+ 315,5	—*210,2*	+ 105,3
1890-91	— *552,5*	—*262,0*	— *814,5*
1889-90	— *746,0*	—*529,6*	—*1,275,6*
1888-89	— *991,1*	—*682,1*	—*1,673,2*
1887-88	—*1,002,0*	—*811,4*	—*1,813,4*
1886-87	— *375,1*	—*675,6*	—*1,050,7*

200. The figures show that the net results, apart from variations in Exchange, improved steadily year by year from 1887-88 to 1895-96, with the single exception of 1892-93, when there was a serious falling off in the wheat export traffic. In 1896-97 traffic receipts were injuriously affected by famine and plague. In 1897-98, however, owing to a revival of traffic after the famine and to the Frontier expedition, there was an improvement, apart from Exchange, of 661,3 under State and Guaranteed Railways. In the past year, owing chiefly to the removal of the stringent plague quarantine measures, and to a return of normal conditions, especially on the guaranteed lines, there was a further improvement apart from Exchange of 137,2 under State and Guaranteed Railways.

Section H.—RAILWAYS—RECEIPTS.

1897-98. Accounts.		1898-99. Budget.	1898-99. Revised.	Accounts.
21,260,9	RECEIPTS	21,823,6	22,736,4	22,740,8

201. The following are the items comprised in this group, particulars of which are given in the succeeding statements :—

1897-98. Accounts.		1898-99. Budget.	1898-99. Revised.	Accounts.
19,044,5	State Railways (gross) . .	19,382,9	19,696,1	19,613,9
2,201,4	Guaranteed Companies (net) .	2,424,0	2,995,0	3,082,7
15,0	Subsidised Companies . .	16,7	45,3	44,2
21,260,9	TOTAL .	21,823,6	22,736,4	22,740,8

202. *State Railways.*—The gross receipts were better by 569,4 than those of the previous year. The principal increases occurred on the East Indian, Rajputana-Malwa, North-Western, Oudh and Rohilkhand, and Bengal-Nagpur Railways.

203. On the East Indian Railway the increase was due chiefly to the exodus from Calcutta in May 1898 on account of the plague scare, to the increased movements of marriage parties, to the *Magh Mela* at Allahabad, and *Jain* fair at Hathras, and to heavy traffic in coal principally from the Jherriah Coal fields both for the public and foreign railways. On the Rajputana Malwa Railway the increase was due to the movement of passengers having been less restricted in consequence of the withdrawal of the stringent quarantine measures in connection with plague, to larger attendance at fairs, to the season having been considered propitious for marriages, and to an improvement in traffic in grain, pulse, oil seeds, salt, and sugar. The increase on the North-Western Railway was due to abnormal traffic in wheat exported *viâ* Karachi, and to the settlement of the large outstandings connected with the frontier expedition. On the Oudh and Rohilkhand Railway the increase was due to the opening of the Rae Bareli-Benares line, to the introduction of a system of fast trains, an improvement in 3rd class passenger traffic, and to better crops and larger exports. The increase on the Bengal-Nagpur Railway was due to the opening to traffic of the greater part of the extensions as well as to general development of traffic on the main line.

204. Compared with the Budget Estimate there was a net increase of 231,0. The chief increases were 160,8 on the East Indian Railway, and 291,7 on the North-Western Railway, due generally to the same causes which led to the increases on these lines, as compared with the actuals of the previous year. The principal decreases were 110,6 on the Southern Mahratta Railway due to the plague restrictive measures seriously interfering with the free movement of passengers, and to the absence of the famine traffic in food grains which marked the business of the railway during the previous year; 56,4 on the South Indian Railway due to the introduction of segregation and other plague precautionary measures having had an adverse influence on the movement of passengers, to local festivals having been poorly attended, and to the transfer of the Nellore-Gudur Section to the East Coast Railway in October 1898; and 59,0 on the Mysore State Railway due to disturbance of business by plague and its preventive measures.

205. *Guaranteed Railways.*—The net receipts were 881,3 above those of the previous year. The increase occurred on the Great Indian Peninsula and Bombay, Baroda and Central India Railways, due chiefly to heavier goods traffic consequent on richer crops and better trade prospects. The increase was to some extent reduced by a falling off in coaching traffic on the Madras Railway, due to the prevalence of plague and the attendant restrictions on the movements of passengers.

206. Compared with the Budget Estimate the net receipts show an increase of 658,7 due to the improvement in goods traffic on the Great Indian Peninsula and Bombay, Baroda and Central India Railways. The small increase of 87,7, as compared with the Revised Estimate, is due to improved traffic at the close of the year.

Section H.—RAILWAYS—RECEIPTS—*continued*.

STATE RAILWAYS—IMPERIAL.

East Indian Railway.

1897-98. Accounts.		1898-99. Budget.	1898-99. Revised.	1898-99. Accounts.
	EARNINGS—			
1,749,8	Coaching	1,700,0	1,790,0	1,799,2
4,065,7	Goods	4,055 5	4,158,8	4,114,5
69,0	Miscellaneous and Suspense	94,8	101,5	97,4
5,884,5	TOTAL	5,850,3	6,050,3	6,011,1

207. The receipts, compared with the actuals of the previous year, show an increase of 126,6. There was an increase of 49,4 under *Coaching* due to the exodus from Calcutta in May 1898 on account of the plague scare, to the increased movement of marriage parties, to the *Magh Méla* at Allahabad, and *Jain* fair at Hathras in February 1899. Under *Goods* there was an increase of 48,8 due chiefly to traffic in coal, principally from the Jherriah coal fields, both for the public and Foreign Railways. Compared with the Budget Estimate there was an increase of 160,8. The Budget Estimate was placed at a moderate figure, as it was not considered prudent to anticipate a continuance of quite such favourable traffic as obtained in 1897-98, but the causes mentioned above contributed most favourably towards developing the coaching and goods traffic.

Eastern Bengal Railway.

1897-98. Accounts.		1898-99. Budget.	1898-99. Revised.	1898-99. Accounts.
	EARNINGS—			
491,8	Coaching	500,0	491,5	496,5
949,5	Goods	931,5	826,5	821,7
88,9	Miscellaneous and Suspense	88,5	92,0	96,7
1,530,2	TOTAL	1,520,0	1,410,0	1,414,9

208. The receipts were worse than those of the previous year by 115,3. There was a decrease of 127,8 under *Goods* traffic due principally to indifferent jute crops, while the increase under *Coaching* was due to the rush of passengers out of Calcutta on the introduction of the plague regulations, and to large numbers of pilgrims having travelled during the lunar eclipses in July and December 1898. The decrease, as compared with the Budget Estimate, was also due to the jute traffic being smaller than anticipated.

Rajputana-Malwa Railway.

1897-98. Accounts.		1898-99. Budget.	1898-99. Revised.	1898-99. Accounts.
	EARNINGS—			
610,4	Coaching	727,5	675,0	674,0
1,326,1	Goods	1,430,0	1,642,5	1,621,2
38,0	Miscellaneous and Suspense	42,5	42,5	—9,1
1,974,5	TOTAL	2,200,0	2,360,0	2,286,1

209. Contrasted with the actuals of the previous year, the receipts show an increase of 311,6. Under *Coaching* there was an increase of 63,6 due to the movement of passengers having been less restricted in consequence of the withdrawal of the stringent quarantine measures in connection with the plague; to larger attendance at fairs, to the season having been considered propitious for marriages. The increase of 295,1 under *Goods* was due to an improvement in traffic in grain and pulse, oil seeds, salt and sugar. The same causes account for the differences as compared with the Budget Estimate.

Section H.—RAILWAYS—RECEIPTS—*continued.*

North-Western Railway.

1897-98. Accounts.		1898-99. Budget.	Revised.	Accounts.
	EARNINGS—			
1,291,7	Coaching	1,250,0	1,140,0	1,139,2
2,154,6	Goods	2,000,0	2,400,0	2,378,0
36,5	Miscellaneous and Suspense	100,0	120,0	124,5
3,482,8	TOTAL .	3,350,0	3,660,0	3,641,7

210. The receipts, as compared with the actuals of the previous year, show an increase of 158,9. The decrease of 152,5 under *Coaching* was due to the large receipts in 1897-98 on account of the frontier expedition. The increase of 223,4 under *Goods* was due to abnormal traffic in wheat exported *viâ* Karachi. The increase of 88,0 under *Miscellaneous* and *Suspense* was due chiefly to the large outstandings connected with the frontier expedition having been cleared during the year. The same causes account for the variations as compared with the Budget Estimate.

Oudh and Rohilkhand Railway.

1897-98. Accounts.		1898-99. Budget.	Revised.	Accounts.
	EARNINGS—			
375,2	Coaching	410,0	414,0	416,0
435,2	Goods	530,0	514,0	515,2
71,7	Miscellaneous and Suspense	60,0	77,0	77,6
882,1	TOTAL .	1,000,0	1,005,0	1,008,8

211. Compared with the actuals of the previous year there was an increase of 126,7. The increases under *Coaching* and *Goods* are attributable to the opening of the Rai Bareli-Benares Railway, to the introduction of a system of fast trains and improvement in 3rd class passenger traffic, and to better crops and larger exports. The differences, as compared with the Budget Estimate, were not large.

Bengal-Nagpur Railway.

1897-98. Accounts.		1898-99. Budget.	Revised.	Accounts.
	EARNINGS—			
132,7	Coaching	150,0	145,2	146,6
434,7	Goods	470,0	503,0	522,8
47,9	Miscellaneous and Suspense	60,0	71,8	68,7
615,3	TOTAL .	680,0	720,0	738,1

212. Compared with the actuals of the previous year there was an increase of 122,8 due to the opening of the greater part of the extensions to traffic, as well as to general development of traffic on the main line. Compared with the Budget Estimate there was an increase of 58,1, due to traffic during the last quarter of the year having been largely in excess of anticipations, and to the opening of the Kola-Cuttack sections earlier than was expected.

Section H.—RAILWAYS—RECEIPTS—*continued*.

Bengal and North-Western and Tirhoot Railways.

1897-98. Accounts.		1898-99. Budget	Revised.	Accounts.
	EARNINGS—			
240,5	Coaching	265,0	254,5	247,1
306,2	Goods	335,0	337,0	334,6
78,3	Miscellaneous and Suspense	75,0	78,5	81,7
625,0	TOTAL	675,0	670,0	663,4

213. Compared with the actuals of the previous year, there was an increase of 38,4 due to improvement in *Coaching* and *Goods* traffic and "Sundries." The decrease, as compared with the Budget Estimate, was due chiefly to the expected increase under *Coaching* traffic not having been fully realized.

Indian Midland Railway.

1897-98. Accounts.		1898-99. Budget.	Revised.	Accounts.
	EARNINGS—			
221,4	Coaching	219,0	228,6	228,9
374,3	Goods	369,0	389,4	394,8
21,3	Miscellaneous and Suspense	12,0	17,0	8,7
617,0	TOTAL	600,0	635,0	632,4
48,4	*Deduct*—Bhopal Railway earnings	50,0	60,0	61,0
568,6	Total Indian Midland Railway proper	550,0	575,0	571,4

214. Compared with the actuals of the previous year there was an increase of only 2,8. Compared with the Budget Estimate there was an increase of 21,4, which occurred chiefly under *Goods* traffic due to heavy outward and cross-traffic, which passed to Bombay for export.

Southern Mahratta Railway.

1897-98. Accounts.		1898-99. Budget.	Revised.	Accounts.
	EARNINGS—			
164,5	Coaching	163,0	132,5	133,1
443,5	Goods	435,5	365,5	365,4
9,5	Miscellaneous and Suspense	11,5	—3,0	9
617,5		610,0	495,0	499,4

215. The decrease, as compared with the actuals of the previous year and the Budget Estimate, was due to plague restrictive measures having seriously interfered with the free movement of passengers, and to the absence of the famine traffic in food grains which marked the business of the railway during 1897-98, when the movements of food stuffs were abnormally large.

South Indian Railway.

1897-98. Accounts.		1898-99. Budget.	Revised.	Accounts.
	EARNINGS—			
475,3	Coaching	485,0	427,0	426,4
390,0	Goods	398,0	380,0	394,1
29,1	Miscellaneous and Suspense	17,0	23,0	23,1
894,4	TOTAL	900,0	830,0	843,6

216. As compared with the previous year's actuals and with the Budget Estimate, there was a decrease under *Coaching* due to the introduction of segregation and other plague precautionary measures having had an adverse influence on the movement of passengers, to local festivals having been poorly attended, to the breaches in the main line in November and December 1898, and to the transfer of the Nellore-Gudur Section to the East Coast Railway in October 1898.

Section H.—RAILWAYS—RECEIPTS—*continued*.

Burma Railway.

1897-98. Accounts.		1898-99. Budget.	1898-99. Revised.	1898-99. Accounts.
	EARNINGS—			
434,7	Coaching	425,0	440,0	446,0
421,1	Goods	425,0	412,3	404,8
13,5	Miscellaneous and Suspense	15,0	12,7	16,9
869,3	TOTAL .	865,0	865,0	857,7

217. The increase under *Coaching* was due to improvement in passenger traffic, while the large falling off under *Goods* was due to a heavy decline in the paddy traffic, owing to the prices obtainable for this commodity in Rangoon having fallen so low as to deter traders from bringing in stock by rail in the usual quantities.

Other State Railways—Imperial.

1897-98. Accounts.	1898-99. Budget.	1898-99. Revised.	1898-99. Accounts.
1,042,0	1,124,5	999,0	1,010,1

218. Compared with the actuals of the previous year there was a decrease of 31,9, made up of total increases of 78,5 and decreases of 110,4. The principal increases were 35,6 on the Assam-Bengal Railway due to increased open mileage, and 14,5 on the Lucknow-Bareilly Railway due to exceptionally good winter harvests, and to the steady development of ordinary passenger traffic owing to the linking up of the metre gauge systems. The principal decreases were 14,6 on the Bengal Central Railway due to a fall in jute traffic owing to short crops, 24,9 on the Guntakal-Mysore Frontier Railway due to the prevalence of plague, and 68,9 on the Mysore State Railway due to the disturbance of business by plague and its preventive measures, and to the larger export traffic in 1897-98 in famine food stuffs. There were other small increases and decreases which are unimportant.

219. The actuals fell short of the Budget Estimate by 114,4. There were increases aggregating 45,4, of which the principal were 12,2, and 14,4 on the Assam-Bengal and Lucknow-Bareilly Railways, respectively, due generally to the same causes which accounted for the increase over the actuals of the previous year, whilst the decreases amounted to 159,8, of which 21,2 and 59,0 occurred on the Guntakal-Mysore Frontier and Mysore State Railways, respectively, due generally to the same causes which accounted for the decrease as compared with the actuals of the previous year, and 56,6 on the East Coast Railway due to portions of the Bezwada-Madras Railway not having been opened to traffic as early as anticipated.

STATE RAILWAYS—PROVINCIAL.

XXVII.—Guaranteed Companies—Net Traffic Receipts.

Accounts, 1897-98.			Guaranteed Railway Companies.	Budget, 1898-99.			Revised, 1898-99.			Accounts, 1898-99.			Guaranteed interest, 1898-99.	Percentage of charges on receipts.
Gross Receipts.	Working Expenses.	Net.		Gross Receipts.	Working Expenses.	Net.	Gross Receipts.	Working Expenses.	Net.	Gross Receipts.	Working Expenses.	Net.		
1,401,8	788,9	612,9	Bombay, Baroda and Central India	1,540,0	840,0	700,0	1,640,0	730,0	910,0	1,674,5	725,1	949,4	663,2	43'30
2,873,1	1,873,7	999,4	Great Indian Peninsula . .	3,050,0	1,876,0	1,174,0	3,690,0	2,100,0	1,590,0	3,683,0	2,054,3	1,628,7	1,788,8	55'78
1,139,7	550,6	589,1	Madras . .	1,100,0	550,0	550,0	1,025,0	530,0	495,0	1,023,5	518,9	504,6	804,4	50'70
5,414,6	3,213,2	2,201,4	Total .	5,690,0	3,266,0	2,424,0	6,355,0	3,360,0	2,995,0	6,381,0	3,298,3	3,082,7	3,256,4	51'69

Gross Receipts.

221. The actual receipts during the year under review exceeded those of the previous year by 966,4. The increase occurred on the B. B. and C. I. and G. I. P. Railways, due mainly to heavier traffic in grain and pulse following on richer crops and better trade prospects, while on the Madras Railway there was a decrease, mainly in coaching traffic, owing to the precautionary measures in connection with plague.

The gross receipts exceeded the Budget Estimate by 691,0 as under—

B. B. and C. I. Railway	+134,5
G. I. P. Railway	+633,0
Madras Railway	— 76,5

The increases on the B. B. and C. I. and G. I. P. Railways were due mainly to improved goods traffic, and the decrease on the Madras Railway to the continued prevalence of plague.

Working Expenses.

222. The total working expenses were more than those of the previous year by 85,1. The increase on the G. I. P. Railway was due chiefly to larger consumption of coal and other stores under Locomotive expenses, and to heavier repairs and renewals of Locomotive and Carriage and Wagon stock. The decreases on the B. B. and C. I. and Madras Railways are accounted for by smaller outlay on repairs and renewals of vehicles.

223. The actual expenses exceeded the provision made in the Budget Estimate by 32,3 made up of—

B. B. and C. I. Railway	—114,9
G. I. P. Railway	+178,3
Madras Railway	— 31,1

224. The increase on the G. I. P. Railway was due to heavier repairs and renewals of Locomotive and Carriage and Wagon stock, to larger issues of stores, and to the replacement of condemned Cammell's axles. The decrease on the B. B. and C. I. Railway was due chiefly to a special credit on account of contribution from Fire Insurance Fund towards the cost of renewal of Warren girders, and to reduced outlay on renewals of Carriage and Wagon stock. On the Madras Railway the decrease is accounted for by short outlay on repairs and renewals of engines and vehicles.

Section H.—RAILWAYS—RECEIPTS—*concluded.*

XXVIII.—Subsidised Companies (Repayment of Advances of interest).

1897-98. Accounts.		1898-99. Budget.	Revised.	Accounts.

38.—State Railways—Working Expenses.

1897-98. Accounts.		1898-99. Budget.	1898-99. Revised.	1898-99. Accounts.
9,201,2	EXPENDITURE . .	9,770,5	9,876,6	9,985,3

228. The details of these amounts by individual railways are given on page 91. An explanation of the variations, compared with the actuals of the previous year and the figures of the Budget Estimate, is given below.

229. Under Imperial there was an excess of 203,6 which still requires sanction. Under Provincial an excess of 8,5 occurred in Assam, of which 7,7 was covered by a reappropriation sanctioned by the Local Government; 1,0 occurred in Madras, and was sanctioned by the Local Government, and 1,7 occurred in Bombay, which, with the balance of 8 in Assam, still awaits sanction.

STATE RAILWAYS—IMPERIAL.

East Indian Railway.

1897-98. Accounts.		1898-99. Budget.	1898-99. Revised.	1898-99. Accounts.
	WORKING EXPENSES—			
403,0	Maintenance	504,5	450,6	492,6
472,4	Locomotive	501,5	605,0	610,6
146,7	Carriage and Wagon	199,9	221,2	227,7
352,3	Traffic	349,5	369,4	380,1
304,9	General, Miscellaneous and Suspense . . .	259,6	323,8	315,6
1,679,3	TOTAL WORKING EXPENSES .	1,815,0	1,970,0	2,026,6
273,9	Share of surplus profits paid to the Company, and contribution to Provident Fund	265,0	300,0	307,3
1,953,2	TOTAL .	2,080,0	2,270,0	2,333,9

230. The increase under *Maintenance* was due to arrears of relaying and repairs of the preceding year having been overtaken to a considerable extent. The increases under *Locomotive* and *Carriage and Wagon Expenses* were due to extensive repairs and renewals of stock, whilst the increase under *Traffic* expenses was due to increased traffic. Under *Company's share of Surplus Profits, etc.*, the increase was due to increased earnings.

Eastern Bengal Railway.

1897-98. Accounts.		1898-99. Budget.	1898-99. Revised.	1898-99. Accounts.
	WORKING EXPENSES—			
135,0	Maintenance	124,6	157,9	179,8
166,1	Locomotive	148,0	144,5	145,3
48,2	Carriage and Wagon	70,0	60,0	57,4
147,2	Traffic	148,0	153,3	158,0
169,9	General, Miscellaneous and Suspense . . .	149,4	124,3	123,9
666,4	TOTAL .	640,0	640,0	664,4

231. The increase under *Maintenance* was due to more relaying and renewals having been done, and to outlay incurred on the Borat and Daulatdia ghât lines and yards, and the increase under *Traffic* was due to the re-opening of the District Traffic Superintendent's office at Chitpore and to the opening of the first section of the Mymensing-Jagganathgunj Railway. The decrease under *Locomotive* was due to the debit in the previous year of the cost of 6 Locomotive engines replaced in 1896-97. The decrease under *General, Miscellaneous, and Suspense* was due to smaller charges for loading and unloading, and to smaller payments for hire of rolling-stock from other lines owing to the fall in goods traffic.

Rajputana-Malwa Railway.

1897-98. Accounts.		1898-99. Budget.	1898-99. Revised.	1898-99. Accounts.
	WORKING EXPENSES—			
202,2	Maintenance	230,3	244,4	260,8
341,2	Locomotive	389,2	370,0	362,8
92,4	Carriage and Wagon	93,4	9[illegible],7	91,7
161,9	Traffic	158,7	167,3	166,5
139,2	General, Miscellaneous and Suspense . . .	144,9	[illegible]	[illegible]
936,9	TOTAL WORKING EXPENSES .	1,016,5	1,096,3	1,1[illegible],5
56,1	Share of surplus profits paid to the Bombay, Baroda and Central India Railway Company, and contribution to Provident Fund	83,5	93,7	109,4
993,0	TOTAL .	1,100,0	1,1[illegible]0,0	1,212,9

N 2

Section H.—RAILWAYS—EXPENSES—*continued.*

232. Compared with the actuals of the previous year there was an increase of 58,6 under *Maintenance* due to heavy renewals of sleepers and fastenings, and to the relaying of the main line with 50 lbs. rails having been pushed on more vigorously. The increase of 21,6 under *Locomotive* expenses was due to increased train mileage run, and to more coal carried. The increase of 82,5 under *General, Miscellaneous and Suspense* was due almost entirely to the outlay on the conversion of the line from Ferozepore to Kotkapura. The increase of 53,3 in *Share of Surplus Profits, etc*, was due to the result of the year's working having proved more satisfactory. Compared with the Budget Estimate the variations under *Maintenance* and *Locomotive* were due to short provision having been made under the former, and excess provision under the latter head The excesses under *General, Miscellaneous, and Suspense* and *Share of Surplus profits, etc.*, in comparision with the Budget Estimate were due to outlay on the conversion of the line between Ferozepore and Kotkapura, and to the result of the year's working having proved more satisfactory than anticipated.

North-Western Railway.

1897-98. Accounts.		1898-99. Budget.	1898-99. Revised.	1898-99. Accounts.
	WORKING EXPENSES—			
558,7	Maintenance	688,5	518,0	549.2
691,7	Locomotive	650,0	720,8	707,0
121,4	Carriage and Wagon	155,0	191.8	196,6
277,6	Traffic	295,0	233,9	236,7
180,8	General, Miscellaneous and Suspense	211,5	185,5	176,0
1,830,2	TOTAL	2,000,0	1,900,0	1,915,5

233. Compared with the actuals of the previous year the decrease of 9,5 under *Maintenance* was due to smaller expenditure on special renewals of permanent-way, while the increase under *Carriage and Wagon* was due to heavy adjustments on account of renewals of stock. The saving of 139,3 under *Maintenance*, compared with the Budget Estimate, was due to failure on the part of the Bengal Iron and Steel Company to supply cast iron pot sleepers provided for, and to permanent-way material, indented for from England, not having arrived in time. The excess of 57,0 under *Locomotive* and of 41,6 under *Carriage and Wagon* were due to heavy repairs and renewals of locomotive and carriage and wagon stock.

Oudh and Rohilkhand Railway.

1897-98. Accounts.		1898-99. Budget.	1898-99. Revised.	1898-99. Accounts.
	WORKING EXPENSES—			
115,7	Maintenance	132,0	132,5	135,1
154,7	Locomotive	139,0	120,0	113,6
43,7	Carriage and Wagon	83,0	79,5	78,2
77,4	Traffic	86,0	80,5	85,3
70,0	General, Miscellaneous and Suspense	70,0	71,5	67,0
461,5	TOTAL	510,0	490,0	479,2

234. Contrasted with the actuals of the previous year, the increase under *Maintenance* was due to the cost of maintaining the additional length of open line, and to increased expenditure in the renewal and strengthening of girders. Under *Locomotive* the decrease was due to engines having been renewed in the previous year, while during the year 1898-99 expenditure was limited to ordinary repairs only. The increase under *Carriage* and *Wagon* was due to special renewals of goods vehicles. Compared with the Budget Estimate the decrease under *Locomotive* was due to savings under running expenses, maintenance and renewals of engines, and generally to savings under most sub-heads.

Bengal-Nagpur Railway.

1897-98. Accounts.		1898-99. Budget.	1898-99. Revised.	1898-99. Accounts.
	WORKING EXPENSES—			
70,2	Maintenance	97,5	104,9	103,1
92,8	Locomotive	103,0	103,3	104,0
26,0	Carriage and Wagon	27,5	20,7	20,6
55,8	Traffic	60,5	61,4	61,2
72,3	General, Miscellaneous and Suspense	71,5	73,7	66,8
317,1	TOTAL	360,0	370,0	361,7

235. The increase under *Maintenance* was due to Revenue having borne its share of the estimate for adding *Sál* sleepers to rails on the main line, and to the net outlay on relaying the Katni-Umaria section having been in excess of that of the previous year. The excess under *Locomotive* expenses was due to additional mileage worked in consequence of the opening of the extensions.

Section H.—RAILWAYS—EXPENSES—*continued.*

Bengal and North-Western and Tirhoot Railways.

1897-98. Accounts.		1898-99. Budget.	Revised.	Accounts.
	WORKING EXPENSES—			
71,6	Maintenance	74,6	79,0	80,5
54,5	Locomotive	57,0	58,0	61,9
15,5	Carriage and Wagon	19,0	18,0	15,2
48,1	Traffic	50,4	4[illegible],0	49,6
69,3	General, Miscellaneous and Suspense	84,0	76,0	79,3
184,3	Share of net earnings paid to the Company, and contribution to Provident Fund	215,0	210,0	195,9
443,3	TOTAL	500,0	490,0	482,4

236. Compared with the actuals of the previous year the variations are small except in the case of *Maintenance*, the increase under which was due to heavy expenditure on repairs to flood damages on the Tirhoot section, and the construction of an additional temporary pile bridge over the Gogra at Turtipur. Compared with the Budget Estimate, the variations under the several heads of expenditure are small.

Indian Midland Railway.

1897-98. Accounts.		1898-99. Budget.	Revised.	Accounts.
	WORKING EXPENSES—			
66,4	Maintenance	65,0	73,0	69,7
119,4	Locomotive	118,0	130,0	137,8
28,7	Carriage and Wagon	25,0	31,1	34,7
49,7	Traffic	49,0	47,9	50,2
77,3	General, Miscellaneous and Suspense	78,0	68,0	68,1
341,5		335,0	350,0	360,5
28,9	*Deduct*—Working expenses of Bhopal State Railway	30,0	35,0	35,9
312,6	Total Indian Midland Railway	305,0	315,0	324,6

237. The increase, as compared with the actuals of the previous year and the Budget Estimate, was due chiefly to increased engine-mileage run, to special repairs to engines, and coaching vehicles, and to special expenditure in fitting goods stock with heavier axles.

Southern Mahratta Railway.

1897-98. Accounts.		1898-99. Budget.	Revised.	Accounts.
	WORKING EXPENSES—			
83,7	Maintenance	82,5	85,5	81,6
125,2	Locomotive	122,9	108,5	107,7
26,7	Carriage and Wagon	30,4	32,5	32,3
61,8	Traffic	65,0	59,0	59,3
68,1	General, Miscellaneous and Suspense	65,2	69,5	70,5
365,5	TOTAL WORKING EXPENSES	366,0	355,0	354,4
72,4	Share of net earnings paid to the Company, and contribution to Provident Fund	64,0	40,0	40,3
437,9	TOTAL	430,0	395,0	394,7

238. The decrease under *Locomotive* and *Traffic* expenses, as compared with the actuals of the previous year and the Budget Estimate, was due to reduced train mileage run.

South Indian Railway

1897-98. Accounts.		1898-99 Budget.	Revised.	Accounts.
	WORKING EXPENSES—			
103,0	Maintenance	100,6	87,5	85,2
168,3	Locomotive	178,9	183,5	182,8

473,1	TOTAL WORKING EXPENSES	485,0	472,5	467,0
34,8	Share of Surplus profits paid to the Company, and contribution to Provident Fund	35,0	27,5	28,9
507,9	TOTAL	520,0	500,0	495,9

Section H.—RAILWAYS—EXPENSES—*continued.*

South Indian Railway—*continued.*

239. The working expenses show a decrease under *Maintenance* due to smaller renewals with 50 lbs. rails. The increase under *Locomotive* was due to the replacement of five condemned engines.

Burma Railways.

1897-98 Accounts.		1898-99. Budget.	1898-99. Revised.	1898-99. Accounts.
	WORKING EXPENSES—			
131,7	Maintenance	127,0	120,2	126,5
155,3	Locomotive	158,5	171,1	171,3
40,8	Carriage and Wagon	41,7	43,6	42,8
90,4	Traffic	90,9	95,0	95,2
85,0	General, Miscellaneous and Suspense	84,4	79,1	75,5
503,2	TOTAL WORKING EXPENSES	502,5	509,0	511,3
16,6	Share of surplus profits, etc.	17,5	16,0	15 8
519,8	TOTAL	520,0	525,0	527,1

240. Compared with the actuals of the previous year there was an increase of 7,3. The decrease under *Maintenance* was due to less relaying. The increase under *Locomotive* was due to increases to the subordinate superintendents and office establishments, and to increased train mileage run. The decrease under *General Miscellaneous and Suspense* was due to writes-back on account of redistributions of salaries of Indian management from 1st September 1896 to 31st December 1898 between Capital and Revenue, and to a refund of the cost of watch and ward establishment from 1st September 1896 to 30th September 1898.

Other State Railways—Imperial.

1897-98. Accounts.	1898-99. Budget	1898-99. Revised.	1898-99. Accounts.
679,6	729,8	713,9	713,9

241. Compared with the actuals of the previous year there was a net excess of 34,3. The increases aggregated 74,8, of which 48,1 occurred on the Assam-Bengal Railway due to proportion of repairs of damage, caused to the line by the earthquake of 12th June 1897, having been charged to Revenue, and 13,2 on the East Coast Railway due chiefly to the opening of the Bezwada-Madras Railway. The decreases amounted to 40,5, of which 10,2 and 26,0 occurred on the Guntakal-Mysore Frontier and Mysore State Railways, respectively, due to less train mileage worked.

242. Compared with the Budget Estimate there was a net decrease of 15,9. The principal increase, 33,9, occurred on the Assam-Bengal Railway, and the more important decreases were 9,0 and 19,4 on the Guntakal-Mysore Frontier and Mysore State Railways, respectively, due generally to the causes which accounted for the variations, as compared with the actuals of the previous year.

State Railways—Provincial.

1897-98. Accounts.	1898-99 Budget.	1898-99 Revised.	1898-99 Accounts.
44,7	40.7	50,4	51.9

243. The principal variation was the increase on the Cherra-Companyganj Railway due to repairs of the damages caused by the earthquake of June 1897.

Section H.—RAILWAYS—EXPENSES—*continued.*

38.—State Railways.

Interest on Debt.

1897-98. Accounts.		1898-99. Budget.	1898-99. Revised.	1898-99. Accounts.
3,991,3	INTEREST ON CAPITAL FOUND BY GOVERNMENT	4,185,5	4,135,1	4,159,7

5,509,1	TOTAL INTEREST ON DEBT	5,697,3	5,585,5	5,612,0

244. There was a decrease in the actuals, as compared with those of the previous year and with the Budget Estimate, in charges for exchange owing to the rise in the rate of exchange. Omitting exchange the charges approximate closely to the Budget Estimate, but exceed those of the previous year owing to the Capital found by Government increasing year by year with the progress of construction.

Interest on Capital found by Government.

245. The following statement shows how the interest charged in the accounts of 1898-99 has been computed :—

CAPITAL EXPENDITURE ON WHICH INTEREST IS CHARGEABLE.

	E. I. Ry. 3½ per cent.	E. I. Ry.	E. B. Ry.	Other State Railways.	TOTAL.
Capital Expenditure at end of 1897-98	—254,4	3,994,3	8,159,6	85,171,3	97,070,8
Capital Expenditure during 1898-99	1,256,0	...	233,3	3,472,0	4,961,3
Capital Expenditure at end of 1898-99	1,001,6	3,994,3	8,392,9	88,643,3	102,032,1
Debentures discharged	...	3,546,7	815,6	...	4,362,3
INTEREST.					
Interest on Capital Account at beginning of the year	—8,9	159,8	326,4	3,406,9	3,884,2
Interest on Debentures, etc., discharged	...			...	174,5
Half a year's interest on Capital spent during the year	21,9	141,9 ...	32,6 4,7	69,4	96,0
TOTAL	13,0	301,7	363,7	3,476,3	4,154,7
Add—½ per cent. on the Holkar Loan of a crore, which bears 4½ per cent. interest	...	...	...	5,0	5,0
TOTAL INTEREST CHARGED, 1898-99	13,0	301,7	363,7	3,481,3	4,159,7
" " " 1897-98	—14,3	301,7	348,5	3,355,0	3,991,3

Section H.—RAILWAYS—EXPENSES—*continued.*

Annuities in Purchase of Guaranteed Railways (including Sinking Funds).

1897-98. Accounts.		1898-99. Budget.	1898-99. Revised.	1898-99. Accounts.
	ENGLAND—			
1,178,6	East Indian Railway	1,180,6	1,180,6	1,180,6
121,9	Eastern Bengal Railway	122,0	122,0	122,0
411,9	Sind, Punjab and Delhi Railway	413,2	411,4	411,4
1,712,4	TOTAL ENGLAND	1,715,8	1,714,0	1,714,0
964,3	EXCHANGE	960,9	857,0	860,5
2,676,7	GRAND TOTAL	2,676,7	2,571,0	2,574,5

246 The sterling payments agree closely with the actuals of the previous year and the Budget Estimate, but the charge for exchange was lower than the actuals of the previous year and the Budget Estimate, owing to the rise in the rate of exchange.

Interest chargeable against Companies on advances.

1897-98. Accounts.		1898-99. Budget.	1898-99. Revised.	1898-99. Accounts.
	INDIA—			
73,7	Bengal-Nagpur Railway	113,5	111,4	111,8

Section H.—RAILWAYS—EXPENSES—*continued.*

39.—Guaranteed Companies—Surplus Profits, Land and Supervision—*continued.*

Surplus Profits.

249. The increase, as compared with the actuals of the previous year, was due chiefly to no surplus having been earned by the Great Indian Peninsula Railway in the first half of 1897, and to the share of surplus profits paid to the Bombay, Baroda and Central India Railway Co. having been larger owing to the increase in net earnings. Contrasted with the Budget Estimate, the increase arose from the improvement in traffic on both the Great Indian Peninsula and Bombay, Baroda and Central Railways.

Land and Supervision.

250. The increase, as compared with the actuals of the previous year, was due mainly to more extensive acquisition of land required for the Calicut-Cannanore extension of the Madras Railway. The lapse on the Budget and Revised Estimates was due to the provision for land required for the Madras and Great Indian Peninsula Railway Extensions not having been utilised in full, owing to delay in the acquisition proceedings connected with the settlement of certain questions relating to alignment and gauge to be adopted.

251. The excess under this head 85,4 requires to be sanctioned.

39.—Guaranteed Companies—Interest.

1897-98. Accounts.		1898-99. Budget.	1898-99. Revised.	1898-99. Accounts.
	INTEREST—

Section II.—RAILWAYS—EXPENSES—*continued.*

40.—Subsidised Companies—Land, Subsidy and Interest—*continued.*

253. Compared with the actuals of the previous year there was a net decrease of 9,4, made up of increases, chiefly on the Brahmaputra-Sultanpur, Hardwar-Dehra and Tapti Valley Railways; and decreases of 38,3, of which 33,9 occurred on the Bengal and North-Western Railway due to large payments during the preceding year on account of land acquired for the Ganges-Gogra Doab lines. Compared with the Budget Estimate, the lapse was due chiefly to amounts set aside for the Bhagulpore-Bansi Baidyanath, Chandipore-Taki, Gogri-Baptiahi, Amritsar-Tarn-Taran, Kurnool Branch, Madura Paumban, Ahmedabad-Dholka, Nariad-Kapadvang, Barsi-Pandharpur-Sangola and Jullunder-Hoshiarpur Railways not having been utilised, and to less land having been acquired for the Brahmaputra-Sultanpur, Mymensingh-Jamalpur, Bengal and North-Western, Nilgiri, South Behar and Tapti Valley Railways than provided for.

7	TOTAL PROVINCIAL	...	—5	—5
16,2	TOTAL IMPERIAL AND PROVINCIAL	80,0	64,1	54,3

254. The total outlay under *Imperial* is more than that of the previous year by 39,3. No useful comparison can be made between the outlay of the two years by individual projects, as surveys are being completed and new surveys are being started every year. During the year new surveys were taken in hand, and others, for which provision was made in the Budget Estimate, were not commenced, the result being that the expenditure was less by 25,7 than the Estimate.

Section J.--IRRIGATION.

255. The following is a general summary of the results under the head Irrigation :—

1897-98. Accounts.		1898-99. Budget.	1898-99. Revised.	1898-99. Accounts.
	Major Works—			
2,377,7	Direct Receipts	2,032,0	2,225,2	2,212,9
964,7	Land Revenue due to Irrigation	972,0	989,7	1,008,8
3,342,4	TOTAL RECEIPTS	3,004,0	3,214,9	3,221,7
892,1	Working Expenses	918,6	931,0	940,4
1,284,3	Interest	1,314,5	1,313,6	1,312,7
2,176,4	TOTAL EXPENDITURE	2,233,1	2,244,6	2,253,1
1,166,0	Net Receipts (Major Works)	770,9	970,3	968,6
	Minor Works and Navigation—			
227 4	Receipts (excluding Land Revenue)	224,1	246,8	241,4
967,7	Expenditure	980,0	977,5	940,3
740,3	Net Expenditure (Minor Works)	755,9	730,7	698,9
425,7	Net Revenue (Irrigation)	15,0	239,6	269,7

256. The final net result of the year was worse than the actuals of the previous year by 156,0, owing chiefly to the revenue during 1897-98 having been abnormally large on account of drought. The net result would have been still more unfavourable but for an increase of revenue due to the development of irrigation from the Chenab canal in the Punjab and the Kistna delta system and Periyar project in Madras. The better result, as compared with the Budget Estimate, was mainly due to the irrigation of a larger area than was anticipated.

Section J.—IRRIGATION—RECEIPTS.

1897-98. Accounts.		1898-99. Budget.	1898-99. Revised.	1898-99. Accounts.
3,569,8	REVENUE . . .	3,228,1	3,461,7	3,463,1

257. The actual receipts in 1898-99 fell short of those of the previous year by 106,7. The decrease was mainly due to the revenue during 1897-98 having been abnormally large owing to the exceptionally dry nature of the seasons. The increase of 235,0 over the Budget Estimate was due chiefly to the areas irrigated having exceeded expectations, and partly to the recovery of outstanding balances.

XXIX and 42.—Major Works.

Direct Receipts and Working Expenses.

Section J.—IRRIGATION—RECEIPTS—*continued.*

Direct Receipts—Imperial Works.

258. The *gross revenue* in 1898-99 shows an increase of 257,4 over that of the previous year. Of this increase 236,9 represents half the amount of net revenue from Major Irrigation Works in the North-Western Provinces and Oudh which was transferred from Provincial to Imperial under the new provincial settlement. The increase in the Punjab is ascribed to the extension of irrigation from the Chenab canal and the recovery of outstanding balances on the Western Jumna canal. The decrease of 54,3 on the Sirhind canal was due to the receipts in 1897-98 having been abnormally high owing to drought. The increase in Bombay was due chiefly to the expansion of irrigation and recovery of outstanding balances on the canals in the Deccan and Gujarat, and partly to a better supply of water in the canals in Sind. The increase of 129,1 over the Budget Estimate was due chiefly to the areas irrigated from the canals in the Punjab and the North-Western Provinces having exceeded expectations, and partly to the recovery of outstanding balances on the Western Jumna canal.

Direct Receipts—Provincial Works.

259. The *gross receipts* in 1898-99 were less than those of the previous year by 422,2. The decrease was due partly to the return to normal conditions, the receipts during 1897-98 having been abnormally high owing to the unusually dry nature of the seasons, and partly to the transfer of 236,9 representing half the amount of net revenue in the North-Western Provinces and Oudh from Provincial to Imperial. The actuals exceeded the Budget Estimate by 51,8. The increase was contributed chiefly by the North-Western Provinces and Oudh, where a larger area was irrigated than was anticipated. The increase in Bengal was due to prompt realizations of water-rates and to increased revenue from rent of lands on the Sone canals.

XXIX.—Major Works—Indirect Receipts.

Portion of Land Revenue due to Irrigation.

1897-98. Accounts.		1898-99. Budget.	1898-99. Revised.	1898-99. Accounts.
117,5	N.-W. Provinces and Oudh	117,5	117,5	117,5
57,9	Punjab	69,0	65,5	67,9
675,1	Madras	679,4	694,8	714,2
114,2	Bombay	106,1	111,9	109,2
964,7	TOTAL	972,0	989,7	1,008,8

260. The actuals for 1898-99 exceeded those of the previous year by 44,1 and the Budget Estimate by 36,8. The increase over the previous year was due partly to the development of irrigation from the Chenab canal and the Periyar project, and partly to more dry lands on the Kistna delta system having been converted into wet lands. The increase over the Budget Estimate was due to the latter cause.

Section J.—IRRIGATION—RECEIPTS—*concluded.*

227,4			224,1		246,8		241,4	

A.—Imperial. B.—Provincial and Local.

Imperial Works.

261. The actual receipts during 1898-99 exceeded those of the previous year by 19,6, and the Budget Estimate by 16,4. The increase occurred chiefly in the Punjab, and was due to the revenue in the Montgomery District, which was hitherto shown as *Indirect*, having been treated as *Direct Receipts* in the accounts for 1898-99 in accordance with the new schedule of water-rates; also to better irrigation from the Indus canals.

Provincial and Local Works.

262. The decrease in the receipts during 1898-99, as compared with those of the previous year and the Revised Estimate, was mainly due to a falling off of the navigation receipts from the canals in Bengal. The increase of 6,3 over the Budget Estimate in Burma was due to increased traffic on the Pegu and Sittang canal.

Section J.—IRRIGATION—EXPENDITURE.

1897-98. Accounts.		1898-99. Budget.	Revised.	Accounts.
3,144,1	EXPENDITURE . . .	3,213,1	3,222,1	3,193,4

263. The increase of 49,4 in the expenditure during 1898-99 over that of the previous year was partly in the cost of working and maintenance, due to the expansion of irrigation, and partly in the interest charges on the capital outlay of the year. The saving, as compared with the Budget and Revised Estimates, was due to the requirements under Minor Works and Navigation having been over-estimated. The savings under Exchange Compensation Allowance amounted to 3,5.

42.—Major Works—Working Expenses.

1897-98. Accounts.		1898-99. Budget.	Revised.	Accounts.
506,2	Imperial Works	528,0	537,4	538,1
385,9	Provincial Works	390,6	393,6	402,3
892,1	TOTAL .	918,6	931,0	940,4

(For details see page 110.)

Imperial Works.

264. The expenditure in 1898-99 exceeded that of the previous year by 31,9. The increase was mainly due to increased maintenance charges on the canals in the Punjab owing to the expansion of irrigation. There was a decrease of 8,8 in Bombay due to the expenditure in 1897-98 having been very large, owing chiefly to the transfer to this head of the normal expenditure on famine relief work on the Lakh canal and the Ekruk and Mhasvad tanks.

265. The Budget grant was increased to 537,4 by additional grants amounting to 9,4 sanctioned by the Finance Department during the course of the year for certain urgent repairs and for increased collection charges necessitated by increased irrigation in the Punjab. Against this, the actuals amounted to 538,1, resulting in a small excess of 7, which still requires to be sanctioned.

Provincial Works.

266. The expenditure in 1898-99 exceeded that of the previous year by 16,4 and the Budget Estimate by 11,7. The increase occurred in the North-Western Provinces and Oudh, and was due chiefly to the write-back, under the orders of the Government of India, from 49—Irrigation, to this head of 11,8, by which sum the Capital account of the Fatehpur Branch of the Lower Ganges canal was overcharged in previous years on account of the share of direction and accounts establishment, and partly to increased expenditure on maintenance and repairs and tools and plant in the Narora division of the Lower Ganges canal. The short outlay of 6,7 in Bengal, as compared with the Revised Estimate, was due chiefly to the share of establishment charges, debitable to the Buildings and Roads branch on account of work done for that branch, having been under-estimated. The excess was sanctioned by the Local Government.

967,7			980,0		977,5		940,3	

A. Imperial. B. Provincial and Local.

Imperial Works.

268. The expenditure in 1898-99 was less than that of the previous year by 9,3. The decrease was due partly to a smaller grant having been made available for expenditure and partly to the normal expenditure on famine relief work on the Ghaggar canal having been added to the expenditure under this head in the accounts for 1897-98. The Budget Estimate was prepared for 290,3, against which the actuals amounted to 286,9.

Provincial Works.

269. The decrease of 18,1, as compared with the actuals of the previous year, is made up of an increase of 10,6 in Burma and a decrease of 31,6 in Bengal. The increase in Burma was due to a larger programme of expenditure in Upper Burma, and the decrease in Bengal was principally due to the approaching completion of works in connection with the canalization of the Bhangur khal in the Calcutta and Eastern canals. In the Budget Estimate the requirements of several works in Burma, Bengal, North-Western Provinces and Oudh and Madras were over-estimated.

Section K.—BUILDINGS AND ROADS—RECEIPTS.

1897-98. Accounts.		1898-99. Budget.	Revised.	Accounts.
667,8	RECEIPTS	678,7	696,4	705,0

270. The receipts in 1898-99 exceeded those of the previous year by 37,2 and the Budget Estimate by 26.3. The increase was made up of various items, the most important being an improvement under road tolls and ferry receipts.

XXXI.—Military Works.

1897-98. Accounts.		1898-99. Budget.	Revised.	Accounts.
41,9	India	40,8	44,4	44,4
7,5	Burma	6,8	7,2	7,2

1,3	Punjab	1,0	9	7
3	Madras	3	3	4
9	Bombay	9	9	9
52,6	TOTAL	50,3	54,2	54,2

271. The actual receipts during 1898-99 were better than those of the previous year by 1,6 and the Budget Estimate by 3,9. The increase was chiefly due to the sale to His Highness the Nizam's State Railway of barracks and other buildings in the old lancer lines at Secunderabad.

A.—Public Works in charge of Departmental Officers. B.—Public Works in charge of Civil Officers.

Imperial Works.

272. The differences under this head are inconsiderable.

Provincial Works.

273. The receipts by departmental officers during 1898-99 exceeded those of the previous year by 8,9. The increase was due to the realization in Bombay of balances of toll receipts outstanding at the close of the previous year. The increase of 3,5 in the North-Western Provinces and Oudh was chiefly due to the realization of much larger profits from the Roorkee workshops and of larger arboricultural receipts. In the Punjab and Burma the sale-proceeds of lands and buildings were not so large as in the previous year.

274. The increase of 7,8 over the Budget Estimate was contributed by Burma, North-Western Provinces and Oudh, and the Punjab. The increase in Burma was due chiefly to additional rentable quarters having been provided. The increase in the North-Western Provinces and Oudh was due to better profits from the Roorkee workshops and larger receipts from arboriculture. In the Punjab the receipts were under-estimated.

275. The receipts by Civil officers exceeded those of the previous year and the Budget Estimate by 11,2 and 10,6, respectively. The increase occurred chiefly in Bengal, North-Western Provinces and Oudh and the Punjab. The increase in Bengal was due to a rise in the realizations from "Ferry tolls." The increase in the North-Western Provinces and Oudh was due chiefly to the sale of the steamer and plant of the Ghazipur steam ferry to the Bengal and North-Western Railway Company. The increase in the Punjab was due to larger sales of lands and buildings.

Local Works.

276. The increase in the revenue realized by departmental officers during 1898-99 over that of the previous year and the Budget was due to the amount recovered from the Assam-Bengal Railway on account of compensation for the district road from Gauhati to Kalang river made over to them.

277. The revenue realized by Civil officers in 1898-99 exceeded that of the previous year by 10,0. The increase was due to an improvement in road tolls in Bombay and in ferry and miscellaneous receipts in Madras and Burma. Owing to the latter cause, the actual receipts in Madras and Burma also exceeded the Budget Estimate. The decrease of 8,5 in Bombay, as compared with the Budget Estimate, was mainly due to the recovery under ferry receipts, road tolls, and contributions for Public Works turning out to be less than was anticipated owing to the continuance of famine and plague.

Section K.—BUILDINGS AND ROADS—EXPENDITURE.

1897-98. Accounts.		Budget.	1898-99. Revised.	Accounts.
5,418,9	EXPENDITURE	6,021,5	5,842,1	5,868,8

278. The expenditure during 1898-99 exceeded that of the previous year by 449,9. The increase was due to the restriction of expenditure in 1897-98 in consequence of famine. The decrease of 152,7, as compared with the Budget Estimate, was due partly to the curtailment of expenditure in Madras and Bombay to provide funds for plague purposes, and partly to the requirements for several works in the other Provinces having been over-estimated. The saving under Exchange Compensation Allowance under Military Works was 9, and under Civil Works 5,0.

279. The actual expenditure during 1898-99 exceeded that of the previous year by 43,2, which is made up of an increase of 73,1 in the expenditure in India and of a decrease of 29,9 in the expenditure in England, including exchange. The increase in the Indian expenditure occurred under India, Bengal and the Punjab. The increase under India was due partly to the restriction of expenditure in the previous year, and partly to requirements during 1898-99 arising out of recent extensions on the North-West Frontier, in particular the construction and improvement of fortifications at Malakand and the Samana range, and the provision of defensible accommodation for troops at Chakdara. In Bengal the increase was due to larger expenditure on the quarters for military students. The increased expenditure in the Punjab was incurred on the Bannu-Datta Khel road, accommodation for troops in the Tochi Valley and the collection of metal for special repairs to the North-West Frontier road. The decrease in the expenditure in England was due to the demand for stores during 1898-99 having been smaller than in the previous year. The total expenditure of the year in India worked up closely to the Budget Estimate. The variations, as compared by provinces, were due to modifications of the Budget programme, which were sanctioned by the Government of India during the course of the year. The excesses were met by re-appropriation. The increase in the expenditure in England was due to a larger demand for stores.

Imperial Works.

280. *Departmental Officers.*—The expenditure in 1898-99 exceeded that of the previous year by 103,4. The increase was due to larger grants having been assigned for expenditure in 1898-99 than in the previous year. In the Budget Estimate the requirements of some works in Bengal and under India General and Political were over-estimated.

281. *Civil Officers.*—The increase was due to a larger programme of works in 1898-99.

Provincial Works.

282. *Departmental Officers.*—The expenditure in 1898-99 exceeded that of the previous year by 264,0. The increase was due to the restriction of expenditure during 1897-98 in consequence of plague and famine. The increase would have been larger had it not been for repairs of earthquake damages to buildings in Assam and Bengal in 1897-98. In the Budget Estimate the requirements for works in Burma and Bombay were over-estimated. The increase of 12,9 in the Punjab was due to the construction of Civil buildings at Lyallpur, and was covered by additional grants sanctioned by the Local Government.

283. *Civil Officers.*—The expenditure in 1898-99 was 27,8 less than that in the previous year. The decrease occurred principally in Burma, Assam, and Madras. In Burma and Assam the decrease was due to smaller contributions given to Municipal, Town and Cantonment Funds. The decrease in Madras was due to a smaller grant having been provided for expenditure in 1898-99 on the construction of new buildings than in the previous year. Compared with the Budget Estimate, the actuals show a decrease of 15,2, which occurred chiefly in the North-Western Provinces and Oudh, the Punjab and Madras. The decrease in the North-Western Provinces and Oudh was due to the ferry at Ghazipur being now worked by the Bengal and North-Western Railway Company. In the Punjab the decrease was due to payment not having yet been made to the Lyallpur Municipality of the unspent balance of receipts from the sale of town sites in Lyallpur. The decrease in Madras was chiefly due to non-payment of grants to municipalities for water-supply of towns.

Local Works.

284. *Departmental Officers.*—The expenditure in 1898-99 exceeded that of the previous year by 47,4. The increase was due chiefly to a larger programme of works in Burma and the North Western Provinces and Oudh and the Punjab, the expenditure in the previous year having been restricted. The actual expenditure of the year fell short of the Budget Estimate by 15,7. The excess in the Punjab has been sanctioned.

285. *Civil Officers.*—The total expenditure in 1898-99 was only 6,1 less than that of the previous year; but compared by Provinces, there were large variations in Bengal, Madras, and Bombay. The increase of 18,4 in Bengal was due to the restriction of expenditure in the previous year in consequence of famine. The decrease of 15,2 in Madras and 16,3 in Bombay was due to curtailment of expenditure to provide funds for plague purposes. Owing to this cause the actuals also fell short of the Budget Estimate. In Burma the requirements of the year were over-estimated.

26,996,8	TOTAL .	25,055,9	24,051,3	24,010,7

287. The receipts in India exceeded the Budget Estimate and the actuals of the previous year by 5,7 and 29,3, respectively. The small improvement over the Budget does not call for any special remarks. The increase, as compared with the previous year, occurred chiefly under Commissariat, due to a larger consumption of malt liquor, and to larger recoveries on account of Occupation of Chitral and its communications and the Tochi Field Force, and under Ordnance Establishments, Stores, etc., owing to larger sales of unserviceable stores and camp equipage, partly counterbalanced by smaller recoveries in connection with Military operations.

288. The receipts in England exceeded the Budget Estimate by 7,8, chiefly in the value of articles in possession of regiments on their transfer from the Indian to the British Establishment and sales of unserviceable stores.

289. The following statement shows separately the ordinary and special charges included under expenditure in India :—

1897-98. Accounts.			1898-99. Budget.		Revised.		Accounts.	
		SPECIAL ITEMS :—						
3,848,0		Military operations on the N.-W. Frontier . .	1,368,0		1,023,7		1,057,5	
188,5		Other special services .	(a)472,7		526,0		492,0	
	4,036,5			1,840,7		1,549,7		1,549,5
	16,326,1	Other Charges . .		16,243,1		16,015,5		15,939,6
	20,362,6	TOTAL .		18,083,8		17,565,2		17,489,1

(a) Includes 90,0 on account of Kohat-Kurrum Force provided in the Estimate under Military Operations on the N.-W. Frontier.

Section L.—ARMY SERVICES—*continued.*

290. The total Budget provision and actual expenditure under Military operations on the North-West Frontier are shown in detail below:—

	1898-99. Budget.	Accounts.
Charges for—		
North-West Frontier Field Operations	1,355,0	1,024,8
Tochi Field Force	5,0	26,2
Mekran	8,0	6,5
TOTAL	1,368,0	1,057,5

291. The large saving under North-West Frontier Field Operations was due to provision having been made for the maintenance of the Tirah Expeditionary Force for three months of 1898-99, whereas the Force was demobilized in April 1898, when the Khyber Force was organized, which, in its turn, was reduced, and the Khyber Brigade, including the moveable column, formed. The decreases due to these causes were partly counterbalanced by payment of field gratuity which was not provided for. The excess under Tochi Field Force was due to the grant of field gratuity to the troops engaged in the operations, and to larger arrear payments than were anticipated.

292. The total Budget provision and actual expenditure for Other Special Services are shown in detail below:—

	1898-99. Budget.	Accounts.
Charges for—		
Occupation of Chitral and its communications	238,8	237,1
Wano Garrison	26,6	25,6
Tochi Garrison	60,2	89,2
Gilgit Agency	26,4	27,4
Kajuri Kach and Jondola Garrisons	10,0	9,2
Kengtung Garrison	20,7	14,9
Kohat-Kurrum Force	90,0	81,6
Burma-China Boundary Commission Escort	...	7,0
	472,7	492,0

293. The excess under Tochi Garrison was due to the augmented strength of the garrison having been maintained for a longer period than was intended when the Estimate was framed. The charges under Burma-China Boundary Commission Escort were met by a transfer of 9,3 from the Civil Estimates under 25 - Political, under which head provision for the escort was made in Burma. The saving under Kengtung Garrison was due to short strength, more favourable rates of supplies and utilization of Government Transports, and that under Kohat-Kurrum Force to an over-estimate.

294. The details of the reduction of 303,5 in the ordinary expenditure, as compared with the Budget, are shown by the following figures:—

	Budget.	1898-99. Accounts.	Excess + Reduction—
Army and Garrison Staff	534,3	518,9	—15,4
Regimental Pay	8,370,2	8,100,0	—270,2
Commissariat	3,330,3	3,319,2	—11,1
Remount	352,1	297,5	—54,6
Clothing	281,6	264,8	—16,8
Medical	734,6	727,0	—7,6
Ordnance	773,3	826,0	+52,7
Miscellaneous	96,0	97,2	+1,2
Other heads	1,770,7	1,789,0	+18,3
TOTAL	16,243,1	15,939,6	—303,5

Section L.—ARMY SERVICES—*continued.*

295. The principal savings are given below :—

(1) Smaller payments of Exchange Compensation Allowance, owing to the actual rates of payment being more favourable than that adopted in the Budget	45,5
(2) Savings due to the retention in Mombassa of the 27th Bombay Infantry and Head-Quarters Wing, 4th Bombay Rifles, for a longer period than was anticipated	28,9
(3) Savings due chiefly to the establishment of British Infantry in India having been short by one battalion for a part of the year	37,0
(4) Transfer to the Civil Department of the charge for the pay of soldiers and medical officers on plague duty . . .	24,9
(5) Savings due to smaller purchases of transport animals, remounts, young stock and of Ordnance mules	37,4
(6) Smaller purchase of malt liquor, owing to decreased consumption	30,0
(7) Lapse of Provision made in the Budget for an increased establishment of officers for the Commissariat Transport Department	20,0
(8) Savings due to fall in prices of food supplies for men and animals	50,0
(9) Transfer to the Military Works Estimate of the provision made for the Barrack Department, Madras	11,3
(10) Less non-effective charges	24,2
(11) Saving due to the ordinary charges on account of the 1st Bengal Infantry stationed at Mauritius having been borne by the Home Government	17,9
	327,1

The only considerable excesses are :—

Excess due to the deduction made under Ordnance in the India Estimates to adjust the excess provision in the Home Estimates	47,2
Issue of a larger number of medals on account of the North-West Frontier Operations	4,9
	52,1

296. As compared with the previous year the decrease was chiefly (2,790,5), due to the cessation of the Military operations on the North-West Frontier. These savings were counterbalanced to the extent of 303,5 by increased expenditure under Other Special Services, which occurred chiefly in connection with the Occupation of Chitral and its communications, the Tochi Garrison, the Kohat-Kurram Force, and the Burma-China Boundary Commission Escort. Under ordinary charges there was a saving of 386,5, due chiefly to a decrease in the pay of British soldiers and in Exchange Compensation Allowance, consequent on an improvement in the rate of exchange; to the absence of Native troops at Mombassa and Mauritius; to the transfer of the Barrack Department, Madras, to the Military Works Department; to smaller local purchases of Medical and Ordnance supplies; and to the absence of expenditure on account of famine against the heavy charges incurred on this account in the previous year. These decreases were partly counter balanced by increases due to charges on account of messing allowance sanctioned, with effect from 1st June 1898; to more extensive ordinary reliefs of British and Native troops; to larger purchases of remounts; and to larger cost of war medals.

Section L.—ARMY SERVICES—*concluded.*

297. The expenditure in England showed a saving as compared with the Budget, due chiefly to a smaller demand for Ordnance stores; to less payments than anticipated on account of pay and pension of non-effective and retired officers of the Indian Service; to the absence on furlough in England of fewer officers than was expected; partly counterbalanced by increased payments to the War Office in respect of British Forces serving in India, and of retired pay, etc., of British Forces for service in India.

26,1	EXCHANGE	27,6	29,9	28,7
881,9	GRAND TOTAL	909,9	924,8	924,5

298. There was an improvement of 5,7 in the receipts in India as compared with the Budget. This was mainly the result of increases under *Ordnance* (13,6), and *Military Operations on the North-West Frontier* (18,3), and a falling off of 29,1 under *Commissariat*. The improvement under *Ordnance* was chiefly due to exceptionally large sales of unserviceable stores and camp equipage (13,4), to larger demands from the Hyderabad Contingent (1,0), and to issues of Europe stores to the Uganda Regiment, the Mombassa Contingent, and the Imperial Government, London, counterbalanced to the extent of 2,4 by smaller issues to the Civil Department. The increase under *Military Operations on the North-West Frontier* was due chiefly to unexpectedly large recoveries in connection with the North-West Frontier Field Operations (15,0), and to unexpected receipts on account of the Tochi Field Force (2,4). The decrease under *Commissariat* was due chiefly to smaller issues of malt liquor owing to the absence of a large number of British troops on field service, where such liquor is not issued (27,5), to smaller sales of rum (2,0), and to smaller receipts than was anticipated under Special Services (1,6), partly counterbalanced by larger sales of provisions and stores (9), by the issue of stores to the Imperial Government, London, (1,5), and by better profits from the operations of dairy farms (9).

299. The decrease of 1,5 under *Regimental Pay* was due chiefly to smaller receipts on account of fines; that of 1,0 under *Medical Establishments, Supplies and Services* was due to smaller issue of Medical stores to the Civil Department, to return of stores from famine relief camp hospitals, and to lower rates for recoveries for English stores consequent on an improvement in exchange; and that under *Miscellaneous Services* (2,1) was mainly due to fewer fines and confiscations of earnest money and security deposits of contractors. The improvement of 1,2 under *Remount and Veterinary Establishments* was due to larger sales of country-bred horses (4,6), and to the sale of chargers to His Excellency the Viceroy (7), partly counterbalanced by fewer castings and fewer sales of chargers to officers (3,7);

that under *Military Pensions to Natives* (1,8) was due to recoveries of pension contributions from the Central African Administration; and that under *Widows' Pensions and Compassionate Allowances* (3,0) was due to an increase in the number of subscribers, and to more donations on promotion, marriage, and birth of children.

300. The receipts in England showed an improvement of 7,1 over the Budget Estimate under *Effective Services,* due chiefly to the value of stores in possession of regiments on their transfer from the Indian to the British Establishment (3,6), and to larger sales of unserviceable stores (3,2); and by 7 under *Non-effective Services,* due chiefly to sufficient allowance not having been made for the growth of receipts under Indian Military Service Family Pensions.

2	Staff Miscellaneous	3	3	3
2,2	Special Services	6,9	7,8	8,6
535,2	TOTAL	541,2	521,0	527,5

301. Of the saving of 13,7 under this head, as compared with the Budget, 4,8 was due to less payment of salaries, owing to absence of officers on furlough and field service and to vacancies, and 4,0 to less payment of Exchange Compensation Allowance. There was a saving of 4,1 under the sub-head *Hill Sanitaria*, due chiefly to the closing of hill depôts in the Bengal and Panjab Commands during the winter months. Less tour expenses of the Commander-in-Chief in India and of the Lieutenant-Generals Commanding the Forces resulted in a saving of 3,3. The excess under *Special Services* (1,7) was chiefly due to the augmented strength of the Tochi Garrison having been maintained for a longer period than was provided for.

Administrative Staff.

1897-98. Accounts.		1898-99. Budget.	Revised.	Accounts.
16,2	Personal Staff of the Governor-General, Governors, and Lieutenant-Governors	16,6	16,1	15,9
17,6	Accountant General, Military Department	17,3	16,3	17,2
	Controller of Military Accounts—			
27,6	Central Branch	26,8	26,7	27,1
14,0	Accounts Branch	14,3	13,6	13,7
45,1	Pay Branch	45 6	45,5	45,7
34,2	Commissariat Branch,	34,8	33,8	34,1
7,6	Commissariat Branch Rangoon	7,9	8,1	7,9
19,3	Ordnance and clothing Branches	19,3	19,8	20,5
13,9	Circle, Field and Pension Pay Officers	13,6	13,9	13,9
8,1	Inspections, Special Duties, and Probationers	10,9	8,1	7,5
8	Special Services	1,8	1,4	1,4
204,4	TOTAL	208,9	203,3	205,0

302. The saving under this head was chiefly due to less payments of Exchange Compensation Allowances and of salaries, the deduction for probable saving having proved insufficient, and to fewer officers having been present on duty.

Regimental Pay.

1897-98. Accounts.		1898-99. Budget.	Revised.	Accounts.
3,956,0	European Army	4,102,2	3,882,9	3,852,7
4,310,4	Native Army	4,268,0	4228,8	4,247,3
11,8	Special Services	30,0	29,0	30,0
82,78,2	TOTAL	8,400,2	8,140,7	8,130,0

303. The saving of 270,2 under the head, as compared with the Budget Estimate, was due chiefly to a decrease of 256 6 under salaries and pay, owing mainly to short strength of British troops in India, to the debit to the Imperial Government, London, of charges on account of troops serving in East Africa and

Section L.—ARMY SERVICES—EXPENDITURE—*continued.*

Regimental Pay—*continued.*

Mauritius, to officers being lent to the Civil Department for plague duty, to insufficient deduction on account of probable savings, and to less messing allowance charges arising from a change in classification, and of 30,6 under Exchange Compensation Allowance, partly counterbalanced by an increase of 13,0 under good-conduct pay. The saving of 148,2, as compared with the actuals of the previous year, was due chiefly to the adoption of more favourable rates of exchange for the payment of British troops, to lower Exchange Compensation Allowance, to more deputations to the Civil Departments for plague duty, to the absence of Native troops in East Africa and Mauritius, and to short strength of British troops, partly counterbalanced by the introduction of the messing allowance rules recently authorised in England by which non-commissioned officers and men of British troops draw gross instead of net pay for a part of the year, by larger payments under Reserve Forces, under kit money, owing to larger enlistment of recruits, and under special services.

304. The details of the principal sub heads of the European Army are given below :—

1897-98. Accounts.		1898-99. Budget.	1898-99. Revised.	1898-99. Accounts.
1,006,0	Artillery	1,033,3	986,3	974,6
405,0	Cavalry	411,2	390,6	390,6
3,9	Engineers	3,3	3,4	3,6
2,442,7	Infantry	2,570 9	2,394,6	2,380,0
3,5	Invalid and Veteran Establishment	3,4	3,1	3,1
45,1	Staff Corps, General List of Officers, Unattached and Unemployed Officers	38,4	43,0	48,5
5,4	Colonel's Allowances	5,8	5,5	5,9
44,4	Other Charges	35,9	56,4	46,4
3,956,0	TOTAL	4,102,2	3,882,9	3,852,7

305. Under *Artillery* the saving, as compared with the Budget Estimate (58,7), was due chiefly to short strength, and the transfer to the head Commissariat charges of the bulk of the charges for messing allowance (45,9), to less Exchange Compen sation Allowance (3,8), to short complement of sergeant armament artificers (5,3), to savings in the pay of regimental educational establishments (1,7), and to less command, staff and horse allowances (4,8), partly counterbalanced by larger charges under good-conduct pay (2,3). Under *Cavalry* there was a saving of 20,6 under pay, due to the reasons stated under *Artillery*, of 1,8 due to insufficient deduction on account of officers absent in Europe, of 1,3 under Exchange Compensation Allowance, of 8,2 under command, staff and horse allowances, and of 1 in the pay of regimental educational establishments and native artificers and followers, partly counterbalanced by increased charges for deferred pay (1,2). Under *Infantry* the saving was chiefly due to less charges on account of pay of non-commissioned officers, rank and file, for the reasons stated under *Artillery* (149,1), to short strength of officers, and deputations to the Civil Department for plague duty (34,5), to less Exchange Compensation Allowance (9,2), to savings in the pay of the educational establishments (1,7) and of native followers (1,6), to less command, staff and horse allowances (1,8), to less charges for family allowances, prizes for skill-at-arms, etc. (1,9), partly counterbalanced by increased charges for good-conduct pay (2,1) and deferred pay (5,7). Under *Staff Corps, etc.*, the largest excess occurred under Staff Corps, due to there having been a larger number of unemployed field officers and of unattached list officers present on duty. Under *Other charges* the excess was due chiefly to the grant of a special bounty to men of certain regiments for extension of service in India (8,3), and to heavy charges on account of funeral allowances and more telegram charges (1,8). The decrease, as compared with the actuals of the previous year, have been explained above.

306. The details of the principal sub-heads under the Native Army are as follows :—

1897-98 Accounts.		1898-99. Budget.	1898-99. Revised.	1898-99. Accounts.
57,4	Artillery	56,7	58,9	56,9
14,8	Body-Guard	15,7	15,3	15,4
1,276,4	Cavalry	1,277,3	1,274,9	1,273,1
136,0	Sappers and Miners	138,4	134,8	132,5
2,596,9	Infantry	2,550,2	2,520,1	2,523,8
57,0	Annual grant-in-aid of half-mounting	52,9	53,7	55,2
26,2	Kit-money for Recruits	36,0	32,2	37,0
27,5	Hutting-money	28,3	28,3	25,7
72,3	Reserve Forces	70,4	69,8	86,7
45,9	Other Charges	42,1	40,8	41,0
4,310,4	TOTAL	4,268,0	4,228,8	4,247,3

Section L.—ARMY SERVICES—EXPENDITURE—*continued.*

Regimental Pay—*concluded.*

307. Only a few of the variations under this head call for explanation. The savings under *Cavalry, Sappers and Miners,* and *Infantry* were chiefly in pay of officers, due to insufficient deduction on account of probable savings, to recovery of home advances, to the deputation of officers to the Civil Department for plague duty, and to less Exchange Compensation Allowance. Under *Cavalry* the saving due to these causes was increased by 1,5 owing to short strength of native artificers and followers, partly counterbalanced by an excess of 10,6 under pay of native commissioned and non-commissioned officers, rank and file, due chiefly to too large a deduction on account of probable savings and for short strength of troopers; that under *Sappers and Miners* was raised by short strength of native officers, rank and file (1,7,) and less command, staff and horse allowances (1,0), counterbalanced to the extent of 5 by increased good-conduct pay; and that under *Infantry* was enhanced by savings due to the debit to the Imperial Government, London, of charges connected with the troops serving in East Africa and at Mauritius (44,1), partly counterbalanced by too small a deduction for probable savings under pay of native commissioned and non-commissioned officers, rank and file, and for short strength (14,6), by the employment of a larger number of hospital assistants, at higher rates of pay than provided for (4,6), by more command, staff and horse allowance due to too large a deduction on account of half staff salary of officers on furlough (5,7), and by increased good-conduct pay owing to new admissions, and to higher rates having been drawn according to length of service (8,5). The excess of 16,3 under *Reserve Forces* was due partly to an under-estimate, and partly to payment of arrears to the reservists of certain centres, who were not called out during 1897-98, and to frontier tribes, to whom payment was not made in 1897-98 on account of the recent operations on the frontier.

308. Under *Special Services* the saving was due to less charges on account of Occupation of Chitral and its Communications (3,4), partly counterbalanced by increased charges on account of the Wano Garrison, (1,3), due to the grant of field batta to the troops and followers at Sarwekai, and on account of the Tochi Garrison (1,9), due mainly to the augmented garrison having been maintained for a longer period than that provided for. The excess over the previous year was chiefly due to more charges on account of Occupation of Chitral and its Communications and the Tochi Garrison, owing mainly to the charges under these heads for a part of the year 1897-98 having been shown under *Military Operations on the North-West Frontier.*

Commissariat Charges.

1897-98. Accounts.		1898-99. Budget.	1898-99. Revised.	1898-99. Accounts.
513,1	Establishment	540,3	519,4	49,68
1,870,8	Supplies	1,595,3	1,677,0	1,668,7
905,3	Services	847,2	885,0	872,8
321,9	Transport Branch	347,5	303,3	280,9
136,5	Special Services	293,9	344,6	302,4
3,747,6	TOTAL	3,624,2	3,729,3	3,621,6

309. The decrease of 2,6 under this head is the result of large differences under the several heads; the excesses under *Supplies* (73,4), *Services* (25,6), and *Special Services* (8,5) being more than covered by the savings under *Establishment* (43,5) and *Transport* (66,6). The excess under *Supplies* was due chiefly to charges for messing allowances, provided for under Regimental Pay, and to compensation for dearness of forage in the Bombay Command, partly counterbalanced by low prices for articles of food in the Bengal and Madras Commands, by the absence of certain troops in East Africa and Mauritius, and by smaller consumption of malt liquor; that under *Services* to high prices of articles of food for horses and mules; and that under *Special Services* to the maintenance of troops in the Tochi Garrison at the augmented strength beyond the period provided for. The saving under *Establishment* was due chiefly to the lapse of the provision for additional officers for the Commissariat-Transport Department and to less cattle establishment; and that under *Transport* to less outlay on the purchase and feed of transport animals. The saving as compared with the previous year was due chiefly to lower prices of food for men and animals, and to no compensation having been paid for dearness of food, partly counterbalanced by increased charges on account of messing Allowance, due to the introduction from 1st June 1898 of the messing rules recently authorized in England, to more movements of troops, and to larger expenditure under special services.

Section L.—ARMY SERVICES—EXPENDITURE—*continued.*

Commissariat Charges—*continued.*

310. The details of the expenditure under *Establishment* are given below :—

1897-98. Accounts.		Budget.	1898-99. Revised.	Accounts.
47,8	Supervising Staff	49,2	47,0	47,3
234,1	Executive Establishment	256,7	237,7	236,3
42,1	Ambulance Transport	44,4	42,5	41,4
173,5	Subordinate Establishment	178,2	177,2	159,7
11,1	Khedda Establishment	8,3	11,1	8,9
4,5	Other Heads	3,5	3,9	3,2
513,1	TOTAL	540,3	519,4	496,8

Under *Supervising Staff* the decrease was chiefly due to savings in office establishment (6), to absence of officers on furlough (3), to less Exchange Compensation Allowance (4), and to savings in travelling postage and contingent charges (6) ; that under *Executive Establishment* was due mainly to the lapse of the grant for an increased complement of officers for the Commissariat-Transport Department (20,0) less Exchange Compensation Allowance (1,9), and to smaller charges for contingencies and advertisements (5), and for regimental transport charge allowance (7), partly counterbalanced by too large a deduction on account of probable savings (3,3) ; under *Ambulance Transport* the decrease was due to short strength of bearers; and that under *Subordinate Establishment* chiefly to the entertainment of smaller cattle establishments, owing to a deficiency in the strength of animals (15,0), and to smaller regimental and temporary godown establishments (1,5), partly counterbalanced by increased charges for water gear and establishments, and for supply of water at hill stations (7), and in Burma by hired transport (7). As compared with the previous year the saving was mainly due to the employment of smaller cattle and godown establishments.

311. Under *Supplies* the details are as follows :—

1897-98. Accounts.		Budget.	1898-99. Revised.	Accounts.
748,5	Provisions for Europeans	703,6	822,5	848,7
178,9	Provisions for Natives	158,6	149,7	154,3
	Compensation to Natives—			
481,1	(*a*) for dearness of provisions	338,6	315,0	296,7
151,5	(*b*) for dearness of forage	45,5	57,4	55,1
13,7	Purchase of Reserve Stock	16,4	15,9	14,5
293,3	Malt Liquor purchased locally	320,5	306,5	290,5
3,1	Rum	6,0	3,0	4,6
3,8	Dairy Farms	10,3	10,1	7,4
...	Contingent Expenses	2	1	...
—*3,1*	*Deduct*—Value of Supplies to other Departments	—*4,2*	—*3,2*	—3,1
...	*Do.*—Excess Provision on account of Commissariat Stores	—*2*	...	...
1,870,8	TOTAL	1,595,3	1,677,0	1,668,7

The excess under *Provisions for Europeans* was due chiefly to charges for messing allowance, provision for which was made under *Regimental Pay* (para. 305) having been compiled under this head (158,4), to higher charges in connection with the supply of meat (3,5), and larger payments in lieu of rations (2,2), partly counterbalanced by savings due to the cheapness of wheat, and ration articles other than meat (14,1), and to less miscellaneous charges (2,8). Under *Compensation for dearness of forage* the excess (9,6) was due chiefly to larger payments in the Bombay and Punjab Commands. The savings under *Provisions for Natives* and *Compensation to Natives for dearness of Provisions* was due chiefly to favourable prices, increased in the former case by the issue of stock purchased in 1897-98, and reduced by larger money payments in lieu of rations in the Quetta district, while in the latter the saving was enhanced by the absence of certain troops in East Africa and Mauritius, and counterbalanced by higher rates in the Punjab and Bombay Commands. The consumption of malt liquor and rum was smaller than was anticipated. Less expenditure in connection with the model farm at Umballa, partly counterbalanced by an increase of 1,8, due to the purchase of cattle and plant for establishing three additional dairies in the Bengal Command, account for the saving under *Dairy Farms*. The saving, as compared with the previous year, has been explained above.

Section L.—ARMY SERVICES—EXPENDITURE—*continued.*

Commissariat Charges—*continued.*

312. Under *Services* the following details are supplied :—

1897-98. Accounts.		1898-99. Budget.	1898-99. Revised.	1898-99. Accounts.
41,4	Hire of Transport	33,0	37,2	37,8
19,3	Sea and Inland Water Charges . . .	28,1	24,7	25,2
357,4	Railway Charges	385,4	400,0	390,3
78,6	Grass Cultivation	87,9	82,7	81,8
319,7	Feed of Horses, Battery Mules, Yaboos, Bullocks and Elephants	224,2	251,5	255,3
7,4	Regimental Equipment and Camp Contingencies .	10,7	8,5	8,1
31,8	Implements, Godown Furniture, etc. . . .	24,7	25,6	28,7
49,7	Other Heads	53,2	54,8	45,6
905,3	TOTAL .	847,2	885,0	872,8

The excess under *Hire of Transport* (4,8) was due to more movements of European and Native troops by route march, to smaller utilisation of Government transport (3,5), and to larger consignments of Commissariat and clothing stores (3,5), partly counterbalanced by smaller consignments of miscellaneous stores (7). The saving under the second head was due to smaller movements of troops and stores by water. Under *Railway charges* the excess was due to more movements of European troops by rail (8,6), and to larger consignments of commissariat, medical and miscellaneous stores (2,7), partly counterbalanced by less charges for conveyance of Native troops (6), and smaller consignments of ordnance stores (5,5). Under *Grass Cultivation* the saving occurred chiefly under establishment and contingencies, and was due to less harvesting. Under *Feed of Horses, Battery Mules, etc.*, the excess was due to unexpectedly high prices, and to purchases for stock in the Madras Command (29,9), partly counterbalanced by a decrease in the charges for feed of battery elephants and bullocks (1,4). Under *Regimental Equipment, etc.*, the saving (2,6) was due to fewer condemnations and replacements. Under *Implements, Godown Furniture, etc.*, the excess was due mainly to larger purchase of godown furniture (3), and of packing materials for stock (1,0), to replacement of unserviceable tarpaulins (4), to adjustment of the value of stores returned by troops on their return from East Africa (3), and to saving due to ordinary fluctuations (6). Under *Other Heads* the saving was due chiefly to an over-estimate under reserves of fodder (3,3), to smaller purchases of battery bullocks (9), to smaller charges for purchase and repair of gear (7), to smaller purchases of warm clothing for troops and followers (3,5), and to saving in charges of a fluctuating character (7), partly counterbalanced by an excess of 1,0 under Cattle Farm (Hissar), due to the purchase of cows not anticipated in the Estimate (6), and to the purchase of fodder to complete the reserve (1,7), counterbalanced to the extent of 1,3 chiefly because of short crops. The decrease, as compared with the previous year, occurred chiefly under *Feed of Horses, Battery Mules, etc.* (64,4), and *Other Heads* (4,1), due to the prevalence of famine during 1897-98, counterbalanced by excesses mainly under *Sea and Inland water charges* (5,9), and *Railway charges* (32,9), due mainly to larger consignments of ordnance stores by water and to more movements of European and Native troops by rail.

313. The details of the charges in the *Transport Branch* are as follows :—

1897-98. Accounts.		1898-99. Budget.	1898-99. Revised.	1898-99. Accounts.
315,8	Depôt and Regimental	338,3	297,6	275,1
6,1	Ambulance Transport	9,2	5,7	5,8
321,9	TOTAL .	347,5	303,3	280,9

The saving under *Depôt and Regimental* was due chiefly to fewer purchases of animals, owing to the animals returned from the frontier having been absorbed in making up deficiencies in the ordinary complement (16,0), to the transfer to the head Remount and Veterinary of the cost of purchase (9,0), and feed (5,2) of additional ordnance mules, incorrectly provided for under this head, to smaller charges for feed of animals owing to deficiency in the complement of animals, and to favourable rates for articles of feed in the Madras Command (28,2), to smaller purchases of gear, and to the cost of replacement and repair of articles issued for animals proceeding on field service having been charged to the service concerned (8,1), and to less miscellaneous charges due to the absence of animals on active service on the frontier (1,1), partly counterbalanced by higher rates of hire of animals for permanent hired transport (1,1), and to the laying in of a larger stock of warm clothing (1,1). The saving, as compared with the previous year, occurred chiefly in the charge for feed of animals, and was due to the high prices of articles of feed in 1897-98 owing to the prevalence of famine, partly counterbalanced by larger purchases of animals.

Section L.—ARMY SERVICES—EXPENDITURE—*continued.*

Commissariat Charges—*concluded.*

314. Under *Special Services* the excess of 8,5 was due to the maintenance of troops at the Tochi Garrison above the normal strength, beyond the period provided for, and to arrear payments (22,0), and to larger purchase of stores for stock for the Gilgit Agency (2,5), partly counterbalanced by saving on account of occupation of Chitral and its Communications (14,0), Wano Garrison (3,0), Kajuri Kach (2,1), due mainly to less expenditure for warm clothing for troops and followers. The excess, as compared with the previous year, was due partly to the expenditure during a part of 1897-98 on account of occupation of Chitral and its Communications, and to the Tochi Garrison having been charged to Military Operations on the North-West Frontier, and partly to increased expenditure on account of the Gilgit Agency as stated above, partly counterbalanced by less expenditure on the Wano Garrison, Kajuri Kach, and Jandola Garrison, due to more favourable prices of food.

Remount and Veterinary.

315. The details are given below :—

1897-98. Accounts.		1898-99. Budget.	Revised.	Accounts.
3,3	Supervising Staff	3,3	3,1	3,5
33,5	Depôt Establishments	35,2	31,0	30,5
9,0	Veterinary Inspection	8,7	8,5	8,6
31,8	Station Veterinary Hospitals	33,1	29,6	29,8
4	Veterinary Schools	5	5	4
2,3	Remount Depôt, Garden Reach	2,6	2,5	2,4
118,7	Purchase of Remounts	150,8	155,5	138,1
65,1	Feed of Cattle and Remounts	68,5	49,7	45,3
39,2	Miscellaneous	49,4	50,4	38,9
...	Special Services	1	...	1
303,3	TOTAL	352,2	330,8	297,6

316. The saving under this head was chiefly due to the purchase of fewer young stock and mules, and to lower rates (7,8), to purchase of fewer remounts, and to Australian animals having been purchased at more favourable rates of exchange than anticipated (4,7); to less feeding charges (23,4) owing to lower rates for grain and fodder in the Bengal and Bombay Commands, to fewer horses having been maintained at Depôts, and the issue of articles of food from the stock of the previous year; to less Cultivation (6,8) and Road (6,5) expenses, and to the employment of fewer cattle and remount establishments, absence of Remount Officers on furlough, and short strength of Veterinary Officers, (7,4), partly counterbalanced by an increase due to the acquisition of land for the Hapur Depôt (3,5). The saving, as compared with the previous year, was chiefly in the cost of feed due to the prevalence of famine in 1897-98, and to fewer horses and young stock having been maintained at the Depôts during 1898-99, counterbalanced by an increase under *Purchase of Remounts*, due to the purchase of more Australian animals.

Clothing Establishments.

1897-98. Accounts.		1898-99. Budget.	Revised.	Accounts.
10,4	Superintending Establishments	11,2	11,1	10,8
6,1	Manufacturing and Store Establishments	7,0	6,5	6,0
	Supplies and Services—			
143,9	Factories	167,2	148,0	148,5
33,2	Regimental	38,7	39,7	36,5
51,4	Compensation in lieu of clothing	57,6	61,8	63,0
8	Special Services	1,6	2,1	2,3
...	*Deduct.*—Value of stores supplied to other Departments	—*1*	—*1*	...
245,8	TOTAL	283,2	269,1	267,1

317. The saving under this head occurred chiefly under *Factories*, and was due mainly to the low rates at which boots and helmets were purchased (9,4), to the supply from England of serge provided for in the Estimates (5,3), to flannel drawers not having been supplied to men returning to England (4,3), to fewer garments having been made up at the factories (1,8), and to less packing and freight charges (8); partly counterbalanced by larger purchases of helmets, khaki putties, badges and braids (3,7). There was a saving of 2,2 under *Supplies and Services—Regimental*, due chiefly to summer clothing not having been

Section L.—ARMY SERVICES—EXPENDITURE—*continued.*

Clothing Establishment.—*contd.*

made up regimentally by certain corps and batteries which arrived from England during the year. There was an excess of 5,4 under *Compensation in lieu of Clothing* due to a larger grant of compensation than was anticipated. The excess, as compared with the previous year, was chiefly due to the larger purchase of boots, helmets, and khaki putties, and to full compensation for articles of clothing interchangeable between the Imperial and Indian Governments having been admitted to units and time-expired men leaving India.

Barrack Establishments.

1897-98. Accounts.		1898-99. Budget.	Revised.	Accounts.
4,1	Executive Establishments	4,0	...	...
53,0	Subordinate Establishments	54,7	53,6	52,4
15,3	Station Conservancy	16,4	27,6	29,7
13,1	Barrack Furniture	10,4	...	...
50,3	Barrack Bedding	47,9	48,9	51,1
35,5	Lighting Charges	38,4	37,4	37,0
59,7	Miscellaneous	59,0	62,2	61,2
2,1	Special Services	1,9	3,5	4,3
233,1	TOTAL	232,7	233,2	235,7

318. The excess of 13,3 under *Station Conservancy*, was due to the expenditure incurred in certain cantonments in the Bombay Command on account of the plague, and for sanitary improvements at the Quetta Cantonment, for which an extra grant of 12,5 was sanctioned by the Government of India. The excess under *Special Services* was chiefly on account of the employment of larger conservancy establishments in connection with the occupation of Chitral and its Communication (5), and the maintenance of the Tochi Garrison at the augmented strength for a longer period than provided for. These excesses were partly counterbalanced by the saving due to the transfer of the Barrack Department, Madras, to the Military Works Department, which explains the absence of expenditure under the first and fourth heads; and the saving of 2,3 under *Subordinate Establishments* was due to the employment of less extra conservancy establishment and less punkha-pulling establishments, owing mainly to the complement of the British Infantry having been short by one battalion for a part of the year, and to less lighting and miscellaneous charges. The increase, as compared with the previous year, was due chiefly to a saving due to the transfer of the Barrack Department, Madras, as stated above, counterbalanced by the increased expenditure on account of the plague and on the improvements at Quetta.

Administration of Martial Law.

1897-98. Accounts		1898-99. Budget.	Revised.	Accounts.
	Judge Advocate-General's Department—			
5,7	Head-Quarters	6,0	5,9	6,1
14,7	Commands	16,0	14,7	14,2
20,4	Miscellaneous	21,2	20,3	19,5
40,8	TOTAL	43,2	40,9	39,8

319. The saving under this head was chiefly due to the absence of officers on furlough, less exchange compensation allowance, and less prison charges.

Medical Establishments.

320. The charges are classified under the following heads:—

1897-98. Accounts.			1898-99. Budget.		Revised.		Accounts.
		Medical Establishment—					
26,9		Head-Quarters and Commands		27,1		25,4	24,8
449,3		Districts		431,3		439,0	433,8
12,0		Nursing Service		12,1		11,3	11,0
27,7		Army Hospital Corps		28,5		28,5	29,6
18,6		Medical Store Depôts		19,5		17,6	17,2
9		Followers' Hospitals		1,1		1,0	8
7,1		Miscellaneous		10,1		8,6	7,2
	234,7	Medical Supplies	229,7		229,5		227,9
		Deduct—					
	28,6	Issues to other Departments	*24,8*		*25,0*		*25,3*
206,1				204,9		204,5	202,6
748,6				734,6		735,9	727,0
2,0		Special Services		5,4		6,3	7,0
750,6		TOTAL		740,0		742,2	734,0

Section L.—ARMY SERVICES—EXPENDITURE—*continued.*

Medical Establishment—*continued.*

321. The savings under the first, third, and fifth heads occurred chiefly under salaries and Exchange Compensation Allowance, and were mainly due to absence of officers on furlough and deputation to the Civil Department for plague duty, and to short strength of the establishment of nursing sisters. The saving under *Miscellaneous* was chiefly due to fewer Military pupils having been under tuition in Medical Colleges and Schools (1,0), to smaller payments of grants-in-aid to Cantonment Hospitals (6), to less outlay on extra duty pay of nursing orderlies, and training soldiers' wives for employment in station hospitals (8), and to smaller purchases of books and periodicals (4); that under *Medical supplies* was principally due to smaller purchases of Medical and Surgical stores, owing mainly to demands having been met from the large stock in hand, and to smaller demands from civil hospitals and dispensaries (10,0), to less expenditure on Medical comforts, owing to smaller issues of extras, and to the establishment of British Infantry having been short by one battalion for a part of the year (2,7), and to less freight and miscellaneous charges (7), partly counterbalanced by higher expenditure for dieting the sick owing to increased sickness of soldiers, and to the local purchase of extracts of meat (3,1), and to larger condemnations and replacements of hospital equipments (2,6). Of the excess under *Special Services*, 1,1 was on account of Occupation of Chitral and its Communications, due to the retention of two sections of the British field hospital longer than anticipated, and 6 on account of Tochi Garrison due to the augmented strength having been maintained for longer than was provided for. The saving, as compared with the previous year was due chiefly to less payment of Exchange Compensation Allowance, and to fewer officers having been present on duty, to smaller purchases of Medical and Surgical stores, and to less expenditure for Medical comforts and diet, owing to there having been fewer patients in hospitals.

Ordnance.

322. The charges are sub-divided below:—

1897-98. Accounts.		1898-99. Budget.	1898-99. Revised.	1898-99. Accounts.
	ESTABLISHMENTS—			
41,1	Supervising Staff	41,3	40,5	39,9
199,2	Arsenals and Depôts	199,3	185,1	186,9
222,4	Factories	240,1	245,1	240,9
10,9	Fort Armaments	11,1	10,8	10,4
	STORES—			
161,9	For Arsenals and Depôts	154,3	125,0	147,7
163,1	For Factories	147,3	170,0	152,1
12,2	Freight	6,1	6,1	5,5
53,9	Camp Equipage	36,8	35,8	36,1
12,8	Line Gear	13,4	12,9	12,9
34,1	Other Charges	35,5	33,6	34,6
	Deduct—			
59,7	Supplies to other Departments	*47,2*	*49,1*	*41,0*
...	Excess Provision on account of Ordnance Stores	*64,7*		...
851,9		773,3	816,8	826,0
1	Special Services—	2	3	1,2
852,0	TOTAL	773,5	817,1	827,2

323. The excess under this head was chiefly due to the special deduction of 64,7 made in the Budget to adjust an excess provision made in the Home Estimates on account of ordnance stores. Apart from this, there was a saving of 12,0, which occurred chiefly under *Establishments-Supervising Staff* (1,4) and *Arsenals and Depôts* (12,4); the former due mainly to the absence of an officer and a clerk on furlough and savings in office establishment charges (7), to less Exchange Compensation Allowance (4), and to saving in travelling and contingencies (6); the latter to less expenditure on salaries (4,2) and on extra temporary, artificers and others (7,0), owing to charges for the Harness and Saddlery Workshop, Madras, having been transferred to the head *Factories*, and to less Exchange Compensation Allowance (1,1). The saving under *Stores for Arsenal and Depôts* (6,6) was due principally to the transfer of the cost of stores

Section L.—ARMY SERVICES—EXPENDITURE—*continued*.

Ordnance—*continued*.

purchased for the Harness and Saddlery Workshop, Madras, to the head *Stores for Factories*, where the excess (4,8) was partly due to this cause (8,3), and partly to larger purchase of copper and other stores locally for the Foundry and Shell Factory (4,1), partly counterbalanced by smaller purchases of stores for Gunpowder Factories (2,9), and Timber for Gun Carriage Factories (5,6). The recoveries from other Departments fell short of the Budget by 6,2, owing principally to smaller supplies to the Civil Department. The excess under *Special Service* (1,0) occurred chiefly in the charges on account of Occupation of Chitral and its Communications, and the Tochi Garrison. As compared with the previous year, the decrease under *Arsenals and Depôts*, the increase under *Factories*, and the decrease under *Stores for Arsenals and Depôts*, were mainly due to the change in classification of charges of Harness and Saddlery Workshops, Madras, referred to above. The decrease under *Stores for Factories* was due chiefly to smaller purchases of stores for the Foundry and Shell Factory, Gunpowder Factories, and Small Arms Ammunition Factories, partly counterbalanced by larger purchases of timber for the Gun Carriage Factories, and to the change of classification mentioned above ; that under *Camp Equipage* was due to less charges for repairs of camp equipage. The smaller deduction on account of supplies to other Departments was due to smaller supplies having been made to the Civil Department.

324. The excess under this head requires sanction. A report that the grant was likely to be exceeded was made to Government.

Other Effective Charges.

325. There was an excess of 1,4 under *Ecclesiastical*, due chiefly to the posting of Presbyterian Chaplains to regiments, instead of to stations, except at Presidency towns. The decrease of 2,2 under *Education* occurred mainly in the charges of the Lawrence Military Asylums. The saving under *Volunteer Corps* was due chiefly to insufficient deduction for probable savings in salaries, and to certain appointments having been held by Civilians (1,7), to savings under contingencies and Exchange Compensation Allowance (1,0), and to less expenditure on account of grants for constructing rifle ranges, camps of exercise, and allowances for field days (1,1), counterbalanced to the extent of 2,2 by more travelling charges owing to more frequent inspections.

326. The excess under *Ecclesiastical* requires sanction. A report that the grant was likely to be exceeded was made to Government.

327. The figures under *Miscellaneous Services* may be sub-divided as follows :—

1897-98. Accounts.		1898-99. Budget.	Revised.	Accounts.
32,2	Special charges	130,9	131,0	134,8
76,3	Other Items	96,0	101,0	97,2
108,5		226,9	232,0	232,0

Under *Special Charges* the variations are chiefly due to the causes stated in para. 293. *Under Other Items* the principal differences, which are mainly due to ordinary fluctuations, are savings under extra staff and command allowance (1,7), contingencies (1,7), and camps of exercise and instruction (3,2), and excesses under Munshi allowances (3,1), due to a larger number of officers and soldiers having passed the test in native languages, and to more telegram charges (1,3). The excess, as compared with the previous year under *Special Services*, was due chiefly to the charges on account of Kohat-Kurram Force and Burma-China Boundary Commission Escort, and to more charges under Occupation of Chitral and its Communications, owing chiefly to the expenditure on this last account for a part of 1897-98 having been shown under Military operations on the North West Frontier. Under *Other Items* the increase was due to more charges for Munshi allowances, to larger purchase of lands, to more expenditure on telegrams and camps of exercise and instruction. The excess requires the sanction of the Government of India.

Military Operations on the North-West Frontier.

1897-98. Accounts.		1898-99. Budget.	Revised.	Accounts.
...	North-West Frontier Field Operations	1,355,0	990,0	1,024,8
3,468,1	Malakand Field Force and North-West Frontier Disturbances	...	...	...
369,1	Tochi Field Force	5,0	27,7	26,2
10,8	Mekran	8,0	6,0	6,5
3,848 0		1,368,0	1,023,7	1,057,5

328. The variations under this head have been fully explained in para 291.

Section L.—ARMY SERVICES—EXPENDITURE—*concluded.*

Non-effective Charges.

329. Under *Rewards for Military Service* the excess (4,5) was due chiefly to a larger nnmber of medals having been struck for the North-West Frontier operations than was anticipated (5,0), and to more recipients of the order of merit (6), partly counterbalanced by fewer admissions to the Order of British India (1,0). The saving under *Military Pensions to Europeans* (10,7) was chiefly due to less payments of pensions (4,9), smaller capitalized payments (2,4) to British Officers, and smaller payments (3,2) of wound gratuities. That under *Military Pensions to Natives* was due to smaller payments of pensions due to casualties (10,9), and to reduced payments of compensation for dearness of provisions to Madras pensioners (3,5), partly counterbalanced by larger payments of gratuities (1,1), owing to more men having been invalided and discharged on gratuities. Under *Widows' Pensions and Compassionate Allowances* the saving was due chiefly to casualties (1,2), to fewer admissions to the Indian Military Service Family Pensions (8), and to smaller payments of Compassionate allowances (3,1). Under *Departmental Pensions* there was an excess of 1,0 due to ordinary fluctuations. The excesses under *Rewards for Military Service* (4,5) and *Departmental Pensions* (1,0) require to be sanctioned.

Expenditure in England.

330. The saving in the effective charges in England (73,3) was due to fewer officers having taken furlough to Europe than was anticipated (26,2), to smaller demands for Ordnance Stores (90,2), to fewer officers having been provided with passages otherwise than in transports (8,0), and to smaller miscellaneous payments (1,2), owing chiefly to a decrease in the pay and expenses of Officers studying the Russian language, partly counterbalanced by an increase of 43,4 in the *Payments to the War Office in respect of British Officers servingin India*, and of 9,0 under *Indian Troop Service*, owing chiefly to the increased cost of coal in consequence of the strike. Under non-effective charges there was a saving of 54,1, due chiefly to an over-estimate under *Pay and Pensions of Non-effective and Retired Officers of the Indian Service* (64,0), counterbalanced by an excess of 11,0 in the *Payments to the War Office for Retired Pay, etc., of British Forces for service in India.*

Section LL.—SPECIAL DEFENCE WORKS—EXPENDITURE.

47.—Special Defence Works.

1897-98. Accounts.		1898-99. Budget.	1898-99. Revised.	1898-99. Accounts.
23,7	EXPENDITURE	...	8,4	1,5

331. The distribution of expenditure is noted below:—

1897-98. Accounts.		1898-99. Budget.	1898-99. Revised.	1898-99. Accounts.
—4,0	India	...	1	1
17,7	England	...	5,5	9
10,0	Exchange	...	2,8	5
23,7	TOTAL	...	8,4	1,5

The expenditure has fallen from 23,7 in 1897-98 to 1,5 in 1898-99, owing to the approaching completion of the Secretary of State's payments in connection with armaments. The Budget Estimate contained no provision on this account, but a sum of 8,4 was provided in the Revised Estimate including exchange, of which 1,5 only was utilized. The excess requires to be sanctioned.

Section M.—PROVINCIAL ADJUSTMENT.

332. The figures shown under this head represent the surplus or deficit of each Provincial Government in respect of the revenues and charges assigned to it, including Incorporated Local Funds. The differences between the Estimates and Accounts under the various Revenue and Expenditure heads have been explained in detail in the foregoing pages, and the share of these pertaining to the Provincial and Local sections of the accounts for the several groups is given below separately for each province. The Budget provided for an increase in the Provincial balances of 43,5 and a decrease of 160,3 in the Local balances; but the accounts show both the net Provincial and Local revenues better by 1,391,6 and

Section M.—PROVINCIAL ADJUSTMENT—*continued.*

192,7 respectively. The actual improvement in the Provincial balance in the course of the year therefore amounted to 1,435,0 and that in the Local 32,4; consequently the Provincial and Local balances being taken together the actual increase was 1,467,4. These figures do not, however, give a true idea of the actual transactions of the year, for, in order to produce this result, the Imperial Revenues had to make special grants amounting to 74,2 to Bombay, to prevent that Government from closing the year with a debit balance, and also free grants to the extent of 70 lakhs, *viz.*, to the Central Province 50,0, to Assam 100,0, to Bengal 150,0, to the North-Western Provinces and Oudh 100,0, to Punjab 50,0, to Madras 100,0, and to Bombay 150,0. Besides these the Imperial Government also made special assignments of 80,0 to Assam for expenditure due to the earthquake and 313,3 to Local bodies, *viz.*, in Bengal (20,0), Madras (30,0), and Bombay (263,3), in aid of Plague expenditure, and also a special contribution of 39,6 to the Provincial Government, Madras, for direct famine and plague expenditure.

333. As compared with the Budget Estimate the improvement was contributed to by all the Provinces. The improvement in Burma 482,2, in the North-Western Provinces and Oudh 303,4, and in Madras 255,4, occurred under almost all the heads, but chiefly under Revenue and Civil Departments in Burma and the North-Western Provinces, and under Revenue and Famine Relief in Madras. Next in order come Bengal, Assam, Bombay, the Punjab, the Central Provinces, and India. In all these Provinces the bulk of the improvement was contributed more or less by the principal heads of Revenue. In Bombay there was a decrease in the receipts and an excess of expenditure under Civil Department, due chiefly to plague, and expenditure amounting to 25,1 under Famine Relief, for which no provision was made in the Budget. The improvements in the other Provinces do not call for special notice.

334. As compared with the actuals of the previous year the improvement was mainly due to increased collection of revenue, owing to the agricultural conditions of the year under review having been proved favourable.

4,1	50.—Miscellaneous Public Improvements	48,0	—4,1	—4,1
4,366,0		6,437,6	4,279,2	5,621,1

336. The lapse under 48—State Railways, as compared with the Budget Estimate, was due largely to short expenditure in England on stores and materials consequent on the Engineering strikes. The lapse would have been larger if the East Indian Railway Co. had raised by debentures the sum of 944,3 allowed for in the Budget Estimate. In the Revised Estimate allowance was made for short outlay, and the deduction on account of probable amount to be raised by the East Indian Railway Company by the issue of debentures was increased to 1,573,8. No loan was however so raised during the year, and this accounts for the large excess of 1,387,3 in the actuals over the Revised Estimate.

337. As regards *Lines under Construction* the lapse on the Assam-Bengal Railway, Part I, was due to the Estimates by land acquisition officers having been in excess of actual requirements. The excess on the Assam-Bengal Railway, Part II, Construction, was due to more work having been done than was anticipated owing to the labour difficulty being much reduced. The excess on the Rae Bareli-Benares Railway was due to work having been pushed on vigorously with a view to the completion of the line during the year. The lapse on the Indus Bridge was due partly to provision having been made for the completion of three spans of girders, whereas only two were finished during the year, and partly to a saving on 40 ft. girders received from the Bezwada-Madras Railway, and to short supply of English stores. The lapse on the Godavari Bridge was due to the non-arrival of English stores. The excess on the Bezwada-Madras Railway was due to work having been pushed on more vigorously than had been provided for. The lapse on the Lyallpur-Khanewal Railway was due to the inability of the North-Western Railway to transfer permanent-way material to this line, for which provision was made. The lapse on the Hajipur-Katihar extension was due chiefly to the stoppage of work on the Kosi Bridge Division, between the river Kosi and Katihar, pending final settlement of the revised alignment.

338. As regards *Open lines* the excess on the East Indian Railway was due to that Railway Company not having raised any loan during the year by the issue of debentures, for which provision to the extent of 944,3 was made. The lapse on the Rajputana-Malwa Railway was due chiefly to the provision for outlay on the conversion of the line between Ferozepore and Kotkapura having been made against Capital instead of against Revenue; to credits received from the sale of 10 engines to the Mombassa-Uganda Railway; and to the postponement of certain works. The lapse on the Eastern Bengal Railway was due to the non-arrival of English stores for 60 low-sided wagons, 40 bolster trucks, and 6 Loco-Engines, also 2 flats for landing stage at Belgachia; to no outlay having been incurred on six O class Broad Gauge Engines and seven Metre Gauge Engines; to short outlay by the Marine Department for constructing steamers; and to larger issues of permanent-way materials to Revenue for renewals. The lapse on the Oudh and Rohilkhand Railway was due principally to the non-arrival of a large portion of the rolling stock, etc., ordered from England for the Hardwar-Dehra Railway, and other materials; to large sales of surplus and obsolete stores; and to larger issues of stores than estimated. The lapse on the North-Western Railway was due to the non-arrival of English stores.

339. Under *Other Railways* the excess was chiefly due to outlay on the Chittagong jetties having been charged to head 48 instead of 50, under which provision was made in the Budget Estimate. The saving under Exchange Compensation Allowance was 1,5.

49.—Irrigation Works.

49.—Irrigation Works—*continued.*

340. The decrease in the expenditure during 1898-99, as compared with that of 1897-98, was mainly due to the approaching completion of the Chenab canal and the Fatehpur branch of the Lower Ganges canal. The decrease owing to this cause was partly counterbalanced by the expenditure incurred on the Jhelum canal in the Punjab, works which were commenced during the year. The decrease of 96,4, as compared with the Budget Estimate, is mainly attributable to the following causes:—

Burma.—The decrease of 23,4 was due to slower progress than was anticipated on a portion of the Mandalay canal owing to difficulty of obtaining labour, consequent of the unhealthiness of the locality.

Punjab.—The decrease of 63,0 was due chiefly to the approaching completion of the Chenab canal and to work on the Jhelum canal having been started later than was anticipated, and partly to the expenditure on the Sirhind canal having been over-estimated.

Bombay.—The decrease of 18,2 was due to the postponement of works on the Makhi Dhand and the Mithrao canal of the Eastern Nara project.

The saving under Exchange Compensation Allowance was 5.

50.—Miscellaneous Public Improvements.

1897-98. Accounts.		1898-99. Budget.	1898-99. Revised.	1898-99. Accounts.
4,1	Expenditure	48,0	—4,1	—4,1

341. The credit entry of 4,1 represents the write-back of the outlay incurred in 1897-98 on the Jetty and sheds at Chittagong, which has since been classified under the head 48.—State Railways —Construction, and the provision of 48,0 in the Budget Estimate for expenditure on the same work was withdrawn in the Revised Estimate.

Section P.—UNFUNDED DEBT.

	1898-99. Budget.	Revised.	Accounts.
Special Loans	...	...	—3
Treasury Notes and Service Funds, India	+40,4	+29,5	+33,6
Savings Bank Deposits	+498,4	+262,1	+260,9
TOTAL	+538,8	+291,6	+294,2

343. Under *Special Loans* the debit of 3 represents the commutation value of Wasika pensions lapsed to Government. The falling off of 6,8 under *Treasury Notes and Service Funds* was due partly to a special withdrawal (4,0) for the construction of a house for the Bengal Uncovenanted Service Family Pension Fund Office, and partly to an over-estimate, counterbalanced to the extent of 2,2 by an increase in the receipts of the Bombay Fund, owing to a large number of admissions. The details of *Savings Bank Deposits* transactions are as follows :—

	Budget.	Revised.	Accounts.
Post Office Savings Banks	+380,0	+149,5	+140,7
State Railway Provident Institutions	+60,7	+63,8	+53,5
Civil Engineers' Provident Fund	+34,5	+34,5	+40,0
Forest Officers' Provident Fund	+9,1	+9,4	+9,4
Regimental Savings Banks	—1	—21,8	—9,1
Special accounts	+14,2	+26,7	+26,4
TOTAL	+498,4	+262,1	+260,9

344. The large decrease of 239,3 under *Post Office Savings Banks* was due chiefly to larger withdrawals than were anticipated. The variations under *Regimental Savings Banks* depend to a great extent on the transfers of British Regiments between India and England and, therefore, no accurate estimate can be made. The increase under *Special accounts* (12,2) was due chiefly to fluctuations in the withdrawals by the General Family Pension Fund and the Hindu Family Annuity Fund from their balances for investment in Government and other securities. The variations under the other heads were due to the withdrawals being either more or less than were anticipated.

TOTAL			+ 598,6			+ 869,9			+1,666,6

345. The net credit to *Provincial Balances* has been explained in paragraph 332. The improvement of 119,4 under *Appropriation for Reduction or Avoidance of Debt* was due to less direct expenditure on Famine Relief and on the construction of Protective Railways through the Agency of Companies. The net credit against *Excluded Local Funds* was contributed by all the Provinces except the North-Western Provinces and Madras. The net credit against Railway Funds was due chiefly to the receipts of the Provident Fund having been larger than were anticipated in the Estimate. The character and magnitude of the transactions recorded under *Departmental and Judicial Deposits* render an accurate forecast impossible. The net credit was contributed chiefly by India in Railway Deposits, by Bengal in Revenue and Civil Courts' Deposits, by the North-Western Provinces in Civil Courts' Deposits, and by Bombay in Personal Deposits. There were large payments in Burma under Revenue Deposits, and in Madras under Revenue, Personal Deposits and Incorporated Local Funds' Debt Deposits and Advances. The other variations are not sufficiently important to require special explanation.

346. The net figures entered against the head *Advances* may be divided as follows :—

	Budget.	Revised.	Accounts.
Coinage Accounts	+50,0	—38,0	+65,9

	+81,9	+128,9	+417,1

347. The reduction of 15,9, as compared with the Budget Estimate, under *Coinage Account*, was due chiefly to a credit of 105,5 under Bullion Advances, owing to the coinage of half rupees and dollars in the Calcutta and Bombay Mints respectively. There was also a net credit of 15,1 on account of Mint certificates issued in respect of the dollar coinage at the Bombay Mint, and a credit of 58,1 under Copper Coinage Account, due to a credit of 10,4, being the amount by which the stock of copper coin and copper at the Mints at the close of the year was reduced, and of 47,7 on account of increase in the balance at credit of the Mint profit account, consequent on the return from circulation of copper coin owing to cessation of famine works, which resulted in a net debit (112,8) under Small Coin Depôt Balances.

348. The net credit under *Other Advances* is the final outcome of a number of transactions ; the cause of the net credit of 351,2 is however brought out by the following figures :—

Special Advances	+45,0
Permanent Advances	+1,9
Other Advances	+105,7
Account with Foreign States	+198,6

349. The credit under *Special Advances* was due to the recovery, in Bengal, of Survey and Settlement charges from Wards' estates, and, in the North-Western Provinces, of advances to La Martiniere College, Lucknow, and to landholders for village relief works during the famine. The credit under *Other Advances* was contributed chiefly by the Central Provinces under Civil Advances, and by Bengal and the Punjab under Advances Recoverable, Public Works Department. Under *Account with Foreign States* the large credit occurred mainly in India (51,0), owing to the adjustment of transactions with Berar, and in the Punjab (134,6), owing to large supplies of sleepers to the North-Western Railway by the Kashmir State.

Section Q.—DEPOSITS AND ADVANCES—*continued.*

350. Under *Suspense Account* the variations are chiefly on account of fluctuations in the balances in the hands of departmental officers. The main differences were the increase in the balances of the Civil Departmental (61,4) and Postal (51,5) officers.

351. The gross credits and debits working up to the net figures under *Exchange on Remittance Accounts* are as follows :—

Budget, 1898-99. Sterling Amount.	Exchange. Cr.	Exchange. Dr.		Accounts, 1898-99. Sterling Amount.	Exchange. Cr.	Exchange. Dr.
			Permanent Debt—			
+2,615,3	1,464,6	...	Other Loans	+1,913,7	960,7	...
...	...	...	Temporary Debt . .	−1,500,0	...	753,0
−1,160,3	...	649,7	Net payments to or receipts from Guaranteed and Subsidized Railways, including remittances to India	−455,2	...	228,5
			Cash Balance—			
−74,6	...	41,8	Increase (—) Decrease (+) .	−611,5	...	307,0
...	1,464,6	691,5	TOTAL .		960,7	1,288,5
...	53,7	...	Lump alteration by Financial Department . . .			
...	1,518,3	691,5	NET .		...	327,8
	826,8					

352. The following is a statement of the adjustments in the accounts by which the above result was obtained:—

1898-99. Budget. Sterling.	Exchange.		1898-99. Accounts. Sterling.	Exchange.
+16,000,0	+8,960,0	Bills drawn by the Secretary of State . .	+18,692,4	+9,384,0
+519,8	+291,0	Net remittances of Railway Capital to India .	—78,6	−39,5
−493,8	—276,5	Miscellaneous remittances	−1,130,0	−567,3
		Deduct—		
17,406,4	*9,747,6*	Net expenditure in England	16,830,8	8,449,4
...	*53,7*	Lump alteration by the Financial Department .		
	—826,8	Difference, being exchange brought to account in excess of that involved in the Remittances from India during the year		327,8

353. The difference under *Miscellaneous* was due chiefly to exchange on the Rupee advances to the Bengal-Nagpur and Indian Midland and Saugor-Katni Railway extensions.

Section R.—IMPERIAL LOANS AND ADVANCES.

	Budget 1898-99.		Accounts 1898-99.	
Imperial Loans and Advances . . .	100,0	—8,7	139,2	—97,4

354. The following are the details :—

1898-99. Budget. Amount advanced.	Amount repaid.		1898-99. Accounts. Amount advanced.	Amount repaid.
...	11,2	Loans to Native States	...	6,0
...	63,2	" Presidency Corporations and Port Trusts . .	70,0	110,3
...	2,1	" Mofussil Municipalities	11,5	2,1
...	6	" Landholders and Notabilities	1,2	3
...	6,0	" District and other Local Committees . .	...	6,1
1,3	6,9	" Regimental and other Loans, Military . . .	4 5	7,7
7,4	10,0	Advances to Cultivators	10,2	6,7
8,7	100,0	TOTAL AS ABOVE .	97,4	139,2

355. The amount repaid under *Loans to Native States* was 4,3 by the Cooch Behar State, 1,6 by the Sultan of Muscat, and 1 by the Baoni State against a Budget provision of 8,5, 2,4, and 3, respectively. The falling off in the actuals, as compared with the Estimate, was due to the non-payment of an arrear instalment due by the Cooch Behar State for the Railway loan, Government having extended the period for the complete repayment of the loan by two years, and to the subsidy to the Sultan of Muscat, from which the Loan granted to him is repayable, having been kept in abeyance under the orders of Government. Under *Loans to Presidency Corporations and Port Trust* the actuals include 50,0 advanced to and repaid by the Calcutta Municipality on account of plague expenditure, and an advance of 20,0 to the Madras Municipality, as a temporary loan sanctioned by the Government of India. The Budget provided for a payment of 3,0 by the Trustees of the Bombay Port Trust Loan, but only 1 was paid. Under *Loans to Mofussil Municipalities* 10,0 and 1,5 were advanced to the Karachi and Hyderabad Municipalities, respectively, under sanction of the Government of India. The repayments correspond with the amount provided in the Budget. Under *Regimental and other Loans, Military*, 4,5 was advanced in the Military Department against a provision of 1,3 only in the Estimate. The repayments almost correspond with the Budget. The advances under *Loans to Landholders and Notabilities* were sanctioned in the course of the year. Under *Advances to Cultivators*, the advances and repayments occurred chiefly in India, the variations, as compared with the Estimate, being due to the scarcity prevailing in Ajmere-Merwara.

Section RR.—PROVINCIAL LOANS AND ADVANCES.

	1898-99. Budget.	1898-99. Accounts.
Provincial Loans and Advances	759,8—788,9	813,4—416,5

356. The following are the details :—

1898-99. Budget. Amount advanced.	1898-99. Budget. Amount repaid.		1898-99. Accounts. Amount advanced.	1898-99. Accounts. Amount repaid.
338,8	59,4	Loans to Mofussil Municipalities	78,4	55,5
...	7,2	" Port Funds	3,7	5,2
7,5	8,3	" District Committees	6,5	9,9
...	4,2	" Landholders, etc.	20,0	8,9
10,5	21,7	Advances under Special Laws	27,8	30,9
432,1	659,0	" to Cultivators	280,1	703,0
788,9	759,8	TOTAL AS ABOVE .	416,5	813,4

357. The most noticeable features in this table are the reduction in the advances to Municipalities and Cultivators, and the increase in the repayments by the latter in consequence of agricultural prosperity.

358 Under *Loans to Mofussil Municipalities* the following are the details by Provinces of advances and repayments during the year :—

	Budget, 1898-99.		Accounts, 1898-99.		Excess (+) Deficiency (—)	
	Advanced.	Repaid.	Advanced.	Repaid.	Advanced.	Repaid.
Central Provinces	11,5	4,4	6,4	4,3	—5,1	—1
Burma	69,4	3,4	1,9	2,4	—67,5	—1,0
Bengal	54,0	9,8	10,1	8,4	—43,9	—1,4
North-Western Provinces and Oudh .	67,5	20,1	15,9	17,1	—51,6	—3,0
Punjab	86,4	9,8	31,1	11,1	—55,3	+1,3
Madras	...	5,0	...	3,8	...	—1,2
Bombay	50,0	6,9	13,0	8,4	—37,0	+1,5
TOTAL .	338,8	59,4	78,4	55,5	—260,4	—3,9

359. The large savings in advances, in most of the Provinces, were due to loans provided for in the Estimates not having been issued. Under *Loans to Port Funds* the debit of 3,7 represents an advance to the Mergui Port Fund. The fall in the receipts was due to the payment of the annual instalment of the loan to the Chittagong Port Fund having been deferred under the orders of Government.

360. The smaller outlay under *Loans to District Committees* occurred in Bengal, due to advances anticipated in the Budget not having been drawn during the year. The increased receipts also occurred mainly in Bengal due to larger payments than were provided for by the Durbhanga District Board. Under *Loans to Landholders and Notabilities* the debit of 20,0 was on account of the advance to the Raja of Hill Tippera. The excess in the receipts occurred, chiefly, in Bengal. due to larger recoveries than were anticipated from the daughters of Prince Jehan Kadir Mirza, and in Bombay, owing to the Jath State having paid an instalment in advance of the due date.

361. Under advances to cultivators the following are the details :—

	Budget, 1898-99.		Accounts 1898-99.		Difference Advanced.	Difference Repaid.
	Advanced.	Repaid.	Advanced.	Repaid.		
Central Provinces	60,0	73,2	59,7	95,7	— 3	+ 22,5
Burma	40,0	39,5	20,8	42,0	— 19,2	+ 2,5
Assam	2,6	1	2	1	— 2,4	...
Bengal	25,0	63,4	12,2	72,0	— 12,8	+ 8,6
North-Western Provinces and Oudh .	74,5	144,5	22,4	175,8	— 52,1	+ 31,3
Punjab	75,0	104,9	40,0	81,7	—35,0	— 23,2
Madras	55,0	62,0	32,6	80,6	— 22,4	+ 16,6
Bombay	100,0	171,4	92,2	155,1	—7,8	—16,3
TOTAL .	432,1	659,0	280,1	703,0	—152,0	+ 44,0

Section RR.—PROVINCIAL LOANS AND ADVANCES—*continued.*

362. The prosperity of the agricultural classes minimised the necessity of advances to them, and enabled them to repay a larger portion of the advances of previous years than the Budget anticipated. In the Punjab and Bombay the recoveries were over-estimated. Under *Advances under Special Laws* the increase in advances occurred in Bengal, owing to the construction of sluices in the 24-Pergunnahs, which was not anticipated in the Budget. The increased receipts also occurred in Bengal due to large recoveries on account of the advances for the Howrah and Rajapur drainage works.

363. As explained in former reports, these are all net sums. The Indian figures represent the difference between the advances taken by the Railway Companies and the credits given to them, chiefly on account of stores used on Revenue account. The English figures represent the difference between the Capital deposited by the Companies with the Secretary of State and the withdrawals for expenditure on Stores, Establishment charges, etc. These figures are necessarily liable to great fluctuations, but the following general explanations are furnished:—Under *Guaranteed Companies* the differences in India under the Bombay, Baroda and Central India and Great Indian Peninsula Railways were due to larger sales of stores to foreign railways, and larger issues of stores to Revenue than anticipated. The net credit on the Madras Railway was due mainly to smaller outlay on works than expected, to difficulty in obtaining supplies of timber, firewood, and coal owing to the abnormally heavy monsoon and other causes and to the delay in the acquisition of land and in starting work on its extensions pending the settlement of questions relating to weight of rails and gauge to be adopted. Under England there was a lapse of 478,6 in payments on account of establishment, and purchase of stores, etc., on all three lines, while the receipts on account of subscribed capital were 541,7 less than had been anticipated.

364. Under *Assisted Companies* the excess in India on the Bengal Central Railway was due to short issues of stores to Revenue; to large purchases of coal and other stores; and to a refund to Government of the cost of rolling-stock taken over from the Eastern Bengal State Railway on 1st January 1898. The lapse in India on the Bengal-Nagpur Railway was due to a write-back to Revenue of its share of the work of adding sâl sleepers to rails, to work on the Raipur Dhamtari line having been started in October 1898 instead of early in the year; and to less expenditure in connection with shipping and landing charges on English stores. The lapse on expenditure in India on the Burma Railways was due to provision having been made for completing and opening the Mandalay-Kunlon Railway to the Gorge, and starting work on the Gorge tunnel and cuttings, etc., but the work could not for various reasons be pushed on, as a number of engineering questions were not finally settled; to the anticipation of the practical completion of the Meiktila-Myingyan branch not having been realized; and to completion of the formation, bridging, permanent-way and buildings not having been effected. The excess in India on the Indian Midland Railway was due to no provision having been made for the charge for capitalized value of abatement of land revenue, no data being available on which to base an estimate; to work on the Saugor-Katni extension having been pushed on vigorously, to admit of the section being opened to traffic during the year; and to no provision having been made for commission on debentures for

Section S.—CAPITAL ON RAILWAY COMPANIES—*continued.*

£150,000 issued during the year. The lapse in India on the Southern-Mahratta and Mysore State Railways was due to the annual indents for open line stores not having been submited to the extent for which provision was made, owing to smaller demands from Revenue and to special steps having been taken to reduce stock in hand; to several works not having been sanctioned, and to slow progress of work owing to scarcity of labour due to the prevalence of plague.

365. The branch line Companies deposit capital in Government Treasuries, and against these deposits funds are withdrawn for expenditure on construction according to requirements. For the South Behar 145,0 were deposited and 222,8 withdrawn in 1898-99 against 200,0 and 250,0 respectively provided in the Budget. In England there was a lapse of 116,2 for cost of stores, Establishment charges, etc., and the receipts on account of Subscribed Capital were more by 51,8. The receipts on account of transfer fees, etc., which are very uncertain, also exceeded the Estimates by 1,8.

Section T.—REMITTANCES.

	1898-99. Budget.	Revised.	Accounts.
Money Order (net)	...	...	−22,4
Other Local Remittances (net)	...	...	+41,4

TOTAL	+53,0	+745,2	+152,8

366. The figures entered in this group are the net result of very large transactions, and there is nothing special to record in respect of them. The Money Order transactions continue to show a rapid growth as will be seen from the following figures :—

Year		Issued.	Paid.
1891-92	Money Order transactions	17,365,8	17,349,3
1892-93		18,117,7	18,098,9
1893-94		19,290,8	19,294,5
1894-95		20,452,8	20,430,8
1895-96		21,757,8	21,739,6
1896-97		23,295,0	23,242,7
1897-98		25,714,4	25,714,5
1898-99		26,155,2	26,177,6

Section U.—SECRETARY OF STATE'S BILLS.

	1898-99. Budget.	Revised.	Accounts.
Drawings	16,000,0	19,000,0	18,692,4
Payments	16,014,5	18,695,2	18,883,9

367. The following are the amounts of bills and transfers drawn during the year by the Secretary of State :—

		£	Rx.	Rate in pence.
April	1898	2,054,1	3,088,9	15·96
May	"	1,959,4	2,946,5	15·96
June	"	1,370,1	2,066,9	15·91
July	"	1,281,9	1,948,5	15·78
August	"	696,4	1,051,7	15·89
September	"	1,228,6	1,847,1	15·96
October	"	1,214,5	1,823,4	15·98
November	"	1,198,5	1,803,5	15·94
December	"	1,776,6	2,664,5	16·00
January	1899	1,912,3	2,852,8	16·09
February	"	1,892,4	2,824,9	16·08
March	"	2,107,6	3,157,6	16·02
		18,692,4	28,076,3	15·98

368. The payment account of the year is as follows :—

	£	Rx.
Bills of 1897-98 outstanding on 1st April 1898	503,4	767,0
Bills drawn in 1898-99 as entered above	18,692,4	28,076,3
TOTAL BILLS FOR PAYMENT	19,195,8	28,843,3
Bills paid in 1898-99	18,883,9	28,375,6
Bills outstanding on 1st April 1899	311,9	467,7

Section V.—CASH BALANCE.

	1898-99. Budget.	Revised.	Accounts.
BALANCE ON 1ST APRIL 1898—			
India	16,722,3	15,982,4	15,982,4
England	2,168,3	2,534,3	2,534,3
TOTAL	18,890,6	18,516,7	18,516,7
BALANCE ON 31ST MARCH 1899—			
India	16,208,9	17,072,0	16,766,5
England	2,242,9	4,304,5	3,145,8
TOTAL	18,451,8	21,376,5	19,912,3
Increase (+) or decrease (—) of balance on 31st March 1899	—438,8	+2,859,8	+1,395,6

369. The above difference is distributed between India and England in the following proportions:—

	1898-99. Budget.	Revised.	Accounts.
India	—513,4	+1,089,6	+784,1
England	+74,6	+1,770,2	+611,5
TOTAL	—438,8	+2,859,8	+1,395,6

370. Taking India and England together, the net transactions of the year were better than expected in the Budget by the sum of 1,834,4. The variations which brought about this result are as follows:—

	Better.	Worse.
Improvement in Imperial Surplus	3,069,9	...
Improvement in Provincial Surplus	1,584,2	...
Decrease in Capital Expenditure of State Railways and Irrigation works not charged to Revenue	830,3	...
Decrease under Permanent Debt incurred	...	2,417,6
Decrease under Temporary Debt incurred	...	1,500,0
Increase in the withdrawals of Savings Banks Deposits	...	237,5
Increase under Appropriation for Reduction or Avoidance of Debt	119,4	...
Increase under Departmental and Judicial Deposits	329,4	...
Net excess recovery under Advances	335,5	...
Net excess debit balance under Suspense Accounts	...	132,8
Net excess debit under Exchange on Remittance Account	...	1,154,6
Net short payments under Loans and Advances by Provincial Governments	426,0	...
Smaller withdrawals by Railway Companies	729,1	...
Decrease in the balance of Secretary of State's Bills remaining unpaid at the end of the year	...	299,3
Larger receipts under remittances	99,8	...
Minor variations	52,6	...
	7,576,2	5,741,8

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Weather Review of India for the week ending at 8 a.m. on Saturday, February 24th, 1900.

The depression in the Punjab on Saturday had filled up by Sunday but had given light to moderate rain and snow in the Eastern Upper India hill districts and hailstorms in the western submontane districts of the North-Western Provinces. Ranikhet reported a fall of 1·49 inches and Chakrata ·80 inch. The second depression in the South of the North-Western Provinces and adjacent districts had moved Eastward and was lying over South Bihar, Chota Nagpur, Orissa and the East of the Central Provinces. It had given thunderstorms in Bihar, Chota Nagpur and Bengal, the largest amounts reported being 1·10 inches at Barisal and ·70 inch at Burdwan. Showers continued in Bengal and Assam during the next 24 hours but the depression in North East India had practically filled up by Monday morning. Another depression entered Upper Sind on Tuesday morning but it was a very feeble disturbance and filled up without giving any rain, except a few light showers in Baluchistan. A depression formed in West Persia on Tuesday and Wednesday and advancing Eastwards caused a rapid to brisk fall of pressure in Baluchistan and Sind on Thursday and entered Sind on Friday. It gave no rain in Persia but gave light to moderate rain in Baluchistan on Friday and Saturday, and as it passed through Rajputana was the cause of the formation of a second depression in the Punjab Central near Ludhiana, on Saturday morning. Light showers were received in the North-West Punjab. The amount of rainfall reported on Friday and Saturday at Chaman was 1·59 inches and at Quetta ·82 inch. In addition to the rain given by the two depressions on Saturday, thunderstorms were reported from the Central Provinces, but the amounts of rain received were small, the largest reported being ·45 inch at Nagpur and ·36 inch at Seoni.

Daily Summary.—*Sunday, February 18th.*—Pressure had risen briskly to rapidly in North-West and Central India and had fallen slightly to briskly in Bihar, Chota Nagpur and the adjoining districts. The depression in the Southern districts of the North-Western Provinces on Saturday had advanced into South Bihar, Chota Nagpur, Orissa and the Eastern districts of the Central Provinces, and the depression in the Punjab had filled up. Thunderstorms had occurred in Bihar, Chota Nagpur and Bengal and light to moderate rain and snow had fallen in the Eastern Upper India hill districts while hailstorms had been reported from the western submontane districts of the North-Western Provinces. Mean temperature was normal in Berar, Burma, the Punjab, Sind and the Bombay Deccan, in defect in the West Coast and in excess elsewhere.

Monday, February 19th.—The barometer had risen generally, except in Assam and East Bengal, where it had been steady or had fallen slightly. The depression in Chota Nagpur and adjacent districts had practically filled up but had given showers in Bengal and Assam. Mean temperature was 6½° in excess in Orissa, 4½° in Chota Nagpur and 4° in Mysore and South India. It was normal or in slight defect in Assam, the Punjab, Rajputana Gujarat, Central India, Berar, the West and Madras Coasts and the Bombay Deccan.

Tuesday, February 20th.—The barometer had been steady in Baluchistan and had fallen briskly in Upper India, and a shallow depression was shown entering Upper Sind. Light showers had been received in Baluchistan and at Bhamo, Kindat, Silchar and Darjeeling. The mean of the day and night temperatures was normal or in defect in most provinces, but was from 3° to 4½° in excess in the Madras Deccan, Sind, South India, Mysore and Central India.

Wednesday, February 21st.—Pressure had fallen slightly to briskly in Rajputana, the East of the Central Provinces, Chota Nagpur and Orissa, and the depression in Upper Sind had advanced into North Rajputana and the South East Punjab, where pressure was in slight defect. Mean temperature was in excess in North West India, Lower and Central Burma, Tenasserim and the Peninsula, except the West Coast. It was normal or in slight to moderate defect elsewhere. The only shower of rain reported was one of 1·06 inches at Mergui.

Thursday, February 22nd.—Pressure had given way rapidly in Baluchistan and briskly in Sind, and another shallow depression from Persia was affecting Sind, where pressure was in moderate defect. Mean temperature was normal or in slight defect, except in North West India, Orissa, the Bombay Deccan and Madras where it was in excess. The excess was largest, averaging 4° in the Madras Deccan, Mysore and the Punjab. A thunderstorm had given half an inch of rain at Balasore, and Mergui had received 1·23 inches of rain.

Friday, February 23rd.—Pressure had fallen slightly to rapidly in Baluchistan, Sind, the Punjab and Rajputana. The depression advancing Eastwards had entered Sind and pressure was in considerable to large defect in its central area. Light to moderate rain had fallen in Baluchistan, and Mergui had received another shower. Mean temperature was 6½° above the normal in Sind, 5½° in the Punjab and 4½° in Rajputana, Mysore and the Madras Deccan. It was normal or in slight defect in North-East India, Burma and the West Coast.

Saturday, February 24th.—The barometer had risen briskly to rapidly in Baluchistan and Sind and had fallen briskly to rapidly in the East Punjab, East Rajputana, the North-Western Provinces and Chota Nagpur. The depression in Sind, on Friday, had advanced Eastwards into East Rajputana, Central India and the West of the North-Western Provinces, and a second depression had formed in the Punjab. Light rain had fallen in Baluchistan and the North-West Punjab and thunderstorms had given a few light showers in the Central Provinces. Mean temperature was from 4° to 5½° above the normal in Central India, the Central Provinces, Rajputana and Berar. It was in slight to considerable defect in Baluchistan and Assam, and normal in Burma, Bengal, Bihar and the West Coast.

Temperature.—The variations of mean temperature from the normal were with a few exceptions, smaller during the past week than they have been for some time past. In Orissa the variation was +5°·3 on the 18th and +6°·3 on the 19th; on the 23rd it was +5°·6 in the Punjab and +6°·5 in Sind, and on the 24th mean temperature in Central India averaged 5°·3 above the normal, but these were the only instances of the variation exceeding 5°.

The mean temperature of the week was practically normal in Burma, Assam, Bengal, Bihar, Gujarat and the West Coast. It was in excess in the remaining provinces, the excess being most marked in the Madras Deccan (3°·7), Mysore (3°·2), Sind and South India (3°·1) and the Punjab (2°·7), the largest excess has hence occurred in the South of the Peninsula and in the North West.

The following table gives mean temperature variation data of the week:—

Province.	Variation from normal of mean temperature of 24 hours preceding 8 A.M. of							Mean variation of week.
	18th.	19th.	20th.	21st.	22nd.	23rd.	24th.

Mean for whole of India	+2·2	+1·8	+0·9	+1·1	+1·1	+1·8	+2·0	+1·9

The mean temperature for the whole of India was practically normal on the 20th and in slight to moderate excess on the remaining days of the week. In the whole week the excess averaged 1°·9.

Rain.—Light rain has been fairly general in Assam, Bengal, Orissa, Chota Nagpur, Bihar, the North West Himalayas and Submontane districts, Berar, the Central Provinces and Baluchistan. Amounts equal to or exceeding the normal rainfall of the week have been received in Assam, Bengal (with the exception of the Bengal Hills), Orissa, Chota Nagpur, North Bihar, the West Submontane and Hills, divisions of the North-Western Provinces, the Central, Submontane, Hills and North divisions of the Punjab, Berar, the Central Provinces, the Baluchistan Hills and the North division of the East Coast. The average rainfall of the division has exceeded an inch in Baluchistan and the Hills division of the North-Western Provinces.

The last three columns of the table at the end show that the rainfall of the period, December 31st to February 24th, was practically normal or in excess over the whole of Bengal (except the Hills division), Chota Nagpur, Bihar, the whole of the North-Western Provinces (with the exception of the West division), the Submontane, Hills and North Punjab, the Central and East divisions of the Central Provinces, the Baluchistan Hills, Central India (East), South Central Madras, and Mysore.

The following gives the stations at which the rainfall of the week exceeded two inches in amount :—

Assam—Cherra Poonjee	**2·48 inches.**
Bengal—Ranaghat (Nadia)	**2·73 "**
Bihar—Arraria (Purnea)	**2·13 "**
Central Provinces—Tirora (Chanda)	**2·21 "**

W. A. BION,
for *Meteorological Reporter to the Government of India.*

SIMLA, *1st March 1900.*

T. W. HOLDERNESS,
Secretary to the Government of India.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Weekly Report on the state of the Season and Prospects of the Crops.

Madras.—*For week ending 3rd March.*—Report not received.

Bombay.—*For week ending 5th March.*—No rain has fallen. The standing spring crops are in good condition in the Konkan, Karachi, Shikarpur and the Upper Sind Frontier Districts, and in irrigated lands in Baroda, four districts of Gujarat and three of the Deccan. The spring crops have been damaged by frost in parts of Hyderabad and the Thar and Parkar districts and have withered elsewhere. Reaping of remnants of spring crops has been completed in Belgaum and Satara and is progressing in the Konkan and in the other districts of the Karnatak and the Deccan. Fodder supply is scanty in Broach and in parts of Sindh, the Deccan and the Karnatak. Cattle are suffering severely owing to scarcity of fodder in Rajkot and Baroda and in three districts of Gujarat and in parts of four districts of the Deccan. Prices have fallen in two districts, risen in nine, and are stationary elsewhere.

The daily average number on relief are as follows:—For week ending 3rd instant:—British districts:—on test works, 2,054; on relief works, 888,183; dependants, 250,439; total on works 1,140,676. In poor-houses, 20,815; on village relief, 67,117; total on gratuitous relief, 87,932. Native States—on relief works, 340,806; dependants, 55,663; total on works, 395,469. In poor-houses, 27,962; on village relief, 7,113; total on gratuitous relief, 35,075; grand total on relief, 1,660,152.

Bengal.—*For week ending 5th March.*—More rain fell during the week in various parts of Bengal Proper and Behar and in Hazaribagh and Manbhum. There were also slight showers in Angul and the Khurda Sub-division of Puri. The spring crops are now being generally harvested, and the collection of opium is going on. Spring rice is being transplanted and is doing well, and lands are being ploughed for autumn rice and jute. In Hazaribagh mango and *mahua* are promising crops. In Singbhum *mahua* is promising, but mango has failed. Prices are practically stationary, there being slight variations in a few districts. Fodder and water are generally sufficient except in Angul.

North-Western Provinces and Oudh.—*For week ending 7th March.*—Garhwal received an inch of rain, Dehra Dun over half an inch and Ballia and Mirzapur over ½ of an inch each, while a few cents of rain also fell in Almora, Sahâranpur, Etah and Kheri. Spring crops are ripening and are being reaped. Ploughings and sowings for extra spring crops and sugarcane continue, and land is being prepared in places for autumn crops. In Mirzapur the standing crops have been slightly damaged by hail. Poppy is being lanced and opium collected. Supplies and fodder are generally available. Prices show a slight fall or continue generally stationary. There were 2078 persons on four relief works in the Jhansi district and 312 persons on gratuitous relief in that district. The number of persons receiving relief in poor-houses was:—Jhansi, 103; Mahroni, 39; Muttra, 201; and Agra, 15, of whom three were immigrants.

Punjab.—*For week ending 7th March.*—More or less rain has fallen in all districts except Hissar, Rohtak, Gurgaon, Delhi, Multan and Amritsar. Sowings of extra spring crops as well as of sugarcane and cotton crops are in progress; ploughings for other autumn crops are going on. Irrigated crops are being watered. The condition and prospects of standing irrigated crops are said to be good to fair in Hissar, Rohtak, Karnal, Amritsar, Peshawar and Bannu; and average to below average in Gurgaon, Delhi, Jullundur, Ferozepore, Mooltan, Rawalpindi and Dera Ismail Khan. Crops irrigated by brackish wells are suffering in Rohtak and those in Gurgaon are withering from absence of rain,

low water-supply, feebleness of well bullocks and high winds. The recent rain has slightly benefited and improved the condition of standing crops in Sialkot, Gujrat and Dera Ismail Khan. More rain is urgently wanted for unirrigated crops which are generally in bad condition, and also for late sown spring crops in all districts. The water-supply in the Kalapani stream in the Dera Ismail Khan district is running short. Rape, gram and barley crops are being damaged by caterpillars in parts of Ferozepore. Cattle are reported to be in good condition in Peshawar and fair in Karnal; in other districts their condition is generally poor, but is improving in parts of Sialkot. Cattle are still dying of starvation in Jhelum and Dera Ismail Khan. Fodder is said to be scarce in all districts, and this scarcity is keenly felt throughout the province, especially in the unirrigated tracts. Prices of all food-grains have fallen in Hissar, Rohtak, Amballa, Jullundur, Amritsar, Gujrat, Rawalpindi and Peshawar; the prices of wheat have risen in the Bannu and Dera-Ismail-Khan districts; in other districts the prices are unsettled. Wheat is selling from 10 to 13½; gram, 11 to 14; barley, 12 to 13; great millet, 9¾ to 14; bulrush millet, 9¾ to 13, and maize, 11 to 15 seers per rupee. No change has been made in the price of rice in Sialkot. The average numbers of relief and test workers are:—In British Districts—Relief workers, 131,541; dependants, 49,420; test workers, 34,440; in poor-houses, 4,661; otherwise relieved, 21,891. In Native States:—Relief workers, 3,466; gratuitously relieved, 4,085; no report has been received from one work in Gurgaon.

Burma.—*For week ending 3rd March.*—In Lower Burma the harvesting of wet weather paddy has been completed, except in Myaungmya where threshing and winnowing still continue. In Upper Burma the transplanting of dry weather paddy has been completed in Bhamo, Katha and Kyaukse. The gathering of gram and peas and the reaping of wheat has commenced in Minbu. The prospects of crops are generally good. Damage to wheat, maize, peas and tobacco by insects is reported in Minbu. The price of paddy has fallen slightly in Akyab, Pegu, Thongwa, Amherst and Thayetmyo and has risen slightly in Prome and considerably in Tharrawaddy. Elsewhere the price is stationary.

Central Provinces.—*For week ending 3rd March.*—The weather has been generally clear, the days are warm and the nights and mornings cool. Light showers of rain fell in parts of Jubbulpore and Balaghat; in the latter district eleven cents were registered. In Bhandara the recent rain has been detrimental to harvested crops standing on the threshing floors; but has slightly benefited the standing ringni (cold weather) *juar*. The harvesting of spring crops is approaching completion, and threshing and winnowing is in progress in parts of Seoni and Hoshangabad. The crop outturns are moderate to fair in the Jubbulpore division, but elsewhere they are extremely poor. The pressing of sugarcane continues in Betul. The preparation of land for autumn sowings is in progress in parts of Nagpur, Mandla, Nimar and Wardha. Fodder and water are generally inadequate. Prices have slightly risen in Saugor, Damoh and Raipur; but are steady in Jubbulpore, Mandla, Narsinghpur, Nimar, Betul, Chanda, Bhandara, Balaghat and Sambalpur. Elsewhere there are local fluctuations. The cheapest prices are—wheat, 12; gram, 16; rice, 11½, and *juar* 12 seers per rupee; while the dearest prices are—wheat, 8; gram, 10½; rice, 8⅕, and *juar* 9½ seers per rupee. As harvest operations are slackening the demand for labour is increasing. Over the province as a whole the number on famine relief has increased by 19,962, of which Bilaspur alone accounts for about 12,000. There are 150 Public Works Department relief camps now open. The numbers on relief at the end of the week were as follows:—Relief workers—Public Works Department—adults, 554,141; children, 92,057; village works, 285,388; grass cutting works, 25,289; weaver relief, 24,992; total 981,867. Gratuitous relief:—Dependants—adults, 4,830; children, 115,806; poor-houses—adults, 591; children 97; kitchens—adults, 21,985; children, 179,747; otherwise relieved—adults, 96,125; children, 20,776; total on gratuitous relief, 439,957; total on all forms of relief, 1,421,824. Feudatory States:—Relief workers, 30,890; gratuitous relief, 11,613; total, 42,503. The returns relate to nine States only.

Assam.—*For week ending 6th March.*—The weather is seasonable. Ploughing for early rice in the Assam Valley and for lowland winter rice in Sylhet continues. The pruning of tea is nearly finished. Pressing of sugarcane and gathering of mustard and pulses is in progress. The outturn of mustard is generally good. The prospects of sugarcane are good in Sylhet and Lakhimpur; elsewhere they are indifferent. The land is being prepared for jute in Goalpara. Prices—Common rice, Silchar, 16 to 17; Sylhet, $17\frac{1}{2}$; Dhubri and Tezpur, 16; Gauhati, 19; Nowgong, 20; Sibsagar, 13 and Dibrugarh 12 seers per rupee.

Mysore.—*For week ending 6th March.*—Report not received.

COORG:—*For week ending 6th March.*—The threshing of raggi continues. Prices of food grains are rising. The public health is fair. Fodder for cattle is decreasing, but water is sufficient.

Berar and Hyderabad.—*For week ending 3rd March.*—No rain has fallen. The weather is warm. The harvesting of wheat and gram sown on well-irrigated lands has commenced, except in the Ellichpur taluq. The breaking up of fields for the ensuing crop is in progress in parts of four districts. The supply of fodder and water is inadequate. Prices in seers per rupee—Akola, $9\frac{1}{4}$; Amraoti, $10\frac{1}{2}$; Basim, $8\frac{3}{4}$; Buldana, $9\frac{1}{2}$; Ellichpur, 9; Wun, $10\frac{1}{2}$. The number of persons employed on relief works was 265,896; dependants, 4,084; occupants of poor-houses, 4,778; relieved in kitchens, 36,014; in receipt of village relief, 6,296; grand total, 317,668.

Hyderabad.—*For week ending 3rd March.*—The rainfall during the week was 2 cents; the total from 1st January, 15 cents. The small portion of spring crops saved is being harvested; the winter rice crop sown under wells very badly needs rain and is withering. The weather continues cloudy in parts. Prices:—wheat $5\frac{3}{4}$, coarse rice, $6\frac{1}{3}$ and *juar* $9\frac{1}{8}$ seers per current sicca rupee. The total number of persons on relief works including dependants was 136, 717, and gratuitously relieved, 21, 673.

Rajputana.—*For week ending 28th February.*—No rain has fallen. The condition of the standing crops remains unchanged. Prices are rising in 2 states; are falling slightly in 7 and are stationary elsewhere. Prices:—Marwar, $9\frac{7}{8}$; Partabgarh, $9\frac{1}{2}$; Mewar, $9\frac{3}{16}$; Tonk, $8\frac{7}{8}$; Bundi, $8\frac{1}{4}$; Shahpura, [illegible]; Ajmer, $10\frac{27}{32}$; Merwara, $10\frac{13}{16}$; Jaipur, $13\frac{13}{16}$; Kishangarh, $11\frac{1}{2}$; Bharatpur, 13; Alwar, $11\frac{1}{4}$; Bikaner, $9\frac{3}{4}$; Jaisalmer $8\frac{1}{8}$. The numbers on relief works are as follow:—Marwar, 107,982; Mewar, 99,644; Bundi, 4,043; Tonk, 3,816; Shahpura, 2,554; Ajmer, 23,596; Merwara, 90,124; Jaipur, 42,112; Kishangarh, 6,296; Karauli, 1,000; Bharatpur, 11,381; Alwar, 7,614; Bikaner, 37,505; Jaisalmer, 1,524. On gratuitous relief:—Marwar, 24,262; Mewar, 23,431; Bundi, 893; Tonk, 749; Shahpura, 968; Ajmer, 9,142; Merwara, 15,70[illegible]; Jaipur, 32,212; Kishangarh, 3,047; Karauli, 200; Bharatpur, 1,045; Alwar, 1,369; Bikaner, 975; Jaisalmer, 162. Besides these, 191 persons in Ajmer and 8,640 in Marwar are returned as being relieved by private charity. The totals for all Rajputana, excluding figures for Kotah, Jhalawar and Sirohi, not received, are:—On works 439,191; on gratuitous and charitable relief:—122,995. The Commissioner of Ajmer and the Resident, Udaipur, have been asked for further reports regarding figures on relief works.

Central India.—*For week ending 28th February.*—No rain has fallen. Agricultural operations are in progress everywhere. The condition of the standing crops is indifferent in Gwalior; fair to average in Bhopal, Malwa, and Bundelkhand; and good in Baghelkhand. They have been very much damaged in Indore. The condition of agricultural stock and pasturage is bad in Gwalior, Malwa and Indore; fair in Bhopal and good in other agencies. Prices are steady in Gwalior, Baghelkhand, Malwa and Bhopawar; high in Bhopal and above normal in Bundelkhand. They are rising in Indore. Average prices of staple food-grains are:—12 seers in Gwalior; $10\frac{1}{2}$ in Bhopal; $13\frac{1}{4}$ in Bundelkhand; $12\frac{1}{2}$ in Baghelkhand; 10 in Malwa; $7\frac{3}{4}$ in Indore. Numbers on relief works—

In Gwalior 1,629; Bhopal, 12,672; Bundelkhand, 3,886; Baghelkhand, 21,344; Malwa, 15,513; Bhopawar, 46,624; Indore, 6,620. On test works—Gwalior, 475. On gratuitous relief—Bhopal, 986; Bundelkhand, 1,937, Baghelkhand, 335; Malwa, 3,785; Bhopawar, 2,949; Indore, 6,155.

Baroda.—*For week ending 24th February.*—There is no change in the agricultural prospects. The condition of agricultural stock is not satisfactory. Many cattle have died. The prices of food grains have undergone no change during the week. The average number of persons employed on relief works in Baroda territory was 51,596 and number on gratuitous relief 11,794.

Kashmir.—*For week ending 6th March*—Fair rain has fallen and is beneficial to crops. The weather is sometimes clear and sometimes cloudy. Prices continue below normal. The price of rice is 27 seers the rupee.

JAMMU PROVINCE.—*For week ending 7th March.*—No rain has fallen. Prices are falling slightly; they are:—wheat, from 10 to 16 and maize, 11½ to 20 seers per rupee. The condition of standing crops is fair. Fodder is scarce.

Nepal.—*For week ending 3rd March.*—The rainfall was 0·41 of an inch. The weather is fine. The prospects of crops are good. The price of rice is 8½ seers per rupee.

The number of persons in receipt of relief during the preceding and present weeks in each Province is shown in the following table:—

Name of Province.	PRECEDING WEEK.			PRESENT WEEK.			Increase or decrease.
	Relief works.	Gratuitous relief.	TOTAL.	Relief works.	Gratuitous relief.	TOTAL.

§ Reports not received.

T. W. HOLDERNESS,
Secretary to the Government of India.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

(FAMINE.)

Return of the number of persons in receipt of relief in districts affected by scarcity.

NOTE.—The figures are compiled from returns obtained from Local Governments and Political Officers, and give the District details of the Provincial totals published weekly in the Crop and Weather Summary of the *Gazette of India*.

Non-labouring children and other dependants of relief workers are classed as on relief works when distinguished in the local returns from persons gratuitously relieved in poor-houses or at their homes.

The dates at the head of the table are the dates of the *Gazette of India* in which the Provincial totals were published. The figures, however, actually show the numbers on relief in each previous week.

No.	Name of Province and District.	Population.	For the week ending the 10th February 1900.			For the week ending the 17th February 1900.			For the week ending the 24th February 1900.			For the week ending the 3rd March 1900.

(a) Includes Godhra-Rutlam-Nágda and Bhátinda-Ferozepore standard gauge.

(b) Includes Jammu and Kashmir and Hyderabad-Shadipalli rys.

(c) Includes Bezwada-Madras ry.

(d) From 1st to 30th April 1898 and from 23rd December 1898 to 25th February 1899.

(e) From 3rd January to 24th February 1900.

(f) From 1st December 1898 to 25th February 1899.

(g) From 3rd July 1899 to 24th February 1900.

(h) From 15th October 1898 to 25th February 1899.

(i) From 1st April to 25th June 1899 and from 19th October 1899 to 24th February 1900.

(j) From 1st to 29th October 1898, after which the line was closed for traffic.

(k) From 15th June 1899 to 24th February 1900.

(l) From 1st December 1899 to 24th February 1900.

(m) From 21st October 1899 to 24th February 1900.

(n) From 1st June 1898 to 25th February 1899.

ACCOUNTS AND ESTIMATES.

APPENDIX II.

APPENDIX III.

FINANCIAL STATEMENT FOR 1900-1901.

PART I.

INTRODUCTION.

1. In introducing the Financial Statement last year my predecessor dwelt with cautious satisfaction on the rapid recovery of the country from the effects of famine. It was generally hoped, and not without reason, that the two years of good harvests which had contributed to this recovery, were ushering in a period of agricultural prosperity, and that the word famine would not be on men's lips again for some time. That hope was doomed to cruel disappointment. While the ravages of plague continue, India has once more been afflicted by a visitation of famine nearly as widespread as the greatest famines of the century, and, in many respects, unprecedented in intensity. The significance, therefore, of the figures which I have to submit to this Council will very largely relate to the agricultural situation.

2. The Indian Financial Statement has to deal with three years. In the first year of the present triad, 1898-99, the total revenue was £67,595,815 and the expenditure charged against Revenue was £64,954,942. The accounts therefore yield a surplus of £2,640,873, a surplus due to the abundant harvests of 1897 and 1898. The results of those good harvests continued to make themselves felt in the earlier months of the year now passing away, 1899-1900. My predecessor had estimated a surplus of £2,621,800. He had, moreover, taken exchange at a very prudent figure, and it was anticipated that this surplus would be considerably exceeded. It has been slightly reduced. The Revised Estimates for 1899-1900 show a Revenue of £68,532,400 and an Expenditure of £65,979,600, while the surplus works out at £2,552,800. It is needless to say that famine, in the closing months of the year, has caused the disappointment. If the crops had not failed the year would have closed with a surplus in the neighbourhood of £4,500,000 or of 6 to 7 crores. Without famine, again, the year upon which we are shortly entering, 1900-1901, might have been expected to show an ample surplus. The Budget Estimates are—

	£
Revenue	70,155,800
Expenditure	69,995,500
Surplus	160,300

Accounts of 1898-99.

3. Turning now to the examination of the total results of each year, the differences between the Accounts of 1898-99, which were published two months ago, and the anticipations formed in March 1899, will be seen in the following table:—

		Revised Estimate.	Accounts.	Accounts, better.	Accounts, worse.
REVENUE.					
India	Rx.	101,217,400	101,062,361	...	155,039
England	£	232,500	242,561	10,061	...
Exchange	Rx.	116,200	121,771	5,571	...
TOTAL	Rx.	101,566,100	101,426,693	...	139,407
EXPENDITURE.					
India—					
Imperial, Provincial, and Local	Rx.	71,603,300	71,510,267	93,033	...
Adjustment of Provincial and Local Surplus or Deficit	Rx.	+1,417,900	+1,467,351	...	49,451
NET	Rx.	73,021,200	72,977,618	43,582	...
England	£	16,323,700	16,303,197	20,503	...
Exchange	Rx.	8,161,800	8,184,568	...	22,768
TOTAL	Rx.	97,506,700	97,465,383	41,317	...
SURPLUS	Rx.	4,059,400	3,961,310	...	98,090

The differences are small and do not call for comment. It will be noticed that the figures in the above table are set forth in a different form from that adopted in the statements in the Appendices to this Budget Statement. The change in the form of the Appendices is the result of a decision to make an important change in the form of the Estimates and Accounts which I will now explain. The table in the preceding paragraph is the last place in which the now familiar but much misunderstood headings of "Rx." and "Exchange" will appear in this or in future Financial Statements.

Change in the Form of Accounts.

4. The method in which our combined accounts of transactions in India and in England have hitherto been stated may be shortly described as follows. In respect of Revenue and Expenditure, including Expenditure not charged against Revenue, we had, first, columns showing the rupee transactions in India in tens of rupees; secondly, a column showing the sterling figures in pounds sterling; thirdly, a column headed "Exchange" showing the addition required to the sterling figures in order to convert them into rupees, or rather tens of rupees, this addition being the difference between the equivalent of the sterling at a conventional rate of exchange of *2s.* the rupee and at the average rate obtained for Council Bills for the year; and, lastly, a column which gave the figures of the preceding columns added together and exhibited the total of the rupee and sterling transactions in tens of rupees. These entries showed with absolute accuracy the figures for rupee and sterling transactions both separately in tens of rupees and in pounds sterling, respectively, and when combined, in tens of rupees, while the rupee equivalent of the sterling figures was readily ascertainable by adding together the columns for £ and "Exchange." Nevertheless the method of stating exchange in a separate column gave rise to misapprehension. The figures under the head Exchange, of great magnitude since exchange fell largely below the former rate of *2s.* the rupee, were frequently confounded by the public with real losses by exchange. To prevent this misapprehension, the meaning of the word Exchange, as used in the Accounts and Estimates, was clearly explained in footnotes, but these did not suffice wholly to disabuse the public, or even English financial experts, of the erroneous impression. Footnotes are not always read. Moreover, the separation of a portion of the rupee equivalent of the sterling figures under the title of "Exchange" was often criticised on the ground that it was based on the assumption of a fictitious rate of exchange, namely, *2s.* the rupee, and that the figures in the column did not really represent Rx. or indeed any other monetary unit. However, in the absence of any stable rate of exchange between India and England, it was not till now found practicable to devise a better method of converting and combining the rupee and sterling accounts. Next, in respect of the figures falling under the Debt and Deposit heads, the rupee figures were shown in one column headed "Rx." and the sterling figures in another headed "£", figures relating to exchange being shown in the "Rx." column, but not distributed over the separate heads; the sterling figures and the ten rupee figures, without any addition for exchange were, however, added together in the column for the total. These combined totals under the separate heads indicated no precise facts, for they represented neither a stated number of tens of rupees nor of pounds sterling, and in recognition of this the total column had no heading assigned to it. The Government of India had always recognised that this plan of stating the combined accounts was open to serious criticism, but they acquiesced in its continuance, because complications of this nature seemed inseparable from a system wherein transactions stated in two currencies having no stable relation in value are combined in one account.

5. The adoption of a gold standard for India, on the basis of R15 = £1, having linked the Indian currency with that of Great Britain, and having given a stable rate of exchange that will only vary within the gold points on either side of *16d.* to the rupee, it has been decided to remove the misapprehension connected with the present method of statement of exchange in our accounts, and to outflank the difficulty of stating the totals of the Debt and Deposit figures, by the simple expedient of stating the figures in fifteens of rupees instead of tens of rupees. This is equivalent to converting the whole account of revenue and expenditure into sterling at the rate of *16d.* the rupee, and the combined figures under the Debt and Deposit heads represent with close accuracy so many pounds sterling. Advantage of the opportunity has

been taken to discontinue altogether the use of the symbol "Rx.," with which the misapprehensions described above were undoubtedly connected.

The main changes in the form of the estimates and accounts are—

(1) The Imperial and Provincial-Local Revenue and Expenditure in India are shown in separate columns in rupees instead of in tens of rupees as formerly;

(2) The totals under each head in the India columns are stated in £ at the rate of R15 to the £;

(3) The column headed "Exchange" is omitted;

(4) The "total" column is the sum of the Indian total column and the sterling column;

(5) Any small differences connected with exchange caused by variations of the actual rates from the fifteen rupee standard are brought to account through the heads XXIV.—Exchange as Revenue, or 31.—Exchange as Expenditure, as the case may be.

6. Having thus explained the reasons and nature of the change of form, I give in the new form the same comparison that was given in the old form in the table in paragraph 3:—

	Revised Estimate.	Accounts.	Accounts, better.	Accounts, worse.
REVENUE.	£	£	£	£
India	67,478,300	67,353,254	...	125,046
England	232,500	242,561	10,061	...
TOTAL	67,710,800	67,595,815	...	114,985
EXPENDITURE.				
India—				
Imperial, Provincial, and Local	47,735,500	47,673,511	61,989	...
Adjustment of Provincial and Local Surplus or Deficit	945,300	978,234	...	32,934
NET	48,680,800	48,651,745	29,055	...
England	16,323,700	16,303,197	20,503	...
TOTAL	65,004,500	64,954,942	49,558	...
SURPLUS	2,706,300	2,640,873	...	65,427

The final result is not of course affected by the change in form. The surpluses of £2,706,300 and £2,640,873 in the new form are the equivalents at 16*d.* the rupee of the surpluses of Rx. 4,059,400 and Rx. 3,961,310 in the old form. The same is true of the total Revenue and of the total Expenditure in any Accounts and Estimates in which the average rate of exchange is taken at exactly 16*d.* the rupee, but not in any in which the average rate differs from that standard. The rate was 16*d.* the rupee in the Revised Estimate of 1898-99, and the total Revenue shown in the new form, £67,710,800, is the equivalent at 16*d.* the rupee of the total Revenue shown in the old form, R1,01,56,61,000, and the total Expenditure, £65,004,500, the equivalent of R97,50,67,000. But in the Accounts the average rate of exchange slightly differed from the standard rate, being 15·9784578*d.* the rupee. The total Revenue in the new form, £67,595,815, converted into rupees at 16*d.* the rupee is less than the total in the old form by R3,29,700, the total Expenditure, £64,954,942, similarly converted is less than the total in the old form, R97,46,53,830, by the same amount.

These differences are caused by the alteration in the treatment of the difference in the equivalents of the sterling figures when converted at 16*d*. the rupee and at the actual average rate. That difference under the old form was distributed over the various heads of Revenue and Expenditure, and under the new form is not so distributed but brought to account through the head XXIV or 31.—Exchange.

The Famine Relief and Insurance Entry.

7. Before leaving these arid questions of Accounts, I should also like to draw attention to the change (in the Revised Estimates of 1899-1900 and the Budget Estimates of 1900-1901) in one entry, under the head of Famine Relief and Insurance, which may have escaped Honourable Members. The recent Famine Commission suggested that the full amount of one-and-a-half crores or £1,000,000 should be provided in the Estimates for the Famine Grant, a recommendation in which the Government entirely agreed. That is to say, the Famine Grant, or the unappropriated balance thereof, will, in ordinary years, when receipts exceed expenditure, be a surplus within the surplus. But the allocation of this first surplus in recent years has been obscured by the practice of charging against it expenditure on works which are not exclusively of a protective, *i.e.*, famine character. To make the situation clear it has now been decided that protective works, the cost of which may be charged against the Famine Grant, shall include only such works as may be sanctioned solely and exclusively in view of their value as a protection from famine. This is an extension to Railway works of a practice which has been uniformly followed in respect of Irrigation works. The programme of purely protective Railway works has been practically exhausted, and that of Irrigation works has been much reduced of late years, and, though the latter may be capable of some expansion, the expenditure on these works will not be large, while the amount required to cover the loss on the Indian Midland and Bengal-Nagpur Railways, which it was specially decided to charge to the grant some years ago, will not usually exceed R30,00,000. There will therefore, now that the grant is relieved from charges for such Railways as the East Coast and South Indian, be a large balance in normal years when there is no direct expenditure on famine, a balance likely to increase as the loss on the Indian Midland and the Bengal-Nagpur lines diminishes. It has hitherto been the practice to show this unappropriated balance under the heading of Reduction of Debt, a heading which has puzzled people who ask how there can be a reduction of debt in a year when fresh loans are raised or in which no debt is discharged? We hope to clear up the difficulty by altering this heading to that of Reduction or Avoidance of Debt. It may lead people to grasp more readily what is actually happening in a normal year. In such a year the Indian Government raises more revenue than it actually requires to meet its ordinary charges against revenue by the amount of the unappropriated balance of the Famine Grant. This amount is devoted to expenditure on public works which would otherwise have to be provided by loan. For instance, in a normal year, in which ordinary revenue and expenditure balanced, the Government of India instead of raising a loan of three crores for public works would be able to reduce the three crores by the unappropriated balance, say a crore, of the Famine Grant. Less debt would be incurred in normal years and the credit of Government would be higher, when it was compelled to borrow.

Part I and Part II.

8. Another change is introduced into the Financial Statement this year. Honourable Members are aware that Part I of the Financial Statement is the only part which is actually inflicted on their suffering ears. Part II, Details of Accounts and Estimates—on which no doubt they fling themselves eagerly when this meeting terminates—was separated off from the main statement some ten years ago, in order to release the main statement (Part I) from being overloaded. Sir David Barbour, a master of clear exposition, effected the separation. Since that time Part II has always been compiled by the Financial Secretary but has issued under the signature of the Finance Member. I think sufficient experience has been obtained to show that the permanent relegation of the Details of Accounts and Estimates to a second chapter or part is useful. It is proposed to continue this practice and to publish Part II with Part I. But as Part II is prepared by the Financial Secretary, it should bear his signature, and its relation to Part I should be explained.

Revised Estimates of 1899-1900.

9. It has already been stated that the surplus of £2,621,800 taken last year, which there was so much reason to think would be exceeded, has remained practically the same, being £2,552,800. Receipts improved by £607,400, but the expenditure increased by £676,400, reducing the anticipated surplus by £69,000. The principal differences will be seen in the following statement:—

Estimates of 1899-1900.

Principal Heads of Revenue.	Revenue.		
	Budget Estimate.	Revised Estimate.	Difference, + Better — Worse.
	£	£	£
Land Revenue	18,427,900	17,240,800	—1,187,100
Opium	4,002,500	4,403,800	+401,300
Salt	5,838,100	5,879,100	+41,000
Stamps	3,264,700	3,231,700	—33,000
Excise	3,852,200	3,860,600	+8,400
Customs	3,099,100	3,153,300	+54,200
Other Heads	6,060,300	5,959,700	—100,600
TOTAL PRINCIPAL HEADS	44,544,800	43,729,000	—815,800
Interest	619,000	604,600	—14,400
Post Office, Telegraph, and Mint	2,043,400	2,466,300	+422,900
Receipts by Civil Departments	1,183,700	1,175,300	—8,400
Miscellaneous	522,200	545,300	+23,100
Railways	15,640,600	16,464,300	+823,700
Irrigation	2,300,700	2,415,200	+114,500
Buildings and Roads	458,800	441,800	—17,000
Receipts by Military Departments	611,800	690,600	+78,800
TOTAL REVENUE	67,925,000	68,532,400	+607,400

	Expenditure.		
	Budget Estimate.	Revised Estimate.	Difference, + Better — Worse.
	£	£	£
Direct Demands on Revenue	7,568,300	7,467,500	+100,800
Interest	1,964,400	1,954,500	+9,900
Post Office, Telegraph and Mint	1,985,100	1,972,100	+13,000
Salaries and Expenses of Civil Departments	10,913,400	10,782,200	+131,200
Miscellaneous Civil Charges	4,072,400	4,051,900	+20,500
Famine Relief and Insurance	753,100	2,072,900	—1,319,800
Construction of Railways (charged against Revenue in addition to that under Famine Insurance)	2,400	2,400	Nil.
Railway Revenue Account	16,133,400	16,472,700	—339,300
Irrigation	2,223,200	2,241,800	—18,600
Buildings and Roads	4,536,000	4,130,800	+405,200
Army Services	15,768,000	15,029,600	+738,400
Special Defence Work	...	200	—200
TOTAL EXPENDITURE, IMPERIAL AND PROVINCIAL	65,919,700	66,178,600	—258,900
Add—Provincial Surpluses	...	247,000	—247,000
Deduct—Provincial Deficits	616,500	446,000	—170,500
TOTAL EXPENDITURE CHARGED AGAINST REVENUE	65,303,200	65,979,600	—676,400
Surplus	2,621,800	2,552,800	—69,000

10. Revenue shows a falling-off of £1,187,100 or 178 lakhs under the head of Land Revenue. This is mainly due to shorter collections and to remissions rendered

necessary by famine. The principal losses occurred in the Central Provinces 35 lakhs, Punjab 37 lakhs, and in Bombay 84 lakhs. The collections in Madras also fall short of the Budget Estimate by about 19 lakhs owing to scanty crops. Opium, however, has come to the rescue with 60 lakhs owing to Bengal Opium fetching better prices. Customs show an increase of over 8 lakhs; a loss in the excise duty on cotton goods on the Bombay side and in the export duties on Burma rice diverted to India, is more than counterbalanced by the new countervailing duty on beet sugar and a larger import of spirits. Receipts from Post Office, Telegraph, and Mint improved by £422,900 or over 63 lakhs. The Mint brought in over 45 lakhs, 32 lakhs came from the profit on new silver coinage, and the remainder was derived from profits on a large coinage of copper coin required for famine relief, and on an increased dollar coinage for the Far East. An increase of 13½ lakhs occurred also under the Telegraph earnings, due to the great number of telegrams relating to the war in South Africa and to transactions in grain, many of them speculative. The famine was also largely responsible for an increase in gross receipts of nearly £820,000 or nearly a crore-and-a-quarter under Railway receipts. The real increase from this cause was even larger than this figure would make it appear, for the Railway earnings had fallen off in the earlier months of the year, and there was a good deal of lee-way to be made up in the autumn. The Railways that contributed principally to this result, taking the difference between the Budget and Revised Estimates of their net earnings, were the—

	Lakhs.
Rajputana-Malwa with a net improvement of	30
East Indian " "	26
Bengal-Nagpur " "	16
Oudh and Rohilkhund " "	12
Indian Midland " "	7

On the other hand, the check in the export trade to our western seaboard, due to plague and famine, resulted in a net loss on the Great Indian Peninsula of 30 lakhs and on the North-Western of 13 lakhs. The net increase in the total Railway receipts, in spite of the large increase in gross receipts, did not exceed 73 lakhs or £484,400. There was also a net improvement under Irrigation of over 14 lakhs, largely owing to the failure of rain in the Punjab.

11. There is not much to arrest the attention of any one running his eye down the comparative column in the Expenditure figures, until the entry of Famine Relief and Insurance is reached, except a satisfactory reduction under Salaries and Expenses of Civil Departments of about 20 lakhs, due almost entirely to the fact that the reserve for Plague expenditure was scarcely trenched upon, the Provincial Governments having generally kept the expenditure on plague within their Provincial grants. The difference shown in the statement above in the entries in the Budget and Revised Estimates under Famine Relief and Insurance is £1,319,800 or nearly two crores. This is, of course, the difference under that entry. But, with reference to my previous explanation, I may point out that the entry under Famine Relief and Insurance does not show the whole of the Famine Grant. To any critic who might ask where, then, in the Budget Estimate is your total crore-and-a-half, the answer is that part of the Famine Grant is shown in the Railway Revenue Account. It may be well to clear up this matter, once for all, since there has been some misunderstanding about it, by running through the total provision for famine purposes made in the Budget and Revised Estimates. Last March the total Famine Insurance Grant, £1,000,000 or one-and-a-half-crores, was appropriated as follows: 113 lakhs to Famine Relief and Insurance, including Famine Protective Works and Avoidance of Debt, while 37 lakhs was taken in the Railway Revenue Account to cover the net loss on the Bengal-Nagpur and Indian Midland Railways. The total provision made for famine purposes in the Revised Estimate is £2,162,400 or 324 lakhs. Of this, £2,054,800 or 308 lakhs will, it is expected, be devoted to direct famine relief in British districts. A small sum of £18,000 or 2¾ lakhs will also be applied to certain Protective Irrigation Works. Both of these sums are charged under Famine Relief and Insurance. An amount of £89,500 or 13½ lakhs taken in the Railway Revenue Accounts will suffice to make good the interest on the Bengal-Nagpur and Indian Midland Railways owing to the improved earnings, mainly on the former Railway. Of the expenditure on direct famine relief the Central Provinces, where the famine made itself earliest felt, absorb 154 lakhs, Bombay takes 110 lakhs, the Punjab accounts for 22 lakhs, Ajmere 17 lakhs, and other Provinces 4 lakhs.

I may also mention here that loans have also been made to Native States to the amount of 48 lakhs, but these are, of course, not charged against Revenue.

The increase of £339,300 in the Expenditure chargeable to the Railway Revenue Account was required to earn the larger Revenue. The large saving of £405,200 in the grants for Buildings and Roads represents the usual lapses from the grants for Civil Works which were especially large this year owing to the exigencies of famine requiring greater attention to relief works and to economies in ordinary expenditure. Army expenditure shows a reduction of £738,400 owing chiefly to the despatch of troops to South Africa, Ceylon, and Singapore, the cost of which will be borne by Her Majesty's Imperial Government, and a considerable decrease in the payments for Ordnance stores in England also contributed to the result. The correcting entries after "Total Expenditure, Imperial and Provincial," relate to the net improvement in the Provincial Accounts as compared with the Budget Grants. The Famine expenditure has been mainly Imperial, and certain Provinces, principally Burma and Bengal, exempt from famine, have participated in the general improvement that, apart from famine, has taken place, to the extent of some 70 lakhs.

Before dismissing the fiscal history of the passing year, it may be noted with satisfaction that we were not obliged to have recourse to a loan. My predecessor left me with high balances, and it was decided last March to husband the anticipated surplus of the year in view of the pending report of the Currency Committee. We have not found it necessary to use a single rupee of the surplus for the purposes of our currency reforms, and it was therefore available and sufficed for all our other purposes.

Rate of Exchange.

12. The rate of exchange taken for the Budget Estimate last March was 15⅞*d.* I think Sir James Westland would be the first to admit that he caused some surprise by taking so modest a figure. However that may be, the average rate during the first six months of the year was 16·002*d.*, but the average rate up to February 28 was 16·069*d.* The expectation is that this year will exemplify the oscillation of the rate in future; that is to say, that in the slack season it will be lower and may approximate to 1*s.* 3⅞*d.*, and in the busy season it will be steady at 1*s.* 4⅛*d.* We expect, when this year closes, to have remitted by Council Bills, including those issued against gold received in London, £19,000,000 equal to 2,837 lakhs of rupees.

I need hardly say that for next year we have taken 1*s.* 4*d.* as the rate, and with this remark I may pass to the Budget Estimate.

Budget Estimate.

13. It has already been stated that the Budget Estimate for 1900-1901 gives £70,155,800 as the Revenue, £69,995,500 as the Expenditure, and £160,300 or 24 lakhs of rupees as the Surplus. Following the usual practice I may now run through the various heads, illustrating them by comparison with the same heads in the Revised Estimate of the year which is still with us. The statement below will make the comparison easy :—

Budget Estimates of 1900-1901 compared with the Revised Estimates of 1899-1900.

	Revised Estimate, 1899-1900.	Budget Estimate, 1900-1901.	Difference, + Better — Worse.
Revenue—			
Principal Heads of Revenue—	£	£	£
Land Revenue	17,240,800	18,078,700	+837,900
Opium	4,403,800	4,559,800	+156,000
Salt	5,879,100	5,845,100	—34,000
Stamps	3,231,700	3,267,400	+35,700
Excise	3,860,600	3,819,300	—41,300
Customs	3,153,300	3,134,200	—19,100
Other Heads	5,959,700	6,019,000	+59,300
TOTAL PRINCIPAL HEADS	43,729,000	44,723,500	+994,500

	Revised Estimate, 1899-1900.	Budget Estimate, 1900-1901.	Difference, +Better —Worse.
	£	£	£
Interest	604,600	627,300	+22,700
Post Office, Telegraph, and Mint	2,466,300	2,397,500	—68,800
Receipts by Civil Departments	1,175,300	1,177,500	+2,200
Miscellaneous	545,300	544,200	—1,100
Railways	16,464,300	17,131,500	+667,200
Irrigation	2,415,200	2,406,200	—9,000
Buildings and Roads	441,800	443,900	+2,100
Receipts by Military Department	690,600	704,200	+13,600
TOTAL REVENUE	68,532,400	70,155,800	+1,623,400
Expenditure—			
Direct Demands on the Revenues	7,467,500	7,657,100	—189,600
Interest	1,954,500	1,961,800	—7,300
Post Office, Telegraph, and Mint	1,972,100	2,111,100	—139,000
Salaries and Expenses of Civil Departments	10,782,200	11,089,600	—307,400
Miscellaneous Civil Charges	4,051,900	3,934,100	+117,800
Famine Relief and Insurance	2,072,900	3,368,300	—1,295,400
Construction of Railways (charged against Revenue in addition to that under Famine Insurance)	2,400	85,200	—82,800
Railway Revenue Account	16,472,700	17,616,900	—1,144,200
Irrigation	2,241,800	2,300,400	—58,600
Buildings and Roads	4,130,800	4,162,800	—32,000
Army Services	15,029,600	16,258,800	—1,229,200
Special Defence Works	200	...	+200
TOTAL EXPENDITURE, IMPERIAL AND PROVINCIAL	66,178,600	70,546,100	—4,367,500
Add—Provincial Surpluses: that is, portion of Allotments to Provincial Governments not spent by them in the year	247,000	...	+247,000
Deduct—Provincial Deficits: that is, portion of Provincial Expenditure defrayed from Provincial balances	*446,000*	*550,600*	+104,600
TOTAL EXPENDITURE CHARGED AGAINST REVENUE	65,979,600	69,995,500	—4,015,900
SURPLUS	2,552,800	160,300	—2,392,500

14. Land Revenue, it will be seen, has been taken at £837,900 or one crore and a quarter higher in the Budget than in the Revised Estimate. It is hoped that famine will have disappeared by the end of next September. The increases in the different Provinces are, Bombay 67 lakhs, Madras 31 lakhs, and Punjab 27 lakhs. There is not much that calls for comment under the other Principal Heads. We have taken Opium at £4,559,800 or 684 lakhs. It is very difficult to forecast the course of prices. But the average price this year has been R1,221 a chest, and recent prices have been so good as to warrant us taking an average price of R1,200 a chest next year. The small decreases under other Principal Heads are due to famine. Passing further down the columns there is a decrease of £68,800 or over 10 lakhs under Post Office, Telegraph, and Mint. It will be remembered that there was an item of 32 lakhs in the Revised Estimates, profits on silver coinage. To what extent we may have to issue fresh silver coinage next year, after the very large additions that have been made to the volume of our rupee currency this year (this subject will be gone into more fully in another place), is uncertain. But meanwhile we are equipping ourselves with a further half million pounds worth of silver. The Secretary of State has bought this amount, which we expect to receive in April. The profit on coining it is taken at 32 lakhs, the same amount as this year. Profits from copper coinage, however, are not likely to be as large as this year, and we take 3 lakhs less under Telegraph revenue. The anticipated receipts from Railways require some explanation,

and it is necessary to cast a glance down to the Railway Revenue Account entry below under Expenditure. A great part of the increase in the receipts is only nominal, because in the last nine months of the year the Great Indian Peninsula will be a State Railway. In the case of a Guaranteed Railway, which the Great Indian Peninsula will continue to be for the first three months, the net receipts only are shown on the Revenue side of the account, and the working expenses are not shown in our expenditure. In the case of a State Railway, gross receipts, of course, are shown on the Revenue side, and working expenses on the Expenditure side. The acquisition of the Great Indian Peninsula, therefore, means a larger addition to either side of the account. Apart from this change in accounting, the Railway Revenue for the year is 53 lakhs less than the Revised Estimates, but we hope that grain traffic will not again be stimulated by Famine.

15. To pass to Expenditure, under Direct Demands on Revenue there is an increase of 28 lakhs, 18 lakhs of which occur under Land Revenue mainly owing to Famine establishments. The increase of £139,000 or 21 lakhs under Post Office, Telegraph, and Mint is attributable to the normal growth of the first two Departments. Any increase under Salaries is usually jealously noticed. The increase of 46 lakhs in respect of Civil Departments is due to a variety of causes. Eight lakhs under Jails are due to Famine, *i.e.*, high prices of food grains; 15 lakhs under Police are largely due to the same cause; Scientific and Minor Departments get 14 lakhs, of which 7 lakhs will go to Census, and the increased expenses of Law Courts will take over 7 lakhs. The striking item in the expenditure columns is, unfortunately, famine relief. I have explained how the total expenditure of £2,162,400 or 324 lakhs in the Revised Estimate is arrived at. The total expenditure for famine purposes of all kinds next year will be £3,505,400 or 526 lakhs, of which all but 5 lakhs will go to direct famine relief in British India, while 20½ lakhs will be provided to make up the loss on the Indian Midland and Bengal-Nagpur Railways. Bombay alone requires over 248 lakhs and Central Provinces 180 lakhs. The Punjab demands 37 lakhs; Ajmer will want 16 lakhs, and other Provinces, chiefly Madras, will want 19½ lakhs. We are meeting the demands of the Provincial Governments in full. We are also assisting the Native States by loans to the amount of nearly 75 lakhs. Grants under the head of Buildings and Roads have been generally reduced in the Provinces owing to famine, but Burma, where the Provincial finances are prosperous, proposes to spend an additional 21½ lakhs out of its wealth on these objects. Military Works expenditure has once more been confined within 115 lakhs. Army Services show an increase of £1,229,200 or 184 lakhs. Of this amount, 37 lakhs must be put down to higher prices of food supplies for men and animals, 22 lakhs are on account of replacement of additional horses sent to South Africa which will be eventually recovered from Her Majesty's Government, and 13 lakhs are on account of the Troopship Service, the cost of which was abnormally low this year owing to the partial suspension of the Home reliefs. Eliminating these items, I may state the increase to Military Estimates at 112 lakhs, of which the re-armament of the Native Army absorbs more than a third. The increase in the Military Estimates is, of course, a payment towards National Insurance. The Military Estimates, and their bearing on our Military policy, are explained by the Honourable Military Member in his Memorandum.

Railway Construction.

16. Under existing arrangements it is the practice of the Government of India to prepare triennial programmes of Railway Construction embracing all Capital expenditure for which Government undertakes any financial responsibility or gives any direct guarantee. The figures for any year included in the triennial programme are also examined in October or November of the preceding year, and the programme of expenditure of the ensuing year is then finally settled in communication with the Secretary of State with reference to immediate requirements for expenditure and to the general Ways and Means of Government.

17. The last triennial programme of Capital outlay on Railways was prepared in November 1898 and contemplated an expenditure of just over 20 crores in the three years from 1899-1900 to 1901-1902 distributed as follows :—

			R
1899-1900	£4,515,100	equivalent to	6,77,27,000
1900-1901	£4,485,600	" "	6,72,84,000
1901-1902	£4,547,300	" "	6,82,10,000
	13,548,000		20,32,21,000

For reasons already explained by Sir J. Westland last year, it was decided in 1899-1900 to add to the amount originally contemplated, a considerable amount which, as he said, might "be regarded as arrears of the old programme handed on to the new one" and the grant announced in the Budget Statement was for R8,82,27,000. But this increased grant has been exceeded, and we found ourselves obliged to make additional grants of 46 lakhs during the year to meet expenditure beyond their allotments in which the East Indian and the Assam-Bengal Railways had involved themselves.

18. The expenditure of R6,72,84,000 proposed for the year 1900-1901 in the triennial programme adopted in November 1898 included 1½ crores for new projects. But when, in October last, we resurveyed the programme in the light of the situation at that date, it was found impossible to restrict the expenditure on open line Capital, and on projects already begun, to the amounts contemplated in November 1898. It would have been necessary, in order to meet this class of demand, and also to provide for the new projects set down for the year, to increase the total expenditure on Railway Construction to R8,22,84,000. The enormous demands for famine which were looming on the near horizon, prevented any thought of expansion. All new projects had, to our great regret, to be swept aside, and even outlay on works in progress did not escape some reduction. Instead of increasing the figure of R6,72,84,000 we reduced it in October to R6,54,00,000, but special additional provision has been made for the Assam-Bengal Railway since October, and the final figure for next year will be R7,30,84,000 or £4,872,300. The totals, £6,188,500 or R9,28,27,000 in the Revised Estimates and £4,872,300 or R7,30,84,000 in the Budget, are distributed as follows:—

	Revised, 1899-1900.	Budget, 1900-1901.
	R	R
I. State lines managed by the State or Companies .	5,25,29,000	3,80,14,000
II. Lines of Old Guaranteed Companies and extensions	1,00,86,000	49,96,000
III. Lines of other Guaranteed or Assisted Companies .	2,87,32,000	2,96,24,000
IV. Branch lines on firm guarantee	14,80,000	4,50,000
TOTAL .	9,28,27,000	7,30,84,000

Capital Expenditure on Irrigation.

19. For some years it has been the practice to provide a fixed grant of 75 lakhs a year for Capital expenditure on Irrigation Works. In the Budget Estimate of the current year the grant was raised to 85 lakhs. We desired to raise the grant substantially during the year, but our necessities curtailed the proposed increase to some 5 lakhs which, moreover, the Department undertook to spend on works providing labour in famine districts. This year's grant will, therefore, absorb about 90 lakhs. Looking to the very remunerative character of the greater part of our Irrigation outlay, and to the immense value in times of scarcity of the food supplies which can be relied upon with confidence to come from the irrigated areas, the Government of India has resolved to spare no effort to make ample provision for irrigation. In pursuance of this policy it has been decided, in spite of our difficulties, to raise the irrigation grant in the Budget to a full crore.

20. The following are the details of the estimates:—

	Revised, 1899-1900.	Budget, 1900-1901.
	R	R
Mandalay Canal	11,00,000	9,00,000
Lower Ganges Canal (including Fatehpur Branch)	9,45,000	4,16,000
Chenab Canal	9,15,000	7,90,000
Jhelum Canal	26,86,000	34,14,000
Jamrao Canal	12,07,000	7,51,000
Other Projects	21,20,000	37,29,000
TOTAL .	89,73,000	1,00,00,000

Remittance and Debt.

21. The following are the usual details of the requirements of the Secretary of State:—

(A)

	Revised, 1899-1900.	Budget, 1900-1901.
Requirements on Government Account—	£	£
Excess of expenditure on Revenue Account . .	16,249,700	17,071,500
Expenditure not charged to Revenue . .	644,000	6,835,900
Net payments on Remittance Account, etc. . .	—419,700	330,000
Total Requirements	16,474,000	24,237,400
Transactions of Railway Companies—		
Net receipts on account of Capital	1,606,300	3,413,500
Payments for Stores, etc.	3,054,400	2,740,600
Net Outgoings .	1,448,100	—672,900
Net Funds required .	17,922,100	23,564,500

The following figures show how the above requirements will be met:—

(B)

	Revised, 1899-1900.	Budget, 1900-1901.
	£	£
By sale of Council Bills	19,000,000	16,440,000
Transfer of gold to or from Currency under Act II of 1898	—1,500,000	500,000
Purchase of silver for coinage	—500,000	...
By addition to Permanent Debt . . .	...	5,922,400
Increase of Temporary Debt	...	500,000
Reduction of Cash Balance	922,100	202,100
	17,922,100	23,564,500

According to the programme announced in the last Financial Statement the Secretary of State intended to renew £4,500,000 Temporary Debt on the security of India Bills, and no addition to the Permanent Debt of Government was intended. This intention has been carried out, but the amount of Temporary Debt created and discharged has been £6,500,000 owing to some of the India Bills having been issued for six months and having consequently to be replaced twice within the year.

22. The heavy trade demands for remittances during the year enabled the Secretary of State to raise his drawings on India from £17,000,000 to £19,000,000, but owing to the Famine expenditure, the treasury balances in India were not sufficient to meet the demand in full, and £1,500,000 out of the total drawings were met out of the Currency reserve, the gold being set apart in England under Act II of 1898. The Secretary of State has also employed £500,000 of the proceeds of Council Bills for the purchase of silver for coinage into rupees, the Government of India having decided that a further coinage of rupees, in addition to the coinage of the present year, is desirable. Thus the net addition to the Home Treasury balances by means of Council Bills in the year has been £17,000,000, the same amount as was entered in the Budget Estimate. A sum of £650,000 will be received from Her Majesty's Government in repayment of the disbursements in India in connection with the despatch of Troops to South Africa. With other insignificant differences the total reduction of cash balance during the year is now estimated at £922,100 against £1,487,100 taken in the Budget Estimate.

23. It will be seen from Statement A in paragraph 21, that the gross requirements of the Secretary of State for 1900-1901 amount to £24,237,400. The first item is "Excess of Expenditure on Revenue Account" £17,071,500. The second item, £6,835,900 opposite "Expenditure not charged to Revenue," is exceptional in character. Part of this expenditure is, as usual, for stores, but the far greater part, £5,922,400, is really a book entry connected with the purchase of the Great Indian Peninsula Railway, and will be explained below. The gross requirements are reduced by the surplus of the money raised by Railway Companies over the issues to be made to them (that is, by £672,900). Therefore the net requirements become £23,564,500. Statement B will show how it is proposed to meet this net requirement. The Secretary of State's drawings will be limited to £16,440,000 to which are added £500,000 from an increase in Temporary Debt in the form of India Sterling Bills, while £202,100 will be taken from the Cash Balance in London. In addition, the Secretary of State will receive a further sum of £500,000 from gold forming part of the Currency Reserve, but held in London, on the payment of the equivalent in India into the Currency Reserve here from silver purchased this year for coinage in India. The entry opposite Permanent Debt of £5,922,400 completes the £23,564,500. It represents the Debentures and Debenture Stock of the Great Indian Peninsula Railway Company, which will be purchased on June 30. This is really no increase to the Permanent Debt, and no new liability, for when the Great Indian Peninsula was a Guaranteed Railway, the Secretary of State was always ultimately liable. It is in fact a book entry: and balances a book entry of a corresponding amount included under the item of £6,835,900 in the statement of the Secretary of State's gross requirements. Owing to the assistance procured in these various ways the Secretary of State avoids raising fresh Permanent Sterling Debt.

We estimate that in India we shall have to borrow for Ways and Means up to three crores of rupees.

24. These announcements, both as regards the amount of Council Bills and as regards loans in England and in India, are made with the usual reservation of entire liberty to the Secretary of State and the Government of India to vary the amounts as may be found convenient.

Financial Changes in 1899-1900.

25. In turning to the financial changes of the year, it must be premised that under the pressure of famine Government can do little more than cope with immediate difficulties, and mark time so far as the fiscal system is concerned. Nevertheless, this year has witnessed the working of new economic legislation destined, perhaps, to be far-reaching in its effects. I refer to the Tariff Amendment Act whereby countervailing duties were imposed on bounty-fed beet sugar. The Act received the assent of the Governor General on March 20, 1899, but, as it did not apply to sugar in transit, its actual operation dates from the current financial year. Responsibility for the actual introduction of a more momentous measure belongs exclusively to the twelvemonth now terminating. India has at length emerged from a period of transition in her currency, has reached the goal to which she has been struggling for years, has established a gold standard and a gold currency, and has attained that practical fixity in exchange which has brought a relief alike to the private individual and to the Government finances. Yet, it is not only as regards currency that India has been called upon to set her house in order. Her equipment as regards banking is admittedly unsatisfactory and retards her development. There is, indeed, unanimous agreement on this point, although, as is natural, in a matter of extreme intricacy and where divergent, or apparently divergent, interests are concerned, there are various opinions as to the really weak places in the equipment, and as to the remedies to be applied. The outgoing year has witnessed no legislation on this important subject, but there have been discussions which, I venture to think, have contributed to clear up some of the issues involved, and the Secretary of State has the views of the Government of India now under consideration. I may perhaps beg the indulgence of Council if I proceed to touch in some detail on these three important events which distinguish the year, countervailing duties, currency legislation, and the examination of our banking position.

Countervailing Duties.

26. The countervailing duties on bounty-fed beet sugar came into force, as I have said, in the current year, practically not until May. We have, therefore, the experience

of less than a year to guide us, and indeed the figures from May 1899 to January 1900 are all that are now available. It is most unfortunate that trade was conducted under abnormal conditions of plague, or of plague and famine, during this period, and we cannot, in consequence, even look to these months as throwing light on the effect of the measure under normal conditions. Nevertheless, the figures will have considerable interest for Council, though I should myself like further experience, under more normal conditions, before drawing any final conclusion. Austria is our great purveyor of beet sugar. The total exports of beet sugar from Austria-Hungary to all the world are worth about £5,500,000, and constitute one-twelfth part of that empire's entire exportations; Austria-Hungary is therefore likely to fight hard for this trade. The total amount 498,484 cwt. received by India from Austria during the nine months I have taken was 26 per cent less than the amount in the corresponding period of 1898-99 and 25 per cent less than that of 1897-98. German beet sugar, which had been largely displaced by its Austrian rival before our legislation was undertaken, dwindled from 300,604 cwt. in the nine months of 1898-99 to 31,138 cwt. in the nine months ending last January. The total imports of beet sugar, 530,705 cwt., the additional duties on which are expected to yield in the whole year some 7 lakhs, were accordingly 44·6 per cent *less* than in the corresponding months of 1898-99 and 63·5 per cent *less* than in the corresponding months of 1897-98, but they were 63·3 per cent *more* than the average in the same months of the five preceding years. The fluctuating character of the importation is very noticeable. Nevertheless, the diminution in the imports this year compared with the last two years is striking, and taken by itself the decline might be held to indicate that the import of beet sugar had been arrested; but, at the same time, it must be remembered that there was a quite sudden and abnormal expansion of imports in 1897-98, that stocks were unusually large in Bombay in 1898, and that the entire decline in the imports of beet sugar has occurred in Bombay and Karachi, indicating also, I am afraid, that the purchasing power of the people on our Western sea-board has been sadly reduced by their accumulated disasters. The total import of sugar into India during the nine months was beet sugar and cane-sugar together, an aggregate of 2,308,432 cwt. or 11·7 per cent less than in the previous corresponding nine months, 22 per cent less than in the same months of 1897-98. The value in sterling was £1,681,138. The decline in beet has been in part made up for by larger imports of cane sugar. As regards these, I find that the imports from Mauritius are smaller than last year but larger than the year before; those from Java and China rose considerably. Passing to the influence of the Act upon prices, it is notable that prices rose immediately after the Act, though they are now tending to decline, and the rise in prices may, I think, be assigned principally to the measure. Producers of cane-sugar in China and Java have profited by the rise in price. How far it has benefited Indian producers it is impossible as yet to say. We are awaiting replies from the Local Governments on this point, and are not yet able to say whether native refining industries have received any stimulus.

Trade and the 1*s*. 4*d*. Rate.

27. Before proceeding to the second event, which distinguishes the financial year, the introduction of the gold standard and gold currency, I would, as a preliminary, invite attention to the volume of trade in the past ten months. Special reason exists for looking closely into these figures both with regard to the trade balance on which India depends to meet her foreign obligations, and with regard to the sterling rate fixed for the rupee. Strong objections were taken to stereotyping the rupee at 1*s*. 4*d*. on the ground that the trade of 1898-99 was altogether unprecedented and abnormal, that such a volume of trade was unlikely to recur, and that the normal volume of trade required a rupee at a lower sterling ratio. It was further urged that a rupee appreciated to 1*s*. 4*d*. would check exports, and would, in particular, exercise an evil influence on our opium revenue and trade with China. How far have these objections been supported by facts, how far do the figures of the year indicate what is the normal volume of Indian trade? The answer to these questions will, I think, dispel any apprehensions that may still linger as a consequence of the objections mentioned. It might, indeed, have been expected that our trade would not have kept at the level of 1898-99. It has been carried out under conditions which have certainly checked anything like a normal rate of growth. Plague has been with us the whole time, the failure of the rains and famine came early, and the cotton-spinning and weaving industry has been more or less in a

critical condition owing, I think, to over-production in relation to the Chinese market. In spite of these adverse conditions the total volume of our trade, excluding Government transactions, measured in sterling compares as follows with the trade of the corresponding ten months of preceding years :—

First Ten Months.	Imports.	Exports.	Total Trade.
	£	£	£
1897-98	48,932,487	55,976,774	104,909,261
1898-99 . . .	44,252,991	65,045,099	109,298,090
1899-1900 . . .	50,367,975	64,993,058	115,361,033

The import trade completely recovered from its depression, at any rate as far as the earlier months of the year were concerned. Some part in this increase is due to fresh capital coming out to India, and the imports of gold, in sovereigns from Australia and in gold yen from Japan, play a large part. But it was the effect of the 1*s*. 4*d*. rupee on the export trade that was chiefly dreaded, and it was in respect of exports that 1898-99 was declared to be an unprecedented year. The figures do not bear this out, although there has been a serious decline in the export of wheat and in the export of rice, owing, as regards the latter, to the rice, which would otherwise have been exported to foreign countries, being diverted to the famine districts in India. Nevertheless, in spite of this, the decline in the whole value of the exports is a very small fraction. Whether February and March, with the continued diversion of rice to India, and the failure of cotton and oil-seeds in Western India owing to the drought, will yield results on the same scale as the months under review, is doubtful. But I think it is clear that our exports, even under the depressing circumstances of this year, show that 1898-99 was in no sense an exceptional year, and that their expansion in happier times may confidently be counted upon. I have alluded to the diversion of Burma rice to India. The extent to which Burma is becoming the food reservoir of India is remarkable, as the following figures will show :—

First Ten Months.	Total quantity of Burma rice produced.	Quantity of rice sent to India.	Value of Burma rice crop [based on Rangoon prices in the rice season].
	Tons.	Tons.	£
1896-97	2,384,000	168,500	12,800,000
1897-98	2,611,000	500,300	12,400,000
1898-99	2,243,000	259,000	10,650,000
1899-1900	2,790,000	427,700	14,100,000

Rice indeed is our premier export crop. The hopes that were once founded upon wheat have been disappointed. In the last six years the average annual value of the wheat trade has been about £2,700,000, that of the rice trade over £8,500,000. Wheat in India is a very uncertain crop, and the demand for it hardly exists except when crops are short elsewhere. But Lower Burma has never known a failure of the rice-crop ; the demand for Burma rice is constant, and the Burma crop is a dominating factor in the markets of Europe, Asia and South America. Looking further into the figures of our exports it is notable that the export of food grains is about £5,050,000 less than last year, but other articles have come to the rescue, including, amongst many others, tea, raw sugar, wool, jute and its manufactures, coffee, hides, opium. The increase in the last item but one, hides, is not, however, a matter for congratulation, as it is largely due to the mortality among cattle in consequence of drought. But the statistics for opium do not support the allegation that the enhancement of the rupee, and the fall in the China exchange on India, would check the opium revenue. The demand in China has been brisker, and the average price R1,221 realized per chest is higher than the average prices R1,023 and R1,055 in 1897-98 and in 1898-99. I trust that this examination of our trade will be considered sufficient to allow me now to pass to the gold standard without further discussion of the sterling rate adopted for the rupee.

Gold Legal Tender.

28. The measure passed on the 15th September to make gold legal tender in India was the outcome of the Indian Currency Committee's Report. Clear and convincing as the Report was, and desirable as it seemed to give immediate effect to its recommendations, the Government was subjected to considerable pressure to defer action when the Report appeared. We received urgent representations from several important quarters to hold our hands. It was contended that in making the sovereign legal tender Government abandoned the advantages which the monopoly position of the rupee gave for

attracting gold; that the moment the sovereign was legal tender, it would cease to reach Government, it would be absorbed, would disappear like rain into the sea, etc., so that the gradual accumulation of gold would be arrested, and that Government would be driven into borrowing for its stock of gold. We considered these objections carefully, but decided that the case for postponing action was not made out, and believed that exchange would tend to settle, at any rate in the busy season, at the maximum level possible under our policy, and that gold would not be deflected but would still reach us. The result is well known. The alarmist predictions of our friends have not been verified. Instead of gold ceasing to reach us we have almost been swamped with gold. Difficulties, of a temporary character, it is true, have arisen from its plethora, not from its scarcity, so true is it that the unexpected always happens.

29. I do not venture to claim for one moment that Government foresaw the enormous inrush of gold which has been brought about by the withdrawals of silver up-country on account of famine relief by unusual movements of grain, and by the requirements of an exceptionally large rice crop in Burma and also by capital coming out to India. But it is not unfair to claim that the reasons which decided Government to take instant action have proved sound, and that, independently of the abnormal causes to which I have alluded, the operation of other causes on which Government relied has not disappointed us. As I have said, we have been nearly swamped (temporarily) by gold. The amount in our currency reserve on April 1, 1899, was £2,030,000. It stood on March 7, 1900, at £7,069,800; the amount accumulated in London under Act II of 1898 stood at £1,500,000 making the aggregate £8,569,800. The difficulty has been that of meeting the demand for rupees in exchange for notes or gold tendered to us. To meet this demand we could rely in the first place upon the silver liberated from the currency reserve by the gold taking its place. But it is obvious that a certain number of rupees must be kept to meet the needs of the public, and that the stock of rupees must not, therefore, be unduly reduced, while the amount of gold that can conveniently be kept in the actual currency reserve in India must depend partly on the extent to which gold will pass into circulation. It has been decided as a tentative measure to hold £5,000,000 in our reserve in times of low balances, though this normal amount may be increased in the time of high balances, and to pay out any gold in excess of the £5,000,000 minimum reserve. Now, if we had only paid out silver up to the extent of five millions of gold, we should of course have released 7½ crores of rupees. But the gold which has been passed into us for silver in India amounted up to the 10th of March to £7,208,000 and has drawn out from us 10 crores and 81 lakhs of rupees. In addition there was the amount paid out on account of gold received in London, so that our balance of coin in silver rupees began to run low. We decided, therefore, to re-coin some uncurrent silver we had by us and also to buy new silver for coinage. Our new rupee coinage will amount to about 2½ crores. We neither propose to add more rupees than are necessary of new coinage to the circulation, nor to hamper trade by refusing rupees for gold or notes presented.

To sum up, before the beginning of the present year we had added 305 lakhs from our reserve to the volume of silver circulation in exchange for gold presented to us. In this year we have added 776 lakhs in exchange for gold presented in India, and 225 lakhs in exchange for gold paid in at home, a total for the year of 10 crores 1 lakh. To enable us to make these additions we have had to coin new rupees, amounting to about 1½ crores, and to ensure our meeting further demands we have decided upon supplementary coinage to the extent of 1 crore, a total, as stated above, of 2½ crores.

The Rupee Currency.

30. This brings us to the important question of the relation of the silver currency of India to the functions which it has to perform. Perhaps it is not rash to assume that in 1893 the silver currency was redundant. It is impossible to arrive at mathematical accuracy on this subject; but its importance is extreme, and although I am aware that I shall be treading on controversial ground, it is not right to pass by on one side. There are such enormous deductions to be made from the quantitative theory in western countries amply equipped with credit money, with progressive transport, and with constant reductions in the number of hands employed in given industries, that the theory virtually disappears from sight, and that the quantity of standard coin offering in the market probably operates only in so far as Bank

reserves may be concerned. But in India where these deductions cannot be largely made, and where other conditions do not change rapidly, the quantity of currency being supplied and offering in the market must have a very material effect in regulating its value in exchange with other commodities. Therefore the relation between the volume of the currency, and the duty that is thrown upon it, is very important in India, not only as regards rupee prices in the country, but as regards exchange through the influence of rupee prices on exchange. I am not of course denying that exchange also depends upon the relation between our exports and imports, but it must not be forgotten that the volume of currency as influencing rupee prices is another material factor. To put it in an extreme form, could it be denied that if the quantity of currency offering in the country was suddenly doubled, other things being equal, that is to say, other conditions remaining unchanged, prices would not also tend to double, and exchange to fall in a corresponding ratio? Therefore our currency policy, as a whole, must be affected by the relation between the volume of currency and the number of transactions, and it is essential that the currency should adapt itself automatically to the requirements of trade. Looking to the events of this passing year my own impression is that the redundancy or superfluity of the silver currency that formerly existed has been absorbed. At the same time the normal march of affairs has been complicated by unusual factors, such as the famine and drain of silver to relief works, and there is need for caution. We shall be in a much better position to form a sound opinion as to the sufficiency or otherwise of our silver currency when silver coin flows back to trade centres from famine districts, and when we have had the experience of contracted trade in the summer months. The influence of the return of this silver and of the after-effects of famine must be awaited with some anxiety on the part of Government—an anxiety which, however, will be mitigated by the fact that the accumulation of gold, available for foreign remittance, has been much larger than we could have reasonably expected. I say the after-effects of famine because I believe, though it may seem paradoxical, that famine stimulates exchange. Or, rather, that this is the immediate effect of famine owing to the withdrawal of rupees from trade centres and the consequent greater demand for the rupees left in those centres, while the curtailment in exports resulting from shorter crops does not influence exchange until some months after famine has made its appearance and after the expenditure on famine relief has begun. However, under our present system the volume of the silver currency may be fairly regarded—under normal circumstances, for I must except famine demands—as adjusting itself automatically to the duty thrown upon it; in other words, to the demands for it. I should indeed shudder if it were left to the Government to determine, with nothing to guide it, whether the currency was or was not redundant, and to take action accordingly. It would be more than difficult to steer a middle course between the Scylla of stringency with lowering of prices and the Charybdis of dilution of the currency with depression of exchange. But henceforward the Government will be guided by the trade demand for our silver-circulating medium, for our notes printed on silver as we may really regard our rupees as being, the trade demand expressing itself in the presentation of gold. As long as Government refrains from coining rupees, except upon the demand of trade, there can be no dilution of the currency. There can be no contraction, as long as trade, if it needs rupees, has only to tender a sovereign to obtain silver coin in exchange, coin already in our balances or new silver coin if the balances will not suffice. The only difficulty will consist in closely watching the times and seasons so that the supply may be there to meet the demand and not be forestalled, as rupees take time to coin. But experience will soon supply indications for the future. It has already been stated that we are in process of equipping ourselves with additional silver to the value of one million sterling. The only other intervention of Government that I can foresee will possibly be recourse to shipping surplus gold to Europe as a temporary corrective in abnormal times, such as upon the return from up-country of silver coins after a famine. It might, under such circumstances, be desirable to restrict Council Bills temporarily. But the inflow and outflow of gold through private agency, according as the demand varies in either direction, is expected to become a regular factor in Indian business.

Gold in Circulation.

31. Having thus dealt with the general question of our currency, I may now turn to an interesting point: how far gold coins are passing and are likely to pass into general circulation? It has been said that we resolved when our gold reserve exceeded

the fixed minimum of £5,000,000 to pay out gold. We began to give out gold on January 15. I may perhaps explain that Government has no intention of forcing gold upon a reluctant public, although, now that the public has spontaneously taken a certain number of sovereigns, we thought it was not unjustifiable to familiarize people more widely with gold by cashing Postal Orders in Presidency towns of the value of R15 or £1 in gold coins, and we also propose to pay certain salaries in gold in the Presidency towns. Recipients of these gold coins can, of course, always get silver for them, if they really desire silver, by tendering them at the Currency Offices. The amount of gold taken out from the Currency Offices voluntarily by presenters of notes from January 15 to March 10 has been £130,700. Calcutta easily ranks first on the list of towns that are taking to the use of gold. Calcutta has absorbed £84,309. I believe that the rate at which gold is taken is likely to increase slowly, and that gold will pass gradually into general circulation in our sea-ports and large towns. No expectation was ever formed, nor is there any reason to desire, that gold would penetrate into the interior, or that the large mass of transactions in the country would ever be conducted except through the medium of silver and copper. Gold is behaving very much as we anticipated. We have been frequently told, and with perfect justice, that we could never claim to have a true gold standard in India until we were prepared to exchange gold for rupees as well as rupees for gold. By being prepared to exchange I do not mean that we should accept a legal liability to give gold for rupees, but that in practice, as for example in France, anybody who wanted gold for internal purposes should be able to obtain gold freely, without let or hindrance. Theorists, indeed, argue that neither France nor the United States possess a gold standard in the full and complete sense of the words. But I think no one will dispute that if we can advance to the same position as France we shall have attained a gold standard for all practical purposes. A year ago it seemed that we should probably have to sit for a long while under the reproach of our critics, and put up with what has been termed an "exchange standard." It then appeared impossible that in twelve months we should be paying out gold to anybody who asked for it. We are doing so now. Whether we shall be able to continue to do so without check or interruption, whether now we have once started giving gold for rupees we may not have to suspend temporarily, is not a matter about which confident prediction can be made. But it would be reasonable to say that the auguries are not unfavourable for our being able to pursue the path on which we have entered. Our position in respect of gold is strong. In India and in London we have accumulated nearly £8,600,000. We have, as I have explained, set aside £5,000,000 for the present as our minimum reserve against eventualities, against the contingency of the Secretary of State's being obliged to restrict or curtail his drawings and to ask us to ship home gold to enable him to meet his obligations. Any gold received in excess of this minimum, or of such minimum gold reserve as may, with further experience, be established, we shall be ready to pay out as we are paying it out. But the probability is that the gold reserve, ultimately available for foreign remittance, will continue to exceed the minimum experimental reserve. Gold is still coming in, though the inflow is expected to slacken, and may, with confidence, be expected to reach us at least in every busy season. And in addition to the gold received from abroad, we may reckon upon the gold mined in India. It has been decided to constitute a branch of the Royal Mint at the Bombay Mint for the coinage of gold. The terms of the proclamation to be issued under the Imperial Coinage Act have been settled, and we are merely awaiting now until the Royal Mint has satisfied itself as regards the Mint premises and appliances at Bombay. A representative of the Royal Mint is starting this week for Bombay to report. The gold from the Mysore mines is, indeed, already reaching us in anticipation of coinage, and we count upon receiving an annual increment to our stock of gold of from one-and-a-half to two millions from this source. And may I perhaps express satisfaction in passing that we have been able to assist the Indian gold mining industry by saving it the freight and charges incidental to the transmission of its gold to London?

Exchange and Telegraphic Transfers.

32. It is but a few years ago, since a Finance Member exclaimed at this season "Exchange is still the only burden of my song," and on looking back through the Financial Statements and discussions of the last twenty years exchange is writ large, very large, on every page. There is little to be said about exchange this year. The object of the Government, a stable exchange between the gold points, *i.e.*, an exchange

varying between 1*s.* 3⅞*d.* and 1*s.* 4⅛*d.* or, in the case of telegraphic transfers, 1*s.* 4$\frac{5}{32}$nds., has been maintained. Indeed there would be nothing to be said about exchange, were it not for the fact that for a brief period, and for exceptional reasons, exchange advanced above 1*s.* 4$\frac{5}{32}$nds. I refer to the action of the Secretary of State in deciding in January to limit telegraphic transfers under Act II of 1898, whereby silver can be obtained from the currency reserve against the deposit of gold in London: to limit them, I should explain, by progressively enhancing the price for such accommodation. The situation that dictated such action was to some extent caused by the Exchange Banks, who, as profitable employment for money existed in London, had not brought out money to India at the beginning of the season. Indeed the Exchange Banks in December urged that any loans which Government might be able to make to the public should be made to them as well as to the Presidency Banks, or failing this, if the loans were made through the Presidency Banks, they demanded to have a first refusal of this money to the exclusion of merchants, European and Native. The request was refused.

33. The season opened, therefore, without the assistance of the money that is usually brought out before Christmas by the Exchange Banks. But after Christmas, when rates grew easier in England, there was a sudden demand for transfers to obtain money here, while at the same time there were unprecedented demands for coin to move a record rice crop in Burma, together with an increasing drain of silver to the famine districts, and an inflow of gold exceeding expectations. The silver coin reserve of Government in consequence rapidly neared a point at which it was impossible to continue to meet unlimited transfers. Therefore the Secretary of State decided to limit the demands by gradually raising the rate, thus meeting the most urgent demands, and weeding out the less urgent, while warning those whose demands were not so urgent to ship gold to India. No other course was practical. The liability of the Secretary of State to keep the tap turned on indefinitely at 1*s.* 4$\frac{5}{32}$nds. has been asserted. But I cannot see that any positive liability exists, and I wonder if those who assert its existence would have preferred that the stability of our currency (whose situation they were well able to appreciate and follow) should have been affected by the reserve of rupees being dangerously reduced? There is another observation to be made, though I am afraid it may be resented in certain quarters because it is inconveniently true. The incident exemplifies the difficulties which Indian trade is likely to run into, if the Banks and merchants trust to Government always meeting their demands from its resources instead of supplying themselves with funds.

Banking Discussion.

34. I have already stated that the current year has been marked by much discussion on the banking situation in India. It was inevitable that this discussion should arise. Recent years in India have abounded in periods of stringency, and more than one exceptional measure, such as the reduction of the silver in the currency reserve, has been taken to deal with an imminent crisis. It has long been clear that something is amiss, if not actually rotten, in the State of Denmark. Writing in December last the Bengal Chamber recorded a deliberate opinion that its members "are convinced that in the busy season the banking facilities of India are not sufficient for the trade and satisfactory development of the country, and at times of pressure the existing arrangements for giving relief seem to them to be quite inadequate." These are grave words. That discussion indeed has not supervened earlier may be attributed to the existence of general hesitation while India was passing through the transitional stage immediately following the closure of the Mints. But the moment India emerged from that stage the subject pressed for consideration, and this is an answer to the somewhat wild statement that Government has forced on this question, because the establishment of a gold standard was not proceeding fast enough in its judgment, in order to hasten this desired consummation. In so far as the establishment of a gold standard (which has perhaps proceeded even faster than our desires) has had any influence on the matter it is this. We have been told to expect with a stable exchange that British capital will more readily seek investment in India, and indeed there are more than indications that reasonable expectations will not be disappointed, for a not inconsiderable amount of capital has come out. The tide has turned. But if capital seeks India more readily, investments will no doubt be made in mines, railways and industrial enterprize generally, and there will arise a demand for banking facilities in connection with these investments. The revision of our banking situation was, therefore, in nowise part of a design to hurry

on the gold standard, but followed upon the initiation of that standard. The matter was brought to a head by a request, and a very natural request from the Presidency Banks, for the extension of their statutory powers. We thoroughly sympathized with that request; not so much in the interests of the Banks, as in the interests of the development of India. But a doubt existed, and had previously found expression, how far, in view of their capital and resources, it was prudent to extend the operations of Banks which are the custodians of the public balances, and in whose cash balances the Government account bulks so largely. The Bank of Bengal stated in a letter of the 2nd of December last that the Directors were of opinion that the restrictions imposed on their operations might be "withdrawn with safety and advantage without *in ordinary times* overtaxing the resources of the Banks," and added that they "would not be disposed to countenance any great extension of the Bank's investments in securities which might not be easily realizable." But we have to legislate for extraordinary as well as for ordinary times, and the securities of Assisted Railways and District Boards will probably not be easily realizable for some time to come. The discussion of the banking situation to my mind has been of great utility, and I cannot believe that the discussion, to which valuable suggestions have been contributed from many quarters, and in which the public has taken so much interest, will not, sooner or later, result in some important improvement. The Government of India for its part carefully considered the various representations and arguments that have been made, and has submitted comprehensive recommendations to the Secretary of State. No answer has yet been received, nor, considering the importance of the subject and the shortness of the time, could an answer have been received. As anything which can elucidate the subject is not amiss, I may perhaps before leaving the question offer one explanation. Considerable criticism has been directed against the proposed project of a "State Bank." It was not unnatural perhaps that some misconceptions should arise until the exact recommendations of the Government are made public. But, on the other hand, nothing has been stated by the Government, nothing was said by myself, when I had the honour to explain in Council, in answer to the Honourable Mr. Arthur, the suggestions I should make to Government, on which an allegation could be founded that the creation of a State Bank was contemplated. It is right to say this to remove the apprehensions that have been expressed in certain quarters of State intervention, State competition and other unspeakable horrors. What I then said I would suggest to Government for consideration was that a Central Bank of India, with branches possessing large local autonomy, might be formed by the amalgamation of the three Presidency Banks; that this Bank might, under certain conditions and restrictions, have access to London; and that to this Bank, as to an Agent, might (though this is not an essential condition) be entrusted the management of the Paper Currency. The arrangement as regards the note issue would be analogous to that which obtains in England. As regards its banking side, the Bank would have, as the Presidency Banks have now and as the Bank of England has now, the custody, at any rate to a large extent, of the public balances; and as in the case of the Bank of England, the profit derivable from the Government balances would be considered in fixing the remuneration of the Bank for doing the public business. If anybody cares to call a Bank framed on these lines, a Bank in which the Government holds no shares, on whose Board it has no Director, in whose banking profits it has no interest—if there is anybody who desires to term such an institution a State Bank, and to detect behind it the gruesome spectre of State competition, of course he is at liberty to do so. But he must then be equally prepared to call the Bank of England a State Bank, which it notoriously is not in the accepted meaning of language.

Government Balances.

35. There is yet another question at which I beg leave to glance in connection with the history of the year. I mean the utilisation of the Government balances in the busy season. It may be as well, perhaps, though the matter has been frequently discussed and explained of late, to go over the ground once more. Government keeps its working balance in the Government Treasuries, the Reserve Treasuries and the Presidency Banks. Government Treasuries are maintained where there are no Presidency Banks or their branches. The Reserve Treasuries were instituted by Lord Northbrook to give Government control over a certain sum of money for emergencies, Government having been resisted and hampered on two occasions when it required to withdraw its own funds from the Banks for pressing needs. As regards the Presidency Banks, Government

keeps a balance at their Head Offices maintained at a fairly constant figure, and this balance may, in fact, in so far as it exceeds what is really required for treasury purposes, be considered as additional to the real working balance of Government. But there are seasons when the Government receipts exceed the amount required for its working balances and for the constant balance at the Banks. It might be supposed that this excess should naturally go into the balances at the Presidency Banks, and that the Government balance should shrink or expand according to the receipts or outgoings of Government. It has, however, been the arrangement, and a deputation from the Bengal Chamber of Commerce in 1898 recognised that it was advantageous, to have a fairly constant balance with the Presidency Banks, while the excess receipts of which I have been speaking flow into the Reserve Treasuries which, rather than the Banks, are thereby primarily exposed to the sudden and fluctuating demands which war and famine and all the exigencies of a great Government may entail. So far, therefore, as the Government balances in the Presidency Banks do not, as might be expected, mount up in the busy season, which is also the season of revenue collections, the Government is not open to the reproach of locking up its balances. I do not see that the arrangement could be changed under present circumstances, and Government could hardly move in the matter except at the request of the business community who were a party to it. Whether it would be not more natural to pass in all the Government receipts if the Banks had a larger capital and larger resources, and the Government could always count on getting its own money without serious disturbance, and whether the Reserve Treasuries are not an anomaly, but a disagreeable necessity, due to existing circumstances, are other and larger questions. If the Reserve Treasuries did not exist, if there was a Bank powerful enough to ensure Government obtaining any money it called for, a larger part of the money collected by Government would be returned into ordinary channels and be available for trade. The real gist, however, of the accusation that Government locks up its balances is concerned with the granting or refusal of temporary loans in the busy season from those funds which I have described above as the receipts in excess of our working balance. That was a subject which was gone into last year, and the Secretary of State has laid down and made public the conditions under which such loans may be granted. There is no unreadiness to make loans under those conditions; but the history of this year enforces the danger of relying on such loans. We had one application this year for a loan for 30 lakhs to Bombay to avert, so we were assured, a most imminent crisis. We were not in a position to make the loan; and moreover those who principally urged us to make the loan, who were representatives of the Exchange Banks, could always have procured funds for their customers through the Secretary of State's telegraphic transfers. Indeed this was admitted: but it was urged that transfers at the rate at which the Secretary of State was then selling were to be boycotted. The crisis was conjured without our assistance: but I refer to it as showing the danger of relying upon Government assistance and indicating doubts as to the sufficiency of banking strength in Bombay. To have a crisis threatened in an Imperial City of the importance of Bombay for want of R30 lakhs points to a very narrow margin.

Conclusion.

36. Famine has left a deep impress upon the financial history of this year, and will make an even deeper impress upon the year we are shortly entering. But looking back on the past twelvemonth we may congratulate ourselves, at least, on having passed to a gold standard through the continued closure of the Mints and the ordinary operations of trade without having added to the indebtedness of India. The uncertainties in both public and private finance owing to a fluctuating and falling exchange have, it may be hoped, become a thing of the past. In the year now passing away India has been able not only to relieve the suffering population in her midst, but to invest revenue in productive public works She will not be able to escape borrowing in the coming year. But the difficulties will be chiefly those of Ways and Means. Nevertheless, after providing for famine and after making a substantial addition to the payment for national insurance, the Indian Government can count upon a surplus with reasonable confidence.

March 21, 1900. C. E. DAWKINS.

PART II.

BEING A MEMORANDUM BY THE FINANCIAL SECRETARY EXAMINING THE DETAILS OF THE ACCOUNTS AND ESTIMATES.

Section I.—The Accounts of 1898-99.

1898-99. General Result.

37. The surplus of the year in the Accounts was less by R9,80,900, than that anticipated when the Revised Estimate was framed in March last.

The variations between the figures finally entering into the Accounts and those taken in the Budget and Revised Estimates of the year are fully explained in the Appropriation Report published in the *Gazette of India* of the 11th instant.

Tables giving a general comparison of the Revised Estimates with the Accounts have been given above in Part I, paragraph 3 in the old form and paragraph 6 in the new form.

1898-99. Revenue in India.

38. The Revenue in India was less than taken in the Revised Estimate by R15,50,390. The falling-off is accounted for by a decline in Land Revenue of R22,00,870: the collections were considerably lower than the Estimate in Bombay and Madras, while there were smaller improvements in Burma and the North-Western Provinces and Oudh. There was also a decline in the Customs Revenue of R9,62,380 under the heads of silver, oils, and cotton goods. The payment of interest due on April 1, 1899, on the preceding day by the Bombay Port Trust increased the Interest receipts by R8,65,260. Smaller variations under other heads resulted in a net improvement of R7,47,600.

1898-99. Expenditure in India.

39. The Expenditure in India was less than the Revised Estimate by R9,30,330 the result of a number of small differences, the largest of which are, on the side of excess, R10,86,910 in the Working Expenses of State Railways, and, on the side of reduction, R7,60,670 under Army.

40. The net deterioration in India of R6,20,060 was distributed thus between the Imperial Section and the Provincial and Local Section: an Imperial deterioration of R11,14,570 and a Provincial and Local improvement of R4,94,510.

1898-99. Revenue and Expenditure in England.

41. The Sterling Revenue in England was higher by £10,061 and the Sterling Expenditure was less by £20,503.

1898-99. Exchange.

42. The fractional difference between the average rate of exchange and the rate of 16*d*. the rupee of the Revised Estimate caused an increase of expenditure of R1,71,970.

Section II.—Revised Estimate of 1899-1900.

1899-1900. Statement of the gross figures.

43. The following is a general comparison of the Budget Estimates with the Revised Estimates of 1899-1900:—

	Budget.	Revised.	Revised, better.	Revised, worse.
	£	£	£	£
Revenue.				
India	67,717,900	68,284,700	566,800	
England	207,100	247,700	40,600	
Total	67,925,000	68,532,400	607,400	
Expenditure.				
India— Imperial, Provincial, and Local	49,388,100	49,681,200		293,100
Adjustment of Provincial and Local Surplus or Deficit	—616,500	—199,000		417,500
Net	48,771,600	49,482,200		710,600
England	16,531,600	16,497,400	34,200	
Total	65,303,200	65,979,600		676,400
Surplus	2,621,800	2,552,800		69,000

1899-1900. General features.

44. The striking feature of the year is the recurrence of famine, involving an expenditure on direct relief of £2,054,800, over three crores of rupees, in addition to indirect expenditure and to loss of revenue—the reduction below the Budget Estimate under the one head of Land Revenue is £1,187,100, over a crore-and-three-quarters of rupees. To help in meeting this unforeseen expenditure, we have had, in addition to the unappropriated portion of the famine grant of over a crore, improvements in net Revenue under Opium, Mint, Railways, and Irrigation amounting to nearly 2 crores, savings in expenditure on the Army and plague preventive measures amounting to nearly a crore-and-a-half, and savings of nearly half a crore in consequence of the rate of exchange having been more than a farthing above the extremely cautious rate of 15¾*d.* the rupee which was adopted in the Budget Estimate. These improvements have diminished the reduction in the estimated surplus of the year, £2,552,800 as compared with £2,621,800, to the insignificant amount of about ten lakhs of rupees. It is very probable that the actual surplus in the Accounts of the year will exceed that of the Budget Estimate.

45. In India there is an increase of Revenue of R85,01,000 or £566,800, and an increase of Expenditure of R43,96,000 or £293,100. These variations are divided between the Imperial and Provincial-Local sections of the accounts thus: a deterioration under Imperial of R21,57,000 or £143,800, and an improvement under Provincial and Local of R62,62,000 or £417,500. In England the Revenue is higher than the Budget Estimate by £40,600 and the Expenditure less by £34,200, giving an improvement of £74,800, which, deducted from the net deterioration on the Imperial section in India of £143,800, results in a reduction of the surplus by £69,000.

1899-1900. Revenue in India.

46. The important increases of Revenue in India are—

	R
Opium	60,20,000
Salt	6,15,000
Customs	8,12,000
Forest	7,49,000
Telegraph	13,50,000
Mint	45,24,000
Railways—	
State, Gross Receipts more R1,45,87,000 } Guaranteed, Net Receipts less R23,75,000 }	1,22,12,000
Irrigation, Major Works	20,89,000
Army	11,28,000

1899-1900. Opium.

47. The increase in Opium Revenue occurs in Bengal, and is mainly due to the average price realised at the monthly sales having been R1,221 a chest, while the price was taken at R1,100 a chest in the Budget Estimate: on the 40,800 chests taken in the Budget Estimate as to be sold, this rise in price accounts for an improvement of R49,36,800. The sales in the last three months of the year were also increased by 900 chests, the receipts from which at the average rate realised amount to R10,98,900. The receipts from the pass duty on the exports of Malwa Opium from Bombay are expected to be slightly less than in the Budget Estimate, and the receipts on Excise Opium slightly higher.

1899-1900. Salt.

48. The Salt Revenue has improved in Madras by R8,57,000, the fall from the abnormally high receipts of 1898-99 having been less than anticipated, and in Bengal by R6,40,000, low prices and the favourable circumstances of the year in that Province having stimulated imports; while it has decreased by R2,15,000 in Bombay due to the famine, and by R6,17,000 in the Northern India Salt Department in consequence of the drought in Rajputána which has caused a deterioration in the quality of the salt produced at Sambhar Lake and a diminution in the sales at that source.

1899-1900. Customs.

49. The Customs receipts have improved in the three Maritime Provinces unaffected or only slightly affected by famine by a total of R14,24,000, but in Bombay the famine and plague have caused a decrease of R6,05,000.

1899-1900. Forest.

50. The Forest Revenue in Burma has improved by the large sum of R12,33,000 due to the high price of teak inducing large extractions: Bengal shows an increase of R1,55,000; but in Bombay there has been a falling-off of R3,16,000, in Madras of R1,20,000, and in the Central Provinces of R1,38,000, all attributed to famine.

51. The abnormally large increase in Telegraph receipts is caused by the interest in the war news from South Africa and by the great use of telegrams in connection with the movements of grain caused by the famine.

1899-1900. Telegraph.

52. The increase in the Mint receipts is exceptional. The larger part of it, R32,00,000, represents the profit on the coinage of about one crore of rupees from purchased silver bullion, the Government of India having found it necessary to resort to coinage to meet the great demand for rupees which has been so marked a characteristic of this cold weather: that demand is surmised to have been caused by the withdrawal of rupees from the trade centres to meet famine expenditure, and by the exceptionally large rice crop in Burma.

1899-1900. Mint.

The coinage of dollars has also been much greater than was assumed in the Budget Estimate; and the receipts in Bombay have consequently increased by R4,79,000.

The famine has caused a large demand for copper coin, on the coinage of which there is a gain, brought to account when the coins pass into circulation: the increase from this cause amounts to R8,50,000.

There is a small set off to these large receipts in the increased charges of the Mints, amounting to R2,23,000.

53. The large improvement in Railway earnings is due partly to the ordinary development of traffic and the earnings of new lines and additions to existing lines, and to a brisk coal trade, but mainly to the increase in grain traffic to meet the requirements of the famine-stricken districts, and to the carriage of troops to the seaports for despatch to South Africa.

1899-1900. Railway Receipts.

The improvement has been fairly generally distributed, the only two lines of which the receipts will fall far short of the Budget Estimate being the Great Indian Peninsula Railway,—the failure of the cotton and grain crops in the districts served by that Railway and the continued prevalence of plague have seriously interfered with its traffic,—and the North-Western Railway,—the traffic on that Railway varies from year to year, up and down, more than on any other Railway, with the greater or smaller movement of troops to or from the North-West frontier: the famine has also diminished the receipts of the line, and the exports of wheat have been much smaller than last year.

54. There has been a large development of Irrigation, the larger portion of the increase occurring in the Punjab: this is partly due to the failure of the rains.

1899-1900. Irrigation Revenue.

55. The increase in Army Receipts is due chiefly to the recovery of the value of stores, etc., sent with the troops to South Africa.

1899-1900. Army Receipts.

56. The more important decreases in Revenue are:—

1899-1900. Decreases in Revenue in India.

	R
Land Revenue	1,78,07,000
Provincial Rates	17,97,000
Interest	7,57,000

57. The Land Revenue in Bengal and Assam is expected to be slightly higher than the Budget Estimate, but the only Province in which a substantial increase has occurred is the extraordinarily prosperous Province of Burma. There an increase of R21,11,000 has been taken. In every other Province there are very serious decreases. In Bombay the falling-off is R84,37,000, in the Punjab R37,00,000, in the Central Provinces R35,43,000, and in the small Provinces administered directly by the Government of India, of which the most important are Ajmer, Baluchistan, and Coorg, R2,63,000: all of these are direct consequences of the famine prevailing in those Provinces, which has necessitated heavy suspensions and remissions. In Madras the unfavourable character of the north-east monsoon led the Local Government to anticipate that considerable suspensions would be necessary in February and March, and a decrease of R18,89,000 has been taken in that Province. In the North-Western Provinces and Oudh a decrease of R23,01,000 is shown: the collections of the arrears remaining over from the last famine are expected to be smaller than assumed in the Budget Estimate.

1899-1900. Land Revenue.

58. The decline in the Revenue from Provincial Rates follows generally in distribution the decline in Land Revenue and is due to the same causes.

1899-1900. Provincial Rates.

1899-1900. Interest Receipts.

59. The fall in Interest receipts is not a real reduction in Revenue. The interest on the debt of the Bombay Port Trust falls due for payment on April 1, and the annual payment was included in the Budget Estimate. The payment was, however, made on March 31, 1899, and the receipts on account of that debt in 1898-99 were accordingly doubled while there are none this year.

1899-1900. Increase in Expenditure in India.

60. The important increases in Expenditure in India are:—

	R
Forest	4,52,000
Political	6,31,000
Famine Relief	3,06,86,000
State Railways, Working Expenses	59,24,000
Irrigation, Working Expenses	5,39,000

1899-1900. Forest Expenditure.

61. The increase in Forest Expenditure occurs in Burma, R1,43,000, and Bombay, R3,83,000, the expenditure in other Provinces differing but slightly from the Budget Estimate. In Burma the increase was required to earn the increase in Revenue noticed in paragraph 50. In Bombay the increase is caused by the sanction to a scheme for supplying fodder to the cattle in the famine-stricken districts of Bombay. It is expected that more than half of the cost will be recovered from the owners of the cattle, as they will be charged for the fodder supplied to them. Part of the expenditure in that scheme was incurred in the Central Provinces also, but other lapses reduce the total expenditure there almost to the Budget figure.

1899-1900. Political Expenditure.

62. The increase in Political Expenditure is due to the Amir of Afghanistan having drawn more of his subsidy than the amount due for the year: he draws his subsidy somewhat irregularly.

1899-1900. Famine Relief.

63. The very large expenditure on Famine Relief has been fully explained in other parts of this Statement.

1899-1900. Railway and Irrigation Expenditure.

64. The increases in Railway and Irrigation Expenditure were required to earn the increased Revenue discussed in paragraphs 53 and 54, the real gain being only the net amount.

1899-1900. Savings in Expenditure in India.

65. The necessity of meeting the large expenditure connected with the famine has led to the restriction of ordinary expenditure wherever possible; and there are savings under the great majority of heads. The more important decreases are the following:—

	R
3.—Land Revenue	8,47,000
Opium	6,01,000
13.—Interest	10,27,000
Law and Justice, Jails	6,58,000
Police	5,65,000
Medical	29,05,000
31.—Exchange	21,46,000
Construction of Protective Railways	49,00,000
Reduction or Avoidance of Debt	60,39,000
Military Works	6,70,000
Civil Works	57,67,000
Army	52,05,000

1899-1900. Land Revenue Expenditure.

66. Grain compensation allowances caused by famine prices have prevented any saving in the Land Revenue Expenditure in the Central Provinces and Bombay, in which the charges slightly exceed the Budget Estimate, and have reduced the savings in the Punjab. In Bengal there is an increase of R1,46,000, mostly under Survey and Settlement. But there are savings of R2,77,000 in Burma—where some schemes of improvement were not brought into operation so soon as anticipated and the charges for the collection of Revenue were overestimated; of R3,57,000 in Madras—where one scheme of improvement was partially postponed, and the progress of expenditure under several heads was less than provided for in the Estimates; and of R3,06,000 in the North-Western Provinces and Oudh, where it was found that the grants under several heads were not fully required.

67. Though the poppy crop was a better one than we have had for many years, it was not quite up to the standard which we assume as the average, and for which we provide every year in the Budget Estimate. The payments to the cultivators for their opium were therefore smaller than taken in the Estimate, and there will be a saving of about six lakhs of rupees.

1899-1900. Opium.

68. The Capital Expenditure on the construction of Railways in 1898-99 was higher than anticipated in the Revised Estimate for that year, because of the postponement from last year to this of the issue of Debenture Capital by the East Indian Railway Company : the advances on which interest is charged against Railway Companies were also higher than estimated ; and consequently the transfer from Ordinary to Railway Debt was increased above the Budget Estimate by R5,42,000, causing a saving of that amount in ordinary Interest payments. The remainder is due to arrear payments of Interest warrants having proved to be less than provided for in the Estimate of last March.

1899-1900. Interest Payments.

69. Famine prices have caused small excesses over the Budget Estimates for Expenditure on Jails in Bombay and the Punjab. In all other Provinces there are savings, due partly to the Jail population having been less than anticipated, partly to the opening of new Jails having been postponed, and partly to the specially low price for provisions in the earlier months of the year when stocks were purchased.

1899-1900. Expenditure on Jails.

70. In Bombay, the Punjab and the Central Provinces the Police Expenditure has exceeded the Budget Estimates in consequence of the famine necessitating large payments of grain compensation allowances. In the other Provinces there are substantial savings, due partly to economies such as the substitution of locally-manufactured for imported cloth for uniforms, partly to the absence of officers on leave, and partly to the slower introduction of some schemes of reform.

1899-1900. Police.

71. Only a small part of the reserve of R20,95,000, provided for new plague preventive expenditure as stated in paragraph 146 of the Budget Statement of last March, was required, and there is a saving of R19,42,000 in the India General Revised Estimate of Medical Expenditure. The Madras and Central Provinces Governments have also not found it necessary to spend so much as expected on plague prevention, and there are savings under the head in Madras of R10,19,000 and in the Central Provinces of R1,58,000. On the other hand, the Bengal Government increased its expenditure on those measures and there is an increase in that Province of R3,59,000.

1899-1900. Medical Expenditure.

72. The changes in the form of Accounts and Estimates described in paragraphs 4 to 6 of Part I of this Statement affect very materially the entries under the two heads XXIV and 31.—Exchange. In the Budget Estimate, as published last March in the old form, the final figure resulting from the calculations was R6,90,000 on the receipt side, under XXIV.—Exchange. The calculations under the new form give a figure on the charge side, under 31.—Exchange, of R31,96,000 (or £213,000). The explanation of this large difference is that under the new form the whole of the difference between the rate of exchange assumed in the Budget Estimate, 15$\frac{3}{4}$*d.* the rupee, and the standard rate of 16*d.* the rupee is brought to account through the heads XXIV and 31.—Exchange, whereas under the old form that difference was (like the difference between the 2 shilling rate and the standard rate under both the old and new forms) distributed over the various heads of Revenue and Expenditure under which sterling transactions occur.

1899-1900. 31.—Exchange.

In the Revised Estimate, in the new form, the entry of R31,96,000 (£213,000) on the charge side, 31.—Exchange is reduced to R10,50,000 (£70,000). The reason of this difference is that the average rate of exchange of the year will be slightly over 16*d.* the rupee instead of 15$\frac{3}{4}$*d.* the rupee taken in the Budget Estimate. This in itself would have caused the whole 32 lakhs to disappear; but the remittances of some Railway Companies were made at a lower rate than the average rate of Council Bills, which acted on the figure in the contrary direction.

73. The entries under the two heads named in the margin in the Budget Estimate of this year together made up the amount required to bring the Famine Relief and Insurance Grant up to the sum of a crore and a half of rupees. As the expenditure on Famine Relief in the Revised Estimate far exceeds that sum,

1899-1900. Protective Railways and Reduction or Avoidance of Debt.

there is no room for the expenditure under the two heads and the entries are omitted.

The amount shown under Reduction or Avoidance of Debt disappears absolutely from the Expenditure of the year. But the expenditure represented by the entry under 34.—Construction of Protective Railways has not been stopped: it has merely been removed to Expenditure not charged to Revenue under head 48.—State Railways—Construction. It may be mentioned here that this transfer would have been made even if the Famine Relief expenditure had not occurred and swallowed up the whole of the Famine Grant. For under the decision described in paragraph 7 of Part I of this Statement, expenditure on Railways of the class for which the entry in the Budget Estimate was made will in future be charged to head 48, and not to head 34.

1899-1900. Military Works Expenditure.

74. The reduction in the Expenditure in India on Military Works represents partly a transfer of Expenditure from India to England, and partly the usual lapses which always occur.

1899-1900. Civil Works Expenditure.

75. Assam is the only Province which shows an increase (R41,000) in the Expenditure on Civil Works: funds being available from Provincial Revenues the Chief Commissioner pressed on the repair of the damages caused by the great earthquake. The decrease in Burma (R2,65,000) is an ordinary one, the progress of expenditure not being so rapid as expected when the Budget grant was fixed. The savings in the other Provinces varying from R14,57,000 in Bombay to R5,62,000 in the Punjab may all be taken as being the result of the efforts of the Local Governments to reduce ordinary expenditure to provide funds for the famine, and to a small extent for other Provincial needs.

1899-1900. Army.

76. The main cause of the saving in Military Expenditure is the despatch, without replacement, of British troops to South Africa, and of two Native Infantry Regiments to Ceylon and Singapore, the charges for all of which are borne by Her Majesty's Government. This saving is estimated at R39,09,000.

There have also been savings in the charges for military operations and special services, R6,42,000: in Exchange Compensation Allowance R3,89,000, the rate of exchange having been over 16*d.* the rupee, whereas the Budget Estimate assumed a rate of $15\frac{3}{4}$*d.*: in Regimental Pay and Allowances R4,00,000: in the pay of officers transferred for plague duty to the Civil Department R3,64,000: in the annual relief movements R2,20,000: in the purchase of malt liquor R2,60,000: from the postponement of the purchase of a reserve of fodder because of the famine prices, R3,76,000: the postponement of other mobilization requirements R1,84,000: in the purchase of mules and horses in India R4,40,000; and under Medical, chiefly Cantonment General Hospitals, R4,13,000.

On the other hand, the high prices have caused an extra expenditure of R10,00,000—this would have been much greater had it not been that very low prices prevailed in the earlier months of the year: the orders issued this year regarding the messing allowance of British soldiers have entailed an additional expenditure of R9,85,000: there have been special grants of R1,32,000 for the purchase of land, and of R1,22,000 for the purchase of equipment of transport corps and supply trains; and the stoppage of the troopship service, causing a large saving in sterling expenditure as noticed below, has necessitated the chartering of two vessels to convey details to England at a cost of R4,10,000.

1899-1900. Revenue in England.

77. The Revenue in England is expected to exceed the Budget Estimate by £40,600, the bulk of which occurs under Interest. The Secretary of State had larger amounts available from his cash balance for temporary investment, and the rate of interest obtained was high during a portion of the year.

1899-1900. Expenditure in England.

78. The Expenditure in England is expected to be less than the Budget Estimate by £34,200. There is an increase of £71,500 in the payments of interest on India Bills partly owing to the rate of interest being higher and partly to some of the Bills being issued for six months and replaced within the year, which involves an interest charge this year for 18 months: £62,600 are to be spent on the purchase of land for the Store Department and for the installation of electric light in the India Office: the payments for the Indian troopship *Hardinge*, now being built, are increased by £110,700: the last quarterly payment in 1898-99 of the subsidy to the Admiralty for the Indian Defence Vessels was withheld pending settlement of a doubtful point, and the

sum of £15,200 has to be added to the payments this year. On the other hand, the payments for the Indian Troopship Service are reduced by £124,800, the South African War having prevented the despatch of the usual reliefs to India: The expenditure on Army Stores has been less than expected by £205,900: and the non-effective Army charges mainly pensions have been less than the Estimate by £73,800.

1899-1900.
Exchange.

79. As explained in paragraph 5, exchange no longer appears separately on the Accounts and Estimates. But, of course, any rise or fall in the rate of exchange affects them to the same extent as before the change in form. In the Budget Estimate the rate of exchange for the year was taken at 15¾*d.* the rupee, and the average rate obtained on the Secretary of State's drawings will be slightly above 16*d.* the rupee: the Revised Estimate places the rate at 16·072*d.* the rupee. The net sterling expenditure in the Revised Estimate is £16,249,700. The equivalent of that amount is R24,76,14,000 at 15¾*d.* the rupee and R24,26,53,000 at 16·072*d.* the rupee. The difference between these two amounts, R49,61,000, represents the saving secured by the rise in the rate above that assumed in the Budget Estimate. In addition, the higher level of exchange has caused reductions in the payments of exchange compensation allowance amounting to R6,97,000.

Section III.—Budget Estimate of 1900-1901.

1900-1901.
Statement of the gross figures.

80. The following is a general comparison of the Budget Estimate of 1900-1901 with that of 1899-1900:—

	1899-1900.	1900-1901.	1900-1901, better.	1900-1901, worse.
REVENUE.	£	£	£	£
India	67,717,900	69,978,300	2,260,400	...
England	207,100	177,500	...	29,600
TOTAL .	67,925,000	70,155,800	2,230,800	...
EXPENDITURE.				
India—				
Imperial, Provincial and Local	49,388,100	53,297,100	...	3,909,000
Adjustment of Provincial and Local Surplus or Deficit .	—616,500	—550,600	...	65,900
NET .	48,771,600	52,746,500	...	3,974,900
England	16,531,600	17,249,000	...	717,400
TOTAL .	65,303,200	69,995,500	...	4,692,300
SURPLUS .	2,621,800	160,300	...	2,461,500

1900-1901.
Main features.

81. The famine, involving a direct expenditure of just over five crores of rupees besides loss of Revenue and indirect Expenditure, and the undertaking of new Military expenditure of nearly a crore are the leading characteristics of next year. To meet this outlay the surplus shown in the Budget Estimate of the present year of nearly four crores goes a long, though not the whole, way. But increases in Revenue and strict economies in other Expenditure suffice to enable us to show a small surplus in the coming year.

82. In India an increase of Revenue of R3,39,06,000 or £2,260,400 and an increase of Expenditure of R5,86,34,000 or £3,909,000 are estimated. This net deterioration of R2,47,28,000 or £1,648,600 represents an improvement in the Provincial and Local Section of R9,88,000 or £65,900 and a deterioration in the Imperial Section of R2,57,16,000 or £1,714,500. The Revenues in England are expected to be less by £29,600 and the expenditure greater by £717,400. The total Imperial falling off, £2,461,500, reduces the surplus to the small sum of £160,300..

1900-1901. Increases of Revenue in India.

83. The heads which mainly contribute to the large increase in Revenue in India above shown are—

		R
Railways, State, Gross Receipts	more R3,63,12,000	2,22,61,000
Guaranteed, Net „	less R1,40,51,000	
Opium		83,60,000
Customs		5,26,000
Post Office		7,75,000
Telegraph		10,50,000
Mint		34,87,000
Irrigation, Major Works		13,56,000
Army		17,45,000

1900-1901. Railway Receipts.

84. A considerable part of the increase under Railways is nominal only, being caused by the change in the status of the Great Indian Peninsula Railway for nine months of the year from a Guaranteed Railway, of which the receipts are shown net, to a State Railway, of which the gross receipts are shown on the Revenue side, and the working expenses on the Expenditure side. The amount of this nominal addition to the Revenue and Expenditure is R1,53,00,000, and that amount should be deducted from the figure above given to arrive at the real increase in Railway Revenue, which will then be R69,61,000.

The Railway Revenue is estimated at an amount less by R52,51,000 than the Revised Estimate of 1899-1900, because it is not considered prudent to assume that the whole of the increase secured by the very exceptional traffic of the present year will be retained in the coming year.

1900-1901. Opium.

85. Part of the increased Revenue from Opium is obtained by the sale of 3,600 more chests than were taken in the Budget Estimate of the present year: at the price of R1,100 a chest taken in the Budget Estimate of 1899-1900 this accounts for an increase of R39,60,000. The high prices secured at the opium sales this year, particularly in the last half of it, justify us in anticipating a higher average price than R1,100 next year: the average has been taken at R1,200 a chest; and this accounts for an increase of R44,40,000.

1900-1901. Customs Revenue.

86. The Customs Revenue in Bombay is expected to be lower than in the Budget Estimate of this year by R7,66,000 in consequence of famine and plague; but in the other Maritime Provinces increases aggregating R13,05,000 are anticipated. The Estimate is taken at about three lakhs lower than the Revised Estimate of this year: the decrease is distributed over the Rice Export Duty, Articles of Food and Drink, Silver, Cotton Goods, and Manufactured Articles.

1900-1901. Post Office Receipts.

87. The Estimate of Post Office Revenue assumes that the Revenue next year will exceed that of this year by about the same amount as the latter exceeded that of 1898-99, there being nothing abnormal in the receipts this year or last.

1900-1901. Telegraph Receipts.

88. The Telegraph Revenue having increased by an abnormal amount this year owing to special causes, the estimate for next year is placed somewhat lower than the Revised Estimate of 1899-1900.

1900-1901. Mint Receipts.

89. It has been decided to coin in the beginning of next year a further crore of rupees: this will yield a profit of R32,00,000. The gain on copper coinage is also taken higher by R2,00,000 than in the Budget Estimate of this year, and the receipts for Dollar coinage are also placed slightly higher, though much lower than in the Revised Estimate of this year.

1900-1901. Irrigation Revenue.

90. The Irrigation Revenue was especially high this year, and it is improbable (as it is most undesirable) that the seasons next year will be as favourable for irrigation. The estimate has accordingly been taken over seven lakhs lower than the Revised Estimate though thirteen and-a-half lakhs higher than the Budget Estimate of this year.

1900-1901. Army Receipts.

91. The increase in the Army Receipts represents recoveries from Her Majesty's Government of the value of horses, stores, etc., sent to South Africa with the troops.

1900-1901. Decreases in Revenue in India.

92. The important decreases in Revenue in India are:—

	R
Land Revenue	52,39,000
Excise	4,92,000
Provincial Rates	3,19,000

93. The famine will necessitate suspensions and remissions of Land Revenue and Provincial Rates next year as well as in the current year, though not to so great an extent. The decrease under the latter head would have been considerably greater were it not that the Madras Government has decided to increase the rate at which a local cess is levied and there is an increase under the head in that Province of R3,69,000.

1900-1901. Land Revenue and Provincial Rates.

94. In ordinary times the Excise Revenue increases from year to year in all Provinces in which no special measure leading to a check has been adopted for administrative reasons. This normal increase is expected next year in Bengal, the North-Western Provinces, and Burma. In the latter Province, however, one such measure has been adopted leading to a loss of Revenue moderately estimated at R1,50,000 a year: it is the decision to stop the sale by auction of licenses to sell opium in Lower Burma in order to diminish the temptation to the licensees to traffic in illicit opium.

1900-1901. Excise Revenue.

In Bombay and the Central Provinces the famine is expected to cause a serious decline in Excise Revenue, and in the Punjab the same cause has restricted the usual increase.

In Madras a very large decrease of R12,64,000 is anticipated by the Local Government. The Excise Revenue in that Province advanced more rapidly than that of any other Province till two years ago when it began to decline, and the Local Government expects that the decline will continue next year for special reasons some being connected with difficulties—temporary it is hoped—in the administration of the special system in force in that Province, and some with the unfavourable character of the seasons.

95. The important increases in expenditure in India are :—

1900-1901. Increases in Expenditure in India.

		R
3.—Land Revenue		10,18,000
Forest		5,76,000
Post Office		7,35,000
Police		9,33,000
Political		5,85,000
Scientific and Minor Departments		11,63,000
Famine Relief		4,99,68,000
37.—Construction of Railways charged to Revenue		12,42,000
State Railways, Working Expenses		1,93,58,000
Interest on Railway Debt	14,82,000	
Interest on Irrigation Debt	3,90,000	22,82,000
Interest on Advances chargeable against Companies	4,10,000	
Army		41,43,000

96. The increase in the Expenditure under 3.—Land Revenue is partly caused by the famine, partly by pressing on Surveys and Settlements, partly by larger charges for the collection of the Revenue, and partly by carrying out various schemes for the improvement of District Administration.

1900-1901. Land Revenue Expenditure.

97. The increase in Forest Expenditure occurs mainly in Burma, R4,61,000, necessary to earn the increased Revenue, and in Bombay, R1,03,000, caused by the fodder scheme mentioned in paragraph 61.

1900-1901. Forest Expenditure.

98. The increase in Post Office Expenditure is a necessary outcome of the development of this progressive department, and is less than the increase in Revenue.

1900-1901. Post Office.

99. The more important increases in Police Expenditure occur in the Punjab R1,79,000, Burma R2,18,000, Bombay R2,85,000, and the Central Provinces R1,09,000. In the first two the cause is the intended increase to Border Military Police and in the two last the famine.

1900-1901. Police Expenditure.

100. The increase in Political Expenditure occurs mainly in the Punjab where it amounts to R4,82,000. It provides for the establishment of the Tochi Militia and for additional expenditure on the Kurram Militia and the Khyber Rifles, all these measures being connected with the scheme for withdrawing some of the outlying garrisons of the regular Army, which will result in a considerable saving on the whole.

1900-1901. Political Expenditure.

1900-1901. Scientific and Minor Departments.

101. The larger part of the increase under Scientific and Minor Departments is caused by the provision for the Census which is to be taken on March 1, 1901. The amount of that provision is R7,32,000, being about the same as the provision entered in the Budget Estimates of 1890-91. The expenditure of the Meteorological Department shows an increase of R54,000, and that of the Civil Veterinary Department an increase of R1,84,000, part of which, however, is nominal only, being a transfer of the cost of the Hissar Cattle Farm from the head Army. In Madras there is an increase of a lakh and-a-half for the charges of the aluminium manufactory started in the School of Arts: the receipts from the sale of the articles will more than cover the charges.

1900-1901. Famine Relief.

102. The Famine Relief Expenditure has been explained in other parts of this Statement.

1900-1901. 37.—Construction of Railways.

103. The increase under 37.—Construction of Railways charged to Revenue is an item of Local Expenditure. The Tanjore Local Board intends to spend R12,73,000 next year, from the accumulations of the local railway cess, on the commencement of an extension of the Mayavaram-Mutupet Railway. To complete the extension it will be necessary for the Board to borrow, but the loan will not be issued in the coming year.

1900-1901. Working Expenses of State Railways.

104. It has been explained in paragraph 84 that from the increase shown under State Railways, a deduction of R1,53,00,000, the charges of the Great Indian Peninsula Railway for nine months, must be made to arrive at the real increase. The amount then becomes R40,58,000, an addition which is necessitated by the larger traffic expected to bring in the increase in Receipts of R69,61,000 mentioned in paragraph 84.

1900-1901. Interest on Railway and Irrigation Debt.

105. The increase in the Railway and Irrigation Debt is the interest on the new capital expenditure. The amount is transferred from Interest on ordinary Debt.

1900-1901. Army Expenditure.

106. The famine is responsible for a large part of the increased Military expenditure in India, the cost of food supplies for men and animals being taken R47,30,000 higher than in the Budget Estimate of the present year. The orders regarding the messing allowances of British soldiers involve a higher expenditure of R6,63,000. The cost of the annual reliefs is expected to be higher by R2,56,000. The purchase of horses to replace those sent to South Africa with Cavalry Regiments and Batteries of Artillery will cost R22,00,000; and the replacement of stores sent to South Africa with the Indian troops will cost R2,60,000. The maintenance of a larger number of transport animals adds R2,43,000 to the Estimates. A special purchase of 2,000 mules will cost R9,10,000 including the keep of the animals for a part of the year; and the purchase of 1,000 Persian mules for ordinary requirements R1,70,000. The new scheme regulating the promotion of Commissariat Officers will cost R1,00,000. The provision for "Regimental Pay and Allowances" has been raised by R1,30,000, and that for the Native Army Reserves, which have been increased in strength, by R1,39,000. Under Ordnance an increase of R1,87,000 has been taken, mainly to provide for larger purchase of hides for the Cawnpore Saddlery Factory from which large issues of leather were made to the South African force. The following additions have been made to the Estimates: R9,01,000 for the improvement of Commissariat-Transport arrangements: R5,64,000 for improvements in the organization of Horse and Field Batteries and additions to Mountain Battery establishments: R4,94,000 for the reorganisation of the four Heavy into two Howitzer Batteries: R4,00,000 for an addition of 92 officers to the Staff Corps: R3,81,000 for the increased cost of ammunition for the new rifle to be supplied to the Native Army; and R1,27,000 for the purchase of equipment to complete transport corps and supply trains.

On the other hand, the despatch of three Native Regiments to Ceylon, Singapore and Mauritius secures a saving of R6,40,000; and the expectation that the British troops sent to South Africa will not be replaced before October, a saving of R38,50,000. The grants for mobilization and clothing expenditure are less by R8,71,000, for Camps of Exercise by R1,45,000, and for Exchange Compensation Allowance by R3,35,000. And a smaller provision for special services has been made giving a reduction of R29,11,000: the bulk of this is due to the decision to withdraw regular troops from several outlying posts in the frontier, replacing them by Militia.

1900-1901. Decreases in Expenditure in India.

107. The important savings in Expenditure in India are :—

	R
Interest on Ordinary Debt	6,77,000
Medical	26,28,000
31.—Exchange	31,96,000
Protective Railways	49,00,000
Reduction or Avoidance of Debt	60,39,000
Guaranteed Railways, Surplus Profits, etc.	27,48,000
Military Works	14,87,000
Civil Works	41,05,000

1900-1901. Interest.

108. The Interest on Ordinary Debt is reduced by R22,82,000, being the amount transferred to Railway and Irrigation Debt, see paragraph 105; and a smaller provision has been made for arrear payments than in the Budget Estimate of the present year. On the other hand, we have made a provision of R20,00,000 for the interest and possible discount on the loan which is to be raised in India in the coming year.

1900-1901. Medical Expenditure.

109. The saving in Medical Expenditure is accounted for by the facts that it is unnecessary to repeat the provision of a reserve of R20,95,000 for plague preventive measures, and that the Madras and the Central Provinces Governments have reduced their provisions for that purpose by R9,77,000 and R51,000. On the other hand, the Bengal Government has provided R2,00,000 for plague preventive measures, and there are small increases in general Medical Expenditure in the other Provinces, some of them caused by famine.

1900-1901. 31.—Exchange.

110. The explanation of the difference under 31.—Exchange is given in paragraph 72.

111. The explanation of the reduction under Protective Railways and Reduction or Avoidance of Debt has been given in paragraph 73.

1900-1901. Surplus Profits, etc.

112. The reduction in the payments of surplus profits, etc., to Guaranteed Railways occurs mainly on the Great Indian Peninsula Railway, of which the earnings will be very low in the half-year ending June 30, the last in which such payments will fall due in respect of it, as it will then become a State Railway.

1900-1901. Military Works.

113. In the Budget Estimate of this year a special addition of 15 lakhs was made to the Military Works grant for the cost of defensive works on the frontier. The financial position does not admit of a similar addition next year.

1900-1901. Civil Works.

114. The great bulk of the expenditure on Civil Works is Provincial. Burma is the only Province of which the Provincial Revenues are in a really prosperous condition, but Bengal, the North-Western Provinces and Oudh, and Assam are fairly well off: all the others have difficulty in securing equilibrium in the Provincial finances. The Burma Government has provided for an increase in Public Works expenditure of R21,97,000. The Chief Commissioner of Assam estimates for a reduction of R8,63,000, but the reason is that the expenditure this year was exceptional, being the continuation of the repair of earthquake damages for which Imperial Revenues made a large special grant: the back of that special expenditure has been broken, and a reduction is possible next year. In all the other Provinces large reductions have been made to help the Local Governments to secure equilibrium in the Provincial Revenues. The amounts are :—

	R
Bombay	13,79,000
Bengal	11,90,000
The Punjab	10,57,000
Madras	8,52,000
The Central Provinces	5,31,000
The North-Western Provinces and Oudh	3,38,000

1900-1901. Revenue in England.

115. The sterling Revenue next year is taken less than in the Budget Estimate of this year by £29,600. Almost the whole of this decrease is due to the omission of receipts in connection with the Indian Troopship Service, a net amount for the Service being provided on the Expenditure side.

1900-1901. Expenditure in England.

116. The sterling expenditure is increased by £717,400. The larger items of increase are :—

£

37,500 in interest payments, the amount of India Bills being higher by £500,000, and the probable rate of interest being taken at 3 instead of 2½ per cent.

£

51,400 for Telegraph Stores, which require replenishment.

11,500 in payments for the Indo-European Telegraphs, the increase in the homeward traffic, and the carriage of a larger percentage by the Indo-European route being expected to continue.

114,800 in payments for the Troopship *Hardinge* under construction.

40,000 in payments of civil furlough allowances and pensions.

183,300 in the interest payments connected with the Great Indian Peninsula Railway. The Railway is to be purchased by the Government by means of terminable annuity, and the amount charged to Railway Revenue will include the part of the annuity which goes towards repayment of the capital.

62,900 in payments of interest on capital deposited by Railway Companies, caused by further receipts of capital.

321,700 in the payments for Ordnance and other Military stores. This is caused by the decision to re-arm the Native Army in India and to adopt other measures to increase the efficiency of the Army.

On the other hand, the Army non-effective charges are reduced by £69,500; and the payments to the War Office in respect of British Forces in India are expected to be less by £30,000 owing to the absence of troops in South Africa.

1900-1901. Exchange.

117. The adoption of the rate of 16*d.* the rupee in the Budget Estimate for next year yields a saving as compared with the Budget Estimate of this year, in which the rate of 15¾*d.* was adopted. The net sterling Expenditure next year is £17,071,500. The equivalent is R26,01,37,000 at 15¾*d.* the rupee and R25,60,72,000 at 16*d.* the rupee. The difference R40,65,000 represents the saving due to the rise in the rate of exchange. The saving in exchange compensation allowance from the same cause amounts to R5,81,000.

Section IV.—Statements comparing the figures of the Estimates under the more important heads of Revenue and Expenditure with those of past years.

119. The only remark which need be added to the explanations given in paragraphs 47, 67, and 85 is that in June last the Government decided to discontinue the purchases of Malwa Opium for excise purposes which have been made for six years. These purchases were resorted to only as a temporary measure in view of the abnormally small produce of the poppy crops and the consequent exhaustion of the reserve and great reduction in the annual sales. Now that somewhat better crops have enabled us to make moderate additions to the annual sales and to the reserve, it is undesirable to continue the purchase of Malwa Opium. This decision does not affect the provision for expenditure next year, as the practice is to provide for a normal crop, and no addition was made to the total provision because of the Malwa purchases.

SALT.

	Accounts, 1896-97.	Accounts, 1897-98.	Accounts, 1898-99.	1899-1900. Budget.	1899-1900. Revised.	1900-1901, Budget.

England	191	468	258	600	700	200

(a) Chiefly excise on local manufacture. | (b) Chiefly duty on imported salt.

120. The Salt Revenue this year, though higher than the moderate Budget Estimate, is considerably lower than the high figure attained in 1898-99. The famine has rendered it necessary to estimate the Revenue next year at an amount decidedly lower than what should now be taken as the normal in an ordinary year.

STAMPS.

	Accounts, 1896-97.	Accounts, 1897-98.	Accounts, 1898-99.	1899-1900.		1900-1901, Budget.

121. The usual increase in Stamp Revenue received a check in 1898-99 as occasionally happens. There has been some recovery this year, though not to the extent assumed in the Budget Estimate. A further recovery of an amount sufficient to bring the total up to the Budget Estimate of this year is anticipated next year.

EXCISE.

	Accounts, 1896-97.	Accounts, 1897-98.	Accounts, 1898-99.	1899-1900.		1900-1901, Budget.

England	226	123	...	100	...	...

122. The increase of Excise Revenue this year has been smaller than the usual increase, and next year we estimate for a decline. The famine is the main reason in both cases, though in Madras, where the decline is largest, other causes are in operation as explained in paragraph 94.

Charges	20,33,860	21,13,790	21,48,440	23,21,000	22,85,000	23,53,000

124. The Revenue from Import Duties shows a considerable increase over last year and the Budget Estimate of this year. The main item of improvement is the new source of revenue from the countervailing Sugar Duties (see paragraph 26, Part I) which are expected to yield R7,09,000 this year and R7,66,000 next year. Important increases also occur under Liquors, Manufactured Articles and Cotton Goods, while there are decreases under the other subdivisions of the Tariff.

The Export Duties have fallen off in consequence of the famine which diverts rice from the foreign export trade to India.

ASSESSED TAXES.

	Accounts, 1896-97.	Accounts, 1897-98.	Accounts, 1898-99.	1899-1900. Budget.	1899-1900. Revised.	1900-1901, Budget.

128. The introduction of the one anna postage rate for letters to British Possessions, in the case of the Post Office, and the decision to deliver deferred messages by messenger as received instead of delivering them by the first post of the next day, in the case of the Telegraph Department, are the two administrative improvements which have, for a time, checked the rate of increase of the Revenue of these two progressive and most efficiently managed departments.

Notwithstanding, the figures in the above table show satisfactory progress. The Telegraph Revenue has also been affected by special causes which have been explained in paragraph 51, and both the Revenue Expenditure and the Capital Expenditure have to be specially high next year to enable the department to cope with the annually increasing traffic, to keep the older lines in proper repair, and to carry out the extensions which have been ordered.

129. The Mint figures are explained in paragraphs 52 and 89.

Madras	...	2,17 000	2,17,000	7,20,000	3,05,000	10,25,000
Bombay	1,09,70,000	30,000	1,10,00,000	2,47,92,000	60,000	2,48,52,000
England converted into Rupees at R15 = £1	79,000	...	79,000	...	...	...
TOTAL	3,01,27,000	6,95,000	3,08,22,000	4,88,16,000	12,09,000	5,00,25,000

133. The ordinary rule of the Provincial Settlements is that this expenditure is Provincial. But outlay on the scale necessitated by the present famine is beyond the power of the Provincial Revenues to meet, and it has been necessary for Imperial to come to the assistance of Provincial Revenues in Bombay, the Central Provinces, and the Punjab: the Government of India has also agreed to treat as Imperial any expenditure next year in Madras in excess of 3 lakhs.

134. In addition to the direct expenditure, the famine entails indirect expenditure and loss of revenue. The following table gives an estimate of these items :—

	1899-1900, Revised.	1900-1901, Budget.
Loss of Revenue—		
Land Revenue—	R	R
Remissions	1,97,00,000	45,00,000
Suspensions		13,00,000
Salt	5,00,000	10,00,000
Excise	9,00,000	12,00,000
Provincial Rates—		
Remissions	2,00,000	1,00,000
Suspensions	15,00,000	6,00,000
Forest	8,00,000	4,00,000
Railways (net)	...	30,00,000
	2,36,00,000	1,21,00,000
Increase of Expenditure—		
Compensation for dearness of provisions and other charges	37,00,000	71,00,000
Total estimated cost of famine in addition to the charge under 33.—Famine Relief	2,73,00,000	1,92,00,000

135. These do not exhaust the calls on our resources made by the famine. The present famine affects large tracts in Native States. The administration of famine relief is left to the rulers of the States, the Government of India merely offering advice through its political officers, and lending officers to such States as require that assistance. But the resources of the States are not in all cases equal to the strain on them, and the Government of India have freely promised help in the way of loans. The amount of those loans this year exceeds R48,00,000 and in 1900-1901 a provision has been made in the Ways and Means Estimate of R75,00,000.

Moreover, in British India one measure resorted to for combating famine is to increase the amount of agricultural advances : the increase on that account is R37,75,000 this year and about R20,00,000 next year.

136. The Revised Estimate of net receipts on State Railways in 1899-1900 is higher than the Budget Estimate by R86,63,000 or £577,600. The improvement is chiefly on the East Indian, Rajputana-Malwa and Bengal-Nagpur Railways and is due to general development of traffic following an increased open mileage, to heavier coal and food-grain traffic and to the movement of troops sent to South Africa.

137. The increase in the Interest charges in India is due chiefly to the East Indian Railway Company not having raised during 1898-99 debentures

to the extent of £1,000,000 as was anticipated in the Revised Estimate for that year, in consequence of which the outlay on the line was provided from funds under the head 48 and interest charged in India.

138. The net receipts from State Railways in 1900-1901 are estimated at R82,91,000 or £552,700 higher than the Revised Estimate for 1899-1900. This increase is merely nominal as it is due to the inclusion under this head of the net receipts of the Great Indian Peninsula Railway which in the previous year were included in those of the Guaranteed Railways. Excluding the transactions of this Railway the results show a falling-off of R39,09,000 or £260,600, it is not considered prudent to anticipate a continuance of the exceptional traffic obtained in 1899-1900. The increase under working expenses is due, as explained above, to the inclusion of the transactions of the Great Indian Peninsula Railway under this head. The increase in Interest charges in India is due to the progress of Capital Outlay, and in England to provision having been made for the purchase of the Great Indian Peninsula Railway by means of an annuity, the interest charges in England being reduced for the same cause.

139. The Revised Estimate of net receipts from Guaranteed Railways is lower than the original Estimate by R23,75,000 or £158,400 due to a falling-off in traffic on the Great Indian Peninsula Railway consequent on the failure of the cotton and grain crops.

140. The decrease in surplus profits and other charges is due to the same cause.

STATISTICS OF MAJOR WORKS.						
Capital Outlay to March 31 . .	31,89,71,390	32,63,98,030	33,31,93,720	34,25,90,030	34,25,34,720	35,31,57,720

141. The increase in the receipts from Major Works in 1899-1900 is due chiefly to the greater demand for canal water consequent on short rainfall in the districts served by the canals; the small decrease in the receipts from Minor Works is mainly due to the short supply of water in the tanks in Baluchistan. The Budget Estimate of receipts from Major Works anticipates a decrease of R7,33,000 as it is not expected that the seasons will be so favourable for Irrigation as in 1899-1900. The Estimate, however, provides for an increase of R5,35,000 in the revenue from the Chenab Canal, the direct receipts from which are expected to rise to R35,80,000 in 1900-1901, being about 50 per cent more than the actual receipts of 1898-99. The increase of Irrigation in 1899-1900 necessitated an increase in the charges for the collection of revenue as well as in the charges for maintenance and repairs.

142. The financial results obtained during 1897-98 and 1898-99 from Irrigation Works, for which Capital and Revenue Accounts are kept, are given below:—

	1897-98.	1898-99.
MAJOR WORKS.	R	R
Capital Outlay—		
Direct and Indirect . { During the year . .	77,51,250	70,71,840
{ To end of year . .	34,12,73,360	34,83,46,160
Revenue Account—

India . . . R	65,26,606	62,26,319	65,91,962	64,38,000	61,92,000	62,48,000
England . . £	26,224	28,911	30,519	29,600	29,000	27,300

143. The expenditure on Imperial Military Works during 1899-1900 is expected to be less than the Budget Estimate by R6,70,000. This is chiefly due to expenditure on defensive works on the frontier having fallen short of the estimate. No special grant for the frontier works has been made in 1900-1901.

144. Under Imperial Civil Works a lapse of R1,10,000 is expected in Baluchistan. The Budget grant for 1900-1901 is higher than that for 1899-1900 owing to provision being made for special works at Bangalore and for a contribution to the Simla Municipality for expenditure on the extension project.

145. The expenditure on Provincial and Local Civil Works during 1899-1900 is expected to fall short of the Budget Estimates by R48,43,000 and R8,12,000, respectively. Under Provincial, the Budget Estimate was abnormally high, as it provided for spending the contributions from Imperial to Provincial Revenues, aggregating about R60,00,000. Owing to the occurrence of famine, expenditure, especially in the Central Provinces, Punjab, and Bombay, was restricted. The only point deserving notice in connection with the Provincial Budget Estimates for 1900-1901 is that Burma provides for expenditure to the extent of about R20,00,000 more than in the previous year. The decrease under Local Civil Works is entirely due to restriction of expenditure in connection with famine.

146. In paragraphs 76 and 106, the numerous items accounting for the variations in the Expenditure under this large and important head have been detailed. But it will be convenient here to state the causes for the increase in expenditure next year in a somewhat different way.

147. We may take first the causes which are beyond the power of the Government of India to control. The famine adds R47,30,000 to the expenditure by increasing the price of food supplies. And the despatch of troops out of India, without replacement, secures a net saving of R42,40,000—the gross saving is R44,90,000, but the absence of the troops involves a reduction in receipts of R2,50,000. The net addition to the expenditure for unavoidable reasons is accordingly R4,90,000.

148. The other class of items consists of increases which are the result of orders of the Government of India or of the Secretary of State. The savings effected by such orders amount to R29,11,000, being the result chiefly of the decision to withdraw regular troops from several outlying posts on the frontier: there is some set-off against this saving in the Civil Estimates where provision is made for the Militia or Military Police which will replace the troops.

149. On the other hand, the Government of India has deemed it prudent to sanction several measures involving increased Military Expenditure considered necessary to improve the efficiency of the Army.

The first and most important of these is the re-armament of the Native Army with the Lee-Enfield Rifle. The manufacture and supply of the arms will necessarily be spread over some years, and the provision made next year is R44,50,000. This represents part of the increase shown in the above table in the Sterling charge for Ordnance Stores.

Next comes the provision of Lyddite shells for a howitzer battery and siege train howitzers for which a provision of R2,77,000 is made.

For the improvement of Commissariat-Transport arrangements the estimates provide R10,00,000.

An addition of 92 officers to the Indian Staff Corps is estimated to cost next year R4,00,000.

The four Heavy Field Batteries are to be reorganised into two Howitzer Batteries, improvements are to be made in the organisation of the Mounted Artillery Batteries, and additions have been sanctioned to the establishments of Mountain Batteries. The cost of these measures next year will be R10,59,000.

Four Mountain Batteries are to be armed with a new gun, costing R90,000.

Fifty miles of light railway material are to be purchased costing R8,00,000.

The purchase of 2,000 mules has been ordered costing, with their keep for a part of next year, R9,10,000.

A sum of R75,000 has been provided to admit of experiments being made to determine the best method of adding military balloons to the equipment of the army.

The total cost of these measures exceeds R90,00,000.

Section V.—Capital Expenditure on Public Works not charged against Revenue.

RAILWAY CONSTRUCTION.

150. As explained in paragraphs 16 to 19 of Part I, the Expenditure on Railway Construction for which the Government undertakes any financial responsibility or gives any direct guarantee will be R9,28,27,000 in the current year and R7,30,84,000 in 1900-1901, the amount having been R8,84,21,189 in 1898-99, and R8,82,27,000 in the Budget Estimate of this year. The distribution of the total

Expenditure on Railway Construction through State and Companies' Agency in each of the three years from 1898-99 to 1900-1901, is as follows :—

	1898-99, Accounts.	1899-1900, Revised.	1900-1901, Budget.
Expenditure in England.	£	£	£
1. State Lines	766,839	634,000	910,000
2. Old Guaranteed Railways	893,241	715,300	638,000
3. Extensions of ditto	77,584	76,100	120,400
4. Other Guaranteed or Assisted Railways	746,056	908,300	702,200
TOTAL	2,483,720	2,333,700	2,370,600
Equivalent in rupees of Expenditure in England.	R	R	R

3. Extensions of ditto ditto	15,05,298	34,10,000	10,63,000
4. Other Guaranteed or Assisted Railways	1,77,92,827	1,51,05,000	1,90,98,000
5. Branch Lines on firm guarantee	20,65,758	14,80,000	4,50,000
TOTAL INDIA	5,46,52,011	5,83,57,000	3,82,48,000
TOTAL OF PROGRAMME	8,84,21,189	9,28,27,000	7,30,84,000

151. The figures in the above table do not include the expenditure of Branch Line Companies not in receipt of a direct guarantee nor that of other Companies whose transactions are outside the Government accounts. Including this expenditure and also the expenditure from Provincial and Local Revenues on local lines, the total expenditure on Railway Construction in the three years may be stated as follows :—

	Accounts, 1898-99.	Revised, 1899-1900.	Budget, 1900-1901.
	R	R	R
Total as in table in paragraph 150	8,84,21,189	9,28,27,000	7,30,84,000
Branch lines not on firm guarantee	89,27,019	41,82,000	—55,000
Railways outside Government accounts	68,07,000	57,61,000	66,42,000
Provincial and Local State lines	14,526	36,000	12,78,000

49.—Irrigation Construction.

159. The figures are :—

Accounts, 1898-99.	Budget, 1899-1900.	Revised, 1899-1900.	Budget, 1900-1901.
R	R	R	R
65,35,482	85,00,000	89,73,000	1,00,00,000

Owing to vigorous prosecution of work on the Jhelum Canal in the Punjab, an additional grant of R5,00,000 was made during the year. The Budget grant for 1900-1901 has been fixed at R1,00,00,000 to permit of work on the large projects now in hand being vigorously pushed on.

51.—Redemption of Liabilities.

160. The Budget Estimate for 1900-1901 provides £5,922,400 under this head representing the Permanent Debt brought on the Government books on account of the Debentures and Debenture Stock of the Great Indian Peninsula Railway Company for which the Secretary of State will incur the liability on the purchase of their undertaking.

Section VI.—Ways and Means.

HOME TREASURY.

161. The following are the details of the transactions of the Home Treasury in the Budget and Revised Estimate for 1899-1900 and in the Budget Estimate for 1900-1901 :—

	Budget, 1899-1900.	Revised, 1899-1900.	Budget, 1900-1901.

Add—Closing Balance	2,817,344	2,223,668	2,021,568
TOTAL	28,526,044	29,249,068	33,129,268

1899-1900. Home Treasury Ways and Means.

162. In preparing the Budget Estimates of the current year, the cash balance in the Home Treasury on the 1st of April 1899 was taken at £4,304,444, and it was assumed that with the sale of Bills on India to the amount of £17,000,000 the Secretary of State would be able, without any additions to the Sterling Debt, to meet a net disbursement of £18,487,100 during the year by drawing upon his cash balances to the extent of £1,487,100.

The East Indian Railway Company did not raise until May 1899 £1,000,000 Debenture Capital which they intended to raise in March: the sales of Council Bills in 1898-99 were less by £307,623 than the amount entered in the Revised Estimate; while, on the other hand, the net disbursements of the year were less than in the Revised Estimate of 1898-99 by £148,947. The actual cash balance on the 1st of April 1899 was consequently lower than that taken in the Budget Estimate by £1,158,676.

The heavy trade demands for funds in India enabled the Secretary of State to increase his drawings in the current year, and it is now expected that the total Bills and Transfers sold during the year will be £19,000,000 instead of the £17,000,000 entered in the Budget Estimate. But the balances in the Indian Treasuries were not sufficient to meet the whole of the drawings, and it was therefore decided to hold £1,500,000 out of the total drawings in a separate Currency

Account in the Bank of England under Act II of 1898. A sum of £500,000 has also been used for the purchase of silver for coinage into rupees in India, so that £17,000,000 out of the total drawings have been available for the ordinary disbursements of the Secretary of State. These disbursements, apart from the purchases of gold and silver mentioned above, are now expected to amount to £17,922,100, being £565,000, less than the amount, £18,487,100, entered in the Budget Estimate.

Deducting the decrease in the ordinary disbursements of £565,000 from the decrease of £1,158,676 in the opening balance, we get the diminution of the closing balance of 1899-1900 below the amount taken in the Budget Estimate, namely, £593,676, as shown in the Revised Estimate.

1899-1900. Temporary Sterling Loans.

163. No addition to the Sterling Debt was made by the Secretary of State during the year. But in accordance with the programme of the Budget Estimate, Temporary Debt for £4,500,000 was replaced by issuing an equivalent amount during the year. £2,500,000 were issued in May and £2,000,000 in September, the results of the loans having been as follows :—

Month of Issue.	Amount tendered.	Amount accepted.		Average rate of interest per cent per annum.		
	£	£		£	s.	d.
May 1899	7,290,000	1,500,000	for twelve months.	2	14	11½
		1,000,000	for six months.	2	10	2
September „	6,535,000	1,000,000	for twelve months.	3	4	2
		1,000,000	for six months.	3	9	9

As the two millions issued for six months fell due during the year, they had again to be replaced, raising the gross amount issued and discharged to £6,500,000 in the Revised Estimate. The additional issues of two millions have been made with the following results :—

Month of Issue.	Amount tendered.	Amount accepted.		Average rate of interest per cent per annum.		
	£	£		£	s.	d.
November 1899	2,580,000	500,000	for twelve months.	4	2	11
March 1900	4,232,000	1,000,000	Do.	3	18	1
		500,000	for six months.	3	17	5

The rates of interest payable on the temporary loans issued after May have been unusually high owing to the stringency in the London money market.

1899-1900. Capital of Railway Companies.

164. The net issues to Railway Companies in England during 1899-1900 are now estimated to be £1,101,400 against £475,700 entered in the Budget Estimate, showing an increase of £625,700. The usual details are as follows :—

	Budget.	Revised.
RECEIPTS.	£	£
Subscribed Capital—		
(*a*) State Lines	1,754,400	401,000
(*b*) Guaranteed Lines	964,200	200,000
Miscellaneous	3,000	4,800
TOTAL	2,721,600	605,800
ISSUES.		
For Discharge of Debentures—		
(*a*) State Railways	1,234,400	*Nil.*
(*b*) Guaranteed Lines	14,200	2,700
For Stores, Establishment Charges, etc.—		
(*a*) State Railways	997,200	910,000
(*b*) Guaranteed Lines	951,500	794,500
TOTAL	3,197,300	1,707,200

The decrease of £2,117,600 in the receipts on account of subscribed Capital is made up as follows:—

	£
Receipts on account of Capital, less by—	
Bombay, Baroda and Central India Railway	500,000
Great Indian Peninsula Railway	250,000
Indian Midland Railway	70,000
Southern Mahratta Railway	50,000
Madras Railway	2,700
	872,700
Deduct—	
Bengal-Nagpur Railway, more by	— 1,000
	871,700
Debentures renewed instead of being replaced by fresh Capital—	
Bengal-Nagpur Railway	1,234,400
Madras Railway	11,500
TOTAL	2,117,600

The state of the London Money Market made it desirable to postpone the raising of fresh capital as much as possible.

165. As regards the reduced drawings for expenditure on stores, etc., the estimates generally prove too high, and in the current year this is likely to be the case as regards the programmes originally settled for the Bengal-Nagpur, the Indian Midland, the Madras, and Great Indian Peninsula Railways.

166. The following are the details of the remittance transactions of Railway Companies working State lines in India to whom advances of funds are made in England for the purchase of stores, etc., against adjustments in India by debit to the Railway accounts:—

	Budget.	Revised.
	£	£
Advances for Purchase of Stores—		
East Indian Railway	1,000,000	1,147,000
Rajputana-Malwa Railway	100,000	103,400
South Indian Railway	68,000	54,500
Bengal and North-Western Railway	70,000	52,000
TOTAL	1,238,000	1,356,900
East Indian Railway Debentures	500,000	1,008,000
Transfer fees, etc.	2,000	2,200
TOTAL	502,000	1,010,200
Net Remittance from India	736,000	346,700

As stated already in paragraph 162, the East Indian Railway Company issued in May 1899 £1,000,000 Debentures entered in March last in the Estimates for 1898-99. Only £8,000 will, therefore, have been raised in the current year against the Budget Estimate of £500,000, the issue of further amounts being deferred to next year.

The advances for purchase of stores do not differ much from the original estimates.

1899-1900. Family and other Remittances.

167. The Family and other Remittances during the year are now expected to result in a net receipt of £423,500 instead of a net payment of £268,800 entered in the Budget Estimate. The difference of £692,300 is due chiefly to the repayment by Her Majesty's Government of £650,000 in respect of disbursements in India in connection with the despatch of Troops to South Africa.

1900-1901. Home Treasury Ways and Means.

168. The net disbursements at the Home Treasury in 1900-1901 on account of Government Expenditure and Miscellaneous Family and other Remittances are estimated at £18,315,000. This amount it is proposed to provide in the following way, namely :—

(1) the Secretary of State intends to draw £16,440,000 by Bills on India, and to issue £500,000 additional India Sterling Bills in addition to replacing those outstanding at the end of this year ;
(2) large amounts of additional capital will be issued by Railway Companies in England in 1900-1901, and there will be a net receipt in England of £672,900 from Companies ;
(3) the sum of £500,000 spent by the Secretary of State in the purchase of silver this year will be refunded to him by releasing gold held in the Bank of England on Currency account, on the payment of its equivalent in India to the Currency Department out of the proceeds of the coinage ;
(4) the total of the receipts in England mentioned above is £18,112,900 as compared with the total of £18,315,000 required and the remainder, £202,100, will be met by a reduction in the cash balances.

Purchase of the Great Indian Peninsula Railway.

169. In the table in paragraph 161, a sum of £5,922,400 is shown as Permanent Debt to be incurred during the year. This represents the Debentures and Debenture Stock of the Great Indian Peninsula Railway Company, for which the Secretary of State will incur the direct liability on the purchase of the Undertaking on the 30th of June next, and the amount will be brought to account as Debt incurred against the charge of the same amount as Capital Outlay on Railways not charged to Revenue under the head Redemption of Liabilities. This is part of the purchase money of the Railway. Under the contract of the Great Indian Peninsula Railway Company with the Secretary of State, dated August 17, 1849, the Secretary of State has given notice of his intention to purchase the Undertaking on the 30th of June next. The contract provides for the payment, at the option of the Secretary of State, of the share Capital of the Company either in cash or by annuities expiring on the 16th August 1948, the amount of the Capital being determined by the average price of the Stock for the three years preceding the date of notice to purchase. It has been decided to effect the purchase by means of an annuity. The exact amount of the annuity to be paid half-yearly has not yet been settled, but for the purpose of the estimates one half-year's annuity has been taken at £687,500 and entered as a charge in the Railway Revenue Account (see paragraph 116). The decision to make the payments by annuity avoids the necessity of any sterling loan for the discharge of the share Capital, and only the outstanding Debentures and Debenture Stock of the Company are entered in the estimates as an addition to the Debt.

170. According to the programme now announced, the Secretary of State will obtain £16,440,000 by sale of Bills on India in 1900-1901 and no additions to the Sterling Debt of Government will be made by new loans during the year except a Temporary Debt of £500,000 by means of India Bills. The programme is announced with the usual reservation and no pledge is given that the Secretary of State will adhere to it.

INDIA.

1899-1900. Main Features.

171. The main feature of the Ways and Means in India in 1899-1900 was a large reduction in the cash balances in the closing months of the year caused by the expenditure on famine relief. No Rupee loan was required in the year: ordinarily our loans in India are raised in July or August, but the effects of famine were not felt till September and October, and the drain on the balances was not very heavy until after the period of low Treasury balances—November-December—had passed. The expenditure on the direct relief of distress in the current year will be about 308 lakhs and the loss of revenue and other increases of expenditure are estimated at a total of about 273 lakhs. Additional grants of over 86 lakhs were made during the year for loans to Native States and agriculturists for the relief of distress, and an addition of 51 lakhs was

made to the total grant for Capital Expenditure on Railways and Irrigation Works. A charge of over one-and-a-half crores was incurred on account of the troops sent from India to South Africa to be recovered from Her Majesty's Government in England. These increased outgoings were partly counter-balanced by an increase in the Railway revenue, an increase in the Opium receipts and by profits on the coinage of silver and copper. There was a substantial reduction in the Army expenditure: and expenditure on plague preventive measures was considerably lower than was taken in the Budget Estimate; and there were general economies in ordinary expenditure of Local Governments. The total reduction in the cash balances during the year is now expected to be 353 lakhs, while a reduction of 39 lakhs only was anticipated in the Budget Estimates.

The following table compares the leading figures of the estimates of the current and the next year:—

	1899-1900.				1900-1901.

The headings in italics are connected with, and explained by, the corresponding figures of the Secretary of State's account in England. The others refer to purely Indian transactions.

172. A remarkable feature of the year 1899-1900 in the above table is that the net Revenue in India is taken in the Revised Estimate only 21½ lakhs less than in the Budget Estimate, notwithstanding the famine. The smallness of the reduction is partly due to the improvement in Revenue and economies in Expenditure mentioned in Section II, but three items may be mentioned here as largely accounting for it. First, 49 lakhs have been transferred from Expenditure against Revenue, under the Famine Grant to Expenditure not charged to Revenue (see paragraph 73), and the entry—No. 7—under the latter

head is increased by that amount. Second, the 60 lakhs taken in the Budget Estimate under Reduction or Avoidance of Debt are omitted altogether in the Revised Estimate, there being no unappropriated balance of the Famine Grant. Thirdly, some portion of the recoveries from Her Majesty's Government in connection with the despatch of troops to South Africa, though brought to account in India as Revenue, is paid in sterling to the Secretary of State.

1900-1901. Main Features.

173. The year 1900-1901 is expected to open with a cash balance of 1323 lakhs. A balance of 13 crores being low for the month of April, we have nothing available from the cash balances to help us in meeting the disbursements of the year, whereas in 1899-1900 we reduced the cash balance by 353 lakhs. The net Revenue in India in 1900-1901 is expected to fall short of the Revised Estimate of the current year by 236 lakhs, and the excess expenditure charged to Provincial Balances (No. 6) is greater by 53 lakhs. As compared with the current year the means at our disposal are therefore less to the extent of about six crores and a half. We have to make up the deficiency partly by loans in India and partly by reduction in the Capital Expenditure on Railways and in the Secretary of State's drawings. The reduction in the Capital Expenditure in India will be about 2 crores, and the net payments of Council Bills will be less by about 70 lakhs. The charges connected with the despatch of Troops to South Africa will also be smaller next year by about a crore. These items amount to 370 lakhs. We accordingly estimate that a new loan of three crores will be required in India which, after taking into account other unimportant variations, will leave us a balance of 1360 lakhs on March 31, 1901, being about 37 lakhs more than the opening balance of the year.

Discharge of 7s. per cent portion of the 4½ per cent Loans of 1879.

174. No new Rupee loans were raised in India in 1899-1900, but the small balance of the 7*s*. per cent portion of the Transfer loan of 1879 was discharged during the year. Under the terms of this portion of the loan, the Promissory Notes could be discharged on or after the 15th of September 1893 by the payment of the equivalent in rupees of eight pounds fifteen shillings sterling for each hundred rupees of their amount—the said equivalent being calculated at the rate of exchange of the year fixed for the adjustment of financial transactions between the Indian and Imperial Governments. This rate of exchange was considerably lower than 16*d*. from 1893-94 to 1898-99, and the seven shilling per cent portion of the Transfer loan of 1879 was not therefore included in the notices of discharge of Rupee loans issued since 1892-93. The rate of exchange for the year 1899-1900 was fixed at 16*d*., and as that is the rate which will prevail in future years, and no further rise will occur, it was decided to pay off the small outstanding balance (R2,23,000) of the loan. Accordingly by Notification No. 2710, dated June 15, 1899, issued in a Gazette Extraordinary of the same date, this small remnant of the 4½ per cent loans was notified for discharge; the amount has been completely paid off during the year.

Savings Banks, etc.

175. The following table gives the details of the transactions of Savings Banks during the last few years and the estimated transactions for 1899-1900 and 1900-1901:—

YEAR.	Net additions to deposits, cash.	Interest.	Total Addition.
	R	R	R
1891-92	51,79,000	30,62,000	82,41,000
1892-93	54,89,000	33,94,000	88,83,000
1893-94	17,99,000	36,80,000	54,79,000
1894-95	—8,45,000	29,70,000	21,25,000
1895-96	24,77,000	33,85,000	58,62,000
1896-97	—58,11,000	34,66,000	—23,45,000
1897-98	—65,71,000	32,70,000	—33,01,000
1898-99	—8,84,000	32,29,000	23,45,000
1899-1900, Budget	12,65,000	33,66,000	46,31,000
1899-1900, Revised	19,000	33,23,000	33,42,000
1900-1901, Budget	—12,31,000	35,17,000	22,86,000

In the Budget Estimate of the current year, allowance was made for a small addition to the Savings Bank Deposits in 1899-1900. There was a considerable increase in the net deposits during the first six months of the year, but since October there have been heavy withdrawals partly in consequence of the famine and partly in consequence of the low price of Government Securities stimulating investments in them by withdrawals from Saving Banks. It is, therefore, now expected that there will, apart from Interest, be a net withdrawal of about seven lakhs from Savings Banks during the year. For the Budget Estimate of 1900-1901 a net withdrawal of 20 lakhs, apart from Interest, is assumed in view chiefly of the famine. The other Savings Bank accounts included in the figures in the above table do not show any noticeable variations.

Loans by Government.

176. The transactions during the year 1899-1900 under the head of Loans granted by the Government were affected by the famine. The net disbursements are now expected to amount to R76,66,000 against R24,88,000 entered in the Budget Estimate. Additional grants of over 86 lakhs were made during the year, for loans to Native States and Agriculturists, but, as usually happens, the allotments made at the beginning of the year to Provinces exempt from famine have proved too high, and the net excess issues on account of the loans are now taken at only about 52 lakhs.

In fixing the Budget Estimates of 1900-1901, the Government of India have been compelled to curtail grants of loans for ordinary Public Works undertaken by Local Bodies as much as possible in order that the famine requirements may be fully met; the total provision for loans next year is taken at R1,66,62,000, against which there will be recoveries on account of past loans amounting to R76,10,000, making the estimate of net issues during the year R90,52,000. Nearly three-fourths of the gross amount of the loans of R1,66,62,000 are required for relief of famine.

1900-1901. New Rupee Loan.

177. According to the programme now announced, it is the intention of the Government of India to raise in India three crores of rupees by new loans, but full liberty is reserved as usual to vary the programme as now announced to any extent that may be considered desirable.

March 21, 1900. J. F. FINLAY.

FORT WILLIAM,
FINANCE AND COMMERCE DEPARTMENT;
The 21st March 1900.

APPENDIX II.

Memorandum by the Hon'ble Major-General Sir Edwin Collen, K.C.I.E., C.B., on Military, Military Works, and Marine Expenditure for the years 1899-1900 and 1900-1901.

The estimates with which the Military and Marine Department of the Government of India is concerned, are the following:—

I—Indian Military Estimates.
II—Home (India) Military Estimates.
III—Military Works Estimates.
IV—Marine Estimates.

2. They will be dealt with in the order given above, but I shall preface the detailed explanation of these estimates with some general remarks on the causes which lead to increased military expenditure under the first two heads, in the coming year, and shall make a short statement in connection with the work of the military administration during the year 1899-1900.

3. Taking the Indian and the Home (India) Military estimates together, the expenditure for the year 1900-1901 is estimated to exceed the amount provided in the budget for 1899-1900 by R59,74,500 (£398,300). This figure, however, does not give the true increase to military expenditure in the coming year, as compared with the provision in the budget of the current year. To arrive at the true figure, abnormal causes of variation must be eliminated. In the first place, the large increase, amounting to R47,00,000 (£313,333), which has been provided in the budget for next year, to meet the expected rise in the cost of food supplies for men and animals, must be thrown out. Again, the savings amounting to R42,00,000 (£280,000) which will accrue owing to the absence of the troops lent for service in South Africa, and in the Mauritius, Singapur, and Ceylon, must be taken into consideration.

Eliminating both these items, the increase comes to R54,74,500 (£365,000). On the other hand, if a comparison be made between the budget of the coming year and the revised estimate of 1899-1900, it will be found (in this case taking the gross figures) that the increase is R1,84,00,000 (£1,229,200). To arrive at a correct comparison, so far as increased military expenditure is concerned, the abnormal items affecting this figure must also be eliminated. The result will be to show an increase in military expenditure in the budget of next year, as compared with the normal expenditure of the current year in accordance with the revised estimate (Home and Indian together) of R1,12,00 000 (£746,000). The increase in military expenditure is due to the provision for re-armament, increase of officers, transport, and other matters.

4. For some years past it has been evident that many improvements would be necessary, if the Army of India was to maintain its high standard of efficiency. Various proposals have been made, many of which have been thoroughly discussed, reported on by committees, and generally threshed out, while some of them have been the subject of correspondence between the Government of India and Her Majesty's Government. But except for war expenditure, or expenditure that was patent to every one as urgently necessary, such as the increase of pay to the Native Army, it has been impossible to obtain the money required for large improvements or changes, owing to the great financial difficulties caused by the depreciation of the gold value of the rupee and by famine, war, and plague. Thus in 1896, on the military side, we had to restrict expenditure in consequence of famine, and in 1897-98 we had the war expenditure to face, besides that which was entailed later on in connection with the garrison and defence of the frontier.

5. Last year the Government of India came to the conclusion that some of these projects of improvement were so pressing that they should be taken in hand, and an endeavour made to find the required funds. Notwithstanding the heavy expenditure to be met next year on account of famine, the stability of exchange and other beneficial causes have allowed a considerable extra expenditure for military purposes, although we have had to postpone many items, large and small, which might have found a place in the estimates had it not been for the visitation of famine. It was therefore decided, with the concurrence of Her Majesty's Government, to provide for

those measures which were considered to be the most important. We grouped the requirements under the following heads:—

First—Proposals necessitated by improvement in arms and ammunition;
Secondly—Proposals for improving manufacturing establishments;
Thirdly—Proposals for improvement of the organisation of the army in India;
Fourthly—Proposals for improvements of transport and commissariat arrangements.

6. In each of these groups there were several entries, and a selection had to be made. The most important measure proposed, in the *first* group or indeed in any group, is the rearmament of the native army and of the volunteer forces with the magazine rifle. The total cost of rearming the native army is calculated at R1,36,92,377. The rearmament of the volunteers will cost R15,44,085. The rearmament of the whole of the native army will take several years to complete, taking into consideration the probable funds likely to be available annually. We have provided for the rearmament of the field army this year. It must be recollected that there also will be considerable extra recurring expenditure for ammunition. The provision of apparatus for the manufacture of lyddite and for filling shells with this explosive, so that we may be independent of England in this respect, the rearmament of mountain batteries with the new 10-pounder B.-L. gun, R90,000, and the provision of mountings for Maxim guns to be made up in India, have all been included. After prolonged trials I hope that a satisfactory mounting for Maxim guns has been obtained for use with pack transport.

7. The *second* group includes proposals, alluded to by me in previous years, for improvement in the manufacturing establishments. The first is the institution of a cordite factory and the second is the establishment of a central gun-carriage factory. We have received the approval of the Secretary of State for the cordite factory, a suitable site has been selected, and we have provided in the Military Works estimates for a portion of the cost of the buildings. When this factory is in working order it will give us a saving of about R4,00,000 a year in comparison with the trade price at home. Only preliminary arrangements have been made in respect to the central gun-carriage factory.

8. In the *third* group, embracing matters connected with the organisation of the army, one of the first and most important is the addition of officers to the Native Army. This also I have alluded to in past years. A step has been made, and we have provided in the estimates for an increase of 92 officers. This number is made up by the addition of one officer to each battalion of native infantry in the Punjab and Bengal Commands, and a further increase of 28 officers in order to institute a general reform, *viz.*, the discontinuance of the present practice of appointing fresh officers to regiments in the place of absentees. In future two officers will be added permanently to the establishment of all native cavalry and infantry regiments, to provide for absences on furlough, etc. One of the advantages of this plan is that regimental establishments will be more permanent than heretofore. The cost of this addition of 92 officers will be R4,00,000 in the coming year.

9. The next proposal in this group is the reorganisation of horse, field, and mountain batteries in India, and the conversion of the existing heavy batteries into howitzer batteries. After the experience gained in 1897 we were confirmed in the opinion that the existing method of mobilising artillery in this country was defective. The question was considered by a committee, and they submitted proposals with the object of increasing the efficiency of batteries and ammunition columns, and of rendering them capable of being more rapidly mobilised. The proposals include the raising of another native mountain battery. The re-organisation of the heavy field batteries and converting them from four batteries of four guns each, drawn by elephants and bullocks, to two howitzer batteries of six guns each, we discussed last year, and it was agreed that, instead of four of these batteries of four pieces each, it would be better to have two more powerful howitzer batteries with horses for draught, and an additional mountain battery. Events have shewn that these heavy batteries should be more mobile and have a more powerful armament. The net results of these proposals would, if completely carried out, be an initial expenditure of about 12½ lakhs and an annual expenditure of 7½ lakhs, but for next year we have taken in the estimates a sum of R10,58,640.

10. The fourth group includes the various proposals which we have had under consideration for improving matters connected with the Commissiariat-Transport Department. This is also a subject to which I have alluded on previous occasions. With regard to the permanent re-organisation of the transport, all that can be said is that it is one involving large expenditure and great consideration. Connected with that are proposals for the increase of the Supply Branch of the Commissariat

Transport Department, for the appointment of probationers, for the improvement of the Indian ambulance system, and the creation of a reserve of transport drivers. In this group also is the purchase of 2,000 mules in addition to the present complement. We have entered a certain sum provisionally in the estimates to meet charges on account of these measures. I may also mention that a system of time-promotion in the Commissariat-Transport Department has been adopted, which, although involving some increase of expenditure, will we trust prove more satisfactory than the present system.

11. In addition to the measures which can be placed in these groups we have provided for a certain amount of military light railway, and also for experiments with war balloons. Some of the foregoing items are only provisionally provided for, subject to the sanction of the Secretary of State to the detailed proposals. The total sum provided in the estimates of next year for all these measures comes to about R90,00,000.

12. Although we have not yet established a new permanent transport organisation, a great deal has been done in the past year to improve our transport according to our existing means. A system of collection of transport has been prepared, the numbers of animals to be produced from the various districts have been assigned, and in conjunction with the civil authorities, an endeavour has been made to arrive at an improved knowledge of the transport districts, and to provide for a better method of collection. We have also arranged for the organisation of our existing transport into self-contained units, *i.e.*, into corps and cadres, the latter of which can be filled up when an emergency occurs, and we have laid down an organisation for the numbers of transport animals which have to be purchased or hired on every considerable expedition. The concessions to be granted to owners of hired transport and hired attendants have been defined and published. This may sound an easy matter, but it involves the consideration of an immense number of details. We have also been arranging for special grants of land to camel owners on the Chenab canal so as to obtain, we hope, a large number of camels when required. Further, the Secretary of State's sanction has been obtained to the establishment of a reserve of drivers and artificers. We have provided for the reorganisation of the siege-train bullocks and for the redistribution of bullock transport in India. The equipment required to complete transport corps, supply trains, etc., has been detailed, and is provided for partly this year and partly in next year's estimates. The question of our reserves of mule saddles, gear, and equipment generally, has received consideration, and it is satisfactory to know that we have sufficient, with a large amount of manufacturing power behind.

13. During the financial year which is now coming to a close, India has been afflicted by famine and plague, but we have not had to send any expeditions into the field, with the exception of the small Mishmi expedition in the north-east of Assam. But famine and plague have both, although not in the same degree, affected the army. The rise in prices has increased our estimates and of course affects the Native Army; while with regard to plague we have been able to supply a large number of officers and men for work and it has affected military movements. Last September we despatched a small force to South Africa, and had the satisfaction of receiving the acknowledgments of Her Majesty's Government for the promptitude with which the force was equipped and sent off. Up to the beginning of this month we had sent over 8,000 officers and men, over 3,000 natives for non-combatant services, 6,700 horses, about 1,600 mules and ponies, and the necessary field hospitals and other equipments.

14. We have been able to assist the War Office in other ways during the South African campaign, and the possession of reserves and manufacturing power for army equipments have enabled us to meet their requirements. The army clothing department have turned out or have under supply 100,000 warm coats, 40,000 havresacks, 5,000 pairs jack spurs, 40,000 suits of khaki, and 45,000 helmets; the army boot factory at Cawnpore 70,000 pairs of boots; the harness and saddlery factory at Cawnpore made up and issued 2,650 sets of mounted infantry saddlery, of which 1,800 were completed in a fortnight and the remaining 1,050 at intervals of a few days, and we have also sent a large quantity of veterinary stores. The native cavalry of India, the Imperial service troops, and the splendid liberality of a number of Native States have enabled us to send 2,450 horses for mounted infantry work; the commissariat-transport department have collected and despatched one transport corps composed of 460 mule drivers and artificers, and 2,000 equipped bhistis. I should also mention the liberality of Khan Bahadur Dhanjibhoy of Rawal Pindi, who has presented a completely fitted train of twenty-five ambulance tongas; of Rai Bahadur Boota Singh, also of Rawal Pindi, who has given a number of tents for hospital purposes; and of several other Indian firms, who have come forward with gifts of various descriptions for the troops in South Africa.

15. On the frontier considerable saving has been effected by the withdrawal of a battalion of native infantry from Chitral, and it is also contemplated to withdraw

troops from certain advanced posts on the frontier as soon as the militia or police corps which are to be located at these posts have been organized. The troops have been withdrawn from Landi Kotal, and that post has been handed over to the Khyber Rifles. By the withdrawal of troops from other frontier outposts and in Burma, considerable economy will be effected; defensive works on the frontier have been steadily proceeded with, and we hope they will be completed in the coming financial year. An important redistribution of commands—long-needed, but delayed from various causes—which will greatly contribute to the efficiency of the army, will be effected on the North-West Frontier, will have effect from the 1st April, and certain reductions may be made in commands and staff in Burma. As regards the railways on the frontier, the Nowshera-Dargai line has been steadily progressing, and surveys made in other directions.

16. In what may be called our military domestic affairs, a good deal has been done. Continued attention has been paid to the all-important question of improving the health of the British troops in India and of checking the terrible ravages of enteric fever. With this object constant investigations have been conducted by Major Davies, Royal Army Medical Corps, and other special sanitary officers. The sanitation and water-supply of a number of cantonments have been carefully examined, and remedial measures are being pushed forward; further experiments have been made in the disposal of sewage, an officer has been specially deputed to study the question, drainage works have been extended, and inoculation for protection against typhoid is now allowed. In the same connection we are pursuing the policy of establishing dairies to supply the troops with milk and butter at places where no good supply by private enterprise exists; dairies have been opened at Lucknow, Cawnpore, Agra, and Belgaum, and others are contemplated. We are endeavouring to ensure continuous efficient management of these and of grass farms, by specially training officers and non-commissioned officers at the Allahabad farm, under the personal supervision of Captain Meagher, now Special Forage Officer for Bengal, a development of the training classes for non-commissioned officers and men which I mentioned last year. I shall not see the completion of this work, but our experimental combination of grass and dairy farms has been so far very successful, and I believe that if the work is persevered in, the whole of the forage for the mounted branches will be provided from these farms, and a large financial result will eventually be attained, besides advantages to the army in the supply of milk, dairy farm produce, and the fattening of slaughter-cattle.

17. I regret to say that the remount department has during the last year been overtaken by a serious catastrophe in the form of an outbreak of virulent glanders at the country-bred depôt at Hapur. The disease was imported into the depôt last spring. It has resulted in the loss of a number of valuable horses, and the supply of country-bred remounts to the army has necessarily been stopped through fear of spreading contagion. This is particularly unfortunate at the moment when the requirements of regiments sent to South Africa have occasioned an unusually large demand for remounts. This outbreak of glanders is not confined to our depôts. The disease has been virulent in several parts of Northern India, and the country-bred horse market has been injured by this and by the existing famine. We are making large purchases of Australian horses to replace those sent to South Africa. The supply of mules has fallen short of our requirements and we have been obliged to again resort to the costly expedient of purchasing outside India. The development of the mule supply in this country is receiving earnest attention.

18. The transfer of the direct control of the ordnance factories to the Director General of Ordnance has, I have reason to believe, already resulted in considerable saving owing to the facility afforded for regulating the supply of stores to meet the actual requirements of the service generally, for controlling demands for war material, and for comparing rates paid for labour and material in the different manufacturing establishments. The expansion of the manufacturing power of the ordnance factories has been and will continue to be a source of saving to Indian revenues. The factories in this country have been equipped with plant and skilled labour for the manufacture of all kinds of small arms, ammunition, fuzes and tubes, and almost all descriptions of projectiles likely to be required in India, and in addition are in a position to meet the requirements of steel in other departments. The gunpowder factory at Kirkee has been closed as we have the Ishapore Factory for the manufacture of black powder and large quantities of reserves. The question of our reserves of war material continues every year to engage attention, but I am satisfied that they are generally ample. We have been able to supply the War Office with tents, fuzes and tubes, ordnance stores of different kinds, signalling apparatus, etc.

19. Special commissioners have been employed in the investigation of the existing rules relating to compensation for dearness of food and forage, and other cognate matters, and we expect considerable economy to result from their labours. A committee has been examining the question of the supply of medical stores and equipments. Laborious work has been done in the direction of reducing returns and correspondence and in the curtailment of reports, although I cannot announce at this moment the actual results which will follow. Among miscellaneous items, I may mention that we have taken steps to improve the efficiency of coast defence lascars; native troops will be trained regimentally in army signalling; increased rates of wound pensions have been allowed to non-commissioned officers and men of the native army; increased rates of injury and family pensions or gratuities, for followers, to those who receive these by special award have been given; and the rates of the pensions of widows of warrant officers will be raised.

I shall now proceed to explain the details of the various estimates which I have to present. But before doing so, I must refer, however briefly, to the calamity which has overtaken the Government of India and the whole Army of India, by the death of the Commander-in-Chief, His Excellency General Sir William Lockhart. This is not the place to record his great services and distinguished career, but it is, I venture to think, eminently the occasion on which a colleague and friend may allude to the sorrow which is felt by all, and to the loss the Military Administration of this country has sustained, by the death of one whose every thought was for the efficiency and well-being of the Army.

I.—Indian Military Estimates.

Revised Estimates, 1899-1900.

Comparison—
Revised for 1899-1900
and
Budget for 1899-1900.

20. The revised Indian Military Estimates for 1899-1900, compared with the Budget for the year, show a net saving of R63,33,000 caused by an increase in receipts of R11,28,000 and a decrease in expenditure of R52,05,000.

21. The increase in receipts is chiefly due to credits on account of the value of animals and stores sent to South Africa, the cost of which is debitable to the Imperial Government.

22. The more important causes which have led to the decrease in expenditure are as under:—

(*a*) There is a decrease of R39,09,000 due to the despatch of the force to South Africa, India being relieved of all expenditure in connection therewith. This includes the saving on account of the two Madras Infantry battalions sent to Ceylon and Singapore.

(*b*) The actual strength of the Kohat-Kurram Force has been less than estimated for; and the Khyber Force was withdrawn earlier than anticipated. On the other hand, expenditure unprovided for has been incurred on account of the Mishmi expedition. The total decrease is R6,42,000.

(*c*) There is also a decrease of R3,89,000 on account of exchange compensation allowance, owing to exchange having been favourable during the year.

(*d*) Again, savings have accrued owing to the despatch of the 27th Madras Infantry to Mauritius, and to the transfer of the administration of the Somali Coast Protectorate to Her Majesty's Government. The employment of officers on plague duty has also the effect of relieving these estimates.

(*e*) Changes made in the sanctioned programme of reliefs, owing to the war in South Africa, scarcity and plague, have resulted in a saving of R2,20,000.

(*f*) In addition to the foregoing, the following are the chief causes which have contributed towards reducing expenditure:—

(*i*) Under Grant 3 (*Regimental Pay, Allowances and Charges*) there are savings to the extent of R4,00,000 owing to ordinary fluctuation.

(*ii*) Under Grant 4 (*Commissariat Establishments, Supplies and Services*) savings aggregating R2,60,000 are due to smaller purchases of malt-liquor owing to decreased consumption; and there is a considerable saving in connection with Commissariat-Transport.

(*iii*) Under Grant 5 (*Remount and Veterinary Establishments, Supplies and Services*) there are savings amounting to R2,80,000 due to the absence of officers on furlough and to smaller native establishments; to smaller purchases of young stock; and to a

more favourable rate of exchange for converting the fixed price of Australian horses bought.

(*iv*) Under Grant 9 (*Medical Establishments, Supplies and Services*) the savings aggregate R4,13,000 due to various causes.

23. On the other hand, there have been increases in expenditure, the more important of which are the following:—

(*a*) High prices of food supplies for men and animals owing to scarcity (R10,00,000).

(*b*) Larger payments of messing allowance to British soldiers in consequence of Army Order No. 78 of 1899 having been extended to India under which soldiers enlisted before 1st April 1898, who have not yet elected to draw messing allowance, can do so at any time; to arrival in India of drafts who were in receipt of the allowance; and to arrears, with effect from 1st June 1898, to men electing the new rules on or before 31st March 1899 (R9,85,000).

(*c*) Cost of chartering two vessels as transports to convey details to England (R4,10,000).

(*d*) Cost of equipment required to complete transport corps, supply trains, etc. (R1,22,000).

Estimates, 1900-1901.

Comparison—Budget for 1899-1900 and Estimate for 1900-1901.

24. The estimates for 1900-1901, in the net, amount to R16,33,55,000, or R23,98,000 more than the budget for 1899-1900. This is due to an increase in receipts of R17,45,000 and an increase in expenditure of R41,43,000.

25. In comparing the estimates of next year with the budget for the current year, it will be found that the increase in *receipts* is mainly due to credit having been taken for the value of horses forming the peace complement of units that have been despatched to South Africa, debits on account of which will be raised against the Imperial Government.

26. The more important causes of the increase in *expenditure* are the following:—

(*a*) The rise in prices of food supplies for men and animals; an increase of R47,30,000 is anticipated.

(*b*) The proposed purchase of additional horses to replace those sent to South Africa, R22,00,000.

(*c*) The purchase and maintenance of 2,000 additional mules, R9,10,000.

(*d*) For the improvement of commissariat-transport arrangements the sum of R9,01,000 has been provided.

(*e*) Messing allowance charges are likely to exceed the current year's provision to the extent of R6,63,000 as a larger number of British soldiers are now drawing the allowance, and those enlisted before the 1st April 1898 can elect to draw it at any time.

(*f*) A provision of R5,64,000 is made for improvements in the organisation of the artillery, and of R4,94,000 for the conversion of heavy into howitzer batteries.

(*g*) The sanctioned addition of 92 officers to the Staff Corps accounts for an increase of R4,00,000.

(*h*) Rupees 3,81,000 is provided for the ·303-inch ammunition to be supplied to the Native army as a part of the scheme of re-armament.

27. Among other causes of increased expenditure the following may be mentioned:—

The alteration in the establishments of Native army reservists in the four commands (R1,39,000); the maintenance of transport animals surplus to the ordinary complement to provide for garrison at present retained on the frontier (R2,43,000); the new scheme for promotion of officers of the Commissariat-Transport Department (R1,00,000); the annual reliefs next year are anticipated to cause additional expenditure to the extent of R2,56,000; the purchase of mules from abroad for ordinary requirements (R1,70,000); the equipment required to complete the transport corps, etc. (R1,27,000); R99,000 is provided for the formation of a reserve of mule-drivers and artificers; larger provision (R1,87,000) under the grant for Ordnance, due chiefly to increased purchase of hides for the Harness and Saddlery Factory, Cawnpore.

28. The foregoing increases in expenditure will, however, be partly counterbalanced by certain decreases, the more important of which are the following:—

(*a*) In consequence of the anticipated absence for half the financial year of British troops on service in South Africa, R38,50,000.

(*b*) Smaller provision to the extent of R29,11,000 in connection with military operations and special services.

(*c*) Saving in the Indian estimates in consequence of three Madras infantry regiments sent to Mauritius, Ceylon, and Singapore, the full cost of which is borne by Her Majesty's Government, R6,40,000.

(*d*) Owing to a more favourable rate of exchange having been adopted, charges on account of exchange compensation allowance next year are expected to be smaller, R3,35,000.

(*e*) R2,59,000 more than last year has been deducted from the Indian estimate in adjustment of excess provision in the home estimates.

29. A statement is appended showing the net amounts under each of the grants for effective and non-effective services, and for military operations:—

	STRENGTH.	
	1900-1901.	1899-1900.
British Army	63,384*	71,495
Native Army	137,871†	142,237‡
Total .	201,255	214,732

* Exclusive of 9,108 men absent in South Africa and left at depôts in India.

† Exclusive of 2,785 men absent in South Africa, Ceylon and Singapore, 1,570 men stationed at Mauritius, and 192 men on the Somali coast.

‡ Exclusive of 784 men stationed at Mauritius.

Grants.	—	NET ESTIMATES. 1900-1901.	NET ESTIMATES. 1899-1900.	DIFFERENCE ON NET ESTIMATES. Increase.	DIFFERENCE ON NET ESTIMATES. Decrease.	REMARKS.

	Military Operations Rs.	36,000	3,89,040	...	3,53,040	
	Grand Total Rs.	16,33,55,000	16,09,57,000	80,89,740	56,91,740	
			Net Increase .	Rs. 23,98,000		

* The bulk of subscriptions of officers to Indian Military Service Family Pensions is received in India, while most of the expenditure is incurred at home. The receipts in India, therefore, exceed the expenditure in India, and hence, as the figures in the above statement are *net*, there must be a minus entry.

II.—Home (India) Military Estimates.

Revised Estimates, 1899-1900.

Comparison—Revised for 1899-1900 and Budget for 1899-1900.

30. The second of the estimates with which the Military Department is concerned is the Home estimate for army effective and non-effective charges. The Home Budget estimates for 1899-1900 provided for a gross expenditure of £4,493,100, while in the Revised Estimates provision has been made to the extent of £4,101,700 or £391,400 less than the Budget Estimate.

31. This saving of £391,400 in the Revised, as compared with the Budget, Estimate for 1899-1900, is chiefly due to less charges for furlough allowances of officers of the Indian Service, and for furlough allowances and pay, during the voyage, of British forces serving in India; to smaller charges anticipated under "Indian Troop Service" owing to the curtailment of Indian reliefs in consequence of the despatch of troops to South Africa; to decrease in the payments for stores; and to less charges for pay and pensions of non-effective and retired officers of the Indian Service. These decreases are, however, partly counterbalanced by arrear payments in respect of the year 1898-99 to the War Office on account of the British Forces serving in India; by £16,200 having been included in the Revised Estimate on account of the purchase of mules; and by increased charges for the pay and expenses of military officers studying the Russian language.

32. The net figures of the Revised Estimate show a saving of £395,000 on those of the Budget Estimate for 1899-1900, due to a decrease in expenditure of £391,400 as explained above, and an increase in receipts of £3,600.

Estimates, 1900-1901.

Comparison—Budget for 1899-1900 and Estimate for 1900-1901.

33. The receipts and expenditure for 1900-1901 are as follows :—

	Receipts.	Expenditure.	Net expenditure.
	£	£	£
Effective	25,000	2,280,400	2,255,400
Non-effective	18,500	2,427,300	2,408,800
Total .	43,500	4,707,700	4,664,200

34. Compared with the budget for 1899-1900, smaller receipts to the extent of £23,900 are anticipated in 1900-1901. The total gross expenditure for 1900-1901 is higher by £214,600 than the amount provided in the budget for the preceding year. This amount is more than accounted for by the increased provision for ordnance stores. The increase in expenditure is partly counterbalanced by smaller provision on account of pay and pensions of non-effective and retired officers of the Indian Service, as the payments on this account appeared to be decreasing, and the budget for 1899-1900 was too high.

35. The gross charges on account of effective services include payments to the War Office in respect of the British forces serving in India, amounting, as estimated in the coming year, to £700,000, as against £730,000 in the estimates for 1899-1900, owing to an expected refund next year in consequence of a portion of these forces being in South Africa at present. The other items included in the gross effective charges are furlough allowances and pay during the voyage of British forces serving in India (£108,000); furlough allowances of officers of the Indian Service (£230,000); Indian Troop Service (£250,000 net); passage of officers and troops otherwise than in transports (£19,000); miscellaneous (£22,000); and stores for India (£951,400).

36. The gross charges on account of non-effective services are made up of the retired pay, etc., of the British forces for service in India (£569,000); pay of the non-effective Colonels of Royal Artillery (£24,300); pay and pensions of non-effective and retired officers of the Indian Service (£1,710,000); miscellaneous pensions, etc. (£90,000), and the Indian Military Service Family Pensions (£34,000).

37. The net expenditure for 1900-1901 is more by £238,500 than that for the preceding year; and, as explained above, this is due to a decrease of £23,900 in receipts and an increase of £214,600 in gross expenditure.

38. The figures of actual expenditure in 1898-99, of the *budget* and *revised estimates* for 1899-1900, and of the *estimate* for 1900-1901, are given below in detail for convenience of comparison:—

	Accounts, 1898-99.	Budget Estimate, 1899-1900.	Revised Estimate, 1899-1900.	Budget Estimate, 1900-1901.
EFFECTIVE.	£	£	£	£
Payments to War Office in respect of British Forces serving in India	764,400	730,000	739,400	700,000
Furlough Allowances and Pay during voyage of British Forces serving in India	107,875	108,000	104,000	108,000
Furlough Allowances of officers of the Indian Service	203,833	230,000	220,000	230,000
Indian Troop Service	276,556	260,600	135,800	250,000
Passage of officers and troops otherwise than in transports	10,997	19,000	17,000	19,000

III.—Military Works Estimates.

39. Excluding English expenditure and exchange, the budget estimate for 1899-1900 amounted to R1,29,96,000; the revised estimate of expenditure amounted to R1,23,26,000. There has, therefore, been less expenditure in India of R6,70,000 which is due to the transfer of funds to England to meet additional expenditure on English stores, and the transfer of about R80,000 to the military estimates. The lapses on grants for works will be inconsiderable.

40. The budget estimate for 1900-1901, excluding English expenditure and exchange, amounts to R1,15,09,000, or R14,87,000 less than that of 1899-1900. The difference is due to no special grant being allowed for defence works on the North-West Frontier, as it was decided, owing to the great calls for famine expenditure, to reduce the ordinary Military Works grant so as to provide for any expenditure that may be necessary for the completion of frontier works.

41. The heads of the Military Works Estimate are in round figures—

	R
For original works, including those in progress and those to be commenced	43,98,400
" repairs	33,21,300
" establishment and tools and plant	29,01,700
" Barrack Department establishment, supplies and tools and plant	7,71,600

42. Provision amounting to R4,47,000 is made for expenditure on fourteen water-supply projects, R1,95,700 for coast and inland fortifications, R10,00,000 for works on the North-West Frontier, and R3,00,000 for renewals. The remaining provision is for hospitals, barracks, and drainage works, and for Ordnance, Commissariat, Remount, and Marine Department requirements. Excluding renewals, provision is

N

made for 91 new works, of which 52 are in progress and 39 are to be commenced. A sum of R5,33,500 is provided for Minor Works costing less than R2,500 each.

43. The new organisation for the performance of Military Works Services was brought into effect on the 1st October 1899.

IV.—Marine Estimates.

44. During the latter half of the year 44 hired transports have been chartered and fitted up by the Royal Indian Marine on behalf of Her Majesty's Government for the conveyance to South Africa of 8,260 British officers, non-commissioned officers and men, 3,373 natives, 8,318 horses, mules, and ponies, besides field and other guns, ambulance tongas, etc. The arrangements, which imposed a heavy strain on the Dockyard resources of Bombay and Calcutta, were carried through with great promptitude and rendered feasible the expeditious despatch of the Indian contingent. The Government of India have expressed their entire satisfaction with the arrangements made and their acknowledgment of the services rendered by the Royal Indian Marine on this occasion under the supervision of Captain Goodridge, the Director, and of the Deputy Director at Calcutta, Captain Gwyn, whose extended tenure of the post has just expired.

45. A tender of £198,000 has been accepted for the construction in England of a new vessel, the *Hardinge*, to replace the *Warren Hastings* which was wrecked in 1897. It is expected that the new vessel will be delivered in India about January 1901.

46. The vessels of the Royal Indian Marine have been employed on the usual trooping service, but on account of the war in South Africa the Indian troop service transports were withdrawn from the Indian relief service after performing three outward and three homeward voyages. It has therefore been necessary to make special arrangements for sending home invalids, time-expired men, women, and children.

Revised Estimates, 1899-1900.

47. The net total of the Budget Estimate of the Royal Indian Marine for 1899-1900 was R13,70,000, the Revised Estimate stands at R9,22,000, showing a decrease of R4,48,000. This decrease is caused by excess receipts amounting to R2,92,000, and a reduction in expenditure to the extent of R1,56,000.

Comparison—Revised for 1899-1900 and Budget for 1899-1900.

48. The excess under receipts is chiefly due to large recoveries from the Home Government in connection with the employment of Royal Indian Marine vessels on Imperial service.

49. The decrease in expenditure is chiefly due to larger deductions on account of stores supplied, and work done in connection with the fitting of transports for South Africa, and to reduced expenditure on repairs and on coal for Her Majesty's ships of war in Indian seas, and on victualling establishments employed afloat.

50. The increase in expenditure is principally due to the payment of heavy arrears of exchange compensation allowance, and other matters.

51. Taking the increase against the decrease, there is a net decrease of R1,56,000, and adding these figures to the increased receipts, R2,92,000, the result is a decrease of R4,48,000 in the Revised as compared with the Budget Estimate.

Estimates, 1900-1901.

52. The net total of the Marine Estimate for 1900-1901 is R14,20,000 against R13,70,000, the total of the budget for 1899-1900, showing an increase of R50,000. This increase is caused by a decrease in receipts, amounting to R32,000, chiefly due to smaller anticipated recoveries in connection with the employment of Royal Indian Marine vessels on Imperial service, and by increased expenditure to the extent of R18,000.

Comparison—Budget for 1899-1900 and Estimate for 1900-1901.

CALCUTTA;
The 21st March 1900.

EDWIN H. H. COLLEN, *Major-General.*

APPENDIX III.

Memorandum by the Honourable Sir Arthur Trevor, K.C.S.I.

It has been customary since the establishment, under the Viceroyalty of Lord Elgin, of what is known as the Annual Railway Conference at Simla, for the Public Works Member of Council to append to the Financial statement for the year a memorandum designed to place the public in possession of the results of the Simla Conference so far as they appeared to be of public interest.

2. At the Conference held in August last, however, at which His Excellency Lord Curzon presided, it was determined to make certain changes, the object of which, stated shortly, was to remedy the somewhat formal and bureaucratic character which the deliberations of the Conference had assumed without sacrificing the assistance which a comprehensive annual survey of railway projects was calculated to afford in securing steady and fairly distributed progress in railway construction and avoidance of a policy of drift or caprice.

3. These changes were:—

I.—That for a construction programme limited to triennial periods and starting afresh at the end of each such period should be substituted a continuous programme, subject to annual revision, so as always to include the current and next two following years, and thus to be always two years ahead, the amount to be entered for the third year being arrived at in consultation with the Finance Department.

II.—That a Travelling Commission should be constituted as a tentative measure to conduct public enquiries at places where problems in which local interests are acutely involved may call for decision.

III.—That a catalogue of Railway projects, with summaries of their histories and information collected in connection with them, and of the views of the Government of India as to the manner in which they should be dealt with, should be prepared, kept up to date and published annually for the information of persons interested.

4. With the two first of these changes we are not here immediately concerned. The effect given to the last, in the issue of a compilation, entitled "Histories of Railway Projects", brought up to the date of the last Conference and now in the hands of the public, has superseded the necessity for a statement of the nature which has hitherto been customary. This compilation furnishes information in regard to all projects which have not been either (1) finally rejected or (2) included in the Railway programme for the years 1900-1901 to 1902-1903, and it is only in regard to the details of the Railway programme, and the modifications it has undergone, that the general information given under the appropriate heads of the General Financial statement still needs to be supplemented.

5. The programme in its latest shape is given in Statement A appended to this memorandum, and shows the demands for which place has been found in the three years ending 1902-1903 on the basis of an estimated expenditure of R7,30,84,000 in 1900-1901 and of a minimum of 6½ crores in each of the next two years.

There are three projects noted on the margin which were included in the original programme, but which it has since been found necessary to strike out under pressure of the unprecedented demands on the Government balances arising from the famine, and consequent difficulties attending the provision of ways and means for anything more than the obligatory needs of open lines and works in progress.

Godra-Baroda Chord.
Dhulia-Amalner.
Condia-Jabalpur.

A fourth line, the Sakri-Jainagar branch of the Tirhoot State railway, has been omitted for the same reason. But proposals have been made for the financing of this line by the Bengal and North-Western Railway Board, which will, it is hoped, admit of its being constructed with no great delay independently of the programme.

If the Financial position improves, it may be found possible to supplement the minimum allotments of 6½ crores on which the programme for 1901-1902 and 1902-1903 has been provisionally based, and to apply the additional funds thus provided either to the acceleration of progress on the lines under construction or to the restoration of some or all of the new projects which have been struck out to a place in the programme, and to their commencement during 1902-1903, if not earlier.

6. The usual summary of Railway Progress will be found this year in Statement B, and in Statement C is given a list of railways on which earthwork has been commenced for Famine Relief purposes.

7. The capital expenditure on railways falling within the categories now included in the programme for the ten years from 1891-92 to 1900-1901 is shown below:—

Lakhs of rupees.

	1891-92.	1892-93.	1893-94.	1894-95.	1895-96.	1896-97.	1897-98.	1898-99.	Revised Estimate, 1899-1900	Budget Estimate, 1900-1901.
Capital expenditure on open lines.	185	108	120	184	167	240	179	221	359	266
On construction of new lines .	262	472	392	390	421	654	691	661	569	464
TOTAL .	447	580	512	574	588	894	870	882	928	730
Miles opened or to be opened during the year.	456	390	346	346	575	657	186	1,059	468	673

8. The earnings of railways during the current official year have been exceptionally favourable, and it is anticipated that the total earnings will exceed the estimate framed at the beginning of the year by about R1,24,00,000. This improvement is the result of a large traffic in grain owing to the famine, of a substantial addition to the open mileage, of the movement of troops in connection with the war in South Africa, and of a brisk coal trade. Of the railways which contribute to the increase, the East Indian Railway stands first with the large increase of R60,00,000, while the Rajputana-Malwa, Bengal-Nagpur, Oudh and Rohilkhand, Indian Midland and Bombay, Baroda and Central India railways shew increases of R40,00,000, R16,00,000, R12,00,000, R11,50,000 and R9,00,000, respectively, and certain other lines small increases which aggregate about R26,50,000. This improvement has been reduced to the extent of about R51,50,000, owing principally to a decline of R29,50,000 in the earnings of the Great Indian Peninsula railway, which is attributed to the failure of the cotton and grain crops, and of R13,00,000 on the North Western railway owing to a falling off in military traffic and a smaller export of grain to England. It is anticipated that the earnings this year are likely to exceed those of last year by nearly two crores of rupees.

9. There is one other point to which it may be useful to draw attention. The loss on the direct Railway Account, that is the amount by which the net earnings fall short of the interest charges which have to be met, including strategic railways and loss arising from the special exchange provisions of the older Railway Contracts, has been reduced from 2 crores 66 lakhs in 1896-97 to 1 crore 43 lakhs in 1897-98, 93 lakhs in 1898-99 and 74 lakhs, according to the Budget, and 1¼ lakhs according to the revised estimate for the year now closing. The improvement in the Revised as compared with the Budget figures for the year is, of course, due to some extent to causes which are abnormal, and it is probable that some of the ground which has apparently been gained may be lost in the coming year, the estimates for which show a deficit of nearly 73 lakhs. But the figures given show a diminishing tendency in the yearly deficit, which is at least encouraging.

CALCUTTA;
The 21st March 1900.

A. C. TREVOR.

STATEMENT A.

STATEMENT

OF

FORECAST OF CAPITAL EXPENDITURE ON RAILWAYS, 1900-1901 TO 1902-1903,

INCLUDING ALL OPEN LINES,

All lines under, or accepted for immediate construction, and branch lines under firm guarantee.

Branch lines under Rebate terms are excluded.

STATEMENT B.

Memorandum on the construction of railways.

1. At the commencement of 1899-1900, *i.e.*, on the 1st April 1899, the total length of railways open for traffic was 22,499·05 miles, made up as follows:—

		Miles.	Miles.
(i)	East Indian	1,712·25	
	Bengal Central (*a*)	125·01	
	Bengal-Nágpur	1,184·41	
	Indian Midland	795·56	
	Bhopal-Itarsi (*British section*)	(*b*) 13·11	4,190·83
	Godhra-Rutlam-Nágdá	(*c*) 141·14	
	Wardha Coal	(*d*) 44·88	
	Dhond-Manmád	(*d*) 145·44	
	Bezwada extension (East Coast State)	(*e*) 20·58	
	Madras-Ennúr section (Bezwada-Madras)	(*f*) 8·45	
(ii)	North Western	(*g*) 2,817·64	
	Hyderabad-Shadipalli	(*h*) 58·91	
	Oudh and Rohilkhand	950·76	4,893·54
	Eastern Bengal	262·98	
	Calcutta Port Commissioners'	8·53	
	East Coast, including Bezwada-Madras	(*i*) 794·72	
(iii)	Great Indian Peninsula	1,288·00	
	Bombay, Baroda and Central India	460·90	2,588·18
	Madras	839·23	
(iv)	Delhi-Umballa-Kalka	(*f*) 162·23	
	Tarkessur	(*j*) 22·23	643·55
	Southern Punjab (*Delhi-Samásata*)	(*h*) 423·18	
	Tápti Valley	(*c*) 35·91	
(v)	Khamgaon	(*d*) 7·55	
	Amraoti	(*d*) 5·44	
	Bina-Goona	(*b*) 71·74	
	Bhopal-Ujjain	(*b*) 113·52	
	Bhopal-Itarsi (*Native state section*)	(*b*) 44·28	630·33
	The Nizam's Guaranteed State	(*k*) 330·13	
	Nagdá-Ujjain	(*c*) 34·32	
	The Gaekwar's Petlád	(*c*) 13·35	
	Kolar Gold-fields	(*f*) 10·00	
(vi)	Rajpurá-Bhátinda	(*h*) 107·94	123·86
	Jammu and Kashmir (*Native state section*)	(*h*) 15·92	
(vii)	Bengal and North-Western—		
	Tirhoot section	341·80	
	Company's section (*l*)	743·18	
	Lucknow-Bareilly section (Rohilkund and Kumaon)	231·17	
	Rajputana-Malwa	(*c*) 1,673·93	
	Pálanpur-Deesa	(*c*) 17·28	
	Southern Mahratta	1,042·04	6,887·30
	Guntakal-Mysore frontier	(*m*) 119·50	
	Mysore section (Southern Mahratta)	296·00	
	South Indian	1,017·88	
	Máyavaram-Mutupet	(*n*) 53·99	
	Assam-Bengal	414·45	
	Burma	936·08	
(viii)	Eastern Bengal—		
	Northern and Behar sections (*including the Kaunia-Dharlla, 2' 6" gauge, branch*)	478·47	
	Dacca section	85·92	643·99
	Cawnpore-Burhwal (*Metre gauge link*)	(*t*) 79·60	
(ix)	Deoghur	4·79	
	Rohilkund and Kumaon (*Company's section*)	53·92	
	Bengal Dooars	36·40	
	Dibru-Sadiya	77·50	
	Ledo and Tikak-Margherita Colliery	(*o*) 7·50	285·86
	Ahmedabad-Parántij	(*c*) 54·59	
	Mymensingh-Jamalpur-Jagannathganj	(*s*) 33·07	
	Segowlie-Raxaul	(*u*) 18·09	
(x)	The Gaekwar's Mehsana	(*c*) 92·63	
	Kolhapur	(*m*) 29·07	188·30
	Yesvantpur-Mysore frontier	(*m*) 51·35	
	Mysore-Nanjangúd	(*m*) 15·25	
(xi)	Jodhpur-Bikaner	406·00	
	Udaipur-Chitor	60·86	
	Bhávnagar-Gondal-Junágad-Porbandar	(*p*) 333·84	922·04
	Jetalsar-Rájkot	(*q*) 46·23	
	Jámnagar	(*q*) & (*r*) 54·28	
	Dhrángadhrá	(*q*) 20·83	
(xii)	West of India Portuguese	51·00	
	Pondicherry	(*n*) 7·80	73·25
	Karaikkal-Peralam	(*n*) 14·45	
(xiii)	Cherra-Companyganj (2' 6")	8·00	36·50
	Jornát (2' 0")	28·50	
(xiv)	Darjeeling-Himalayan (2' 0")	51·00	
	Bársi Light (2' 6")	31·75	
	Tárakeshwar-Magra (2' 6")	31·12	172·21
	Tezpur-Balipara (2' 6")	20·10	
	Howra-Amta (2' 0")	28·62	
	Howrah-Sheakhalla (2' 0")	19·62	
(xv)	The Gaekwar's Dabhoi (2' 6")	(*c*) 78·80	102·78
	Rajpipla (2' 6")	(*c*) 23·98	
(xvi)	Cooch Behar (2' 6")		(*s*) 22·22
(xvii)	Morvi (2' 6")		94·36

	Miles.	Miles.
Standard gauge—		
(i) State lines worked by companies	4,190·83	
(ii) State lines worked by the State	4,893·54	
(iii) Guaranteed companies	2,588·18	
(iv) Assisted companies	643·55	
(v) Lines owned by native states and worked by companies	630·33	
(vi) Lines owned by native states and worked by State railway agency	123·86	
		13,070·24
Metre gauge—		
(vii) State lines worked by companies	6,887·30	
(viii) State lines worked by the State	643·99	
(ix) Assisted companies	285·86	
(x) Lines owned by native states and worked by companies	188·30	
(xi) Lines owned and worked by native states	922·04	
(xii) Foreign lines	73·25	
		9,000·74
Special gauges—		
(xiii) State lines worked by the State	36·50	
(xiv) Assisted companies	172·21	
(xv) Lines owned by native states and worked by companies	102·78	
(xvi) Lines owned by native states and worked by State railway agency	22·22	
(xvii) Lines owned and worked by native states	94·36	
		428·07
TOTAL		22,499·05

(*a*) Although for convenience classed amongst State railways, this line is the property of the Bengal Central Railway Company.
(*b*) Worked by the Indian Midland Railway Company.
(*c*) Worked by the Bombay, Baroda and Central India Railway Company.
(*d*) Worked by the Great Indian Peninsula Railway Company.
(*e*) Although forming an integral part of the East Coast State Railway, this line is shown separately as it is worked by the Nizam's Guaranteed State Railways Company.
(*f*) Worked by the Madras Railway Company.
(*g*) Including 6·12 miles of military line not used for public traffic, the Mushkaf-Bolán railway and the Kotri-Rohri chord line.
(*h*) Worked by the North-Western State Railway.
(*i*) Excluding the Bezwada extension, *vide* foot-note (*e*), but including 2·66 miles mixed-gauge and 0·38 mile metre-gauge.
(*k*) Including 3·19 miles, Trimulgherry troop siding, constructed but not used for ordinary public traffic.
(*l*) Although for convenience classed amongst State railways, this line is the property of the Bengal and North-Western Railway Company.
(*m*) Worked by the Southern Mahratta Railway Company.
(*n*) Worked by the South Indian Railway Company.
(*o*) Worked by the Assam Railways and Trading Company.
(*p*) Including 4·60 miles of Bhavnagar Dock estates and Junágad quarry lines.
(*q*) Worked by the Bhávnagar-Gondal-Junágad-Porbandar railway.
(*r*) Including 3·99 miles of Bedi-Bandar Dock estate sidings.
(*s*) Worked by the Eastern Bengal State Railway.
(*t*) Excluding 3·66 miles of the Lucknow-Bareilly railway between Daliganj and Aishbagh, but including the length, Bara Banki to Burhwal, 16·70 miles, and the length over Cawnpore bridge 0·59 miles laid on a mixed gauge.

2. And, the mileage under construction or sanctioned for construction on the same date was 3,568·22 miles(*d*), as follows:—

		Miles.	Miles.
Standard gauge—			
(i)	State lines worked by companies . . .	435·31	
(ii)	State lines worked by the State . . .	294·80

3. During 1899-1900, *i.e.*, from 1st April 1899 to 31st March 1900, 710·91 miles of new railway have been authorized as follows:—

	Miles.	Miles.
Standard gauge—		
(i) State lines worked by companies	128·63	
(ii) State lines worked by the State	10·00	
(iii) Lines owned by native states and worked by companies	20·78	
		159·41
Metre gauge—		
(iv) State lines worked by companies	355·47	
(v) State lines worked by the State	38·83	
(vi) Lines owned by native states and worked by companies	29·60	
(vii) Lines owned and worked by native states	88·00	
		511·90
Special gauges—		
(viii) State lines worked by the State	39·60	
		39·60
TOTAL		710·91

And 1,275·22 miles have been or are likely to be opened to public traffic as follows:—

	Miles.	Miles.
Standard gauge—		
(ix) State lines worked by companies	131·23	
(x) State lines worked by the State	131·95	
(xi) Guaranteed companies	38·39	
(xii) Assisted companies	231·22	
(xiii) Lines owned by native states and worked by companies	73·63	
		606·42
Metre gauge—		
(xiv) State lines worked by companies	146·19	
(xv) Assisted companies	63·24	
(xvi) Lines owned by native states and worked by companies	192·52	
(xvii) Lines owned and worked by native states	75·94	
		477·89
Special gauges—		
(xviii) State lines worked by the State	20·08	
(xix) Assisted companies	20·20	
(xx) Lines owned by native states and worked by companies	138·63	
(xxi) Lines owned by native states and worked by State railway agency	12·00	
		190·91
TOTAL		(d)1,275·22

(a) Excluding Kaunia-Moghalhat (2′ 6″) section, 12·23 miles, which is to be converted to the metre gauge.
(b) Correction of mileage.
(c) The mileage given is inclusive of 8·00 miles of His Highness the Maharaja Scindia's private line, opened for public traffic.
(d) Excluding the Bhátinda-Ferozepore conversion (54·50 miles), which was opened for traffic in June 1899.

4. The total length of open line at the commencement of 1900-1901, *i.e.*, on the 1st April 1900, will, therefore, be 23,780·20 miles, comprising :—

	Miles.	Miles.
Standard gauge—		
(i) State lines worked by companies .	4,312·58	
(ii) State lines worked by the State . .	5,032·03	
(iii) Guaranteed companies	2,626·52	
(iv) Assisted companies .	874·77	
(v) Lines owned by native states and worked by companies . .	703·96	
(vi) Lines owned by native states and worked by State railway agency	123·86	
		13,672·72
Metre gauge—		
(vii) State lines worked by companies . .	7,043·36	
(viii) State lines worked by the State . . .	643·99	
(ix) Assisted companies .	349·10	
(x) Lines owned by native states and worked by companies . .	380·82	
(xi) Lines owned and worked by native states .	997·98	
(xii) Foreign lines . .	73·25	
		9,488·50
Special gauges—		
(xiii) State lines worked by the State . . .	56·58	
(xiv) Assisted companies .	192·41	
(xv) Lines owned by native states and worked by companies	241·41	
(xvi) Lines owned by native states and worked by State railway agency . .	34·22	
(xvii) Lines owned and worked by native states .	94·36	
		618·98

(*a*) Although for convenience classed amongst State railways, this line is the property of the Bengal Central Railway Company.
(*b*) Worked by the Indian Midland Railway Company.
(*c*) Worked by the Bombay, Baroda and Central India Railway Company.
(*d*) Worked by the Great Indian Peninsula Railway Company.
(*e*) Although forming an integral part of the East Coast State railway, this line is shown separately as it is worked by H. H. the Nizam's Guaranteed State Railways Company.
(*f*) Worked by the Madras Railway Company.
(*g*) Including 6·12 miles of military line not used for public traffic.
(*h*) Worked by the North Western State railway.
(*i*) Excluding the Bezwada extension, *vide* foot-note (*e*), but including 2·66 miles mixed gauge and 0·33 miles metre gauge. Includes also Madras-Ennur section from 1st July 1899.
(*j*) Worked by the East Indian Railway Company.
(*k*) Including 2·19 miles, Trimulgherry troop siding, constructed but not used for ordinary public traffic.
(*l*) Although for convenience classed amongst State railways, this line is the property of the Bengal and North-Western Railway Company.
(*m*) Worked by the Southern Mahratta Railway Company.
(*n*) Worked by the South Indian Railway Company.
(*o*) Worked by the Assam Railways and Trading Company.
(*p*) Including 4·50 miles of Bhavnagar Dock estates and Junágad quarry line.
(*q*) Worked by the Bhávnagar-Gondal-Junágad-Porbandar railway.
(*r*) Including 3·99 miles of Bedi Bandar Dock estate siding.
(*s*) Worked by the Eastern Bengal State railway.
(*t*) Excluding 3·66 miles of the Lucknow-Bareilly railway between Daliganj and Aishbagh but including the length, Bara Banki to Burhwal, 16·70 miles, and the length over Cawnpore bridge, 0·59 miles, laid on a mixed gauge.
(*u*) Worked by the Bengal and North-Western Railway Company.
(*v*) Including 27·88 miles of standard gauge line between Ferozepore and Kot Kapura and 26·71 miles of both standard and metre gauges between Kot Kapura and Bhatinda, worked over by the North Western State railway.
(*w*) Worked by the Oudh and Rohilkhand State railway.
(*x*) Worked by H. H. the Nizam's Guaranteed State Railways Company.

* Correction of mileage.

Summary.

The Financial Statement points out that the significance of the figures for 1899-1900 and for 1900-1901 relates to the agricultural situation: India is suffering from a very serious famine.

A change in the form of accounts is explained. The column for exchange and the symbol Rx. disappear from the accounts. A stable rate of exchange having been obtained the total figures are given in fifteens of rupees, that is, in pounds sterling.

The Accounts of 1898-99 which have been published yield a surplus of £2,641,000.

A surplus of £2,622,000 was estimated last March for 1899-1900. Receipts improved during the year by £607,000 in spite of a loss of land revenue owing to famine of £1,187,000. Gross receipts from Railways increased by £824,000. Post Office, Telegraph and Mint receipts were better by £423,000 and Opium receipts by £401,000. Expenditure increased during the year by £676,000 in spite of a decrease under Army services of £738,000 owing chiefly to the despatch of troops to South Africa, Ceylon and Singapore, and of economies of £405,000 under Buildings and Roads. The increase was due to Famine, £2,055,000 being devoted to direct famine relief. The surplus for the year therefore becomes £2,553,000.

The Budget Estimates are made up at 16*d*. An increase of £838,000 is taken under Land Revenue, as it is hoped famine will have disappeared by September. An increase of £667,000 is anticipated from Railways and of £156,000 from Opium owing to better prices in China. Direct famine relief is expected to cost £3,335,000. Allowing for temporary increases due to high prices and for recoveries, Military Estimates show an increase of £746,000, of which nearly half is devoted to re-arming the Native Army. The surplus for 1900-1901 works out at £160,000.

The Secretary of State is expected to have drawn by the 31st of March £19,000,000 at an average rate a little over 16*d*., but owing to famine expenditure £1,500,000 of the drawings were met out of Currency Reserve, the gold being held in England.

Next year the Secretary of State expects to draw £16,440,000 and to incur Temporary Debt of £500,000. The Secretary of State does not expect to raise fresh permanent sterling debt; but it is estimated that a loan of three crores will be necessary in India for Ways and Means. Capital expenditure on Railways will amount to £4,872,000 and the Irrigation grant is raised to a full crore.

The Statement then deals with the financial events of the year.

With regard to the countervailing duties on beet sugar, it shows that imports were nearly 45 per cent less in the last nine months than in the corresponding period of the previous year. But trade was conducted under such abnormal conditions, and the fluctuating character of this importation is so remarkable that no conclusion can be drawn.

The suitability of the 1*s*. 4*d*. rate for the volume of Indian trade is discussed. It is shown that the total trade of India for the first ten months is greater in spite of serious obstacles than it was in 1898-99 which was held to be an abnormal year.

Up to April 1, 1899, Government had received £2,030,000 in gold. By March 7, 1900, this amount, including gold held in London, had reached £8,570,000. Government have added to silver currency in exchange for gold over ten crores of rupees including new coinage this year of 1½ crores, while another crore is to be coined next year. Government will not add more rupees to the silver currency than necessary, nor hamper trade by refusing to give rupees for gold. The relation of the rupee currency to the work it has to perform is examined, but the drain of silver to famine districts renders this year abnormal.

Government have decided for the present to keep a minimum balance of £5,000,000 in gold and are paying out gold above that limit to any one who desires it. In seven weeks up to March 10 public has taken over £130,000 and shows a disposition now to take gold at a faster rate.

The action of the Secretary of State in raising the rate for telegraphic transfers is explained. The discussion on the admittedly unsatisfactory banking position in India is believed to have cleared up several points. The subject is now under the consideration of the Secretary of State.

The financial history of the year is overshadowed by famine, but India in the current year met all demands for famine and railway construction out of revenue without borrowing and passed to a gold standard, through the ordinary operations of trade, without adding to her indebtedness.

PART I.

Government of India Notifications, Appointments, Promotions, etc.

MILITARY SECRETARY'S OFFICE.

NOTIFICATIONS.

Calcutta, the 21st March 1900.

No. 315-M.—His Excellency the Viceroy and Governor-General will leave Calcutta at 11 P.M., Calcutta time, on Wednesday, the 28th March 1900.

His Excellency will visit Lalkua, Amritsar, Quetta, Dera Ghazi Khan, Dera Ismail Khan, Bannu and Kohat, and arrive at Simla about the end of April.

All covers intended to reach His Excellency the Viceroy and Governor-General during His Excellency's tour should be addressed "His Excellency the Viceroy's Camp" without the addition of any post town.

The party accompanying His Excellency on tour is as follows :—

Her Excellency Lady Curzon of Kedleston.

Sir William Cuningham, K.C.S.I., Foreign Secretary . Joins at Amritsar.

W. R. Lawrence, Esq., C.I.E., Private Secretary . Joins at Amritsar.

Major the Hon'ble E. Baring, Military Secretary.

Lieutenant-Colonel E. H. Fenn, C.I.E., Surgeon to the Viceroy.

Captain R. G. T. Baker-Carr, A.-D.-C.	Will be at Lalkua Camp only.
Captain W. McL. Campbell, A.-D.-C.	
Captain R. A. Steel, A.-D.-C.	Joins at Amritsar.
Captain A. W. F. Knox, A.-D.-C.	Joins at Amritsar.
Lord Ronaldshay, A.-D.-C.	Will be at Lalkua Camp only.
F. W. Latimer, Esq., Assistant Private Secretary	As far as Amritsar.

All communications connected with business of a mere routine nature should be sent, as usual, to the Head-quarters of the several Departments.

The 22nd March 1900.

No. 317-*M*.—His Excellency the Viceroy and Governor-General will hold a Levée at Quetta at 10-15 P.M., on Wednesday, the 11th April 1900.

2. All Civil and Military Officers and Native Officers of the Native regiments at Quetta are invited to attend.

3. His Excellency will also be glad to receive other gentlemen, who should submit their names to the Agent to Governor-General in Baluchistan, who will issue cards of admission, which should be shown to the Aide-de-Camp in waiting before the Levée, if required.

4. All officers and gentlemen attending the Levée are requested to bring with them two large cards with their names clearly written upon them.

5. Officers and gentlemen wearing uniform will appear in full dress; gentlemen not wearing uniform in evening dress. As regards dress, attention is drawn to this office Notification No. 905-M., dated the 8th September 1899.

By Command,
E. BARING, *Major*,
Military Secretary to the Viceroy.

LEGISLATIVE DEPARTMENT.

NOTIFICATION.

Calcutta, the 23rd March, 1900.

No. 5.—The services of Mr. A. Williams, I.C.S., Officiating Deputy Secretary to the Government of India in the Legislative Department, are replaced at the disposal of the Foreign Department, with effect from the after noon of the 4th April, 1900.

J. M. MACPHERSON,
Secretary to the Government of India.

HOME DEPARTMENT.

NOTIFICATIONS.

PUBLIC.

Calcutta, the 23rd March 1900.

No. 812.—THE following rules, which it is proposed to issue under the Indian Arms Act, 1878 (XI of 1878), are published for general information. They will be taken into consideration by the Governor General in Council on or after the expiry of three months from this date:—

Draft Rule (a).

In exercise of the powers conferred by section 17 of the Indian Arms Act, 1878 (XI of 1878), the Governor General in Council is pleased to make the

following addition to Rule (5) of the rules under the said section as amended by the Notification of the Government of India in the Home Department, No. 1842, dated the 10th October 1879.

[NOTE.—No such license will be granted for the importation of arms of ·303, ·450 or ·577 bore from which Government ammunition, whether for rifle or carbine, can be fired.]

Draft Rule (b).

In exercise of the powers conferred by section 17 of the Indian Arms Act, 1878 (XI of 1878), the Governor General in Council directs that licenses for the possession of reasonable quantities of balled ammunition which can be fired from Government rifles or carbines of the ·303, ·450 or ·577 bore, shall be granted by the Commissioner of Police in the Presidency towns, and by the Magistrate of the district outside those towns, in Form VIII of the forms annexed to the rules issued under the said Act. Such licenses will be granted on application to any person lawfully in possession for sporting purposes of a rifle or carbine of the ·303, ·450 or ·577 bore, and will state the amount of such balled ammunition which he may possess in the following twelve months. Duly licensed dealers will be allowed to import such balled ammunition up to the quantity stated in such licenses. Upon every license produced in support of an application for leave to import, the quantity of ammunition to import which leave was given, and the date of giving it, must be endorsed by the authority by whom leave is granted.

No. 825.—THE following rules which it is proposed to issue under the Indian Arms Act, 1878 (XI of 1878), are published for general information. They will be taken into consideration by the Governor General in Council on or after the expiry of three months from this date :—

Draft Rules.

In exercise of the power conferred by section 17 of the Indian Arms Act (XI of 1878), the Governor General in Council is pleased to direct that the following amendments shall be made in paragraph VI of the Notification of the Government of India, No. 518, dated the 6th March 1879, as amended by subsequent Notifications :—

Add the following proviso (or additional proviso as the case may be) to Rules 2 (clause 1), 6, 6C, 13, 13A, 14 and 16 :—

"Provided that (or provided also that) in the case of breech-loading rifles and balled rifle ammunition the license shall not be granted without the previous sanction of the Board of Revenue in Madras, of the Chief Commissioner in Assam and of the Commissioner of Division in other Provinces."

Note.—The reference to ammunition is not intended to be included in this proviso so far as the latter relates to rule 13A.

Add to Rule 2 (clause 1) the following proviso :—

"Provided that no license for the transport of breech-loading rifles or balled rifle ammunition to a frontier district shall be granted without the previous sanction of the Local Government in whose jurisdiction the district is situated."

Add as clause (*d*) to Rule 8 :—

(*d*) in the case of breech-loading rifles and balled rifle ammunition whether the previous sanction of the Local Government or other prescribed authority, as the case may be, has been obtained.

Add to Rule 11 after the words "appended to these rules" :—

"But licenses to manufacture, convert, keep or sell or keep for sale breech-loading rifles, rifle ammunition or military stores for rifles shall be granted by the Local Government only and shall be in forms VI—B and VII—B herewith prescribed. A Local Government may under this rule grant licenses to selected dealers to hold a certain amount of ammunition for rifles taking Government cartridges on the condition that the license-holders shall not sell from this stock to any person who does not hold a license to possess any such ammunition."

BREECH-LOADING RIFLES, RIFLE AMMUNITION, OR MILITARY STORES FOR RIFLES.

FORM VI—B.

Seal.

(Signature.)

Secretary to the ______________.

Form of renewing the License.

Date and year of renewal.	Date on which the renewed license expires.	Signature of Commissioner of Police or Magistrate.

1. This license is given subject to the provisions of "The Indian Arms Act, 1878," and the rules framed thereunder. The attention of the holder is drawn to the sections of the Act quoted separately below.

2. He shall keep registers of all arms manufactured or converted, of all ammunition and military stores manufactured, of all stock in hand and of all sales, in such forms as the Local Government may direct.

3. He shall exhibit his stock and his registers on demand by any Magistrate or by any Police officer not below the rank of Inspector.

4. If any arms or ammunition covered by this license are lost or stolen, he shall at once give notice at the nearest Police station.

N.B.—This condition may be omitted at the discretion of the Local Government.

5. He shall affix on a conspicuous part of his shop, or usual place of business, a signboard, on which shall be painted in large letters in English and in the Vernacular of the district his name and the words "Licensed to manufacture" (or "Licensed to deal in) arms, ammunition and military stores," as the case may be. He shall also post up in his shop a copy of section 28 of the Act either in the Vernacular of the district, or in English.

6. He shall at the time of purchase endorse upon the license of every purchaser holding a license under Form VIII or IX—(1) the name and address of the person who takes delivery of the articles sold, (2) the nature and amount of the articles sold, (3) the date of sale, and shall sign the endorsement.

7. This license only covers sales of arms, ammunition or military stores effected upon the premises shown on the face of the license.

8. This license expires on the 31st December of the year in which it is issued, but the licensee can have it renewed by filing an application for its renewal on stamped paper of the prescribed value.

9. This license does not authorize the licensee to possess Government arms or ammunition.

Explanation.—A "Government arm" is a firearm or other weapon which is the property of the Government.

"Government ammunition" is ammunition manufactured in any Government factory, or which is prepared for and supplied to Government.

Sections of the Indian Arms Act, 1878, referred to in Condition No. 1.

5. No person shall manufacture, convert or sell, or keep, offer or expose for sale, any arms, ammunition or military stores, except under a license and in the manner and to the extent permitted thereby.

Nothing herein contained shall prevent any person from selling any arms or ammunition which he lawfully possesses for his own private use to any person who is not by any enactment for the time being in force prohibited from possessing the same; but every person so selling arms or ammunition to any person other than a person entitled to possess the same by reason of an exemption under section 27 of this Act shall, without unnecessary delay, give to the Magistrate of the district, or to the Officer in charge of the nearest Police station, notice of the sale and of the purchaser's name and address.

16. Any person possessing arms, ammunition or military stores, the possession whereof by him has, in consequence of the cancellation or expiry of a license * * * * * * * * * become unlawful, shall deposit the same without unnecessary delay with the Officer in charge of the nearest Police station.

If the owner of anything deposited under this section does not within three years from the date on which such thing is so deposited produce a license authorizing him to possess the same and apply for delivery of the same, such thing shall be forfeited to Her Majesty.

19. Whoever commits any of the following offences (namely):—

(*a*) manufactures, converts or sells, or keeps, offers or exposes for sale, any arms, ammunition or military stores in contravention of the provisions of section 5;

(*b*) fails to give notice as required by the same section;

* * * * * * * * * *

(*g*) intentionally makes any false entry in a record or account which, by a rule, * * * he is required to keep;

(*h*) intentionally fails to exhibit anything which, by a rule, * * * he is required to exhibit; or

(*i*) fails to deposit arms, ammunition or military stores, as required by, * * section 16;

shall be punished with imprisonment for a term which may extend to three years, or with fine, or with both.

20. Whoever does any act mentioned in clause (*a*) * * * of section 19, in such manner as to indicate an intention that such act may not be known to any public servant as defined in the Indian Penal Code, or to any person employed upon a Railway, or to the servant of any public carrier,

and whoever, on any search being made under section 25, conceals or attempts to conceal any arms, ammunition or military stores,

shall be punished with imprisonment for a term which may extend to seven years, or with fine, or with both.

21. Whoever, in violation of a condition subject to which a license has been granted, does or omits to do any act shall, when the doing or omitting to do such act is not punishable under section 19 or section 20, be punished with imprisonment for a term which may extend to six months, or with fine which may extend to five hundred rupees, or with both.

22. Whoever knowingly purchases any arms, ammunition or military stores from any person not licensed or authorized under the proviso to section 5 to sell the same, or

delivers any arms or ammunition or military stores into the possession of any person without previously ascertaining that such person is legally authorized to possess the same,

shall be punished with imprisonment for a term which may extend to six months, or with fine which may extend to five hundred rupees, or with both.

23. Any person violating any rule made under this Act, and for the violation of which no penalty is provided by this Act, shall be punished with imprisonment for a term which may extend to one month, or with fine which may extend to two hundred rupees, or with both.

24. When any person is convicted of an offence punishable under this Act, committed by him in respect of any arms, ammunition or military stores, it shall be in the discretion of the convicting Court or Magistrate further to direct that the whole or any portion of such arms, ammunition or military stores and any vessel, cart or baggage animal used to convey the same, and any box, package or bale in which the same may have been concealed, together with the other contents of such box, package or bale, shall be confiscated.

BREECH-LOADING RIFLES, RIFLE AMMUNITION, OR MILITARY STORES FOR RIFLES.

FORM VII—B.

FEE TEN RUPEES IN STAMPS.

________ *Secretary to the* ________

Form of renewing the License.

Date and year of renewal.	Date on which the renewed license expires.	Signature of Commissioner of Police or Magistrate.

1. This license is given subject to the provisions of "The Indian Arms Act, 1878," and the rules framed thereunder. The attention of the holder is drawn to the sections of the Act quoted separately below.

2. He shall keep registers of all arms and ammunition in stock and of all sales, in such form as the Local Government may from time to time direct.

3. He shall exhibit his stock and his registers on demand by any Magistrate, or by any Police officer not below the rank of Inspector.

4. If any arms or ammunition covered by this license are lost or stolen, he shall at once give notice at the nearest Police station.

N.B.—This condition may be omitted at the discretion of the Local Government.

5. He shall affix on a conspicuous part of his shop, or usual place of business, a signboard, on which shall be painted in large letters in English and in the Vernacular of the district his name and the words "Licensed to deal in arms, ammunition and military stores." He shall also post up in his shop a copy of section 28 of the Act either in the Vernacular of the district, or in English.

6. He shall at the time of purchase endorse upon the license of every purchaser holding a license under Form VIII or IX—(1) the name and address of the person who takes delivery of the articles sold, (2) the nature and amount of the articles sold, (3) the date of sale, and shall sign the endorsement.

7. This license only covers sales of arms, ammunition or military stores effected upon the premises shown on the face of the license.

8. This license expires on the 31st December of the year in which it is issued, but the licensee can have it renewed by filing an application for its renewal on stamped paper of the prescribed value.

This condition applies only to Burma.

9. This license does not authorize the licensee to possess Government arms or ammunition.

Explanation.—A "Government arm" is a firearm or other weapon which is the property of the Government.

"Government ammunition" is ammunition manufactured in any Government factory, or which is prepared for and supplied to Government.

Sections of the Indian Arms Act, 1878, referred to in Condition No. 1.

5. No person shall manufacture, convert or sell, or keep, offer or expose for sale, any arms, ammunition or military stores, except under a license and in the manner and to the extent permitted thereby.

Nothing herein contained shall prevent any person from selling any arms or ammunition which he lawfully possesses for his own private use to any person who is not by any enactment for the time being in force prohibited from possessing the same; but every person so selling arms or ammunition to any person other than a person entitled to possess the same by reason of an exemption under section 27 of this Act shall, without unnecessary delay, give to the Magistrate of the district, or to the Officer in charge of the nearest Police station, notice of the sale and of the purchaser's name and address.

16. Any person possessing arms, ammunition or military stores, the possession whereof by him has, in consequence of the cancellation or expiry of a license * * * * * * become unlawful, shall deposit the same without unnecessary delay with the Officer in charge of the nearest Police station.

If the owner of anything deposited under this section does not within three years from the date on which such thing is so deposited produce a license authorizing him to possess the same and apply for delivery of the same, such thing shall be forfeited to Her Majesty.

19. Whoever commits any of the following offences (namely):—

(*a*) manufactures, converts or sells, or keeps, offers or exposes for sale any arms, ammunition or military stores in contravention of the provisions of section 5;

(*b*) fails to give notice as required by the same section;

* * * * * * * * * * * *

(*g*) intentionally makes any false entry in a record or account which, by a rule, * * * he is required to keep;

(*h*) intentionally fails to exhibit anything which, by a rule * * * * he is required to exhibit; or

(*i*) fails to deposit arms, ammunition or military stores, as required by * * section 16;

shall be punished with imprisonment for a term which may extend to three years, or with fine, or with both.

20. Whoever does any act mentioned in clause (*a*) * * * of section 19, in such manner as to indicate an intention that such act may not be known to any public servant as defined in the Indian Penal Code or to any person employed upon a Railway, or to the servant of any public carrier,

and whoever, on any search being made under section 25, conceals or attempts to conceal any arms, ammunition or military stores,

shall be punished with imprisonment for a term which may extend to seven years, or with fine, or with both.

21. Whoever in violation of a condition subject to which a license has been granted, does or omits to do any act shall, when the doing or omitting to do such act is not punishable under section 19 or section 20, be punished with imprisonment for a term which may extend to six months, or with fine which may extend to five hundred rupees, or with both.

22. Whoever knowingly purchases any arms, ammunition or military stores from any person not licensed or authorized under the proviso to section 5 to sell the same, or

delivers any arms, ammunition or military stores into the possession of any person without previously ascertaining that such person is legally authorized to possess the same,

shall be punished with imprisonment for a term which may extend to six months, or with fine which may extend to five hundred rupees, or with both.

23. Any person violating any rule made under this Act, and for the violation of which no penalty is provided by this Act, shall be punished with imprisonment for a term which may extend to one month, or with fine which may extend to two hundred rupees, or with both.

24. When any person is convicted of an offence punishable under this Act, committed by him in respect of any arms, ammunition or military stores, it shall be in the discretion of the convicting Court or Magistrate further to direct that the whole or any portion of such arms, ammunition or military stores and any vessel, cart or baggage animal used to convey the same, and any box, package or bale in which the same may have been concealed, together with the other contents of such box, package or bale, shall be confiscated.

ESTABLISHMENTS.

The 20th March 1900.

No. 197.—The Hon'ble Justice Sir William Macpherson, Kt., having tendered the resignation of his office of Judge of the High Court of Judicature at Fort William in Bengal, the Governor General in Council is pleased, under the provisions of the Indian High Courts Act, 1861 (24 and 25 Vict., C. 104), section 7, to appoint the Hon'ble Mr. J. Pratt, I.C.S., Superintendent and Remembrancer of Legal Affairs, Bengal, to officiate as a Judge of the said Court until Her Majesty's pleasure is known.

The 21st March 1900.

SANITARY.

PLAGUE.

The 22nd March 1900.

No. 908.—Whereas the Governor General in Council is satisfied that there is a danger of an outbreak of dangerous epidemic disease in the town of Madura in the Madras Presidency if pilgrims or other persons from the Mysore State are permitted to assemble at that place on the occasion of the ensuing Chitrai festival:

In exercise of the powers conferred by section 2, sub-section (*1*), of the Epidemic Diseases Act (III of 1897), the Governor General in Council is pleased to direct that no tickets to travel by railway to the stations of Ayyalur, Vadamadurai, Dindigal, Ambatturai, Ammayanayakkanur, Sholavandan, Samaiyanallur, Madura, Tiruparankunram, Tirumangalam, and Kalligudi on the South Indian Railway shall be sold from the 25th March to the 18th April 1900 (both days inclusive) within the Mysore State to any pilgrim or other person intending or believed to be intending to proceed on pilgrimage to the Chitrai festival in the town of Madura.

The 23rd March 1900.

No. 923.—Whereas the Governor General in Council is satisfied that there is a danger of an outbreak of dangerous epidemic disease at Khairupatti in the Pattikonda Taluk of the Kurnool District of the Madras Presidency if pilgrims or other persons from the Bombay Presidency and the Hyderabad State are permitted to assemble at that place on the occasion of the ensuing Virabhadraswami festival:

In exercise of the powers conferred by section 2, sub-section (*1*), of the Epidemic Diseases Act (III of 1897), the Governor General in Council is pleased to direct that no tickets to travel by railway to the stations of Aspari, Nagarur and Adoni on the Madras Railway shall be sold from the 29th March to the 4th April 1900 (both days inclusive) within the Bombay Presidency and the Hyderabad State to any pilgrim or other person intending or believed to be intending to proceed on pilgrimage to the Virabhadraswami festival at Khairupatti.

No. 939.—Whereas the Governor General in Council is satisfied that there is a danger of an outbreak of dangerous epidemic disease at Avanashi and Tiruppur in the Palladam Taluk of the Coimbatore District of the Madras Presidency if pilgrims or other persons from the Mysore State are permitted to assemble at those places on the occasion of the ensuing Car festivals:

In exercise of the powers conferred by section 2, sub-section (*1*), of the Epidemic Diseases Act (III of 1897), the Governor General in Council is pleased to direct that no tickets to travel by railway to the stations of Sulur, Somanur, Mangalam, Tiruppur, Kulipalaiyam, Uttukuli, and Vijayamangalam on the Madras Railway shall be sold from the 1st to the 22nd May (both days inclusive) and from the 1st to the 25th June 1900 (both days inclusive) within the Mysore State to any pilgrim or other person intending or believed to be intending to proceed on pilgrimage to the Car festivals at Avanashi and Tiruppur.

No. 937.—The following letters from the Consul for the Netherlands, Calcutta, are published for general information:—

No. 299, dated the 7th March 1900.

From—G. D. ADVOCAAT, Esq., Consul General for the Netherlands,

To—The Secretary to the Government of India, Foreign Department.

I have the honour to inform you that according to communication received from the Netherland Indian Government, the prohibitive stipulations which existed in the Dutch East Indies regarding the importation of articles coming from foreign places, declared infected with plague, have been modified.

Accordingly the importation in Netherlands India of the following articles, coming from or having been transhipped at Bombay, Karachi and Calcutta is actually temporarily prohibited, *viz.*, carpets and used embroidery, unless transported as luggage or in consequence of a change of habitation, rags, used bags, untanned hides, including hides which have been cured with salt or arsenic, fresh offal, claws, hoofs, raw wool, manes, bristles, and in general animal hair as also human hair.

No. 338, dated the 10th March 1900.

From—G. D. ADVOCAAT, Esq., Consul General for the Netherlands,

To—The Secretary to the Government of India, Foreign Department.

I have the honour to inform you that I have received a telegram from the First Government Secretary at Buitenzorg, saying that the Netherland Indian Government have declared Aden infected with plague from the 22nd February last.

The restrictions imposed upon the importation in the Dutch East Indies as mentioned in my letter of the 7th instant, No. 299, apply to Aden in addition to Bombay, Karachi and Calcutta.

NOTE.—For previous rules of the Netherland Indian Government, see Home Department Notifications No. 1287, dated 20th May 1898, No. 1849, dated 28th July 1898, and No. 1233, dated 27th March 1899.

PORT BLAIR.

The 20th March 1900.

J. F. FINLAY,

Secretary to the Government of India.

MILITARY DEPARTMENT.

No. 304.

Fort William, the 19th March 1900.

His Excellency the Viceroy and Governor General in Council announces with the deepest regret the death of Sir William Stephen Alexander Lockhart, G.C.B., K.C.S.I., Commander-in-Chief in India, and Extraordinary Member of the Governor General's Council, which took place at 11-15 P.M. last night.

The Viceroy and Governor General in Council desires to place upon record his sense of the heavy loss sustained by the army in India of their late commander. In a military career of exceptional brilliancy in many parts of the empire Sir William Lockhart had shown himself to be a brave soldier, an intrepid explorer, and a natural leader of men. Upon the frontier his name was not more widely known than it was respected, and the native soldiers of the Indian Army, no less than their British comrades, will mourn in him both the Captain of their choice, and a personal friend. The civil unites with the military service in deploring the untimely death of a great soldier and a distinguished servant of the Crown.

The Governor General in Council directs that, as a mark of respect to the late Commander-in-Chief, the flag of Fort William shall be hoisted half-mast high, and that seventeen minute guns shall be fired from the Fort at the time that the funeral is taking place.

Flags are also to be hoisted half-mast high at all military and civil stations in India, and minute guns should be fired as above at each station where there is artillery.

The Governor General in Council further directs that all officers of the army shall wear mourning for fourteen days.

The funeral will leave the late Commander-in-Chief's residence at 5 P.M. this evening, and the Governor General in Council requests that the officers of Government, civil, military, and marine, will attend.

The 23rd March 1900.

APPOINTMENTS.

The 21st March 1900.

No. 115.—The following is published for general information :—

Circular No. VII Railway.

GOVERNMENT OF INDIA—PUBLIC WORKS DEPARTMENT—RAILWAY TRAFFIC.

Calcutta, the 12th March 1900.

Risk Note, Form Y.

READ—

Sections 72 and 75 of the Indian Railways Act, IX of 1890.

Government of India circular No. I Railway, dated the 9th March 1898.

Letter from the Secretary, Railway Traffic Conference, No. 56, dated the 14th November 1899.

OBSERVATIONS.—With the Government of India circular No. I Railway, dated the 9th March 1898, was promulgated a Risk Note, Form X, to be used when the sender elects to despatch an "excepted" article specified in the second schedule to the Indian Railways Act, IX of 1890, whose value exceeds one hundred rupees without payment of the percentage on value authorized in section 75 of that Act. Consignors are accordingly required to execute a risk note in the prescribed form for each consignment despatched by them.

This arrangement having proved inconvenient in the case of certain kinds of traffic, the matter was considered by the Railway Traffic Conference of 1899, and a draft Risk Note, Form Y, to be used as an alternative to Risk Note,

Form X, to cover all consignments of the "excepted" articles referred to booked within a period of six months, has been submitted for approval to obviate the inconvenience experienced under the existing arrangement.

RESOLUTION.—The Governor General in Council is pleased to approve, under section 72 (2) (b) of the Indian Railways Act, IX of 1890, of the use of the enclosed form, with effect from the 1st July 1900, by railway administrations working railways to which the Indian Railways Act, IX of 1890, applies.

2. In the case of railways to which Local Acts similar in scope to the Indian Railways Act, IX of 1890, are applicable, the Governor General in Council is also pleased to approve of the use of the form from the 1st July 1900, so far as his approval may be necessary under such Local Acts.

ORDER.—Ordered that a copy of this resolution, and of its enclosure, be communicated to the Local Governments and Administrations and to the officers marginally noted, for information and guidance; also to the

The Governments of Madras, Bombay, Bengal, and Burma.
The Chief Commissioner of Assam.
The Residents at Hyderabad, Mysore and Baroda.
The Agents to the Governor General in Rajputana and Central India.
The Consulting Engineers to the Government of India for Railways, Calcutta, Lucknow, and Assam.
The Managers of the North Western, Oudh and Rohilkhand, Eastern Bengal and East Coast (State) railways.

Governments of the North-Western Provinces and Oudh, and the Punjab, the Chief Commissioner of the Central Provinces, the Agent to the Governor General in Baluchistan, the Accountant General, Public Works Department; and to the Foreign Department, for information.

Ordered, further, that this resolution and the accompanying form be published under a notification in Part I of the *Gazette of India*, and that it be reproduced in the *Local Government Gazettes*.

(Enclosure to the Government of India circular No. VII Railway, dated the 12th March 1900.)

________________RAILWAY.

RISK NOTE, FORM Y.

(Approved by the Governor General in Council under section 72 (2) (b) of the Indian Railways Act, IX of 1890.)

(To be used as an alternative to Risk Note, Form X, when the sender elects to enter into a general agreement for a term not exceeding six months, for the despatch of "excepted" articles specified in the second schedule to the Indian Railways Act, IX of 1890, whose value exceeds one hundred rupees without payment of the percentage on value authorized in section 75 of that Act, instead of executing a separate Risk Note for each consignment.)

________________STATION.

________________190 .

WHEREAS consignments of________________

________________tendered by me/us, for despatch by the________________railway administration or their transport agents or carriers are charged at the ordinary rates for

carriage, and whereas $\frac{I}{we}$ have been required to pay or engage to pay, and elected not to pay or engage to pay, a percentage on the value of the consignments by way of compensation for increased risk, $\frac{I}{we}$, the undersigned, do therefore agree and undertake, except in relation to any particular consignment for which $\frac{I}{we}$ may have entered into a special contract, to hold the said railway administration and all the other railway administrations working in connection therewith, and also all other transport agents or carriers employed by them, respectively, over whose railways or by or through whose transport agency or agencies the said goods may be carried in transit, harmless and free from all responsibility for any loss, destruction or deterioration of, or damage to, the said consignments from any cause whatever before, during and after transit over the said railway, or other railway lines working in connection therewith or by any other transport agency or agencies employed by them, respectively, for the carriage of the whole or any part of the said consignments.

Memorandum from the Consulting Engineer to the Government of India for Railways, Calcutta, No. 117, dated the 2nd March 1900, forwarding letter from the Agent and Chief Engineer of the Bengal Nagpur Railway Company, No. 2332, dated the 27th February 1900.

OBSERVATIONS.—The Agent and Chief Engineer of the Bengal Nagpur Railway Company has applied that the General Rules for working open lines of railway in British India, which have been published under the Government of India, Public Works Department, notification No. 118, dated the 21st March 1895 (*vide* the *Gazette of India* of the 23rd March 1895), as modified by the Government of India circulars Nos. 3 Railway, dated the 22nd May 1896, 3 Railway, dated the 3rd February 1897, 12 Railway, dated the 9th December 1897, resolution No. 84 R. T., dated the 25th January 1898, and circulars Nos. I Railway, dated the 3rd March 1898, III Railway, dated the 15th March 1898, I Railway, dated the 26th April 1899, V Railway, dated the 3rd July 1899, X Railway, dated the 1st December 1899, and IV Railway, dated the 19th January 1900, which were published under Public Works Department notifications Nos. 257, dated the 28th May 1896, 55, dated the 5th February 1897, 3, dated the 5th January 1898, 32, dated the 28th January 1898, 104, dated the 10th March 1898, 134, dated the 23rd March 1898, 197, dated the 5th May 1899, 298, dated the 14th July 1899, 517, dated the 7th December 1899, and 29, dated the 25th January 1900 (*vide* the *Gazette of India* of the 30th May 1896, 6th February 1897, 8th January 1898, 29th January 1898, 12th March 1898, 26th March 1898, 6th May 1899, 15th July 1899, 9th December 1899, and 27th January 1900), may be made applicable to the Kolaghat-Howrah section of that railway's extensions.

RESOLUTION.—The Governor General in Council is pleased to sanction the application of the General Rules for working railways open for traffic which may, for the time being and hereafter from time to time, be in force on the Bengal Nagpur railway, to the Kolaghat-Howrah section of that railway's extensions, with effect from the date or dates on which the said section or portions thereof may be opened for the public carriage of passengers, animals or goods.

ORDER.—Ordered that this resolution be published under a notification in Part I of the *Gazette of India*, as required by section 47, sub-section (3), of the

Indian Railways Act, 1890 ; also that the General Rules cited in the foregoing observations—which have already been published in the *Gazette of India*—be kept at railway stations as directed by sub-section (*6*) of the same section.

Ordered, also, that this resolution be communicated to the Consulting Engineer to the Government of India for Railways, Calcutta, for information and guidance.

F. R. UPCOTT,
Secretary to the Government of India,
Public Works Department, Railways.

The 21st March 1900.

No. 114.—Mr. W. G. Newton, Executive Engineer, 1st grade, Burma, is appointed to officiate as a Superintending Engineer with the temporary rank of Superintending Engineer, 3rd class, with effect from the forenoon of the 7th March 1900, until further orders.

The 23rd March 1900.

No. 119.—Messrs. G. M. Harriott and W. McM. Sweet, Executive Engineers, 1st grade, Minor Administration List, held the rank of Executive Engineer, 1st grade, substantive *pro tempore,* from the 16th February 1898 to 2nd November 1898, both days inclusive.

T. HIGHAM,
Secretary to the Government of India,

The 23rd March 1900.

A. F. COX,
Comptroller-General.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

INVENTIONS and DESIGNS.

Calcutta, the 22nd March 1900.

NOTIFICATIONS.

No. 1081 P.—APPLICATIONS in respect of the undermentioned inventions have been filed, under the provisions of the Inventions and Designs Act of 1888, in the office of the Secretary appointed under that Act, during the week ending 17th March 1900:—

No. 95 of 1900.—Gavin Sibbald Jones, civil engineer, of Cawnpore, North-Western Provinces. *An urinal adapted for the use of natives of both sexes.*

No. 96 of 1900.—Ernsthausen, limited, merchants, Calcuttta. *The improvement of indigo manufacture.*

No. 97 of 1900.—William James Davey, engineer, of 33 Durham road, East Finchley, in the county of Middlesex, and Charles Williamson Milne, gentleman, of 3 and 5 Crown Court, Old Broad street, in the city and county of London. *Improvements in electric arc lamps.*

No. 98 of 1900.—Louis Carnegy Auldjo, consulting engineer, of Equitable Building, George street, Sydney, New South Wales. *A complete heat cycle for steam engines and steam boilers.*

No. 99 of 1900.—John William MacGillivray, gentleman, of 38 St. Petersburg Place, Bayswater, London, and Herbert Amos Hobson, analytical chemist, of 54 Church road, Acton, London. *The production of a concentrated hopped "wort."*

No. 100 of 1900.—Lewis Alexander Scott Elliot, merchant, of 8 Austin Friars, in the city of London. *Improvements in steam-boiler and other furnaces.*

No. 101 of 1900.—George Worsley, hat manufacturer, Albert Ernest Worsley, commercial traveller, both of Audenshaw, and Francis Cree, senior, mechanic, of Denton, all in the county of Lancaster, England. *Improvements in lock-stitch sewing machines.*

No. 102 of 1900.—George Worsley, hat manufacturer, Albert Ernest Worsley, commercial traveller, both of Audenshaw, and Francis Cree, senior, mechanic, of Denton, all in the county of Lancaster, England. *Improvements in winding thread and apparatus therefor.*

No. 103 of 1900 —William Elkin, mechanical engineer, of Calcutta. *A new or improved apparatus for gripping and holding securely one or more boxes, chests or the like in order that they may be lifted by a crane.*

No. 1082 P.—SPECIFICATIONS of the undermentioned inventions have been filed, under the provisions of the Inventions and Designs Act of 1888, in the office of the Secretary appointed under that Act, and copies have been sent to the Governments of Madras, Bombay, and Burma, and the Director of the Department of Land Records and Agriculture, North-Western Provinces and Oudh. These and other specifications are open to public inspection, from 11 A.M. to 4 P.M., at the Secretary's office (Imperial Secretariat, Government Place, West, Calcutta), on payment of a fee of one rupee, and a certified copy of any one of them will be supplied on payment of the fixed expenses of copying:—

No. 437 of 1898.—Alfred Edward Marriott, gentleman, residing at Ootacamund, Madras Presidency. *An improved tethering gear to be known as "the simplex tethering gear" and for improvements connected therewith.* (Specification filed 23 February 1900.)

No. 290 of 1899.—Amzi Lorenzo Barber, manufacturer, of 11 Broadway, in the city, county and State of New York, U. S. A. *Improvements in apparatus for propelling vehicles and in parts thereof, and in vehicles adapted for use with propelling apparatus.* (Specification filed 9 March 1900.)

No. 291 of 1899.—David John Van Praag, engineer, of 3 Hardwick Place, Hampstead Road, in the county of Middlesex, and Frederick William Harker, gentleman, of St. Margarets, Bridge Road, Maidenhead, in the county of Berks, England. *Improvements in acetylene generating apparatus and in lamps for use in connection therewith.* (Specification filed 9 March 1900.)

No. 292 of 1899.—David John Van Praag, engineer, of 3 Hardwick Place, Hampstead Road, in the county of Middlesex, and Frederick William Harker, gentleman, of St. Margarets, Bridge Road, Maidenhead, in the county of Berks, England. *Improvements in acetylene generating apparatus and the like.* (Specification filed 9 March 1900.)

No. 296 of 1899.—Ernsthausen, limited, merchants, Calcutta. *The improvement of indigo manufacture.* (Specification filed 13 March 1900.)

No. 297 of 1899.—Jacob Brown and Arthur Brown, special apparatus manufacturers, both of 2 Downing street, Manchester, in the county of Lancaster, England. *Improvements in and relating to saucepans for heating and boiling milk and other liquids.* (Specification filed 9 March 1900.)

No. 298 of 1899.—Binns Kershaw, manufacturer, of 62 Livesay street, Manchester, in the county of Lancaster, England. *Improvements in and connected with covers or slips for bed bolsters bed pillows and the like.* (Specification filed 9 March 1900.)

No. 299 of 1899.—Franz Walther Wartenberger, tanner, of 46 Esplanade, in the city of Hamburg, German Empire. *An improved process of tanning.* (Specification filed 12 March 1900.)

No. 309 of 1899.—The Liver Acetylene Gas company, limited, gas manufacturers, of 4 York Buildings, Dale street, Liverpool, in the county of Lancaster, England, and Evan Evans, ironmonger, of 45 Denbigh street, Llanrwst, in the county of Denbigh, in the principality of Wales. *Improvements in apparatus for generating acetylene or other gas generated by the addition of a liquid to a solid.* (Specification filed 12 March 1900.)

No. 311 of 1899.—Moriz Eissler, President of the Societé Internationale du gaz d'Eau, Brevets Straché (Societé Anonyme), établie à Bruxelles, of 2 Ebendorferstrasse, Vienna I, and Dr. Hugo Strache, general manager of the said Societé, of 14 Feldgasse, Vienna VIII, both in the Empire of Austria. *An improved reversing or change valve for use in water-gas generators.* (Specification filed 12 March 1900.)

No. 324 of 1899.—Andrew Stenhouse, timber merchant, of Morgan street, and Edwin Atkinson Whitehead, mechanical engineer, of Wolfram street, both in Brokenhill, in the colony of New South Wales. *An apparatus for automatically operating a valve or the like at any predetermined time or times.* (Specification filed 12 March 1900.)

No. 325 of 1899—Anton Pollak, electrician, of Hotel Royal, 45 Elisabethring, Joseph Virag, mechanical engineer, of 19 Elisabethring, Julius Egger, Company Director, of 7 Huszar Utca, all of Budapesth, in the Kingdom of Hungary, and Dr. Friedrich Silberstein, lawyer, of 5 Vorlaufstrasse, Vienna, in the Empire of Austria. *Improved method and apparatus for rapidly transmitting and recording telegrams.* (Specification filed 12 March 1900.)

No. 331 of 1899.—John James Marsland, engineer, of Nesbit road, Mazagon, Bombay *An improved seat and shoot for a latrine or privy, to be called "The Aryan combined privy seat and shoot."* (Specification filed 13 March 1900.)

No. 336 of 1899.—David Gilmour, lumber manufacturer, of Dundas street, in the town of Trenton, in the county of Hastings, in the province of Ontario, Canada. *Improvements in the manufacture of lumber.* (Specification filed 12 March 1900.)

No. 349 of 1899.—Adolphe Isidore Van Vriesland, engineer, of 78 Sarphatistraat, Amsterdam, Netherlands. *Improvements in and relating to carburetting apparatus.* (Specification filed 12 March 1900.)

No 350 of 1899.—Adolphe Isidore Van Vriesland, engineer, of 78 Sarphatistraat, Amsterdam, Netherlands. *A process for producing a constant mixture of air and carburetted-hydrogen vapours and apparatus therefor.* (Specification filed 12 March 1900)

No. 357 of 1899.—Charles Williamson Madden, clerk of works, East Indian Railway, Howrah. *An improved compensated railway signal winch.* (Specification filed 8 March 1900.)

No. 363 of 1899.—David Gilmour, lumber manufacturer, of Dundas street, in the town of Trenton, in the county of Hastings, in the province of Ontario, Canada. *Improvements in the method of manufacturing lumber.* (Specification filed 12 March 1900.)

No. 418 of 1899.—La Société Anonyme Le Carbo Siphon, manufacturers, of 92 Rue Royale Brussels, in the Kindom of Belgium. *Improvements in devices for use in the saturation of liquids with gases at high pressure.* (Specification filed 12 March 1900.)

No. 437 of 1899 —Samuel Thomas Gresham, engineer, of 6 Waterloo street, Calcutta. *An apparatus for passenger communication with driver and guard in connection with vacuum braked trains.* (Specification filed 8 March 1900.)

No. 440 of 1899.—Josiah Byram Millet, gentleman, of 221 Columbus Avenue, in the city of Boston, county of Suffolk and state of Massachusetts, U. S. A. *Improvements in and relating to submarine telegraphy and to apparatus therefor.* (Specification filed 12 March 1900.)

No. 442 of 1899.—Joseph Tibbetts Ward and John Blaisdell Curtis, builders and operators of cotton machinery, the former of 18 Church street and the latter of 78 Main street, both in Chicopee Falls, in the county of Hampden and state of Massachusetts, U. S. A. *Improvements in silver-receiving cans for cotton and other machines.* (Specification filed 12 March 1900.)

No. 448 of 1899.—William McConway, manufacturer, residing at 2851 Bedford Avenue, Pittsburg, in the county of Allegheny, state of Pennsylvania, U. S. A *Coupling mechanisms and draft and buffing apparatus for railway wagons.* (Specification filed 13 March 1900.)

No. 481 of 1899.—The Universal Fuel company, manufacturers of coke, a corporation organized under the laws of the state of New Jersey and having its principal offices located at Chicago, Illinois, U. S. A. *Improvements in the manufacture of coke.* (Specification filed 12 March 1900)

No. 1083 P.—THE fees prescribed in the fourth schedule to the Inventions and Designs Act of 1888 have been paid for the continuance of exclusive privilege in respect of the undermentioned inventions for the periods shown against each :—

No. 39 of 1889.—James Gresham. *Improvements in apparatus for applying sand and other substances to prevent the slipping of the driving wheels of locomotives.* (From 20 March 1900 to 20 March 1901.)

No. 298 of 1889.—Sir William Thomson. *Improvements in valves for water steam or other liquids or gases.* (From 15 March 1900 to 15 March 1901.)

No. 318 of 1889.—Leopold Cassella & Co. *Production of new red colouring matters.* (From 16 April 1900 to 16 April 1901.)

No. 332 of 1891.—William Tatham. *Improvements in or applicable to machinery for preparing and spinning fibrous materials.* (From 14 March 1900 to 14 March 1901.)

No. 1 of 1894.—George Ernest Hudson and George Sanderson. *An improved apparatus for supplying purified and heated feed water to the boilers of non-condensing steam engines.* (From 12 March 1900 to 12 March 1901.)

No. 4 of 1894.—James Price Cleghorn. *Manufacture of Indian cement.* (From 13 March 1900 to 13 March 1901.)

No. 319 of 1894.—James Gresham and Harry Edward Gresham. *Improvements in injectors and connected apparatus for feeding steam boilers with water.* (From 25 March 1900 to 25 March 1901.)

No. 1084 P.—WHEREAS the inventors of the undermentioned inventions have respectively failed to pay, within the time limited in that behalf by the fourth schedule to the Inventions and Designs Act of 1888, the fees hereinafter respectively mentioned, it is hereby notified that under the provisions of section 8, sub-section (2), of the said Act, the exclusive privilege of making, selling and using the said inventions in British India, and of authorising others so to do, has ceased :—

No 76 of 1895.—Patrick William Lenehan. *Improvements in and connected with the steam volves of locomotives and other steam engines of the compound type.* (Specification filed 4 December 1895.)

No. 100 of 1895.—Edward Fenchtwanger. *Improvements relating to the manufacture of artificial fuel.* (Specification filed 9 December 1895.)

No. 138 of 1895.—The Trentham Engineering company, limited. *An improved hot air motor* (Specification filed 4 December 1895.)

No 144 of 1895.—Martin Wanner. *An improved process of refrigeration and apparatus therefor.* (Specification filed 4 December 1895.)

No. 191 of 1895.—Joseph Hinks. *Improvements in or connected with oil lamp burners.* (Specification filed 4 December 1895.)

No. 202 of 1895.—Edward Brook Anderson. *An improved permanent pucca cooking range for household kitchens.* (Specification filed 9 December 1895.)

No. 220 of 1895.—George Lansell. *An improved method of and appliances for raising water from mines or elsewhere by means of compressed air.* (Specification filed 4 December 1895.)

No. 230 of 1895.—William Hose. *An improved device for weeding nurseries or plantations* (Specification filed 6 December 1895.)

No. 280 of 1895.—Joseph Archibauld Bentley. *A new or improved belting fastener.* (Specification filed 4 December 1895.)

Fee in respect of the continuance of an exclusive privilege—

4 (*a*) After the filing of the specification and before the expiration of the fourth year from the date of the filing thereof—

The sum of R50 for each of the above inventions.

NOTICES.

All communications relating to Act V (the Inventions and Designs Act) of 1888 should be addressed to the "Secretary to the Government of India, Department of Revenue and Agriculture (PATENTS BRANCH), CALCUTTA."

The Office of the Secretary under the Act is open for the transaction of business from 11 A.M. to 4 P.M. on all days except Sundays and gazetted holidays.

The Government of India are advised that, as trade marks are not "designs" within the meaning of the Act, they cannot be registered under Part II.

The fees payable under the fourth and sixth schedules are now collected in cash and applicants are warned that they must be responsible for any delay in cashing cheques.

Copies of the weekly notifications, and of the quarterly lists, of applications and specifications filed in the Secretary's office are now on sale to the public at one anna and eight annas a copy, respectively.

Attention is requested to the rules made by the Government on the 10th October, 1895, in regard to the preparation of applications, specifications and drawings.

All applications made under the Inventions and Designs Act. V of 1888, will from this date (December 19th, 1895) lie in the visitor's room of the Patents Office for ten days from the date of the *Gazette of India* in which their filing may have been notified ; or, if the tenth day is a holiday, till the evening of the office day next following.

At the time of delivering or sending an application for leave to file a specification, the applicant shall cause a duplicate copy of the application to be delivered or sent therewith to the Secretary.

S. C. HILL,

Offg. Secy. under the Inventions and Designs Act, 1888.

7, COUNCIL HOUSE STREET;
Calcutta, the 22nd March, 1900

THE RESIDENT IN MYSORE.

NOTIFICATION.

Bangalore, the 27th February, 1900.

No. 983.—In exercise of the powers conferred by sections 5 and 13 of the Opium Act, 1878 (I of 1878), as applied to the Civil and Military Station of Bangalore, and with the previous sanction of the Governor-General in Council, the Resident in Mysore is pleased to make the following rules in supersession of all previous rules on the subject :—

PRELIMINARY.

I.—These rules shall apply to the Civil and Military Station of Bangalore, and shall come into force on, and with effect from, the 1st day of April 1900.

II.—In these rules, unless there is anything repugnant in the subject or context,—

"the Resident" means the Resident in Mysore;
"the Collector" means the Collector of the Civil and Military Station of Bangalore,
"farmer" means a person who has obtained a farm from the Collector under Rule XIII;
"licensed vendor" means a person who has obtained a license for sale by retail under Rule X or XIV;
"medical practitioner" means a person to whom a special license has been granted under Rule V;
"opium" does not include poppy heads, preparations or admixtures of opium and intoxicating drugs prepared from the poppy;
"poppy heads" means the dry capsules of the poppy plant; and

sale "by retail" means the sale in a single transaction of opium and intoxicating drugs prepared from the poppy in any quantity not exceeding three tolas in weight, of poppy heads in any quantity not exceeding five sers in weight and of preparations and admixtures of opium, other than those used for smoking, in any quantity not containing more than three tolas of crude opium.

MANUFACTURE.

III —(*i*) Preparations or admixtures of opium or intoxicating drugs prepared from the poppy, other than preparations or admixtures of opium used for smoking, may be manufactured :—

(*a*) on account of the Government;

(*b*) by a farmer or licensed vendor for wholesale or retail sale in accordance with these rules and with the conditions of his farm or license;

(*c*) by a medical practitioner for medical purposes, or by any person for his own domestic use provided that such manufacture is in quantities not exceeding those in which the possession of the said articles is permitted by these rules, and is from opium of which the possession is similarly permitted.

(*ii*) Preparations or admixtures of opium used for smoking may be manufactured by any person for his own domestic use, but not for sale, in any quantity not exceeding one tola in weight from opium of which he is permitted by these rules to be in possession.

POSSESSION.

IV.—(*i*) Any person may possess :—

(*a*) opium and intoxicating drugs prepared from the poppy in any quantity not exceeding three tolas in weight, poppy heads in any quantity not exceeding five sers in weight and preparations or admixtures of opium, other than those used for smoking, in any quantity not containing more than three tolas of crude opium :

Provided that the said articles have been purchased from a farmer, licensed vendor or licensed medical practitioner, or have been manufactured from opium so purchased :

Provided also that the Collector may specially authorize the possession by any person of any or all of the said articles in any quantity not exceeding one ser in weight:

(*b*) preparations or admixtures of opium used for smoking to the extent of one tola, provided that such preparations have been manufactured by the possessor for private consumption and not for sale under the conditions of Rule III (*ii*) above.

(*ii*) Subject to the conditions of his farm or license, a farmer or licensed vendor may possess opium, poppy heads, preparations or admixtures of opium or intoxicating drugs prepared from the poppy, other than preparations or admixtures of opium used for smoking in any quantity; and a medical practitioner may possess them in any quantity not exceeding one ser of opium, ten sers of poppy heads and one ser of preparations or admixtures of opium or intoxicating drugs prepared from the poppy at one time :

Provided that the said articles have been purchased from the Government or from a farmer, licensed vendor or medical practitioner, as prescribed in the possessor's farm a license or otherwise in these rules, or have been manufactured from opium so purchased :

Provided also that the Collector may in any special case authorize the possession by a medical practitioner of any or all of the said articles in any quantity.

V.—The Collector may grant to any medical practitioner a special license, in such farm as may be prescribed by the Resident, for the possession in accordance with the provisions of the last preceding rule, and sale by retail, for medical purposes only, of opium, poppy heads and preparations or admixtures of opium or intoxicating drugs prepared from the poppy, other than preparations or admixtures of opium used for smoking.

TRANSPORT.

VI.—Any person may transport opium and preparations or admixtures of opium and intoxicating drugs prepared from the poppy of which he is lawfully in possession, from a place where he has purchased any or all of the said articles or manufactured the preparations or admixtures of opium or intoxicating drugs prepared from the poppy, to a place where he is licensed to manufacture or sell the said articles or where he may lawfully consume them.

IMPORT.

VII.—(*i*) The import of opium on account of the Government shall be permitted on the condition that the opium is covered by a pass granted by the Opium Agent at Indore.

(*ii*) A medical practitioner may, with the special permission of the Collector and subject to such conditions as the Collector may prescribe, import such preparations or admixtures of opium or intoxicating drugs prepared from the poppy (other than preparations or admixtures of opium used for smoking) as are not locally procurable, to the extent of the quantities of the said articles of which he is permitted by these rules to be in possession.

SALE.

VIII.—Opium and preparations or admixtures of opium, poppy heads and intoxicating drugs prepared from the poppy, other than preparations or admixtures of opium used for smoking, may

be sold by retail to any person legally authorized to possess the same by a person holding a license in that behalf; and may also be sold for medical purposes only, by a medical practitioner holding a license granted to him under Rule V, to the extent and subject to the conditions specified in such license.

IX.—(*i*) Opium in quantities of not less than one ser shall, on prepayment at such rates as the Resident may prescribe by notification in the official gazette, be supplied by the Collector to any farmer, licensed vendor or medical practitioner.

(*ii*) No opium shall be sold by wholesale or retail which has not been bought from the Collector or from a licensed vendor.

(*iii*) No opium or poppy heads or preparation or admixture of opium, or intoxicating drug prepared from the poppy, shall be sold wholesale, except under special order from the Collector, or as next hereinafter provided.

(*iv*) A licensed vendor or farmer may sell any quantity of opium, poppy heads or preparations or admixtures of opium or intoxicating drugs prepared from the poppy, other than preparations or admixtures of opium used for smoking, to another licensed vendor or farmer, and a quantity not exceeding one ser of opium, ten sers of poppy heads and one ser of preparations or admixtures of opium or intoxicating drugs prepared from the poppy to a medical practitioner.

(*v*) A medical practitioner may sell to another medical practitioner a quantity not exceeding ten sers of poppy heads or one ser of preparations or admixtures of opium or intoxicating drugs prepared from the poppy, other than preparations or admixtures of opium used for smoking.

X.—(*i*) Licenses for the sale by retail of opium, poppy heads or preparations or admixtures of opium, or intoxicating drugs prepared from the poppy, other than preparations or admixtures of opium used for smoking, may be granted by the Collector.

(*ii*) Such limited number of shops for the retail vend of opium, poppy heads or preparations or admixtures of opium, or intoxicating drugs prepared from the poppy as aforesaid, as the Resident may from time to time decide, shall be allowed, and the monopoly of retail vend at such shops shall be sold for such fee as the Resident may fix, or it may be put up to auction at the commencement of each official year. The shops shall be disposed of singly or in groups, as the Resident may direct.

XI.—Licenses for the sale by retail of opium, poppy heads or preparations or admixtures of opium or intoxicating drugs prepared from the poppy, other than preparations or admixtures of opium used for smoking, shall be in such form as may be prescribed by the Resident.

XII.—Licenses for the sale by retail of opium, poppy heads or preparations or admixtures of opium or intoxicating drugs prepared from the poppy other than preparations or admixtures of opium used for smoking, shall be granted for one year only, unless the Resident otherwise specifically directs.

XIII.—(*i*) With the sanction of the Resident, and subject to such conditions (if any) as may be imposed as hereinafter provided, the Collector may farm the duties leviable on the sale by retail of opium, poppy heads or preparations or admixtures of opium or intoxicating drugs prepared from the poppy, other than preparations or admixtures of opium used for smoking, for a term not exceeding five years.

(*ii*) The Resident may prescribe conditions—

(*a*) for the invitation and acceptance of tenders for the farm of such duties.

(*b*) as to the forms and conditions of the farms; and,

(*c*) for the requisition of security for the due fulfilment of the engagements entered into by the farmers.

(*iii*) Any breach of the conditions of a farm granted under this rule shall over and above any other penalty, subject the farm to annulment by the authority by whom it was granted.

XIV.—When duties are farmed under the last foregoing rule, the farmer may issue, within the limits of his farm, licenses for the sale by retail of opium, poppy heads or preparations or admixtures of opium, or intoxicating drugs prepared from the poppy other than preparations or admixtures of opium used for smoking. Such licenses shall be countersigned by the Collector, and shall then have the force of licenses issued by the Collector under Rule X and shall contain such of the conditions of the said licenses as the Collector may prescribe, and may be cancelled at the discretion of the Collector for the breach of any of these conditions.

XV.—Before entering into engagement for the farm of such duties, the Collector may make such reservations or restrictions with respect to the grant of licenses by the farmer as he thinks fit.

XVI.—Every farmer shall file in the Collector's office, in such form as may from time to time be prescribed by the Collector, a list of all licenses granted by him.

XVII.—With the sanction of the Resident, the Collector may cancel any farm granted under Rule XIII, or may within the period of such farm impose any new reservation or restriction on the farmer.

XVIII.—If a farm is cancelled for any cause other than a breach of the conditions imposed under Rule XIII upon the farmer, or if any reservation or restriction in respect of the grant of licenses is imposed under the last foregoing rule during the term of the farm, the Resident may award to the farmer compensation for any loss thereby caused to him.

XIX.—If any licensed vendor or farmer, on the expiry of his license or farm, has in his possession any opium, poppy heads or preparations or admixtures of opium or ictoxicating drugs prepared from the poppy, other than preparations for admixtures of opium used for smoking, which he is unable to dispose of to the satisfaction of the Collector by private sale to other licensed vendors or farmers, he shall surrender the same to the Collector; and the incoming licensed vendor or farmer, or, if the expired license or farm is not renewed, any licensed vendor or farmer within the district shall, when required by the Collector, be bound to purchase the articles aforesaid, to the extent of two months' supply, at such price and in such quantities as the Collector shall adjudge :

Provided that the price thus adjudged shall in no case exceed the rate at which opium can be procured from the Government;

Provided also that, if such articles are declared by the Residency Surgeon to be unfit for use, the Collector shall cause the same to be destroyed.

GENERAL.

XX.—Subject to the limits and conditions laid down in these rules, in respect to possession, the import and transport of poppy heads is permitted.

XXI.—Except where otherwise specially provided in the foregoing rules, the possession, transport, import or sale of opium, poppy heads and preparations or admixtures of opium or intoxicating drugs prepared from the poppy, other than preparations or admixtures of opium used for smoking, by or on behalf of the Government shall be unrestricted.

DISPOSAL OF THINGS CONFISCATED.

XXII.—Opium, poppy heads or any preparation or admixture of opium or intoxicating drugs prepared from the poppy confiscated under the Opium Act, 1878, shall be examined by the Residency Surgeon, and, if declared by him to be fit for use, shall be sent to the Resident's Treasury, and be disposed of as the Collector may direct. If declared to be unfit for use, it shall be immediately destroyed.

XXIII.—All property, other than opium, poppy heads or any preparation or admixture of opium or intoxicating drugs prepared from the poppy, which is confiscated under the Opium Act, 1878, shall be sold under the orders of the Magistrate or other officer by whom the confiscation was adjudged.

REWARDS

XXIV.—Any Magistrate convicting an offender under section 9, or any Magistrate or other authorised officer ordering the confiscation of opium, poppy heads or any preparation or admixture of opium or intoxicating drug prepared from the poppy, under section 12, of the Opium Act, 1878, may grant a reward, not exceeding the value of the article or articles confiscated in addition to the amount of any fine realized, in such proportions as he may think fit to any person or persons who have contributed to the seizure of the article. or articles or the conviction of the offender.

XXV.—If in any case the fine or forfeiture is not realized, the Collector may sanction such reasonable reward, not exceeding the amount of the fine and forfeiture, as may seem appropriate. The Resident may also by general order declare what classes of Excise Officers shall receive rewards, and what classes shall have no title to share therein.

XXVI.—The powers referred to in the third paragraph of section 12, section 19 and section 24, respectively, of the Opium Act, 1878, may be exercised by the Collector.

H. R. C. DOBBS,

First Assistant Resident.

APPENDIX.

Special License to Medical practitioners under Rule V.

Special license is hereby granted under Rule V of the Opium Rules of the Civil and Military Station of Bangalore published with the Resident's Notification No. dated th 190 .
to
following the profession of at
for the possession and sale by retail of opium, poppy heads and preparations or admixtures of opium and intoxicating drugs prepared from the poppy, other than preparations or admixtures of opium used for smoking, subject to the following conditions, *viz.* :—

3. That he shall not open his shop, or make sale therein before sunrise; that he shall not keep it open, or make sale therein, after 9 P.M.; and that he shall not harbour any person therein during the night.
4. That he shall not permit persons of notoriously bad character to resort to his shop ; that he shall prevent gaming and disorderly conduct therein ; and that he shall give information to the nearest Magistrate or Police Officer of any suspected person who may resort to his shop.
5. That he shall have constantly fixed up, at the entrance of his shop, a sign-board bearing the following inscription in legible characters in the Vernacular language and in English :—

(Name of Vendor) licensed to sell by retail opium, poppy heads, preparations or admixtures of opium and intoxicating drugs prepared from the poppy, other than preparations or admixtures of opium used for smoking.

6. That he shall keep up daily an account in the following form showing the receipt and deliveries of opium, poppy heads, preparations or admixtures of opium and intoxicating drugs prepared from the poppy other than preparations or admixtures of opium used for smoking, at his shop each day, and the balance in store :—

Date.	Quantity of opium, etc., in store from yesterday.	Quantity of opium, etc., received this day and whence received.	Total quantity to be accounted for.	Quantity sold this day.	Quantity left in store.

7. That he shall not sell hemp drugs.

8. That he shall immediately produce his license and accounts for inspection on the demand of any Officer of any Departments of Excise, Police, Customs, Salt, Opium, or Revenue, superior in rank to a peon or constable, and that he shall not prevent any such officer of whatever rank from entering his shop at any hour of the day or night.

9. This license shall have effect from to and unless renewed by the order of the Collector by the day of , being the expiration of the period for which it was granted, shall cease to remain in force, notwithstanding that a special order recalling it has not been issued by the Collector.

10. This license may be recalled by the Collector

(*a*) for default of punctual payment of the duty stipulated to be paid in clause 1 ;
(*b*) for violation of any of the conditions specified in this license :
(*c*) if the holder of this license be convicted of breach of the peace or any other criminal offence
(*d*) if the Collector has reason to believe that the license holder either smuggles himself or connives at smuggling.

If the license is recalled for any of these causes, the license-holder shall have no claim to any compensation or to any refund of any duty or instalment of duty already paid. But it shall be in the discretion of the Collector to make such compensation or refund if he considers it necessary or advisable to do so.

If the Collector desires to recall this license before the expiry of the period for which it has been granted for any cause other than those hereinbefore specified (*a*), (*b*), (*c*) (*d*) he shall give 15 days' previous notice and remit a sum equal to the duty for fifteen days, or, if notice be not given, shall make such further compensation in default of notice as the Resident may direct.

11. This license may be surrendered by the license-holder on his giving one month's notice to the Collector and paying such fine not exceeding the amount of the duty for six months, or the loss caused to Government by the failure to carry out any condition imposed as the Collector may adjudge.

If the Collector is satisfied that the reason for surrendering the license is adequate, he may, with the sanction of the Resident, remit the fine.

12. On the infringement of any of the above Articles or of any conditions imposed by the Opium Act, 1878, or by the rules made thereunder, this license, and any other license or licenses that the holder may have obtained for the sale of opium, poppy heads, preparations or admixtures of opium and intoxicating drugs prepared from the poppy, other than preparations or admixtures of opium used for smoking, shall be forfeited.

Granted this day of 190 .

Seal of the
Collector.

Collector.

JUDICIAL COMMISSIONER IN BRITISH BALUCHISTAN.

NOTIFICATIONS.

Quetta, the 17th March, 1900.

No. 166-J.—With the previous sanction of the Agent to the Governor-General in Baluchistan, the following rules are made by the Judicial Commissioner regarding the fees to be paid for processes under section 90 of the Baluchistan Agency Civil Justice Law, 1896, and section 20 of the Baluchistan Agency Criminal Justice Law, 1896.

Rules.

I. The Civil Courts of the territories administered by the Agent to the Governor-General in Baluchistan, as such Agent, shall, for the purposes of levying process-fees, be divided into four grades, as shown in the annexed table.

Grade.	Name of Court.
First	Court of the Judicial Commissioner.
Second	Courts of Political Agents.
Third	Courts of Assistant Political Agents, Extra Assistant Commissioners and Native Assistants.
Fourth	" Small Causes, Munsiffs, Tahsildars and Naib Tahsildars.

II. Fees shall be levied in each grade of Court according to the scale hereto annexed :—

Nature of Process.	Court of 1st grade.	Courts of 2nd grade.	Courts of 3rd grade.	Courts of 4th grade.
	R a. p.	R a. p.	R a. p.	R a. p.
Summons, notice or other process not being a warrant of arrest or of attachment .	2 0 0	1 0 0	0 8 0	0 4 0
Warrant of attachment . . .	4 0 0	2 0 0	1 0 0	0 8 0
Warrant of arrest	4 0 0	2 0 0	2 0 0	2 0 0

III. A separate process shall be issued for each person summoned or arrested, or upon whom a notice is served, and, subject to the rule next following, a separate fee shall be charged for each process.

IV. When any process, other than a warrant of arrest or of attachment, is to be served upon four or more persons being parties, one fee only shall be charged in respect of the first four processes according to the scale in Rule II, and an additional fee shall be charged for each process to be served in excess of four according to the subjoined scale : provided that the aggregate amount of the fee leviable under this rule shall not exceed the maximum prescribed in such scale for each grade of Court :—

	Court of 1st grade.	Courts of 2nd grade.	Courts of 3rd grade.	Courts of 4th grade.
	R a. p.	R a. p.	R a. p.	R a. p.
Rate of additional fee	0 8 0	0 4 0	0 2 0	0 2 0
Maximum	15 0 0	10 0 0	5 0 0	2 8 0

NOTE.—This rule is not applicable to processes issued for service on witnesses.

V. No fee shall be chargeable for any process of a Criminal Court issued through the Police in cognizable cases. In non-cognizable cases a uniform fee of four annas shall be levied for every such process, whether it be issued through the process-serving establishment or the Police.

VI. A process issued by any Court in British territory, whether of Civil or Criminal jurisdiction, shall be served free of charge by any Court in the Agency territories, if it be certified on the process that the proper fee has been levied under the rules in force in the territory in which the Court issuing the process is situated. When any Court, in the Agency territories, whether of Civil or Criminal jurisdiction, sends a process for service or execution to any Court beyond its jurisdiction, it shall endorse on the process a certificate that the fee chargeable under Rule II or Rule IV, as the case may be, has been levied.

VII. Processes to be served in, or in the neighbourhood of, head-quarter stations of districts and tahsils will be served by peons of the Courts. Beyond such limits the processes will be served by levies under such rules as the Political Agents may from time to time issue.

VIII. No process shall be prepared or issued until the proper Court-fee has been filed. When the Court-fee has been put in, the process shall be prepared, and the Court-fee label affixed to the diary of process-fees and immediately punched, leaving the party to issue the process or not as he thinks fit. This will obviate the necessity for any refund of the value of Court-fees filed on account of processes which are not eventually issued.

IX. On every process issued from any Court there shall be recorded the name of the person deputed to serve or execute the same, the period within which he is required to certify service or execution, the amount of fee paid and the date of payment; and the date of return after service or execution shall be subsequently endorsed. Such endorsements shall be signed by the Nazir, or, in Courts where there is no Nazir, by the Judicial Mohurrir.

X. An account of process-fee stamps filed and of processes issued (Civil and Criminal) shall be kept for each Court in prescribed form.*

*Register No. XXIII.

XI. With the record of each Civil case, and of each Criminal case in which process-fees are levied, should be kept a separate sheet of paper which should be devoted to the sole purpose of

maintaining a record of process-fees to be termed the "Diary of process-fees." This Diary should be in Baluchistan Agency Form No. 3 (Vernacular), and should form a portion of File A. In it entries should be made in chronological order of every process ordered to be issued in the case, and the stamps should be affixed opposite each entry and cancelled immediately upon being affixed

No. 167-J.—With the previous sanction of the Chief Commissioner in British Baluchistan, the following rules are made by the Judicial Commissioner regarding the fees to be paid for processes under section 90 of the British Baluchistan Civil Justice Regulation, 1896, and section 20 of the British Baluchistan Criminal Justice Regulation, 1896:—

Rules.

I The Civil Courts of British Baluchistan shall, for the purpose of levying process-fees, be divided into four grades, as shown in the annexed table :—

Grade.	Name of Courts.
First	Court of the Judicial Commissioner.
Second	Courts of Deputy Commissioners.
Third	Courts of Assistant Commissioners, Extra Assistant Commissioners.
Fourth	Courts of Small Causes, Munsiffs, Tahsildars and Naib-Tahsildars.

II. Fees shall be levied in each grade of Court according to the scale hereto annexed :—

Nature of Process.	Court of 1st grade.	Courts of 2nd grade.	Courts of 3rd grade.	Courts of 4th grade.
	R a. p.	R a. p.	R a. p.	R a. p.
Summons, notice or other process not being a warrant of arrest or attachment.	2 0 0	1 0 0	0 8 0	0 4 0
Warrant of attachment	4 0 0	2 0 0	1 0 0	0 8 0
Warrant of arrest	4 0 0	2 0 0	2 0 0	2 0 0

III. A separate process shall be issued for each person summoned or arrested, or upon whom a notice is served, and, subject to the rule next following, a separate fee shall be charged for each process.

IV. When any process, other than a warrant of arrest or of attachment, is to be served upon four or more persons being parties, one fee only shall be charged in respect of the first four processes according to the scale in Rule II, and an additional fee shall be charged for each process to be served in excess of four according to the subjoined scale : provided that the aggregate amount of the fee leviable under this rule shall not exceed the maximum prescribed in such scale for each grade of Court :—

	Court of 1st grade.	Courts of 2nd grade.	Courts of 3rd grade.	Courts of 4th grade.
	R a. p.	R a. p.	R a. p.	R a. p.
Rate of additional fee	0 8 0	0 4 0	0 2 0	0 2 0
Maximum	15 0 0	10 0 0	5 0 0	2 8 0

NOTE.—This rule is not applicable to processes issued for service on witnesses.

V. No fee shall be chargeable for any process of a Criminal Court issued through the Police in cognizable cases. In non-cognizable cases a uniform fee of four annas shall be levied for every such process, whether it be issued through the process-serving establishment or the Police.

VI. A process issued by any Court in British territory, whether of Civil or Criminal jurisdiction, shall be served free of charge by any Court in British Baluchistan, if it be certified on the process that the proper fee has been levied under the rules in force in the territory in which the Court issuing the process is situated. When any Court in British Baluchistan, whether of Civil or Criminal jurisdiction, sends a process for service or execution to any Court beyond its jurisdiction, it shall endorse on the process a certificate that the fee chargeable under Rule II or Rule IV, as the case may be, has been levied.

VII. Processes to be served in, or in the neighbourhood of, head-quarter stations of districts and tahsils will be served by peons of the Courts. Beyond such limits the processes will be served by levies under such rules as the Deputy Commissioners may from time to time issue.

VIII. No process shall be prepared or issued until the proper Court-fee has been filed. When the Court-fee has been put in, the process shall be prepared, and the Court-fee label affixed to the diary of process-fees and immediately punched, leaving the party to issue the process or not as he thinks fit. This will obviate the necessity for any refund of the value of Court-fees filed on account of processes which are not eventually issued.

IX. On every process issued from any Court there shall be recorded the name of the person deputed to serve or execute the same, the period within which he is required to certify service or execution, the amount of fee paid, and the date of payment, and the date of return after service or execution shall be subsequently endorsed. Such endorsements shall be signed by the Nazir, or, in Courts where there is no Nazir, by the Judicial Mohurrir.

X. An account of process-fee stamps filed and of processes issued (Civil and Criminal) shall be kept for each Court in prescribed form.*

*Register No. XXIII.

XI. With the record of each Civil case, and of each Criminal case in which process-fees are levied, should be kept a separate sheet of paper, which would be devoted to the sole purpose of maintaining a record of process-fees, to be termed the "Diary of process-fees." This diary should be in Baluchistan Agency Form No 3 (Vernacular , and should form a portion of File A. In it entries should be made in chronological order of every process ordered to be issued in the case, and the stamps should be affixed opposite each entry and cancelled immediately upon being affixed.

J. RAMSAY, *Captain,*
Offg. Judicial Commissioner.

AGENT TO THE GOVR.-GENERAL IN BALUCHISTAN.

NOTIFICATION.

Quetta, the 12th March, 1900.

No. 2161.—Captain W. E. A. Armstrong, I.M.S. (Madras), assumed charge of the duties of Civil Surgeon, Quetta, with effect from the forenoon of the 26th February 1900, relieving Captain E. G. R. Whitcombe.

By Order,
R. BULLER HUGHES,
First Assistant.

AGENT TO THE GOVR.-GENERAL AND CHIEF COMMISSIONER IN BALUCHISTAN.

NOTIFICATION.

Quetta, the 12th March, 1900.

No. 2174.—Rai Sahib Pandit Nand Lall, Extra Assistant Commissioner and Personal Native Assistant to the Agent to the Governor-General in Baluchistan, is granted privilege leave for one month and fifteen days with effect from the forenoon of the 1st March 1900.

By Order,
R. BULLER HUGHES,
First Assistant.

CHIEF COMMISSIONER OF AJMER-MERWARA.

NOTIFICATIONS.

Abu, the 27th February, 1900.

No. 1056F.—The services of Lieutenant E. N. Heale, 7th Regiment of Bombay Infantry, are replaced at the disposal of the Department of Revenue and Agriculture with effect from the afternoon of the 22nd February 1900.

The 15th March, 1900.

No. 252.—The Chief Commissioner, Ajmer-Merwara, is pleased to make the following rules under the powers conferred by section 652 of the Code of Civil Procedure for regulating the admission of applications for the exercise of the revisional powers of the Chief Commissioner under section 622 of the said Code and section 25 of the Provincial Small Cause Courts Act, 1887:—

Rules.

1. An application to the Court of the Chief Commissioner, Ajmer-Merwara, to exercise the powers conferred by section 622 of the Code of Civil Procedure, drawn up by an Advocate or Pleader or by a Mukhtar or petition-writer, shall specify the particular ground on which the aid of the Court is invoked:
   (*a*) if the ground be that the Court which decided the case exercised a jurisdiction not vested in it by law, the application shall set out clearly the particular exercise of jurisdiction complained of;
   (*b*) if it be that the Court which decided the case failed to exercise a jurisdiction so vested, the jurisdiction which ought, in the applicant's opinion, to have and has not been exercised shall be clearly set out;
   (*c*) if it be that the Court acted in the exercise of its jurisdiction illegally or with material irregularity, the particular illegality or irregularity, or illegalities or irregularities, complained of shall be clearly set out.
2. An application to exercise the power conferred by section 25 of Act IX of 1887, drawn or supported as described in rule 1. shall specify in what particular the decree or order of the Small Cause Court is not according to law.
3. Any application not drawn up in conformity with the foregoing directions may be returned for amendment within a time to be specified in an order to be recorded by the Chief Commissioner on the application.

By Order,
A. D. BANNERMAN, *Captain,*
First Assistant to the Agent to the Governor-General, Rajputana, and Chief Commissioner, Ajmer-Merwara.

Rangoon and Moulmein . .	29th ,,	Per B. I. S. N. Co.'s Steamer.
Rangoon, Moulmein, Tavoy, Mergui, Penang and Singapore.	26th ,,	Ditto.
Rangoon and Moulmein . .	24th ,,	Ditto.
Akyab, Kyaukpyu and Sandoway.	24th ,,	Ditto.
Ditto ditto . .	26th ,,	Per land route *viâ* Chittagong.
Ditto ditto A.M. At 5-30	27th ,,	Ditto.
South Africa	24th ,,	Transport Str. from Bombay.
Mauritius, Réunion and Seychelles	26th ,,	*Viâ* Tuticorin and Colombo.

*Although the date entered in column 2 is, as far as can be calculated, the latest safe date of posting for the next Mail Steamer, full allowance being made for the steamer being in advance of her published timing, Mails for the places mentioned in column 1 are despatched daily to Colombo, so that they may proceed by any steamer that has been unusually accelerated or retarded, or by any special opportunity that may be afforded by a steamer not belonging to one of the regular lines.

The letter-box for Inland articles will be cleared for the forenoon Mails at the following hours:—

For Goalundo and Chittagong Express train at 5-30 A.M.
For Eastern districts as far as Dacca at 6-30 A.M.
For Midnapore, Orissa and Madras Presidency at 7-30 A.M.
For Bombay Mail *viâ* Nagpur at 7-30 A.M. and with a late fee of ½ anna up to 8 A.M.
For Khulna Line at 8-15 A.M.

The letter-box will be cleared for the evening Mails without late fee at the following hours, *viz.*:—

For E. I. Railway Loop Mail at 2-30 P.M. and up to 2-55 P.M. with a late fee of ½ anna.
For Darjeeling and Assam at 3-25 P.M. without late fee, and 3-50 P.M. with late fee of ½ anna.
For the Bombay Mail *viâ* Jubbulpore carrying also Mails for Ceylon at 6 P.M.
For the Punjab Mail at 7-30 P.M.
For Midnapore District only at 7-30 P.M.
For Khulna Mail at 7-30 P.M.
For Eastern Bengal Mail at 7-30 P.M.

Late letters bearing a fee of ½ anna will be received for the Bombay Mail *viâ* Jubbulpore up to 6-30 P.M. and for other Mails from 7-30 to 8 P.M., and from 8-0 to 8-45 P.M. with a late fee of 1 anna for the Punjab and Eastern Bengal Mails only.

Late registered articles will be received between the following hours:—

For Offices served by the Bombay Mail *viâ* Allahabad and Jubbulpore from 5 P.M. to 6-15 P.M.
For Offices served by the Punjab Mail from 6 P.M. to 7 P.M.
For Offices served by the Eastern Bengal Mail from 6 P.M. to 7 P.M.
For Offices served by the Khulna Mail from 6 P.M. to 7 P.M.

The late fee on each registered letter will be two annas, which must be prepaid in stamps on the letter.

Articles for Burma and for Port Blair by Sea are received without late fee up to 7-30 P.M., after which hour they are received fully prepaid and bearing an extra stamp of ½ anna up to 8 P.M.

On the latest safe day of despatch of the Mail for the Australasian Colonies *viâ* Tuticorin, the letter-box for Foreign articles will be cleared for the last time for articles without the late fee at 6 P.M., and late letters and papers fully prepaid will be received up to 6-30 P.M.

On the day of despatch of the Mail for Europe (Thursday), the letter-box for Foreign articles will be cleared for the last time for articles without the late fee at 6-30 P.M., and late letters and papers fully prepaid will be received up to 6-45 P.M. Late registered articles will be received from 5 to 6 P.M. On other days the letter-box for Foreign articles will be cleared for the last time without the late fee at 6 P.M., and late letters and papers will be received up to 6-30 P.M. for despatch by any Foreign Mails *viâ* Tuticorin, Madras, or Bombay the same night and up to 8-30 P.M., late letters and papers up to 9 P.M., for any Foreign Mails despatched by Sea. The late fee for Foreign articles is 4 annas, which must be prepaid in stamps affixed to the articles.

JOHN OWENS,
Presidency Postmaster, Calcutta.

Catalogue of Books procurable from Thomason College Book Depot, Roorkee.

Application to be made to Curator.

CASH MUST ACCOMPANY ORDER. ARTICLES WILL BE SENT BY VALUE-PAYABLE POST TO PERSONS IN GOVERNMENT EMPLOYMENT ONLY.

It is advised that letters containing remittances be registered.

N.B.—The Revised Prices herein entered cover the cost of packing, postage, and other incidental charges (except commission for Value-payable supplies), and are for all purchasers other than resident College Students.

ROORKEE TREATISE ON CIVIL ENGINEERING IN INDIA.

Royal Octavo, with numerous Plates.

Volumes I and II are published in separate convenient sized Sections, as below, but can be bound up if required :—

VOLUME I.*

Section	I.	Building Materials (1898),	R2-0.
„	II.	Masonry (1898),	R1-4.
„	III.	Carpentry (1898),	R1-8.
„	IV.	Earthwork (1892),	R1-4.
„	V.	Tools and Plant (never published).	

VOLUME II.*

Section	VI.	Buildings (1899),	R1-4.
„	VII.	Bridges (1897),	R4-4.
„	VIII.	Roads (1897),	R1-8.
„	IX.	Railways (1891),	R1-4.
„	X.	Irrigation Works.	(Under revision.)

ROORKEE MANUAL OF APPLIED MECHANICS.

Vol. I. Direct and Transverse Strain, principally by Analytical Methods. R7.

„ II. The Stability of Structures, mostly by Graphic Methods (in the Press).

MANUALS.

VII. **Surveying** (by Major Firebrace, R.E.) (7th edition, with Curve Table). R3.

XIII. **Drawing** (by Lieut. R. Pulford, R.E.). † R6.

XIIIa. **Drawing, First Principles of Geometrical** (by do.) R1-4.

XIV. **Simple Applied Mechanics,** (3rd edition), Parts I and II in one. R1-8.

Simple Applied Mechanics, Part II (1st edition). 8*a*.

XV. **Examples of Estimating.** Comprising a progressive series of Estimates (with Plans of Buildings and Bridges, worked in detail). By P. Keay, Esq., and revised by C. C. Sullivan, Esq., Head Master (5th edition). R3-12.

XVI. **Earthwork Estimating,** with Practical Tables and Diagrams. By Major A. M. Brandreth, R.E. R1.

XVII. **Specimens of Printing** used in the College Drawing Course and Entrance Examinations. 6*a*

Note.—The complete Treatise forms the course of the Civil Engineer and Upper Subordinate classes at the Thomason College in Civil Engineering. The other Manuals are the complete course for both Classes in the several subjects of which they treat.

MISCELLANEOUS.

ENGINEERING WORKS.

Curve Tables, complete, for laying any curve. 4*a*.

Scantlings of Timber for Roofs. Tables and investigation of formulæ for determining size of timbers for Flat Roofs from 8 to 22 feet span, and for Trussed Roofs from 16 to 50 feet span (2nd edition). By P. Keay, Esq., Head Master. 12*a*

Notes on Chemistry of Building Materials. R1-8.

Tate's Mechanism. R1.

Barman's Descriptive Mineralogy. R2-4.

* Date of Edition on sale.

† Originally published at R15, reduced to R6.

Useful Rules and Tables relating to Measurement of Timber. Rules for computing the cubic contents of Round Logs, as well as of Sawn Timbers, with Tables, etc. By Rai Kunhya Lal. R2-8.

O'Callaghan's Earthwork Tables for India, in one large sheet, 12a.; mounted on cloth and bound. R1-12.

Tables for Computing Earthwork in Distributaries and small open Channels, in use in Irrigation Department, N.-W. Provinces. 12a.

Tyndall's Hand-Book of Specifications. (In the Press.)

The Indian Engineer's Pocket Book. R1.

Wooden Bridges and Designs. By Rai Kunhya Lal. (In the Press.)

Blasting under Water (2nd edition). 10a.

Waugh's Instructions for Topographical Surveying. R1.

Analysis of Lime and Cement Stones. By Murray Thomson, Esq., M.D., F.R.S.E. 6a.

Chart, giving by a graphic method the discharges of earthen channels up to 40 feet bed width, very useful for Projects. R1-6.

SCIENCE BOOKS.

Wilson's Inorganic Chemistry. R1-8.

MATHEMATICAL.

Boileau's Tables of Wages and Rent, and of the value of goods. Tables for converting Seers and Chittacks into decimals of a Maund, and Annas and Pies into decimals of a Rupee. With a few others of general utility (4th edition). R1-8.

Boileau's Tables of Log sin² ½ P (for computing time 4a.)

Cape's Logarithms, with Tables of Squares, Cubes, etc. R1-4.

Cape's Geometry. R1-4.

Cape's Mechanics. 8a.

Todhunter's Plane Trigonometry. R2-8.

Todhunter's Differential Calculus. R2-8.

Military Topography. 8a.

HINDUSTANI

Elements of Hindustani Grammar. 8a

Technical Dialogues—English and Urdu R1

A Vocabulary of Common and Technical Words in English-Urdu. 12a.

History of India (*Itihas Timirnásak*), Hindi, Parts I and II. Both 6a.

Short Account of Ganges Canal (English and Urdu). Each 4a.

NOTE AND FIELD-BOOKS &c.

Note-Books (Section paper), large. Each R1-4.

Surveying Field-Books (ruled). 14a.

Levelling Field-Books (English Pattern). R1-4.

" " (Canal "). R1-4.

" " (College "). R2-0.

P. W. D. Note-Book. R1-4.

" **Measurement Book.** R1-4

Circular Card-board Protractors, 12 inches. R2.

MISCELLANEOUS.

Distributary, Velocity and Discharge Table. By Capt. Allan Cunningham. 8a.

Description of Venomous Snakes. (The drawings of all the venomous snakes of Upper India, with description and all important information, extracted from the "Thanatophidia of India.") R1-8.

Ditto ditto in Urdu. R1-4.

Perspective (fully explained). By Col. A. M Brandreth, R.E. R1-12

Thomason College Calendars for 1894,* 1895,† 1896† and 1897.† Each R2.

Ditto ditto for 1898‡ and 1899,† Pt. I. R3-0.

* This does not contain the Entrance Examination papers of the Superior Accounts Branch, Public Works Department.

† These include question papers for entrance to Engineer and Upper Subordinate Classes and Superior Accounts Branch, Public Works Department.

‡ This does not contain the Entrance Examination Papers of the Upper Subordinate Class.

Forms of Accounts, P. W. D., for Sub-Divisional Officers, in English (very old). 4a.

Memo. of Instructions for Road Project. R1.

Project for College Mess (sample Project). 8a.

Ferrotype Printing Processes. 8a

Thomason College Library Catalogue. R1-12

Ditto, "Supplement, 1895 to 1899. Each 2a.

Irrigation by Rajbahas,
Irrigation Tract, No. I.
" " " II.

British Burma, 19 Plans.
Central Provinces.
} Whole lot R2. Each 6a.

A set of Professional papers both loose and quarterly numbers inclusive of Railway freight R10. This is not quite complete.

PROFESSIONAL PAPERS ON INDIAN ENGINEERING.

(FIRST SERIES.)

Vol. I (Quarterly, Nos. 1 to 5), bound R1-8.

Quarterly, Nos. 1, 2, 3, 4, and 5,
Vol. II, Quarterly, Nos. 0 and 7.
" VI, " No. 25.
" VII, " Nos. 20, 27, 28, and 29.
Extra No., April 1870.
} 4a. each, inclusive of postage.

(SECOND SERIES.)

Quarterly Numbers of Vols. I, II, and IX of the series, 4a. each, inclusive of postage.

Quarterly Number 41A of Vol. X. Each 8a.

Cloth covers for Volumes of 1st and 2nd Series, at 8a. each.

Index to Professional Papers and loose Papers, 1st and 2nd Series, at 2a each.

FERROTYPE PRINTING.

Chemicals and Lithographic Paper for this process can be purchased from Thomason College Book Depôt. Application to be made to the Curator.

Apparatus for Printing can be made up at the Roorkee Workshops, and all particulars obtained from the Superintendent.

CIRCULARS.

Circulars containing the Rules of admission to the different classes of the College will be forwarded to applicants.

J. CLIBBORN, *Lieut.-Col., I.S.C.,*
Principal, Thomason Civil Engineering College, Roorkee

THE INDIAN LAW REPORTS.

PUBLISHED UNDER AUTHORITY.

The Indian Law Reports, published under the authority of the Governor-General in Council, appear in monthly parts, published as soon as possible after the first of each month, at Calcutta, Madras, Bombay, and Allahabad, and comprise four series,—one for the Calcutta High Court, a second for the Madras High Court, a third for the Bombay High Court, and a fourth for the Allahabad High Court. The cases heard by the Privy Council on appeal from each High Court are reported in the series for that High Court. Cases heard by the Privy Council on appeal from Provinces in India not subject to any High Court are reported in the Calcutta Series.

The Calcutta Series is distributed by the Bengal Secretariat Book Depôt, and the Madras, Bombay, and Allahabad Series are distributed direct from Madras, Bombay, and Allahabad, respectively.

In supersession of the previous advertisements, on and from the 1st January, 1889, the terms of subscription and sale will be as follows for current issues, as well as for back numbers of the Reports from 1876 :—

Terms of subscription payable annually in advance.

For the Complete Series, *including postage* . . . R22-8

	Without postage.			With postage.		
	R	*a.*	*p.*	*R*	*a.*	*p*
For the Calcutta Series	10	0	0	12	8	0
„ each of the Madras, Bombay, and Allahabad Series	6	0	0	7	0	0
„ a part of the Calcutta Series purchased separately, *inclusive of postage in India*.	...			2	0	0
„ a part of each of the Madras, Bombay, and Allahabad Series purchased separately, *inclusive of postage in India*	...			1	0	0

The following is the rate at which deductions will be made for parts out of print and at which duplicate copies will be supplied to subscribers when required in place of copies lost in transit :—

	For town.			For mofussil.		
	R	*a*	*p.*	*R*	*a.*	*p.*
For the Calcutta Series ; per copy . . .	0	8	9	0	10	0
„ each of the Madras, Bombay, and Allahabad Series ; per copy . . .	0	5	3	0	5	9
„ the Calcutta Series. For the year . .	7	2	6	8	6	3
„ each of the Madras, Bombay, and Allahabad Series. For the year . .	4	4	6	4	11	0

Persons desiring to subscribe for, or purchase, the Report should apply to—

Superintendent, Government Press, Madras.

The Superintendent, Government Central Press, Bombay.

The Curator of Government Books, North-Western Provinces and Oudh.

The Officer in charge, Bengal Secretariat Book Depôt.

Orders and subscriptions for 1894 should be at once registered and remitted by money-order payable to the Accountant and Treasurer, Bengal Secretariat, Calcutta.

Advertisements will be received for publication on the wrapped of the Indian Law Reports, Calcutta Series, at the following rates payable in advance :—

	One page.	Half page.	Quarter page.
For one issue	R 20	R 14	R 9
„ three issues	„ 55	„ 36	„ 24
„ six „	„ 100	„ 68	„ 45
„ nine „	„ 145	„ 96	„ 64
„ twelve „	„ 180	„ 120	„ 80

Several volumes of the BENGAL LAW REPORTS, from August 1868 to December 1875, and FULL BENCH RULINGS. Parts I and II, are available at the following rates :—

	Without postage.			With postage.		
	R	*a.*	*p.*	*R*	*a.*	*p.*
Bengal Law Reports, for one year . .	20	0	0	22	8	0
Single copies, R2 per copy.						
Full Bench Rulings, Parts I and II . .	20	0	0	22	8	3

Bengal Secretariat Book Depôt, Writers' Buildings, Calcutta.

Remittances to be forwarded to the Accountant and Treasurer, Bengal Secretariat, Writers' Buildings, Calcutta.

All the wanting parts of the INDIAN LAW REPORTS (complete series) having now been reprinted, the complete Reports from 1876 to 1893 may be purchased for all the years, or for any particular year, on application to the Officer in charge of the Bengal Secretariat Book Depôt.

The subscription R22-8 per annum, should be remitted in advance to the Accountant and Treasurer, Bengal Secretariat.

NOTICE.

It is hereby notified, for general information, that subscription to the complete series of the Indian Law Reports should be registered during the first three months of each calender year. Subscribers are therefore requested to send in their subscriptions of the complete series before the 31st March in each year. Those who register their names after that date will understand that copies will be supplied only if available.

PURE SULPHATE OF QUININE.

Manufactured at the Bengal Government Cinchona Plantation.

From 1st April, 1898, the price of this Quinine will be as follows :—

1-pound tin,	R17,	or,	post-free,	R17-12.
½ „	R8-8,		„	R9-0.
¼ „	R4-4,		„	R4-12.

Analysis shows this Quinine to be of the purest manufacture ; and it is guaranteed to be free from wilful mixture with the inferior alkaloids, Cinchonine and Cinchonidine. It is for sale only to Government officers, and only for cash, and may be had from the Superintendent, Botanic Garden, Seebpore, near Calcutta.

বঙ্গদেশের গবর্ণমেণ্টের সিন্‌কোনা আবাদে প্রস্তুত বিশুদ্ধ কুইনাইন।

১৮৯৮ সালের ১লা এপ্রেল হইতে এই কুইনাইনের নিম্নলিখিত মূল্য হইবে, যথা—

১ এক পৌণ্ড টিন		১৭৲ বা	ডাকমাশুল বিনা	১৭৸৹
৷ আধ „	„	৮৷৹	„	৯৲
। সিকি „	„	৪৷৹	„	৪৸৹

পরীক্ষা করিয়া দেখা গিয়াছে যে এই কুইনাইন অতি বিশুদ্ধ রূপে প্রস্তুত করা হইয়াছে, এবং ইহা যে সিন্‌কোনাইন ও সিন্‌কোনিডাইন নামক অপকৃষ্ট ক্ষারের সহিত ইচ্ছা পূর্ব্বক মিশান হয় নাই তাহার গারাণ্টী দেওয়া যাইতেছে। ইহা নগদ মূল্যে কেবল গবর্ণমেণ্টের কর্ম্মচারীগণের নিকট বিক্রয় করা যাইবে, এবং কলিকাতার নিকট শিবপুরের কোম্পানির বাগানের সুপারিণ্টেণ্ডেণ্টের নিকট পাওয়া যাইতে পারে।

PUBLIC WORKS DEPARTMENT.

NOTIFICATION.

Simla, the 20th September, 1893.

A Registry Office for men of all grades out of employ is kept up by the Principal, Thomason College, Roorkee. Officers requiring men are requested to apply to Principal.

J. CLIBBORN, *Major, I.S.C.*,

Principal, Thomason College.

Special commission is allowed to the above Agents for sale of Government of India publications other than those of the Legislative Department.

* *Agent for sale of the Legislative Department publications.*

NOTICE.—Books and Acts required for private use only can be purchased.—Applications should be accompanied by a remittance, unless it is wished that the books should be sent by value-payable post, in which case, besides the ordinary postage, an additional charge is made for registration and commission.

Books and Acts required for the public service should be obtained through Local Governments to whom the applicant is subordinate.

Applications for Government publications which are no longer in print should be made to the Agents of the particular Government under whose orders they were originally issued.

List of the books and publications for sale which are less than two years old.

NOTE.—A List of the Books and Publications for sale, which are more than two years old, will be found in the first Gazette of each month.

The amounts within parentheses are for packing and postage.

PART IV.

Acts of the Governor General's Council assented to by the Governor General.

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

The following Act of the Governor General of India in Council received the assent of the Governor General on the 22nd March, 1900, and is hereby promulgated for general information :—

ACT NO. VI OF 1900.

THE LOWER BURMA COURTS ACT, 1900 (VI OF 1900).

CONTENTS.

CHAPTER I.

PRELIMINARY.

CHAPTER II.

THE CHIEF COURT.

The Lower Burma Courts Act.

(Chapter I.—Preliminary.—Sections 1-3. Chapter II.—The Chief Court.—Sections 4-8.)

An Act to consolidate and amend the law relating to the Courts in Lower Burma.

WHEREAS it is expedient to consolidate and amend the law relating to the Courts in Lower Burma;

And whereas the Secretary of State for India has given his previous sanction to the passing of this Act, as required by section 46 of the Government of India Act, 1833, read with section 3 of the Government of India Act, 1858;

3 & 4 Will. 4, c. 85. 21 & 22 Vict., c. 106.

It is hereby enacted as follows:—

CHAPTER I.

PRELIMINARY.

Short title, extent and commencement.

1. (*1*) This Act may be called the Lower Burma Courts Act, 1900.

(*2*) Save in so far as it applies expressly or by necessary implication to other parts of British India, this Act extends to Lower Burma only.

(*3*) This Act shall come into force on such date as the Governor General in Council may, by notification in the Gazette of India, appoint.

Definitions.

2. In this Act, unless there is anything repugnant in the subject or context,—

(*a*) "Burma" includes all the territories for the time being administered by the Lieutenant-Governor of Burma:

(*b*) "land-suit" means a suit relating to immovable property or to any right or interest in immovable property:

(*c*) "Lower Burma" means the territories for the time being included in Lower Burma:

(*d*) "Rangoon Town" means the local limits of the original civil jurisdiction of the Recorder of Rangoon immediately before the commencement of this Act unless and until the Local Government, with the previous sanction of the Governor General in Council, shall otherwise direct:

(*e*) "Shan States" means the territories for the time being included in the Shan States:

(*f*) "Small cause" means a suit of the nature cognizable by a Court of Small Causes under the Provincial Small Cause Courts Act, 1887:

IX of 1887.

(*g*) "unclassed suit" means a suit which is neither a land suit nor a small cause: and

(*h*) "value", used with reference to a suit or appeal, means the amount or value of the subject-matter of the suit or appeal.

Saving of Regulations in force in Hill District of Arakan.

3. Save as expressly provided by this Act, nothing herein shall be construed to affect any Regulation in force at the commencement of this Act in the Hill District of Arakan.

CHAPTER II.

THE CHIEF COURT.

Establishment of Chief Court.

4. On and from the commencement of this Act there shall be established for Lower Burma a Chief Court, hereinafter referred to as "the Chief Court".

Constitution of Chief Court.

5. The Chief Court shall consist of four or more Judges, who shall be appointed by the Governor General in Council and shall hold office during his pleasure, and of whom two shall ordinarily be barristers of not less than five years' standing.

Appointment of Chief Judge.

6. The Governor General in Council may, in his discretion, from time to time, appoint one of the Judges of the Chief Court to be the Chief Judge, and may, during any vacancy of the office of Chief Judge, and during any absence of the Chief Judge, appoint one of the other Judges of the Chief Court to perform the duties of the Chief Judge until a new Chief Judge has been appointed and has entered upon the discharge of the duties of his office, or until the Chief Judge has returned from such absence, as the case may be.

Rank and precedence of Chief Judge and Judges of Chief Court.

7. (*1*) The Chief Judge (if any), whether permanent or officiating, shall have rank and precedence before the other Judges of the Chief Court.

(*2*) Save as aforesaid, the Judges shall have rank and precedence according to the seniority of their appointments as such Judges:

Provided that a Judge permanently appointed shall be deemed to be senior to, and shall have rank and precedence before, an officiating Judge.

(*3*) In the construction of this Act the expression "the Senior Judge" shall mean the Judge for the time being entitled to the first place in rank and precedence.

Civil and Criminal jurisdiction of Chief Court.

8. (*1*) The Chief Court shall be the highest Civil Court of appeal, and the highest Court of criminal appeal and revision in and for Lower Burma, and shall—

(*a*) be the High Court for the whole of Burma (inclusive of the Shan States) in reference to proceedings against European British subjects and persons jointly charged with European British subjects;

The Lower Burma Courts Act.

(Chapter II.—The Chief Court.—Sections 9-15.)

(*b*) have power, as a Court of original jurisdiction, to try European British subjects and persons charged jointly with European British subjects, committed to it for trial by any Magistrate and Justice of the Peace exercising jurisdiction in any part of Burma (inclusive of the Shan States);

(*c*) be the principal Civil and Criminal Court of original jurisdiction for the Rangoon Town; and

(*d*) have within the Rangoon Town such powers and authorities with respect to the persons and property of insolvent debtors and with respect to their creditors as are for the time being exercisable by a Court for the Relief of Insolvent Debtors under the Indian Insolvency Act, 1848.

11 & 12 Vict., c. 21.

(*2*) Orders made by the Chief Court in the exercise of its jurisdiction with respect to insolvent debtors shall have the same force and effect throughout British India as if they had been made by the High Court of Judicature at Fort William in Bengal in the exercise of its jurisdiction under the Indian Insolvency Act, 1848, and all the provisions of the said Statute relating to the persons or property of insolvents shall, *mutatis mutandis*, apply to the persons and property of insolvents applying for relief to the Chief Court, and the procedure in the cases of such insolvents shall be, as far as may be practicable, in accordance with the procedure prescribed by the said Statute as amended by any enactment for the time being in force.

11 & 12 Vict., c. 21.

(*3*) Nothing in Chapter XX of the Code of Civil Procedure shall apply to any Court having jurisdiction within the Rangoon Town.

XIV of 1882.

Exercise of jurisdiction by Judges of Chief Court.

9. (*1*) Except as otherwise provided by this Act or by any other enactment for the time being in force, and subject to any rules made under this Act, the jurisdiction of the Chief Court may be exercised by a single Judge of the Court.

(*2*) The Chief Court may, with the sanction of the Local Government, make rules to provide, in such manner as it may think fit, for the exercise of any of its powers by a bench of two or more Judges of the Court.

Constitution of full bench and other benches.

10. (*1*) The Chief Court may make rules declaring what number of Judges, not being less than three, shall constitute a full bench of the Chief Court, and may by such rules prescribe the mode of determining which Judges shall sit as a full bench when a full bench sitting becomes necessary.

(*2*) Subject to the provisions of sub-section (*1*), the Senior Judge of the Chief Court may determine which Judge in each case or class of cases shall sit alone, and which Judges shall constitute any bench.

Power to refer question to full bench.

11. Any single Judge of the Chief Court and any bench of Judges thereof, not being a full bench, may in any case refer for the decision of a bench of two Judges or of a full bench any question of law or custom having the force of law, or of the construction of any document, or of the admissibility of any evidence, arising before the Judge or bench, and shall dispose of the case in accordance with the decision of the bench to which the question has been referred.

Review in certain criminal cases.

12. Where in any case any such question as is referred to in section 11 has been decided by a Judge of the Chief Court exercising the jurisdiction of the Chief Court as a Court having power to try European British subjects committed to it for trial, or as the principal Criminal Court of original jurisdiction for the Rangoon town, and no reference has been made under the provisions of that section or of section 434 of the Code of Criminal Procedure, 1898, the Chief Court may, on its being certified by the Government Advocate that in his opinion the decision should be further considered, review the case or such part of it as may be necessary, and finally determine the question, and may thereupon alter the judgment, order or sentence passed by the Judge, and pass such judgment, order or sentence as it thinks right.

V of 1898.

Magistrate in Rangoon to commit to Chief Court.

13. Notwithstanding anything in the Code of Criminal Procedure, 1898, Magistrates exercising jurisdiction in the Rangoon Town when committing prisoners for trial shall commit them to the Chief Court.

V of 1898.

Appeal from Judge of Chief Court exercising original civil jurisdiction.

14. Except as otherwise provided by any enactment for the time being in force, an appeal from any decree made by a single Judge of the Chief Court, or from any order made by a single Judge of the Chief Court when an appeal from such order is permitted by any law for the time being in force,—

(*a*) in the exercise of its original jurisdiction as the principal Civil Court of original jurisdiction for the Rangoon Town, or

(*b*) in the exercise of its original jurisdiction with respect to insolvent debtors and their creditors, or

(*c*) in the exercise of its original jurisdiction in cases withdrawn from other Courts under section 25 of the Code of Civil Procedure, or

XIV of 1882.

(*d*) in the exercise of any other original jurisdiction of a civil nature to which the Chief Court may by rule extend this section,

shall lie to a bench of the Chief Court consisting of two other Judges of the Chief Court.

Rule of decision where Judges differ.

15. Except as otherwise provided by any enactment for the time being in force,—

(*a*) where there is a difference of opinion among the Judges composing any bench of the Chief Court, the decision shall be in accordance with the opinion of the majority of those Judges;

The Lower Burma Courts Act.

(Chapter II.—The Chief Court.—Sections 16-19.)

(*b*) if there is no such majority, then—

(i) if the bench is a full bench, the decision shall be in accordance with the opinion of the Senior Judge of the bench;

(ii) in other cases, the bench before which the difference has arisen shall refer it to a full bench, and shall dispose of the case in accordance with the decision of the full bench.

Procedure in exercise of civil jurisdiction.

16 (*1*) The Chief Court, when sitting as a Court of Civil Judicature, shall take evidence and record judgments and orders in the manner required by the Code of Civil Procedure, unless it has, with the previous sanction of the Governor General in Council, made rules for regulating these matters.

XIV of 1882.

(*2*) If the Chief Court has so made rules for regulating these matters, the Governor General in Council may declare that any of the provisions of the Code of Civil Procedure with respect thereto shall not apply to the Chief Court.

XIV of 1882.

(*3*) So much of section 579 of the Code of Civil Procedure as requires the decree to contain the memorandum of appeal, and to be signed and dated by the Judge or Judges who passed it, shall not apply to the Chief Court in the exercise of its appellate jurisdiction.

XIV of 1882.

Ministerial officers of Chief Court.

17. (*1*) Subject to any rules and restrictions which may be prescribed by the Governor General in Council, the Senior Judge of the Chief Court may appoint Registrars and Assistant Registrars, an Official Assignee, a Receiver and such other ministerial officers as may be necessary for the administration of justice by the Chief Court and for the exercise and performance of the powers and duties conferred and imposed on it by this Act or by any other enactment for the time being in force.

(*2*) The appointment of the Registrars, Assistant Registrars, Official Assignee and Receiver shall be subject to the sanction of the Local Government.

(*3*) The officers appointed under this section shall exercise such powers and discharge such duties as the Chief Court may direct.

(*4*) Any officer appointed under this section may be suspended or dismissed by the Senior Judge of the Chief Court:

Provided that a Registrar, Assistant Registrar, Official Assignee or Receiver shall not be dismissed without the previous sanction of the Local Government.

Superintendence and control of subordinate Courts.

18. (*1*) The general superintendence and control over all other Civil Courts in Lower Burma shall be vested in, and all such Courts shall be subordinate to, the Chief Court.

(*2*) The Senior Judge of the Chief Court or a Judge of the Chief Court appointed by him shall from time to time visit and inspect the proceedings of the Civil Courts subordinate to the Chief Court, and shall give such directions in matters not provided for by law as may be necessary to secure the due administration of justice

Power to Chief Court to make rules.

19. (*1*) In addition to any other power to make rules expressly or by implication conferred by this Act, the Chief Court, with the previous sanction of the Local Government, may, by notification in the local official Gazette, make rules, consistent with this Act and any other enactment for the time being in force,—

(*a*) declaring what persons shall be permitted to practise as petition-writers in the Courts in Lower Burma, regulating the conduct of business of persons so practising, and determining the authority by which breaches of rules under this clause shall be tried;

(*b*) providing for the translation of any papers filed in the Chief Court, and the copying or printing of any such papers or translations, and requiring from the persons at whose instance or on whose behalf papers are filed, payment of the expenses thereby incurred;

(*c*) regulating the procedure in cases where any person is entitled to inspect a record of any Court in Lower Burma or to obtain a copy of the same, and prescribing the fees payable by such persons for searches and copies;

(*d*) prescribing the travelling and other expenses to be allowed to witnesses in civil cases, and the fees to be allowed to commissioners appointed by the Courts in Lower Burma;

(*e*) determining in what cases advocates and pleaders shall be permitted to address the Courts in Lower Burma in English;

(*f*) conferring and imposing on the ministerial officers of the Chief Court and of the Courts subordinate to it such powers and duties of a non-judicial or quasi-judicial nature as it thinks fit, and regulating the mode in which powers and duties so conferred and imposed are to be exercised and performed;

(*g*) prescribing forms to be used in the Courts subordinate to it for such proceedings, books, entries, statistics and accounts as it thinks necessary;

(*h*) providing for the visitation and inspection of the Courts subordinate to it and the supervision of the working thereof; and

(*i*) regulating all such matters as it may think fit, with a view to promoting the efficiency of the judicial and ministerial officers of the Chief Court and of the Courts subordinate to it, and maintaining proper discipline among those officers.

(*2*) Whoever commits a breach of any rule made under sub-section (*1*), clause (*a*), shall be punishable with fine which may extend to fifty rupees.

The Lower Burma Courts Act.

(Chapter II.—The Chief Court.—Section 20. Chapter III.—The Subordinate Civil Courts.—Sections 21-26.)

Registers, books, accounts, returns, statements and reports.

20. The Chief Court shall keep such registers, books and accounts as may be necessary for the transaction of the business of the Chief Court, and shall comply, in such form and manner as the Local Government may deem proper, with any requisitions which the Local Government may make for records of, or papers belonging to, the Chief Court or any Court subordinate to it, or for certified copies of, or extracts from, those records or papers, or for returns, statements or reports.

CHAPTER III.

THE SUBORDINATE CIVIL COURTS.

Grades of Courts.

Grades of Civil Courts.

IX of 1887.

21. (1) Besides the Chief Court, the Courts of Small Causes established under the Provincial Small Cause Courts Act, 1887, and the Courts established under any other enactment for the time being in force, there shall be four grades of Civil Courts in Lower Burma, namely :—

(a) the Divisional Court;

(b) the District Court;

(c) the Subdivisional Court; and

(d) the Township Court.

(2) Every Court mentioned in the list in sub-section (1) shall be of a lower grade than the Court mentioned immediately above it, and shall be subordinate to all Courts above it in the said list.

Superintendence and control.

22. Subject to the general superintendence and control of the Chief Court, the Divisional Court shall superintend and control all other Courts in the local area within its jurisdiction; and, subject as aforesaid and to the control of the Divisional Court, the District Court shall superintend and control all other Civil Courts in the local area within its jurisdiction.

Territorial Divisions and Establishment of Courts.

Civil divisions, districts, subdivisions and townships.

23. (1) For the purposes of this Act, the Local Government shall divide Lower Burma outside the Rangoon Town into such civil divisions, and each civil division into such civil districts, as may be approved by the Governor General in Council, and may divide each civil district into such civil subdivisions, and each civil subdivision into such civil townships, as it may think fit, or may constitute in each civil district such civil subdivisions and such civil townships as it may think fit.

(2) The Local Government may, with the previous sanction of the Governor General in Council, alter the limits or the number of the said civil divisions and districts, and, of its own authority, the limits or the number of the said civil subdivisions and townships.

24. The Local Government shall establish—

Establishment of Courts.

(a) a Divisional Court for each civil division;

(b) a District Court for each civil district;

(c) a Subdivisional Court for each civil subdivision; and

(d) a Township Court for each civil township.

Jurisdiction of Courts.

Original jurisdiction of Divisional, District, Subdivisional and Township Courts.

XIV of 1882.

IX of 1887.

25. Subject to the provisions of the Code of Civil Procedure, the Provincial Small Cause Courts Act, 1887, and any other enactment for the time being in force,—

(a) the Township Court shall have jurisdiction to hear and determine any suit or original proceeding of a value not exceeding five hundred rupees:

(b) the Subdivisional Court shall have jurisdiction to hear and determine any suit or original proceeding of a value not exceeding three thousand rupees:

IV of 1869.

X of 1897.

(c) the District Court shall have jurisdiction to hear and determine any suit or original proceeding without restriction as regards the value, except proceedings under the Indian Divorce Act, 1869, and shall be deemed to be the Court of a District Judge as defined by clause (15) of section 3 of the General Clauses Act, 1897:

IV of 1869.

(d) the Divisional Court shall have such jurisdiction to hear and determine any suit or original proceeding as is by this section conferred upon a District Court, and shall also have jurisdiction to hear and determine any original proceeding under the Indian Divorce Act, 1869, and shall be deemed the District Court under that Act for all districts comprised in the civil division.

Power to invest certain Courts with Small Cause Court powers.

IX of 1887.

26. The Local Government may, by notification in the local official Gazette, invest any District, Subdivisional or Township Court with the jurisdiction of a Court of Small Causes under the Provincial Small Cause Courts Act, 1887, up to such value not exceeding five hundred rupees as it may think fit, to be exercised in cases arising within the limits of the Court's jurisdiction

The Lower Burma Courts Act.

(Chapter III.—The Subordinate Civil Courts.—Sections 27-31.)

or, in any specified area within such limits, and may withdraw any jurisdiction so conferred.

Enhancement of powers of Judge of Court of Small Causes of Rangoon.

27. (*1*) The Local Government may, by notification in the local official Gazette, direct that such suits of a civil nature as are not excepted from the cognizance of a Court of Small Causes by section 15, sub-section (*1*), of the Provincial Small Cause Courts Act, 1887, and are of value exceeding one thousand and not exceeding two thousand rupees, shall be cognizable by the Judge of the Court of Small Causes of Rangoon as if they were suits cognizable by him under the said Act, and thereupon so much of that Act as relates to—

(*a*) the exclusion of the jurisdiction of any other Court in such suits,

(*b*) the practice and procedure of Courts of Small Causes,

(*c*) appeals from certain orders of those Courts and revision of cases decided by them, and

(*d*) the finality of their decrees and orders subject to such appeal and revision as are provided by the said Act,

shall apply to such suits, and to the trial thereof, and the decrees and orders therein.

(*2*) The Local Government may, by notification in the local official Gazette, cancel any order made under sub-section (*1*), but not so as to affect any proceedings pending at the date of the order of cancellation.

Appellate jurisdiction of the Courts.

28. (*1*) Subject to the provisions of the Code of Civil Procedure, the Provincial Small Cause Courts Act, 1887, and any other enactment for the time being in force, the Courts to which appeals are hereinafter declared to lie, shall respectively have authority to hear appeals from the decrees and orders of the Courts subordinate to them passed in the exercise of their original jurisdiction—

(*a*) an appeal from a decree or order of a Township Court shall lie to the District Court:

(*b*) an appeal from a decree or order of a Subdivisional Court shall lie to the Divisional Court

(*c*) an appeal from a decree or order of a District Court shall, where the value of the suit in such Court is five thousand rupees or upwards, lie to the Chief Court, and in any other case to the Divisional Court:

(*d*) an appeal from a decree or order of a Divisional Court when exercising original jurisdiction shall lie to the Chief Court:

Provided that the Local Government may, by notification in the local official Gazette, direct that appeals from original decrees and orders of any specified District or Subdivisional Court shall lie to the Chief Court, in which case an appeal from any such decree or order of any Court so specified shall, so long as such notification continues in force, lie to the Chief Court.

(*2*) Where an order specified in section 588, clause (*29*), of the Code of Civil Procedure, is made by a District Court in exercise of the jurisdiction of a Court of Small Causes, an appeal therefrom shall lie to the Chief Court. XIV of 1882.

Period of limitation for appeals to the Divisional Court.

29. The period of limitation for an appeal to the Divisional Court under clause (*b*) or clause (*c*) of section 28 shall be sixty days and, in the computation of that period and in all other respects, the limitation of the appeal shall be governed by the provisions of the Indian Limitation Act, 1877. XV of 1877.

Second appeals to the Chief Court.

30. (*1*) In addition to the second appeals permissible under section 584 of the Code of Civil Procedure, a second appeal shall lie to the Chief Court from an appellate decree of a Court subordinate thereto on any ground which would be a good ground of appeal if the decree had been passed in an original suit, whenever the decree of the Appellate Court varies or reverses otherwise than as to costs the decree of the Court below: XIV of 1882.

Provided that no such second appeal shall lie—

(*a*) in the case of a small cause, unless the value of the cause exceeds five hundred rupees, or

(*b*) in the case of an unclassed suit, unless the value of the suit exceeds five hundred rupees or the suit is of the nature described in sub-section (*1*) of section 13 of the Burma Laws Act, 1898. XIII of 1898.

(*2*) The period of limitation for an appeal to the Chief Court under this section shall be ninety days, and in the computation of that period and in all other respects, the limitation of the appeal shall be governed by the provisions of the Indian Limitation Act, 1877. XV of 1877.

Administrative Control.

Power of Courts to transfer cases.

31. (*1*) The Divisional Court may exercise, as regards the Courts under its control, the same powers of withdrawal, trial and transfer as are conferred by section 25 of the Code of Civil Procedure on a District Court. XIV of 1882.

(*2*) In addition to the powers referred to in sub-section (*1*), a Divisional Court and a District Court may, by order in writing, direct that any case or class of cases which may be instituted in such Court, or in any Court subordinate thereto, shall be disposed of by an Additional Judge of such Court or by any other Court subordinate thereto, or by an Additional Judge of any such subordinate Court, as the case may be:

Provided that no direction under this section shall empower any Court to exercise jurisdiction beyond the pecuniary limits of its jurisdiction.

The Lower Burma Courts Act.

(Chapter III.—The Subordinate Civil Courts.—Sections 32-35. Chapter IV.—Supplemental Provisions.—Sections 36-38.)

(3) The Court trying any suit withdrawn under this section from a Court of Small Causes shall, for the purposes of the suit, be deemed to be a Court of Small Causes.

(4) When a case has been withdrawn or transferred under section 25 of the Code of Civil Procedure or under this section, any fees payable in such case under the Court-fees Act, 1870, or under rules made under this Act, shall be payable at the rates which would have been applicable in the Court from which the case has been withdrawn or transferred.

XIV of 1882. VII of 1870.

Delegation of powers of District Court with respect to administrative control.

32. The District Court may, with the previous sanction of the Local Government, delegate to any Subdivisional Court in the civil district the powers conferred on the District Court by section 31 of this Act and by section 25 of the Code of Civil Procedure, to be exercised by the Subdivisional Court in any specified portion of the district within the area of the jurisdiction of the District Court.

XIV of 1882.

Judges not to try cases in which they are personally interested.

33. (1) No Judge or Additional Judge of a Court under this Act shall hear or determine any suit, appeal, or other proceeding to which he is a party, or in which he is personally interested.

(2) When any such suit, appeal, or other proceeding comes before any Judge of a subordinate Court, he shall forthwith transmit the record of the case to the Court empowered to transfer cases to which he is subordinate, with a report of the circumstances attending the reference, and such superior Court shall thereupon hear and determine the case or transfer it to some other Court.

(3) When any such suit, appeal or proceeding comes before an Additional Judge of a subordinate Court, he shall forthwith transmit the record of the case to the Judge of the Court, who shall hear and determine the case.

Appointment of Judges and Ministerial Officers of Subordinate Courts.

Appointment of Judges.

34. (1) The Judges of the Divisional, District, Subdivisional and Township Courts shall be appointed by the Local Government.

(2) The Local Government may, whenever it thinks it necessary or expedient so to do, appoint an Additional Judge or Judges to any Divisional, District, Subdivisional, or Township Court, and any officer so appointed an Additional Judge shall exercise the jurisdiction of the Court to which he is appointed, and the powers of the Judge thereof subject to any general or special orders of the Local Government as to the class or value of suits or appeals which he or officers of his rank or grade may try, hear or determine, and subject also, in respect of the distribution of the business of the Court, to the control of the Judge thereof.

(3) An officer may be appointed an Additional Judge of one or more Courts, and an officer who is a Judge of one Court may be appointed an Additional Judge in another Court or in other Courts.

Appointment of ministerial officers.

35. (1) The ministerial officers of the Divisional Court and of the District Court shall be appointed by the Judges of those Courts respectively.

(2) The ministerial officers of the Subdivisional and Township Courts shall be appointed by the District Court.

(3) Every appointment made under this section shall be subject to such rules as the Local Government may, by notification in the local official Gazette, make in this behalf, and in dealing with any matter under this section, the District Court shall act subject to the control of the Divisional Court.

CHAPTER IV.

SUPPLEMENTAL PROVISIONS.

Place of sitting.

36. Every Civil Court shall be held at such place or places as the Local Government may, by notification in the local official Gazette, direct, or, in the absence of any such direction, at any place within the local limits of the jurisdiction of the Court.

Seal.

37. Every Civil Court shall use a seal of such form and dimensions as the Local Government may prescribe on all processes and orders issued, and on all decrees passed by it.

Vacations.

38. (1) Subject to the approval of the Local Government, the Chief Court shall prepare and publish in the local official Gazette a list of days to be

The Lower Burma Courts Act.

(Chapter IV.—Supplemental Provisions.—Sections 39-42. Chapter V.—Provision for pending and past Proceedings.—Sections 43-44.)

observed in each year as holidays in the Chief Court and the Civil Courts subordinate thereto.

(2) A judicial act done by a Court on a day specified in a list published under sub-section (1) shall not be invalid by reason only of its having been done on that day.

Language of Courts.

39. Plaints, petitions and applications to a Court may be written, and evidence may be taken down, in such language or languages as the Local Government may direct in this behalf.

Advocates of abolished Courts.

40. (1) Every person entitled immediately before the commencement of this Act to appear, plead or act in the Court of the Recorder of Rangoon or in the Court of the Judicial Commissioner, Lower Burma, shall be entitled to be enrolled as an Advocate of the Chief Court, and to practise therein and in the Courts subordinate thereto, subject to the provisions of the Legal Practitioners Act, 1879, and to any rules applicable to Advocates made thereunder.

XVIII of 1879.

(2) Every person entitled immediately before the commencement of this Act to appear, plead or act in any Court or Courts subordinate to the Court of the Recorder of Rangoon or to the Court of the Judicial Commissioner, Lower Burma, shall be entitled to practise as a pleader in such Courts or in the corresponding Court or Courts under this Act, subject to the provisions of the Legal Practitioners Act, 1879, and to any rules applicable to pleaders made thereunder.

XVIII of 1879.

Power to Local Government to make rules as to process-serving establishment.

41. The Local Government, with the previous sanction of the Governor General in Council, may, notwithstanding anything in the Court-fees Act, 1870, make rules with respect to the establishments to be maintained for the service and execution of processes issued by Civil and Criminal Courts and Revenue Courts and authorities, and rules so made may be declared by the Local Government to be in supersession of all or any rules made under sections 22 and 23 of the said Act.

VII of 1870.

Continuance of jurisdiction of abolished Courts.

42. (1) Where any Court under this Act has from any cause ceased to have jurisdiction with respect to any case, any proceeding in relation to the case which, if that Court had not ceased to have jurisdiction, might have been had therein, may be had in the Court to which the business of the former Court has been transferred.

(2) Nothing in this section shall be construed to apply to cases for which provision is made by section 623 or section 649 of the Code of Civil Procedure or by any other enactment for the time being in force.

XIV of 1882.

CHAPTER V.

PROVISION FOR PENDING AND PAST PROCEEDINGS.

Pending proceedings.

43. (1) All proceedings instituted before the commencement of this Act in the High Court of Judicature at Fort William in Bengal, and arising out of any civil or criminal proceeding in any Court in Burma, shall be continued in that High Court as if this Act had not been passed.

(2) Every proceeding pending in any Civil Court in Lower Burma at the commencement of this Act shall be deemed to be transferred to the Court exercising the jurisdiction under this Act, which corresponds to the jurisdiction of the Court in which the proceeding was instituted, and the Court to which any such proceeding is transferred, shall proceed to try, hear and determine the matter as if it had been instituted in such Court:

Provided that nothing herein contained shall be construed to extend the period of limitation to which any suit or appeal may be subject.

(3) Every criminal proceeding pending in the Court of the Judicial Commissioner for Lower Burma or in the Court of the Recorder of Rangoon at the commencement of this Act shall be deemed to be transferred to the Chief Court.

(4) Every insolvency proceeding pending in the Court of the Judge of the Town of Moulmein at the commencement of this Act shall be deemed to be transferred to the District Court of Amherst, and the said District Court shall in such proceedings exercise the jurisdiction which the said Judge would have had if this Act had not been passed, and an appeal shall lie from the decision of the said District Court therein to the Chief Court.

Appeals after commencement of Act against decrees and orders passed before.

44. Appeals from decrees and orders passed and not appealed against before the commencement of this Act shall lie as follows, namely:—

(a) when the appeal would before that date have lain to the High Court of Judicature at Fort William in Bengal, or to the Special Court, the Court of the Recorder of Rangoon or the Court of the Judicial Commissioner of Lower Burma—to the Chief Court;

(b) when the appeal would before the commencement of this Act have lain to the Court of the Commissioner—to the Divisional Court;

(c) when the appeal would before the commencement of this Act have lain to the Court of the Deputy Commissioner or to the Court of an Assistant

The Lower Burma Courts Act.

(Chapter V.—Provision for pending and past Proceedings.—Section 45. Chapter VI.—General.—Sections 46-48.)

Commissioner or of an Extra Assistant Commissioner empowered to hear appeals under section 20 of the Lower Burma Courts Act, 1889,—to the District Court:

I of 1889.

Provided that nothing herein contained shall be construed to extend the period of limitation to which any suit or appeal may be subject.

Execution of past decrees and orders.

45. (*1*) All decrees passed and orders made before the commencement of this Act by the High Court of Judicature at Fort William in Bengal and all sentences and orders passed in the exercise of criminal jurisdiction by the Court of the Recorder of Rangoon or by the Court of the Judicial Commissioner for Lower Burma shall be deemed, for the purposes of execution, to have been passed or made by the Chief Court.

(*2*) All decrees passed and orders made before the commencement of this Act by a Court mentioned in the first column of the following table shall, for the purposes of execution, be deemed to have been passed or made by the Court set opposite to it in the second column of that table exercising jurisdiction over the area in which the Court in the first column had jurisdiction, and every decree which, before the commencement of this Act, shall have been sent for execution to a Court mentioned in the first column of that table shall be deemed to have been sent for execution to the corresponding Court in the second column exercising jurisdiction over the same area.

J. M. MACPHERSON,
Secretary to the Government of India.

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

The following Act of the Governor General of India in Council received the assent of the Governor General on the 22nd March, 1900, and is hereby promulgated for general information :—

ACT NO. VII OF 1900.

An Act to amend and provide for the further continuance of the Currency Conversion (Army Annual) Act, 1899.

WHEREAS it is expedient to amend the Currency Conversion (Army Annual) Act, 1899, and to provide for its further continuance; It is hereby enacted as follows :—

Substitution of a new section for section 2, Act XIX of 1899.

1. For section 2 of the said Act the following shall be substituted, namely :—

Rate of exchange fixed for calculating the equivalent in British Indian currency of sums of British currency mentioned in the Army Act.

44 & 45 Vict., c. 58.

"2. For the purposes of the Army Act or of any similar Act for the time being in force fifteen rupees of British Indian currency shall be deemed to be the equivalent of one pound of British currency and any sum of British currency mentioned in the said Act or in any similar Act as aforesaid shall be deemed to be the equivalent of a sum of British Indian currency calculated at that rate of exchange."

Repeals.

2. The following provisions of the said Act are hereby repealed, namely :—

In section 1, sub-section (1) the word 'Annual,' and section 3.

J. M. MACPHERSON,
Secretary to the Government of India.

SUPPLEMENT TO

The Gazette of India.

No. 12.] CALCUTTA, SATURDAY, MARCH 24, 1900.

OFFICIAL PAPERS.

A SUPPLEMENT *to the* GAZETTE OF INDIA *will be published from time to time, containing such Official Papers and information as the Government of India may deem to be of interest to the Public, and such as may usefully be made known. The Debates of the Legislative Council of His Excellency the Governor General will in future be published in* PART VI *of the* GAZETTE.

Non-Subscribers to the GAZETTE *may receive the* SUPPLEMENT *separately on a payment of five Rupees per annum if delivered in Calcutta, or eight Rupees if sent by Post. The* SUPPLEMENT *and* PART VI *of the* GAZETTE *can also be subscribed for separately on a payment of Rupees six per annum if delivered in Calcutta or Rupees nine if sent by Post.*

No Official Orders or Notifications, the Publication of which in the GAZETTE OF INDIA *is required by Law, or which it has been customary to publish in the* CALCUTTA GAZETTE, *will be included in the* SUPPLEMENT. *For such Orders and Notifications the body of the* GAZETTE *must be looked to.*

FINANCIAL STATEMENT FOR 1900-1901.

CONTENTS.

PART I.

PART II.

DETAILS OF ACCOUNTS AND ESTIMATES.

A

APPENDIX I.

ACCOUNTS AND ESTIMATES.

APPENDIX II.

APPENDIX III.

FINANCIAL STATEMENT FOR 1900-1901.

PART I.

INTRODUCTION.

1. In introducing the Financial Statement last year my predecessor dwelt with cautious satisfaction on the rapid recovery of the country from the effects of famine. It was generally hoped, and not without reason, that the two years of good harvests which had contributed to this recovery, were ushering in a period of agricultural prosperity, and that the word famine would not be on men's lips again for some time. That hope was doomed to cruel disappointment. While the ravages of plague continue, India has once more been afflicted by a visitation of famine nearly as widespread as the greatest famines of the century, and, in many respects, unprecedented in intensity. The significance, therefore, of the figures which I have to submit to this Council will very largely relate to the agricultural situation.

2. The Indian Financial Statement has to deal with three years. In the first year of the present triad, 1898-99, the total revenue was £67,595,815 and the expenditure charged against Revenue was £64,954,942. The accounts therefore yield a surplus of £2,640,873, a surplus due to the abundant harvests of 1897 and 1898. The results of those good harvests continued to make themselves felt in the earlier months of the year now passing away, 1899-1900. My predecessor had estimated a surplus of £2,621,800. He had, moreover, taken exchange at a very prudent figure, and it was anticipated that this surplus would be considerably exceeded. It has been slightly reduced. The Revised Estimates for 1899-1900 show a Revenue of £68,532,400 and an Expenditure of £65,979,600, while the surplus works out at £2,552,800. It is needless to say that famine, in the closing months of the year, has caused the disappointment. If the crops had not failed the year would have closed with a surplus in the neighbourhood of £4,500,000 or of 6 to 7 crores. Without famine, again, the year upon which we are shortly entering, 1900-1901, might have been expected to show an ample surplus. The Budget Estimates are—

	£
Revenue	70,155,800
Expenditure	69,995,500
Surplus	160,300

Accounts of 1898-99.

3. Turning now to the examination of the total results of each year, the differences between the Accounts of 1898-99, which were published two months ago, and the anticipations formed in March 1899, will be seen in the following table:—

		Revised Estimate.	Accounts.	Accounts, better.	Accounts, worse.
REVENUE.					
India	Rx.	101,217,400	101,062,361	...	155,039
England	£	232,500	242,561	10,061	...
Exchange	Rx.	116,200	121,771	5,571	...
TOTAL	Rx.	101,566,100	101,426,693	...	139,407
EXPENDITURE.					
India—					
Imperial, Provincial, and Local	Rx.	71,603,300	71,510,267	93,033	...
Adjustment of Provincial and Local Surplus or Deficit	Rx.	+1,417,900	+1,467,351	...	49,451
NET	Rx.	73,021,200	72,977,618	43,582	...
England	£	16,323,700	16,303,197	20,503	...
Exchange	Rx.	8,161,800	8,184,568	...	22,768
TOTAL	Rx.	97,506,700	97,465,383	41,317	...
SURPLUS	Rx.	4,059,400	3,961,310	...	98,090

The differences are small and do not call for comment. It will be noticed that the figures in the above table are set forth in a different form from that adopted in the statements in the Appendices to this Budget Statement. The change in the form of the Appendices is the result of a decision to make an important change in the form of the Estimates and Accounts which I will now explain. The table in the preceding paragraph is the last place in which the now familiar but much misunderstood headings of "Rx." and "Exchange" will appear in this or in future Financial Statements.

Change in the Form of Accounts.

4. The method in which our combined accounts of transactions in India and in England have hitherto been stated may be shortly described as follows. In respect of Revenue and Expenditure, including Expenditure not charged against Revenue, we had, first, columns showing the rupee transactions in India in tens of rupees; secondly, a column showing the sterling figures in pounds sterling; thirdly, a column headed "Exchange" showing the addition required to the sterling figures in order to convert them into rupees, or rather tens of rupees, this addition being the difference between the equivalent of the sterling at a conventional rate of exchange of *2s.* the rupee and at the average rate obtained for Council Bills for the year; and, lastly, a column which gave the figures of the preceding columns added together and exhibited the total of the rupee and sterling transactions in tens of rupees. These entries showed with absolute accuracy the figures for rupee and sterling transactions both separately in tens of rupees and in pounds sterling, respectively, and when combined, in tens of rupees, while the rupee equivalent of the sterling figures was readily ascertainable by adding together the columns for £ and "Exchange." Nevertheless the method of stating exchange in a separate column gave rise to misapprehension. The figures under the head Exchange, of great magnitude since exchange fell largely below the former rate of *2s.* the rupee, were frequently confounded by the public with real losses by exchange. To prevent this misapprehension, the meaning of the word Exchange, as used in the Accounts and Estimates, was clearly explained in footnotes, but these did not suffice wholly to disabuse the public, or even English financial experts, of the erroneous impression. Footnotes are not always read. Moreover, the separation of a portion of the rupee equivalent of the sterling figures under the title of "Exchange" was often criticised on the ground that it was based on the assumption of a fictitious rate of exchange, namely, *2s.* the rupee, and that the figures in the column did not really represent Rx. or indeed any other monetary unit. However, in the absence of any stable rate of exchange between India and England, it was not till now found practicable to devise a better method of converting and combining the rupee and sterling accounts. Next, in respect of the figures falling under the Debt and Deposit heads, the rupee figures were shown in one column headed "Rx." and the sterling figures in another headed "£", figures relating to exchange being shown in the "Rx." column, but not distributed over the separate heads; the sterling figures and the ten rupee figures, without any addition for exchange were, however, added together in the column for the total. These combined totals under the separate heads indicated no precise facts, for they represented neither a stated number of tens of rupees nor of pounds sterling, and in recognition of this the total column had no heading assigned to it. The Government of India had always recognised that this plan of stating the combined accounts was open to serious criticism, but they acquiesced in its continuance, because complications of this nature seemed inseparable from a system wherein transactions stated in two currencies having no stable relation in value are combined in one account.

5. The adoption of a gold standard for India, on the basis of R15 = £1, having linked the Indian currency with that of Great Britain, and having given a stable rate of exchange that will only vary within the gold points on either side of *16d.* to the rupee, it has been decided to remove the misapprehension connected with the present method of statement of exchange in our accounts, and to outflank the difficulty of stating the totals of the Debt and Deposit figures, by the simple expedient of stating the figures in fifteens of rupees instead of tens of rupees. This is equivalent to converting the whole account of revenue and expenditure into sterling at the rate of *16d.* the rupee, and the combined figures under the Debt and Deposit heads represent with close accuracy so many pounds sterling. Advantage of the opportunity has

been taken to discontinue altogether the use of the symbol "Rx.," with which the misapprehensions described above were undoubtedly connected.

The main changes in the form of the estimates and accounts are—

(1) The Imperial and Provincial-Local Revenue and Expenditure in India are shown in separate columns in rupees instead of in tens of rupees as formerly;

(2) The totals under each head in the India columns are stated in £ at the rate of R15 to the £;

(3) The column headed "Exchange" is omitted;

(4) The "total" column is the sum of the Indian total column and the sterling column;

(5) Any small differences connected with exchange caused by variations of the actual rates from the fifteen rupee standard are brought to account through the heads XXIV.—Exchange as Revenue, or 31.—Exchange as Expenditure, as the case may be.

6. Having thus explained the reasons and nature of the change of form, I give in the new form the same comparison that was given in the old form in the table in paragraph 3:—

	Revised Estimate.	Accounts.	Accounts, better.	Accounts, worse.
REVENUE.	£	£	£	£
India	67,478,300	67,353,254	...	125,046
England	232,500	242,561	10,061	...
TOTAL	67,710,800	67,595,815	...	114,985
EXPENDITURE.				
India—				
Imperial, Provincial, and Local	47,735,500	47,673,511	61,989	...
Adjustment of Provincial and Local Surplus or Deficit	945,300	978,234	...	32,934
NET	48,680,800	48,651,745	29,055	...
England	16,323,700	16,303,197	20,503	...
TOTAL	65,004,500	64,954,942	49,558	...
SURPLUS	2,706,300	2,640,873	...	65,427

The final result is not of course affected by the change in form. The surpluses of £2,706,300 and £2,640,873 in the new form are the equivalents at 16*d.* the rupee of the surpluses of Rx. 4,059,400 and Rx. 3,961,310 in the old form. The same is true of the total Revenue and of the total Expenditure in any Accounts and Estimates in which the average rate of exchange is taken at exactly 16*d.* the rupee, but not in any in which the average rate differs from that standard. The rate was 16*d.* the rupee in the Revised Estimate of 1898-99, and the total Revenue shown in the new form, £67,710,800, is the equivalent at 16*d.* the rupee of the total Revenue shown in the old form, R1,01,56,61,000, and the total Expenditure, £65,004,500, the equivalent of R97,50,67,000. But in the Accounts the average rate of exchange slightly differed from the standard rate, being 15·9784578*d.* the rupee. The total Revenue in the new form, £67,595,815, converted into rupees at 16*d.* the rupee is less than the total in the old form by R3,29,700, the total Expenditure, £64,954,942, similarly converted is less than the total in the old form, R97,46,53,830, by the same amount.

These differences are caused by the alteration in the treatment of the difference in the equivalents of the sterling figures when converted at 16*d.* the rupee and at the actual average rate. That difference under the old form was distributed over the various heads of Revenue and Expenditure, and under the new form is not so distributed but brought to account through the head XXIV or 31.—Exchange.

The Famine Relief and Insurance Entry.

7. Before leaving these arid questions of Accounts, I should also like to draw attention to the change (in the Revised Estimates of 1899-1900 and the Budget Estimates of 1900-1901) in one entry, under the head of Famine Relief and Insurance, which may have escaped Honourable Members. The recent Famine Commission suggested that the full amount of one-and-a-half crores or £1,000,000 should be provided in the Estimates for the Famine Grant, a recommendation in which the Government entirely agreed. That is to say, the Famine Grant, or the unappropriated balance thereof, will, in ordinary years, when receipts exceed expenditure, be a surplus within the surplus. But the allocation of this first surplus in recent years has been obscured by the practice of charging against it expenditure on works which are not exclusively of a protective, *i.e.*, famine character. To make the situation clear it has now been decided that protective works, the cost of which may be charged against the Famine Grant, shall include only such works as may be sanctioned solely and exclusively in view of their value as a protection from famine. This is an extension to Railway works of a practice which has been uniformly followed in respect of Irrigation works. The programme of purely protective Railway works has been practically exhausted, and that of Irrigation works has been much reduced of late years, and, though the latter may be capable of some expansion, the expenditure on these works will not be large, while the amount required to cover the loss on the Indian Midland and Bengal-Nagpur Railways, which it was specially decided to charge to the grant some years ago, will not usually exceed R30,00,000. There will therefore, now that the grant is relieved from charges for such Railways as the East Coast and South Indian, be a large balance in normal years when there is no direct expenditure on famine, a balance likely to increase as the loss on the Indian Midland and the Bengal-Nagpur lines diminishes. It has hitherto been the practice to show this unappropriated balance under the heading of Reduction of Debt, a heading which has puzzled people who ask how there can be a reduction of debt in a year when fresh loans are raised or in which no debt is discharged? We hope to clear up the difficulty by altering this heading to that of Reduction or Avoidance of Debt. It may lead people to grasp more readily what is actually happening in a normal year. In such a year the Indian Government raises more revenue than it actually requires to meet its ordinary charges against revenue by the amount of the unappropriated balance of the Famine Grant. This amount is devoted to expenditure on public works which would otherwise have to be provided by loan. For instance, in a normal year, in which ordinary revenue and expenditure balanced, the Government of India instead of raising a loan of three crores for public works would be able to reduce the three crores by the unappropriated balance, say a crore, of the Famine Grant. Less debt would be incurred in normal years and the credit of Government would be higher, when it was compelled to borrow.

Part I and Part II.

8. Another change is introduced into the Financial Statement this year. Honourable Members are aware that Part I of the Financial Statement is the only part which is actually inflicted on their suffering ears. Part II, Details of Accounts and Estimates—on which no doubt they fling themselves eagerly when this meeting terminates—was separated off from the main statement some ten years ago, in order to release the main statement (Part I) from being overloaded. Sir David Barbour, a master of clear exposition, effected the separation. Since that time Part II has always been compiled by the Financial Secretary but has issued under the signature of the Finance Member. I think sufficient experience has been obtained to show that the permanent relegation of the Details of Accounts and Estimates to a second chapter or part is useful. It is proposed to continue this practice and to publish Part II with Part I. But as Part II is prepared by the Financial Secretary, it should bear his signature, and its relation to Part I should be explained.

Revised Estimates of 1899-1900.

9. It has already been stated that the surplus of £2,621,800 taken last year, which there was so much reason to think would be exceeded, has remained practically the same, being £2,552,800. Receipts improved by £607,400, but the expenditure increased by £676,400, reducing the anticipated surplus by £69,000. The principal differences will be seen in the following statement:—

Estimates of 1899-1900.

Principal Heads of Revenue.	Revenue.		
	Budget Estimate.	Revised Estimate.	Difference, + Better —Worse.
	£	£	£
Land Revenue	18,427,900	17,240,800	—1,187,100
Opium	4,002,500	4,403,800	+401,300
Salt	5,838,100	5,879,100	+41,000
Stamps	3,264,700	3,231,700	—33,000
Excise	3,852,200	3,860,600	+8,400
Customs	3,099,100	3,153,300	+54,200
Other Heads	6,060,300	5,959,700	—100,600
TOTAL PRINCIPAL HEADS	44,544,800	43,729,000	—815,800
Interest	619,000	604,600	—14,400
Post Office, Telegraph, and Mint	2,043,400	2,466,300	+422,900
Receipts by Civil Departments	1,183,700	1,175,300	—8,400
Miscellaneous	522,200	545,300	+23,100
Railways	15,640,600	16,464,300	+823,700
Irrigation	2,300,700	2,415,200	+114,500
Buildings and Roads	458,800	441,800	—17,000
Receipts by Military Departments	611,800	690,600	+78,800
TOTAL REVENUE	67,925,000	68,532,400	+607,400

	Expenditure.		
	Budget Estimate.	Revised Estimate.	Difference, + Better —Worse.
	£	£	£
Direct Demands on Revenue	7,568,300	7,467,500	+100,800
Interest	1,964,400	1,954,500	+9,900
Post Office, Telegraph and Mint	1,985,100	1,972,100	+13,000
Salaries and Expenses of Civil Departments	10,913,400	10,782,200	+131,200
Miscellaneous Civil Charges	4,072,400	4,051,900	+20,500
Famine Relief and Insurance	753,100	2,072,900	—1,319,800
Construction of Railways (charged against Revenue in addition to that under Famine Insurance)	2,400	2,400	*Nil.*
Railway Revenue Account	16,133,400	16,472,700	—339,300
Irrigation	2,223,200	2,241,800	—18,600
Buildings and Roads	4,536,000	4,130,800	+405,200
Army Services	15,768,000	15,029,600	+738,400
Special Defence Work	...	200	—200
TOTAL EXPENDITURE, IMPERIAL AND PROVINCIAL	65,919,700	66,178,600	—258,900
Add—Provincial Surpluses	...	247,000	—247,000
Deduct—Provincial Deficits	*616,500*	*446,000*	—170,500
TOTAL EXPENDITURE CHARGED AGAINST REVENUE	65,303,200	65,979,600	—676,400
Surplus	2,621,800	2,552,800	—69,000

10. Revenue shows a falling-off of £1,187,100 or 178 lakhs under the head of Land Revenue. This is mainly due to shorter collections and to remissions rendered

necessary by famine. The principal losses occurred in the Central Provinces 35 lakhs, Punjab 37 lakhs, and in Bombay 84 lakhs. The collections in Madras also fall short of the Budget Estimate by about 19 lakhs owing to scanty crops. Opium, however, has come to the rescue with 60 lakhs owing to Bengal Opium fetching better prices. Customs show an increase of over 8 lakhs; a loss in the excise duty on cotton goods on the Bombay side and in the export duties on Burma rice diverted to India, is more than counterbalanced by the new countervailing duty on beet sugar and a larger import of spirits. Receipts from Post Office, Telegraph, and Mint improved by £422,900 or over 63 lakhs. The Mint brought in over 45 lakhs, 32 lakhs came from the profit on new silver coinage, and the remainder was derived from profits on a large coinage of copper coin required for famine relief, and on an increased dollar coinage for the Far East. An increase of 13½ lakhs occurred also under the Telegraph earnings, due to the great number of telegrams relating to the war in South Africa and to transactions in grain, many of them speculative. The famine was also largely responsible for an increase in gross receipts of nearly £820,000 or nearly a crore-and-a-quarter under Railway receipts. The real increase from this cause was even larger than this figure would make it appear, for the Railway earnings had fallen off in the earlier months of the year, and there was a good deal of lee-way to be made up in the autumn. The Railways that contributed principally to this result, taking the difference between the Budget and Revised Estimates of their net earnings, were the—

	Lakhs.
Rajputana-Malwa with a net improvement of	30
East Indian ,, ,, ...	26
Bengal-Nagpur ,, ,, ...	16
Oudh and Rohilkhund ,, ,, ...	12
Indian Midland ,, ,, ...	7

On the other hand, the check in the export trade to our western seaboard, due to plague and famine, resulted in a net loss on the Great Indian Peninsula of 30 lakhs and on the North-Western of 13 lakhs. The net increase in the total Railway receipts, in spite of the large increase in gross receipts, did not exceed 73 lakhs or £484,400. There was also a net improvement under Irrigation of over 14 lakhs, largely owing to the failure of rain in the Punjab.

11. There is not much to arrest the attention of any one running his eye down the comparative column in the Expenditure figures, until the entry of Famine Relief and Insurance is reached, except a satisfactory reduction under Salaries and Expenses of Civil Departments of about 20 lakhs, due almost entirely to the fact that the reserve for Plague expenditure was scarcely trenched upon, the Provincial Governments having generally kept the expenditure on plague within their Provincial grants. The difference shown in the statement above in the entries in the Budget and Revised Estimates under Famine Relief and Insurance is £1,319,800 or nearly two crores. This is, of course, the difference under that entry. But, with reference to my previous explanation, I may point out that the entry under Famine Relief and Insurance does not show the whole of the Famine Grant. To any critic who might ask where, then, in the Budget Estimate is your total crore-and-a-half, the answer is that part of the Famine Grant is shown in the Railway Revenue Account. It may be well to clear up this matter, once for all, since there has been some misunderstanding about it, by running through the total provision for famine purposes made in the Budget and Revised Estimates. Last March the total Famine Insurance Grant, £1,000,000 or one-and-a-half-crores, was appropriated as follows: 113 lakhs to Famine Relief and Insurance, including Famine Protective Works and Avoidance of Debt, while 37 lakhs was taken in the Railway Revenue Account to cover the net loss on the Bengal-Nagpur and Indian Midland Railways. The total provision made for famine purposes in the Revised Estimate is £2,162,400 or 324 lakhs. Of this, £2,054,800 or 308 lakhs will, it is expected, be devoted to direct famine relief in British districts. A small sum of £18,000 or 2¾ lakhs will also be applied to certain Protective Irrigation Works. Both of these sums are charged under Famine Relief and Insurance. An amount of £89,500 or 13½ lakhs taken in the Railway Revenue Accounts will suffice to make good the interest on the Bengal-Nagpur and Indian Midland Railways owing to the improved earnings, mainly on the former Railway. Of the expenditure on direct famine relief the Central Provinces, where the famine made itself earliest felt, absorb 154 lakhs, Bombay takes 110 lakhs, the Punjab accounts for 22 lakhs, Ajmere 17 lakhs, and other Provinces 4 lakhs.

I may also mention here that loans have also been made to Native States to the amount of 48 lakhs, but these are, of course, not charged against Revenue.

The increase of £339,300 in the Expenditure chargeable to the Railway Revenue Account was required to earn the larger Revenue. The large saving of £405,200 in the grants for Buildings and Roads represents the usual lapses from the grants for Civil Works which were especially large this year owing to the exigencies of famine requiring greater attention to relief works and to economies in ordinary expenditure. Army expenditure shows a reduction of £738,400 owing chiefly to the despatch of troops to South Africa, Ceylon, and Singapore, the cost of which will be borne by Her Majesty's Imperial Government, and a considerable decrease in the payments for Ordnance stores in England also contributed to the result. The correcting entries after "Total Expenditure, Imperial and Provincial," relate to the net improvement in the Provincial Accounts as compared with the Budget Grants. The Famine expenditure has been mainly Imperial, and certain Provinces, principally Burma and Bengal, exempt from famine, have participated in the general improvement that, apart from famine, has taken place, to the extent of some 70 lakhs.

Before dismissing the fiscal history of the passing year, it may be noted with satisfaction that we were not obliged to have recourse to a loan. My predecessor left me with high balances, and it was decided last March to husband the anticipated surplus of the year in view of the pending report of the Currency Committee. We have not found it necessary to use a single rupee of the surplus for the purposes of our currency reforms, and it was therefore available and sufficed for all our other purposes.

Rate of Exchange.

12. The rate of exchange taken for the Budget Estimate last March was $15\frac{3}{4}d.$ I think Sir James Westland would be the first to admit that he caused some surprise by taking so modest a figure. However that may be, the average rate during the first six months of the year was 16·002*d.*, but the average rate up to February 28 was 16·069*d.* The expectation is that this year will exemplify the oscillation of the rate in future; that is to say, that in the slack season it will be lower and may approximate to 1*s.* $3\frac{7}{8}d.$, and in the busy season it will be steady at 1*s.* $4\frac{1}{8}d.$ We expect, when this year closes, to have remitted by Council Bills, including those issued against gold received in London, £19,000,000 equal to 2,837 lakhs of rupees.

I need hardly say that for next year we have taken 1*s.* 4*d.* as the rate, and with this remark I may pass to the Budget Estimate.

Budget Estimate.

13. It has already been stated that the Budget Estimate for 1900-1901 gives £70,155,800 as the Revenue, £69,995,500 as the Expenditure, and £160,300 or 24 lakhs of rupees as the Surplus. Following the usual practice I may now run through the various heads, illustrating them by comparison with the same heads in the Revised Estimate of the year which is still with us. The statement below will make the comparison easy :—

Budget Estimates of 1900-1901 compared with the Revised Estimates of 1899-1900.

	Revised Estimate, 1899-1900.	Budget Estimate, 1900-1901.	Difference, + Better — Worse.
Revenue—			
Principal Heads of Revenue—	£	£	£
Land Revenue	17,240,800	18,078,700	+837,900

Army Services	15,029,600	16,258,800	—1,229,200
Special Defence Works	200	...	+200
TOTAL EXPENDITURE, IMPERIAL AND PROVINCIAL	66,178,600	70,546,100	—4,367,500
Add—Provincial Surpluses: that is, portion of Allotments to Provincial Governments not spent by them in the year	247,000	...	+247,000
Deduct—Provincial Deficits: that is, portion of Provincial Expenditure defrayed from Provincial balances	*446,000*	*550,600*	+ 104,600
TOTAL EXPENDITURE CHARGED AGAINST REVENUE	65,979,600	69,995,500	—4,015,900
SURPLUS	2,552,800	160,300	—2,392,500

14. Land Revenue, it will be seen, has been taken at £837,900 or one crore and a quarter higher in the Budget than in the Revised Estimate. It is hoped that famine will have disappeared by the end of next September. The increases in the different Provinces are, Bombay 67 lakhs, Madras 31 lakhs, and Punjab 27 lakhs. There is not much that calls for comment under the other Principal Heads. We have taken Opium at £4,559,800 or 684 lakhs. It is very difficult to forecast the course of prices. But the average price this year has been R1,221 a chest, and recent prices have been so good as to warrant us taking an average price of R1,200 a chest next year. The small decreases under other Principal Heads are due to famine. Passing further down the columns there is a decrease of £68,800 or over 10 lakhs under Post Office, Telegraph, and Mint. It will be remembered that there was an item of 32 lakhs in the Revised Estimates, profits on silver coinage. To what extent we may have to issue fresh silver coinage next year, after the very large additions that have been made to the volume of our rupee currency this year (this subject will be gone into more fully in another place), is uncertain. But meanwhile we are equipping ourselves with a further half million pounds worth of silver. The Secretary of State has bought this amount, which we expect to receive in April. The profit on coining it is taken at 32 lakhs, the same amount as this year. Profits from copper coinage, however, are not likely to be as large as this year, and we take 3 lakhs less under Telegraph revenue. The anticipated receipts from Railways require some explanation,

and it is necessary to cast a glance down to the Railway Revenue Account entry below under Expenditure. A great part of the increase in the receipts is only nominal, because in the last nine months of the year the Great Indian Peninsula will be a State Railway. In the case of a Guaranteed Railway, which the Great Indian Peninsula will continue to be for the first three months, the net receipts only are shown on the Revenue side of the account, and the working expenses are not shown in our expenditure. In the case of a State Railway, gross receipts, of course, are shown on the Revenue side, and working expenses on the Expenditure side. The acquisition of the Great Indian Peninsula, therefore, means a larger addition to either side of the account. Apart from this change in accounting, the Railway Revenue for the year is 53 lakhs less than the Revised Estimates, but we hope that grain traffic will not again be stimulated by Famine.

15. To pass to Expenditure, under Direct Demands on Revenue there is an increase of 28 lakhs, 18 lakhs of which occur under Land Revenue mainly owing to Famine establishments. The increase of £139,000 or 21 lakhs under Post Office, Telegraph, and Mint is attributable to the normal growth of the first two Departments. Any increase under Salaries is usually jealously noticed. The increase of 46 lakhs in respect of Civil Departments is due to a variety of causes. Eight lakhs under Jails are due to Famine, *i.e.*, high prices of food grains; 15 lakhs under Police are largely due to the same cause; Scientific and Minor Departments get 14 lakhs, of which 7 lakhs will go to Census, and the increased expenses of Law Courts will take over 7 lakhs. The striking item in the expenditure columns is, unfortunately, famine relief. I have explained how the total expenditure of £2,162,400 or 324 lakhs in the Revised Estimate is arrived at. The total expenditure for famine purposes of all kinds next year will be £3,505,400 or 526 lakhs, of which all but 5 lakhs will go to direct famine relief in British India, while 20½ lakhs will be provided to make up the loss on the Indian Midland and Bengal-Nagpur Railways. Bombay alone requires over 248 lakhs and Central Provinces 180 lakhs. The Punjab demands 37 lakhs; Ajmer will want 16 lakhs, and other Provinces, chiefly Madras, will want 19½ lakhs. We are meeting the demands of the Provincial Governments in full. We are also assisting the Native States by loans to the amount of nearly 75 lakhs. Grants under the head of Buildings and Roads have been generally reduced in the Provinces owing to famine, but Burma, where the Provincial finances are prosperous, proposes to spend an additional 21½ lakhs out of its wealth on these objects. Military Works expenditure has once more been confined within 115 lakhs. Army Services show an increase of £1,229,200 or 184 lakhs. Of this amount, 37 lakhs must be put down to higher prices of food supplies for men and animals, 22 lakhs are on account of replacement of additional horses sent to South Africa which will be eventually recovered from Her Majesty's Government, and 13 lakhs are on account of the Troopship Service, the cost of which was abnormally low this year owing to the partial suspension of the Home reliefs. Eliminating these items, I may state the increase to Military Estimates at 112 lakhs, of which the re-armament of the Native Army absorbs more than a third. The increase in the Military Estimates is, of course, a payment towards National Insurance. The Military Estimates, and their bearing on our Military policy, are explained by the Honourable Military Member in his Memorandum.

Railway Construction.

16. Under existing arrangements it is the practice of the Government of India to prepare triennial programmes of Railway Construction embracing all Capital expenditure for which Government undertakes any financial responsibility or gives any direct guarantee. The figures for any year included in the triennial programme are also examined in October or November of the preceding year, and the programme of expenditure of the ensuing year is then finally settled in communication with the Secretary of State with reference to immediate requirements for expenditure and to the general Ways and Means of Government.

17. The last triennial programme of Capital outlay on Railways was prepared in November 1898 and contemplated an expenditure of just over 20 crores in the three years from 1899-1900 to 1901-1902 distributed as follows:—

			R
1899-1900 . . .	£4,515,100	equivalent to	6,77,27,000
1900-1901 . . .	£4,485,600	"	" 6,72,84,000
1901-1902 . . .	£4,547,300	"	" 6,82,10,000
	13,548,000		20,32,21,000

For reasons already explained by Sir J. Westland last year, it was decided in 1899-1900 to add to the amount originally contemplated, a considerable amount which, as he said, might "be regarded as arrears of the old programme handed on to the new one": and the grant announced in the Budget Statement was for R8,82,27,000. But this increased grant has been exceeded, and we found ourselves obliged to make additional grants of 46 lakhs during the year to meet expenditure beyond their allotments in which the East Indian and the Assam-Bengal Railways had involved themselves.

18. The expenditure of R6,72,84,000 proposed for the year 1900-1901 in the triennial programme adopted in November 1898 included 1½ crores for new projects. But when, in October last, we resurveyed the programme in the light of the situation at that date, it was found impossible to restrict the expenditure on open line Capital, and on projects already begun, to the amounts contemplated in November 1898. It would have been necessary, in order to meet this class of demand, and also to provide for the new projects set down for the year, to increase the total expenditure on Railway Construction to R8,22,84,000. The enormous demands for famine which were looming on the near horizon, prevented any thought of expansion. All new projects had, to our great regret, to be swept aside, and even outlay on works in progress did not escape some reduction. Instead of increasing the figure of R6,72,84,000 we reduced it in October to R6,54,00,000, but special additional provision has been made for the Assam-Bengal Railway since October, and the final figure for next year will be R7,30,84,000 or £4,872,300. The totals, £6,188,500 or R9,28,27,000 in the Revised Estimates and £4,872,300 or R7,30,84,000 in the Budget, are distributed as follows:—

	Revised, 1899-1900.	Budget, 1900-1901.
	R	R
I. State lines managed by the State or Companies	5,25,29,000	3,80,14,000
II. Lines of Old Guaranteed Companies and extensions	1,00,86,000	49,96,000
III. Lines of other Guaranteed or Assisted Companies	2,87,32,000	2,96,24,000
IV. Branch lines on firm guarantee	14,80,000	4,50,000
TOTAL	9,28,27,000	7,30,84,000

Capital Expenditure on Irrigation.

19. For some years it has been the practice to provide a fixed grant of 75 lakhs a year for Capital expenditure on Irrigation Works. In the Budget Estimate of the current year the grant was raised to 85 lakhs. We desired to raise the grant substantially during the year, but our necessities curtailed the proposed increase to some 5 lakhs which, moreover, the Department undertook to spend on works providing labour in famine districts. This year's grant will, therefore, absorb about 90 lakhs. Looking to the very remunerative character of the greater part of our Irrigation outlay, and to the immense value in times of scarcity of the food supplies which can be relied upon with confidence to come from the irrigated areas, the Government of India has resolved to spare no effort to make ample provision for irrigation. In pursuance of this policy it has been decided, in spite of our difficulties, to raise the irrigation grant in the Budget to a full crore.

20. The following are the details of the estimates:—

	Revised, 1899-1900.	Budget, 1900-1901.
	R	R
Mandalay Canal	11,00,000	9,00,000
Lower Ganges Canal (including Fatehpur Branch)	9,45,000	4,16,000
Chenab Canal	9,15,000	7,90,000
Jhelum Canal	26,86,000	34,14,000
Jamrao Canal	12,07,000	7,51,000
Other Projects	21,20,000	37,29,000
TOTAL	89,73,000	1,00,00,000

Remittance and Debt.

21. The following are the usual details of the requirements of the Secretary of State:—

(A)

	Revised, 1899-1900.	Budget, 1900-1901.
Requirements on Government Account—	£	£
Excess of expenditure on Revenue Account	16,249,700	17,071,500
Expenditure not charged to Revenue	644,000	6,835,900
Net payments on Remittance Account, etc.	—419,700	330,000
Total Requirements	16,474,000	24,237,400
Transactions of Railway Companies—		
Net receipts on account of Capital	1,606,300	3,413,500
Payments for Stores, etc.	3,054,400	2,740,600
Net Outgoings	1,448,100	—672,900
Net Funds required	17,922,100	23,564,500

The following figures show how the above requirements will be met:—

(B)

	Revised, 1899-1900.	Budget, 1900-1901.
	£	£
By sale of Council Bills	19,000,000	16,440,000
Transfer of gold to or from Currency under Act II of 1898	—1,500,000	500,000
Purchase of silver for coinage	—500,000	...
By addition to Permanent Debt	...	5,922,400
Increase of Temporary Debt	...	500,000
Reduction of Cash Balance	922,100	202,100
	17,922,100	23,564,500

According to the programme announced in the last Financial Statement the Secretary of State intended to renew £4,500,000 Temporary Debt on the security of India Bills, and no addition to the Permanent Debt of Government was intended. This intention has been carried out, but the amount of Temporary Debt created and discharged has been £6,500,000 owing to some of the India Bills having been issued for six months and having consequently to be replaced twice within the year.

22. The heavy trade demands for remittances during the year enabled the Secretary of State to raise his drawings on India from £17,000,000 to £19,000,000, but owing to the Famine expenditure, the treasury balances in India were not sufficient to meet the demand in full, and £1,500,000 out of the total drawings were met out of the Currency reserve, the gold being set apart in England under Act II of 1898. The Secretary of State has also employed £500,000 of the proceeds of Council Bills for the purchase of silver for coinage into rupees, the Government of India having decided that a further coinage of rupees, in addition to the coinage of the present year, is desirable. Thus the net addition to the Home Treasury balances by means of Council Bills in the year has been £17,000,000, the same amount as was entered in the Budget Estimate. A sum of £650,000 will be received from Her Majesty's Government in repayment of the disbursements in India in connection with the despatch of Troops to South Africa. With other insignificant differences the total reduction of cash balance during the year is now estimated at £922,100 against £1,487,100 taken in the Budget Estimate.

23. It will be seen from Statement A in paragraph 21, that the gross requirements of the Secretary of State for 1900-1901 amount to £24,237,400. The first item is "Excess of Expenditure on Revenue Account" £17,071,500. The second item, £6,835,900 opposite "Expenditure not charged to Revenue," is exceptional in character. Part of this expenditure is, as usual, for stores, but the far greater part, £5,922,400, is really a book entry connected with the purchase of the Great Indian Peninsula Railway, and will be explained below. The gross requirements are reduced by the surplus of the money raised by Railway Companies over the issues to be made to them (that is, by £672,900). Therefore the net requirements become £23,564,500. Statement B will show how it is proposed to meet this net requirement. The Secretary of State's drawings will be limited to £16,440,000 to which are added £500,000 from an increase in Temporary Debt in the form of India Sterling Bills, while £202,100 will be taken from the Cash Balance in London. In addition, the Secretary of State will receive a further sum of £500,000 from gold forming part of the Currency Reserve, but held in London, on the payment of the equivalent in India into the Currency Reserve here from silver purchased this year for coinage in India. The entry opposite Permanent Debt of £5,922,400 completes the £23,564,500. It represents the Debentures and Debenture Stock of the Great Indian Peninsula Railway Company, which will be purchased on June 30. This is really no increase to the Permanent Debt, and no new liability, for, when the Great Indian Peninsula was a Guaranteed Railway, the Secretary of State was always ultimately liable. It is in fact a book entry: and balances a book entry of a corresponding amount included under the item of £6,835,900 in the statement of the Secretary of State's gross requirements. Owing to the assistance procured in these various ways the Secretary of State avoids raising fresh Permanent Sterling Debt.

We estimate that in India we shall have to borrow for Ways and Means up to three crores of rupees.

24. These announcements, both as regards the amount of Council Bills and as regards loans in England and in India, are made with the usual reservation of entire liberty to the Secretary of State and the Government of India to vary the amounts as may be found convenient.

Financial Changes in 1899-1900.

25. In turning to the financial changes of the year, it must be premised that under the pressure of famine Government can do little more than cope with immediate difficulties, and mark time so far as the fiscal system is concerned. Nevertheless, this year has witnessed the working of new economic legislation destined, perhaps, to be far-reaching in its effects. I refer to the Tariff Amendment Act whereby countervailing duties were imposed on bounty-fed beet sugar. The Act received the assent of the Governor General on March 20, 1899, but, as it did not apply to sugar in transit, its actual operation dates from the current financial year. Responsibility for the actual introduction of a more momentous measure belongs exclusively to the twelvemonth now terminating. India has at length emerged from a period of transition in her currency, has reached the goal to which she has been struggling for years, has established a gold standard and a gold currency, and has attained that practical fixity in exchange which has brought a relief alike to the private individual and to the Government finances. Yet, it is not only as regards currency that India has been called upon to set her house in order. Her equipment as regards banking is admittedly unsatisfactory and retards her development. There is, indeed, unanimous agreement on this point, although, as is natural, in a matter of extreme intricacy and where divergent, or apparently divergent, interests are concerned, there are various opinions as to the really weak places in the equipment, and as to the remedies to be applied. The outgoing year has witnessed no legislation on this important subject, but there have been discussions which, I venture to think, have contributed to clear up some of the issues involved, and the Secretary of State has the views of the Government of India now under consideration. I may perhaps beg the indulgence of Council if I proceed to touch in some detail on these three important events which distinguish the year, countervailing duties, currency legislation, and the examination of our banking position.

Countervailing Duties.

26. The countervailing duties on bounty-fed beet sugar came into force, as I have said, in the current year, practically not until May. We have, therefore, the experience

of less than a year to guide us, and indeed the figures from May 1899 to January 1900 are all that are now available. It is most unfortunate that trade was conducted under abnormal conditions of plague, or of plague and famine, during this period, and we cannot, in consequence, even look to these months as throwing light on the effect of the measure under normal conditions. Nevertheless, the figures will have considerable interest for Council, though I should myself like further experience, under more normal conditions, before drawing any final conclusion. Austria is our great purveyor of beet sugar. The total exports of beet sugar from Austria-Hungary to all the world are worth about £5,500,000, and constitute one-twelfth part of that empire's entire exportations; Austria-Hungary is therefore likely to fight hard for this trade. The total amount 498,484 cwt. received by India from Austria during the nine months I have taken was 26 per cent less than the amount in the corresponding period of 1898-99 and 25 per cent less than that of 1897-98. German beet sugar, which had been largely displaced by its Austrian rival before our legislation was undertaken, dwindled from 300,604 cwt. in the nine months of 1898-99 to 31,138 cwt. in the nine months ending last January. The total imports of beet sugar, 530,705 cwt., the additional duties on which are expected to yield in the whole year some 7 lakhs, were accordingly 44·6 per cent *less* than in the corresponding months of 1898-99 and 63·5 per cent *less* than in the corresponding months of 1897-98, but they were 63·3 per cent *more* than the average in the same months of the five preceding years. The fluctuating character of the importation is very noticeable. Nevertheless, the diminution in the imports this year compared with the last two years is striking, and taken by itself the decline might be held to indicate that the import of beet sugar had been arrested; but, at the same time, it must be remembered that there was a quite sudden and abnormal expansion of imports in 1897-98, that stocks were unusually large in Bombay in 1898, and that the entire decline in the imports of beet sugar has occurred in Bombay and Karachi, indicating also, I am afraid, that the purchasing power of the people on our Western sea-board has been sadly reduced by their accumulated disasters. The total import of sugar into India during the nine months was beet sugar and cane-sugar together, an aggregate of 2,308,432 cwt. or 11·7 per cent less than in the previous corresponding nine months, 22 per cent less than in the same months of 1897-98. The value in sterling was £1,681,138. The decline in beet has been in part made up for by larger imports of cane sugar. As regards these, I find that the imports from Mauritius are smaller than last year but larger than the year before; those from Java and China rose considerably. Passing to the influence of the Act upon prices, it is notable that prices rose immediately after the Act, though they are now tending to decline, and the rise in prices may, I think, be assigned principally to the measure. Producers of cane-sugar in China and Java have profited by the rise in price. How far it has benefited Indian producers it is impossible as yet to say. We are awaiting replies from the Local Governments on this point, and are not yet able to say whether native refining industries have received any stimulus.

Trade and the 1*s*. 4*d*. Rate.

27. Before proceeding to the second event, which distinguishes the financial year, the introduction of the gold standard and gold currency, I would, as a preliminary, invite attention to the volume of trade in the past ten months. Special reason exists for looking closely into these figures both with regard to the trade balance on which India depends to meet her foreign obligations, and with regard to the sterling rate fixed for the rupee. Strong objections were taken to stereotyping the rupee at 1*s*. 4*d*. on the ground that the trade of 1898-99 was altogether unprecedented and abnormal, that such a volume of trade was unlikely to recur, and that the normal volume of trade required a rupee at a lower sterling ratio. It was further urged that a rupee appreciated to 1*s*. 4*d*. would check exports, and would, in particular, exercise an evil influence on our opium revenue and trade with China. How far have these objections been supported by facts, how far do the figures of the year indicate what is the normal volume of Indian trade? The answer to these questions will, I think, dispel any apprehensions that may still linger as a consequence of the objections mentioned. It might, indeed, have been expected that our trade would not have kept at the level of 1898-99. It has been carried out under conditions which have certainly checked anything like a normal rate of growth. Plague has been with us the whole time, the failure of the rains and famine came early, and the cotton-spinning and weaving industry has been more or less in a

critical condition owing, I think, to over-production in relation to the Chinese market. In spite of these adverse conditions the total volume of our trade, excluding Government transactions, measured in sterling compares as follows with the trade of the corresponding ten months of preceding years:—

First Ten Months.	Imports.	Exports.	Total Trade.
	£	£	£
1897-98 . . .	48,932,487	55,976,774	104,909,261
1898-99 . . .	44,252,991	65,045,099	109,298,090
1899-1900 . . .	50,367,975	64,993,058	115,361,033

The import trade completely recovered from its depression, at any rate as far as the earlier months of the year were concerned. Some part in this increase is due to fresh capital coming out to India, and the imports of gold, in sovereigns from Australia and in gold yen from Japan, play a large part. But it was the effect of the 1*s*. 4*d*. rupee on the export trade that was chiefly dreaded, and it was in respect of exports that 1898-99 was declared to be an unprecedented year. The figures do not bear this out, although there has been a serious decline in the export of wheat and in the export of rice, owing, as regards the latter, to the rice, which would otherwise have been exported to foreign countries, being diverted to the famine districts in India. Nevertheless, in spite of this, the decline in the whole value of the exports is a very small fraction. Whether February and March, with the continued diversion of rice to India, and the failure of cotton and oil-seeds in Western India owing to the drought, will yield results on the same scale as the months under review, is doubtful. But I think it is clear that our exports, even under the depressing circumstances of this year, show that 1898-99 was in no sense an exceptional year, and that their expansion in happier times may confidently be counted upon. I have alluded to the diversion of Burma rice to India. The extent to which Burma is becoming the food reservoir of India is remarkable, as the following figures will show:—

First Ten Months.	Total quantity of Burma rice produced.	Quantity of rice sent to India.	Value of Burma rice crop [based on Rangoon prices in the rice season].
	Tons.	Tons.	£
1896-97	2,384,000	168,500	12,800,000
1897-98	2,011,000	500,300	12,400,000
1898-99	2,243,000	259,000	10,650,000
1899-1900	2,790,000	427,700	14,100,000

Rice indeed is our premier export crop. The hopes that were once founded upon wheat have been disappointed. In the last six years the average annual value of the wheat trade has been about £2,700,000, that of the rice trade over £8,500,000. Wheat in India is a very uncertain crop, and the demand for it hardly exists except when crops are short elsewhere. But Lower Burma has never known a failure of the rice-crop; the demand for Burma rice is constant, and the Burma crop is a dominating factor in the markets of Europe, Asia and South America. Looking further into the figures of our exports it is notable that the export of food grains is about £5,050,000 less than last year, but other articles have come to the rescue, including, amongst many others, tea, raw sugar, wool, jute and its manufactures, coffee, hides, opium. The increase in the last item but one, hides, is not, however, a matter for congratulation, as it is largely due to the mortality among cattle in consequence of drought. But the statistics for opium do not support the allegation that the enhancement of the rupee, and the fall in the China exchange on India, would check the opium revenue. The demand in China has been brisker, and the average price R1,221 realized per chest is higher than the average prices R1,023 and R1,055 in 1897-98 and in 1898-99. I trust that this examination of our trade will be considered sufficient to allow me now to pass to the gold standard without further discussion of the sterling rate adopted for the rupee.

Gold Legal Tender.

28. The measure passed on the 15th September to make gold legal tender in India was the outcome of the Indian Currency Committee's Report. Clear and convincing as the Report was, and desirable as it seemed to give immediate effect to its recommendations, the Government was subjected to considerable pressure to defer action when the Report appeared. We received urgent representations from several important quarters to hold our hands. It was contended that in making the sovereign legal tender Government abandoned the advantages which the monopoly position of the rupee gave for

The Gazette of India,

EXTRAORDINARY.

PUBLISHED BY AUTHORITY.

CALCUTTA, SATURDAY, MARCH 24, 1900.

MILITARY DEPARTMENT.

Fort William, the 24th March 1900.

With the approval of the Secretary of State for India, the Right Hon'ble the Governor General in Council is pleased to appoint General Sir A. P. Palmer, K.C.B., Indian Staff Corps, Commanding the Forces in the Punjab Command, to be Provisional Commander-in-Chief in India, *vice* General Sir W. S. A. Lockhart, G.C.B., K.C.S.I., deceased. Dated 24th March 1900.

P. J. MAITLAND, *Major-Genl.,*
Secretary to the Government of India.

Printed and published for the GOVERNMENT OF INDIA, *at the Office of the* SUPERINTENDENT OF GOVERNMENT PRINTING, INDIA, *No. 8, Hastings Street, Calcutta.*

attracting gold; that the moment the sovereign was legal tender, it would cease to reach Government, it would be absorbed, would disappear like rain into the sea, etc., so that the gradual accumulation of gold would be arrested, and that Government would be driven into borrowing for its stock of gold. We considered these objections carefully, but decided that the case for postponing action was not made out, and believed that exchange would tend to settle, at any rate in the busy season, at the maximum level possible under our policy, and that gold would not be deflected but would still reach us. The result is well known. The alarmist predictions of our friends have not been verified. Instead of gold ceasing to reach us we have almost been swamped with gold. Difficulties, of a temporary character, it is true, have arisen from its plethora, not from its scarcity, so true is it that the unexpected always happens.

29. I do not venture to claim for one moment that Government foresaw the enormous inrush of gold which has been brought about by the withdrawals of silver up-country on account of famine relief by unusual movements of grain, and by the requirements of an exceptionally large rice crop in Burma and also by capital coming out to India. But it is not unfair to claim that the reasons which decided Government to take instant action have proved sound, and that, independently of the abnormal causes to which I have alluded, the operation of other causes on which Government relied has not disappointed us. As I have said, we have been nearly swamped (temporarily) by gold. The amount in our currency reserve on April 1, 1899, was £2,030,000. It stood on March 7, 1900, at £7,069,800; the amount accumulated in London under Act II of 1898 stood at £1,500,000 making the aggregate £8,569,800. The difficulty has been that of meeting the demand for rupees in exchange for notes or gold tendered to us. To meet this demand we could rely in the first place upon the silver liberated from the currency reserve by the gold taking its place. But it is obvious that a certain number of rupees must be kept to meet the needs of the public, and that the stock of rupees must not, therefore, be unduly reduced, while the amount of gold that can conveniently be kept in the actual currency reserve in India must depend partly on the extent to which gold will pass into circulation. It has been decided as a tentative measure to hold £5,000,000 in our reserve in times of low balances, though this normal amount may be increased in the time of high balances, and to pay out any gold in excess of the £5,000,000 minimum reserve. Now, if we had only paid out silver up to the extent of five millions of gold, we should of course have released 7½ crores of rupees. But the gold which has been passed into us for silver in India amounted up to the 10th of March to £7,208,000 and has drawn out from us 10 crores and 81 lakhs of rupees. In addition there was the amount paid out on account of gold received in London, so that our balance of coin in silver rupees began to run low. We decided, therefore, to re-coin some uncurrent silver we had by us and also to buy new silver for coinage. Our new rupee coinage will amount to about 2½ crores. We neither propose to add more rupees than are necessary of new coinage to the circulation, nor to hamper trade by refusing rupees for gold or notes presented.

To sum up, before the beginning of the present year we had added 305 lakhs from our reserve to the volume of silver circulation in exchange for gold presented to us. In this year we have added 776 lakhs in exchange for gold presented in India, and 225 lakhs in exchange for gold paid in at home, a total for the year of 10 crores 1 lakh. To enable us to make these additions we have had to coin new rupees, amounting to about 1½ crores, and to ensure our meeting further demands we have decided upon supplementary coinage to the extent of 1 crore, a total, as stated above, of 2½ crores.

The Rupee Currency.

30. This brings us to the important question of the relation of the silver currency of India to the functions which it has to perform. Perhaps it is not rash to assume that in 1893 the silver currency was redundant. It is impossible to arrive at mathematical accuracy on this subject; but its importance is extreme, and although I am aware that I shall be treading on controversial ground, it is not right to pass by on one side. There are such enormous deductions to be made from the quantitative theory in western countries amply equipped with credit money, with progressive transport, and with constant reductions in the number of hands employed in given industries, that the theory virtually disappears from sight, and that the quantity of standard coin offering in the market probably operates only in so far as Bank

reserves may be concerned. But in India where these deductions cannot be largely made, and where other conditions do not change rapidly, the quantity of currency being supplied and offering in the market must have a very material effect in regulating its value in exchange with other commodities. Therefore the relation between the volume of the currency, and the duty that is thrown upon it, is very important in India, not only as regards rupee prices in the country, but as regards exchange through the influence of rupee prices on exchange. I am not of course denying that exchange also depends upon the relation between our exports and imports, but it must not be forgotten that the volume of currency as influencing rupee prices is another material factor. To put it in an extreme form, could it be denied that if the quantity of currency offering in the country was suddenly doubled, other things being equal, that is to say, other conditions remaining unchanged, prices would not also tend to double, and exchange to fall in a corresponding ratio? Therefore our currency policy, as a whole, must be affected by the relation between the volume of currency and the number of transactions, and it is essential that the currency should adapt itself automatically to the requirements of trade. Looking to the events of this passing year my own impression is that the redundancy or superfluity of the silver currency that formerly existed has been absorbed. At the same time the normal march of affairs has been complicated by unusual factors, such as the famine and drain of silver to relief works, and there is need for caution. We shall be in a much better position to form a sound opinion as to the sufficiency or otherwise of our silver currency when silver coin flows back to trade centres from famine districts, and when we have had the experience of contracted trade in the summer months. The influence of the return of this silver and of the after-effects of famine must be awaited with some anxiety on the part of Government—an anxiety which, however, will be mitigated by the fact that the accumulation of gold, available for foreign remittance, has been much larger than we could have reasonably expected. I say the after-effects of famine because I believe, though it may seem paradoxical, that famine stimulates exchange. Or, rather, that this is the immediate effect of famine owing to the withdrawal of rupees from trade centres and the consequent greater demand for the rupees left in those centres, while the curtailment in exports resulting from shorter crops does not influence exchange until some months after famine has made its appearance and after the expenditure on famine relief has begun. However, under our present system the volume of the silver currency may be fairly regarded—under normal circumstances, for I must except famine demands—as adjusting itself automatically to the duty thrown upon it; in other words, to the demands for it. I should indeed shudder if it were left to the Government to determine, with nothing to guide it, whether the currency was or was not redundant, and to take action accordingly. It would be more than difficult to steer a middle course between the Scylla of stringency with lowering of prices and the Charybdis of dilution of the currency with depression of exchange. But henceforward the Government will be guided by the trade demand for our silver-circulating medium, for our notes printed on silver as we may really regard our rupees as being, the trade demand expressing itself in the presentation of gold. As long as Government refrains from coining rupees, except upon the demand of trade, there can be no dilution of the currency. There can be no contraction, as long as trade, if it needs rupees, has only to tender a sovereign to obtain silver coin in exchange, coin already in our balances or new silver coin if the balances will not suffice. The only difficulty will consist in closely watching the times and seasons so that the supply may be there to meet the demand and not be forestalled, as rupees take time to coin. But experience will soon supply indications for the future. It has already been stated that we are in process of equipping ourselves with additional silver to the value of one million sterling. The only other intervention of Government that I can foresee will possibly be recourse to shipping surplus gold to Europe as a temporary corrective in abnormal times, such as upon the return from up-country of silver coins after a famine. It might, under such circumstances, be desirable to restrict Council Bills temporarily. But the inflow and outflow of gold through private agency, according as the demand varies in either direction, is expected to become a regular factor in Indian business.

Gold in Circulation.

31. Having thus dealt with the general question of our currency, I may now turn to an interesting point: how far gold coins are passing and are likely to pass into general circulation? It has been said that we resolved when our gold reserve exceeded

the fixed minimum of £5,000,000 to pay out gold. We began to give out gold on January 15. I may perhaps explain that Government has no intention of forcing gold upon a reluctant public, although, now that the public has spontaneously taken a certain number of sovereigns, we thought it was not unjustifiable to familiarize people more widely with gold by cashing Postal Orders in Presidency towns of the value of R15 or £1 in gold coins, and we also propose to pay certain salaries in gold in the Presidency towns. Recipients of these gold coins can, of course, always get silver for them, if they really desire silver, by tendering them at the Currency Offices. The amount of gold taken out from the Currency Offices voluntarily by presenters of notes from January 15 to March 10 has been £130,700. Calcutta easily ranks first on the list of towns that are taking to the use of gold. Calcutta has absorbed £84,309. I believe that the rate at which gold is taken is likely to increase slowly, and that gold will pass gradually into general circulation in our sea-ports and large towns. No expectation was ever formed, nor is there any reason to desire, that gold would penetrate into the interior, or that the large mass of transactions in the country would ever be conducted except through the medium of silver and copper. Gold is behaving very much as we anticipated. We have been frequently told, and with perfect justice, that we could never claim to have a true gold standard in India until we were prepared to exchange gold for rupees as well as rupees for gold. By being prepared to exchange I do not mean that we should accept a legal liability to give gold for rupees, but that in practice, as for example in France, anybody who wanted gold for internal purposes should be able to obtain gold freely, without let or hindrance. Theorists, indeed, argue that neither France nor the United States possess a gold standard in the full and complete sense of the words. But I think no one will dispute that if we can advance to the same position as France we shall have attained a gold standard for all practical purposes. A year ago it seemed that we should probably have to sit for a long while under the reproach of our critics, and put up with what has been termed an "exchange standard." It then appeared impossible that in twelve months we should be paying out gold to anybody who asked for it. We are doing so now. Whether we shall be able to continue to do so without check or interruption, whether now we have once started giving gold for rupees we may not have to suspend temporarily, is not a matter about which confident prediction can be made. But it would be reasonable to say that the auguries are not unfavourable for our being able to pursue the path on which we have entered. Our position in respect of gold is strong. In India and in London we have accumulated nearly £8,600,000. We have, as I have explained, set aside £5,000,000 for the present as our minimum reserve against eventualities, against the contingency of the Secretary of State's being obliged to restrict or curtail his drawings and to ask us to ship home gold to enable him to meet his obligations. Any gold received in excess of this minimum, or of such minimum gold reserve as may, with further experience, be established, we shall be ready to pay out as we are paying it out. But the probability is that the gold reserve, ultimately available for foreign remittance, will continue to exceed the minimum experimental reserve. Gold is still coming in, though the inflow is expected to slacken, and may, with confidence, be expected to reach us at least in every busy season. And in addition to the gold received from abroad, we may reckon upon the gold mined in India. It has been decided to constitute a branch of the Royal Mint at the Bombay Mint for the coinage of gold. The terms of the proclamation to be issued under the Imperial Coinage Act have been settled, and we are merely awaiting now until the Royal Mint has satisfied itself as regards the Mint premises and appliances at Bombay. A representative of the Royal Mint is starting this week for Bombay to report. The gold from the Mysore mines is, indeed, already reaching us in anticipation of coinage, and we count upon receiving an annual increment to our stock of gold of from one-and-a-half to two millions from this source. And may I perhaps express satisfaction in passing that we have been able to assist the Indian gold mining industry by saving it the freight and charges incidental to the transmission of its gold to London?

Exchange and Telegraphic Transfers.

32. It is but a few years ago, since a Finance Member exclaimed at this season "Exchange is still the only burden of my song," and on looking back through the Financial Statements and discussions of the last twenty years exchange is writ large, very large, on every page. There is little to be said about exchange this year. The object of the Government, a stable exchange between the gold points, *i.e.*, an exchange

varying between 1*s.* 3$\frac{7}{8}$*d.* and 1*s.* 4$\frac{1}{8}$*d.* or, in the case of telegraphic transfers, 1*s.* 4$\frac{5}{32}$nds., has been maintained. Indeed there would be nothing to be said about exchange, were it not for the fact that for a brief period, and for exceptional reasons, exchange advanced above 1*s.* 4$\frac{5}{32}$nds. I refer to the action of the Secretary of State in deciding in January to limit telegraphic transfers under Act II of 1898, whereby silver can be obtained from the currency reserve against the deposit of gold in London: to limit them, I should explain, by progressively enhancing the price for such accommodation. The situation that dictated such action was to some extent caused by the Exchange Banks, who, as profitable employment for money existed in London, had not brought out money to India at the beginning of the season. Indeed the Exchange Banks in December urged that any loans which Government might be able to make to the public should be made to them as well as to the Presidency Banks, or failing this, if the loans were made through the Presidency Banks, they demanded to have a first refusal of this money to the exclusion of merchants, European and Native. The request was refused.

33. The season opened, therefore, without the assistance of the money that is usually brought out before Christmas by the Exchange Banks. But after Christmas, when rates grew easier in England, there was a sudden demand for transfers to obtain money here, while at the same time there were unprecedented demands for coin to move a record rice crop in Burma, together with an increasing drain of silver to the famine districts, and an inflow of gold exceeding expectations. The silver coin reserve of Government in consequence rapidly neared a point at which it was impossible to continue to meet unlimited transfers. Therefore the Secretary of State decided to limit the demands by gradually raising the rate, thus meeting the most urgent demands, and weeding out the less urgent, while warning those whose demands were not so urgent to ship gold to India. No other course was practical. The liability of the Secretary of State to keep the tap turned on indefinitely at 1*s.* 4$\frac{5}{32}$nds. has been asserted. But I cannot see that any positive liability exists, and I wonder if those who assert its existence would have preferred that the stability of our currency (whose situation they were well able to appreciate and follow) should have been affected by the reserve of rupees being dangerously reduced? There is another observation to be made, though I am afraid it may be resented in certain quarters because it is inconveniently true. The incident exemplifies the difficulties which Indian trade is likely to run into, if the Banks and merchants trust to Government always meeting their demands from its resources instead of supplying themselves with funds.

Banking Discussion.

34. I have already stated that the current year has been marked by much discussion on the banking situation in India. It was inevitable that this discussion should arise. Recent years in India have abounded in periods of stringency, and more than one exceptional measure, such as the reduction of the silver in the currency reserve, has been taken to deal with an imminent crisis. It has long been clear that something is amiss, if not actually rotten, in the State of Denmark. Writing in December last the Bengal Chamber recorded a deliberate opinion that its members "are convinced that in the busy season the banking facilities of India are not sufficient for the trade and satisfactory development of the country, and at times of pressure the existing arrangements for giving relief seem to them to be quite inadequate." These are grave words. That discussion indeed has not supervened earlier may be attributed to the existence of general hesitation while India was passing through the transitional stage immediately following the closure of the Mints. But the moment India emerged from that stage the subject pressed for consideration, and this is an answer to the somewhat wild statement that Government has forced on this question, because the establishment of a gold standard was not proceeding fast enough in its judgment, in order to hasten this desired consummation. In so far as the establishment of a gold standard (which has perhaps proceeded even faster than our desires) has had any influence on the matter it is this. We have been told to expect with a stable exchange that British capital will more readily seek investment in India, and indeed there are more than indications that reasonable expectations will not be disappointed, for a not inconsiderable amount of capital has come out. The tide has turned. But if capital seeks India more readily, investments will no doubt be made in mines, railways and industrial enterprize generally, and there will arise a demand for banking facilities in connection with these investments. The revision of our banking situation was, therefore, in nowise part of a design to hurry

on the gold standard, but followed upon the initiation of that standard. The matter was brought to a head by a request, and a very natural request from the Presidency Banks, for the extension of their statutory powers. We thoroughly sympathized with that request; not so much in the interests of the Banks, as in the interests of the development of India. But a doubt existed, and had previously found expression, how far, in view of their capital and resources, it was prudent to extend the operations of Banks which are the custodians of the public balances, and in whose cash balances the Government account bulks so largely. The Bank of Bengal stated in a letter of the 2nd of December last that the Directors were of opinion that the restrictions imposed on their operations might be "withdrawn with safety and advantage without *in ordinary times* overtaxing the resources of the Banks," and added that they "would not be disposed to countenance any great extension of the Bank's investments in securities which might not be easily realizable." But we have to legislate for extraordinary as well as for ordinary times, and the securities of Assisted Railways and District Boards will probably not be easily realizable for some time to come. The discussion of the banking situation to my mind has been of great utility, and I cannot believe that the discussion, to which valuable suggestions have been contributed from many quarters, and in which the public has taken so much interest, will not, sooner or later, result in some important improvement. The Government of India for its part carefully considered the various representations and arguments that have been made, and has submitted comprehensive recommendations to the Secretary of State. No answer has yet been received, nor, considering the importance of the subject and the shortness of the time, could an answer have been received. As anything which can elucidate the subject is not amiss, I may perhaps before leaving the question offer one explanation. Considerable criticism has been directed against the proposed project of a "State Bank." It was not unnatural perhaps that some misconceptions should arise until the exact recommendations of the Government are made public. But, on the other hand, nothing has been stated by the Government, nothing was said by myself, when I had the honour to explain in Council, in answer to the Honourable Mr. Arthur, the suggestions I should make to Government, on which an allegation could be founded that the creation of a State Bank was contemplated. It is right to say this to remove the apprehensions that have been expressed in certain quarters of State intervention, State competition and other unspeakable horrors. What I then said I would suggest to Government for consideration was that a Central Bank of India, with branches possessing large local autonomy, might be formed by the amalgamation of the three Presidency Banks; that this Bank might, under certain conditions and restrictions, have access to London; and that to this Bank, as to an Agent, might (though this is not an essential condition) be entrusted the management of the Paper Currency. The arrangement as regards the note issue would be analogous to that which obtains in England. As regards its banking side, the Bank would have, as the Presidency Banks have now and as the Bank of England has now, the custody, at any rate to a large extent, of the public balances; and as in the case of the Bank of England, the profit derivable from the Government balances would be considered in fixing the remuneration of the Bank for doing the public business. If anybody cares to call a Bank framed on these lines, a Bank in which the Government holds no shares, on whose Board it has no Director, in whose banking profits it has no interest—if there is anybody who desires to term such an institution a State Bank, and to detect behind it the gruesome spectre of State competition, of course he is at liberty to do so. But he must then be equally prepared to call the Bank of England a State Bank, which it notoriously is not in the accepted meaning of language.

Government Balances.

35. There is yet another question at which I beg leave to glance in connection with the history of the year. I mean the utilisation of the Government balances in the busy season. It may be as well, perhaps, though the matter has been frequently discussed and explained of late, to go over the ground once more. Government keeps its working balance in the Government Treasuries, the Reserve Treasuries and the Presidency Banks. Government Treasuries are maintained where there are no Presidency Banks or their branches. The Reserve Treasuries were instituted by Lord Northbrook to give Government control over a certain sum of money for emergencies, Government having been resisted and hampered on two occasions when it required to withdraw its own funds from the Banks for pressing needs. As regards the Presidency Banks, Government

keeps a balance at their Head Offices maintained at a fairly constant figure, and this balance may, in fact, in so far as it exceeds what is really required for treasury purposes, be considered as additional to the real working balance of Government. But there are seasons when the Government receipts exceed the amount required for its working balances and for the constant balance at the Banks. It might be supposed that this excess should naturally go into the balances at the Presidency Banks, and that the Government balance should shrink or expand according to the receipts or outgoings of Government. It has, however, been the arrangement, and a deputation from the Bengal Chamber of Commerce in 1898 recognised that it was advantageous, to have a fairly constant balance with the Presidency Banks, while the excess receipts of which I have been speaking flow into the Reserve Treasuries which, rather than the Banks, are thereby primarily exposed to the sudden and fluctuating demands which war and famine and all the exigencies of a great Government may entail. So far, therefore, as the Government balances in the Presidency Banks do not, as might be expected, mount up in the busy season, which is also the season of revenue collections, the Government is not open to the reproach of locking up its balances. I do not see that the arrangement could be changed under present circumstances, and Government could hardly move in the matter except at the request of the business community who were a party to it. Whether it would be not more natural to pass in all the Government receipts if the Banks had a larger capital and larger resources, and the Government could always count on getting its own money without serious disturbance, and whether the Reserve Treasuries are not an anomaly, but a disagreeable necessity, due to existing circumstances, are other and larger questions. If the Reserve Treasuries did not exist, if there was a Bank powerful enough to ensure Government obtaining any money it called for, a larger part of the money collected by Government would be returned into ordinary channels and be available for trade. The real gist, however, of the accusation that Government locks up its balances is concerned with the granting or refusal of temporary loans in the busy season from those funds which I have described above as the receipts in excess of our working balance. That was a subject which was gone into last year, and the Secretary of State has laid down and made public the conditions under which such loans may be granted. There is no unreadiness to make loans under those conditions; but the history of this year enforces the danger of relying on such loans. We had one application this year for a loan for 30 lakhs to Bombay to avert, so we were assured, a most imminent crisis. We were not in a position to make the loan; and moreover those who principally urged us to make the loan, who were representatives of the Exchange Banks, could always have procured funds for their customers through the Secretary of State's telegraphic transfers. Indeed this was admitted: but it was urged that transfers at the rate at which the Secretary of State was then selling were to be boycotted. The crisis was conjured without our assistance: but I refer to it as showing the danger of relying upon Government assistance and indicating doubts as to the sufficiency of banking strength in Bombay. To have a crisis threatened in an Imperial City of the importance of Bombay for want of R30 lakhs points to a very narrow margin.

Conclusion.

36. Famine has left a deep impress upon the financial history of this year, and will make an even deeper impress upon the year we are shortly entering. But looking back on the past twelvemonth we may congratulate ourselves, at least, on having passed to a gold standard through the continued closure of the Mints and the ordinary operations of trade without having added to the indebtedness of India. The uncertainties in both public and private finance owing to a fluctuating and falling exchange have, it may be hoped, become a thing of the past. In the year now passing away India has been able not only to relieve the suffering population in her midst, but to invest revenue in productive public works. She will not be able to escape borrowing in the coming year. But the difficulties will be chiefly those of Ways and Means. Nevertheless, after providing for famine and after making a substantial addition to the payment for national insurance, the Indian Government can count upon a surplus with reasonable confidence.

March 21, 1900. C. E. DAWKINS.

PART II.

BEING A MEMORANDUM BY THE FINANCIAL SECRETARY EXAMINING THE DETAILS OF THE ACCOUNTS AND ESTIMATES.

Section I.—The Accounts of 1898-99.

1898-99. General Result.

37. The surplus of the year in the Accounts was less by R9,80,900, than that anticipated when the Revised Estimate was framed in March last.

The variations between the figures finally entering into the Accounts and those taken in the Budget and Revised Estimates of the year are fully explained in the Appropriation Report published in the *Gazette of India* of the 11th instant.

Tables giving a general comparison of the Revised Estimates with the Accounts have been given above in Part I, paragraph 3 in the old form and paragraph 6 in the new form.

1898-99. Revenue in India.

38. The Revenue in India was less than taken in the Revised Estimate by R15,50,390. The falling-off is accounted for by a decline in Land Revenue of R22,00,870: the collections were considerably lower than the Estimate in Bombay and Madras, while there were smaller improvements in Burma and the North-Western Provinces and Oudh. There was also a decline in the Customs Revenue of R9,62,380 under the heads of silver, oils, and cotton goods. The payment of interest due on April 1, 1899, on the preceding day by the Bombay Port Trust increased the Interest receipts by R8,65,260. Smaller variations under other heads resulted in a net improvement of R7,47,600.

1898-99. Expenditure in India.

39. The Expenditure in India was less than the Revised Estimate by R9,30,330 the result of a number of small differences, the largest of which are, on the side of excess, R10,86,910 in the Working Expenses of State Railways, and, on the side of reduction, R7,60,670 under Army.

40. The net deterioration in India of R6,20,060 was distributed thus between the Imperial Section and the Provincial and Local Section: an Imperial deterioration of R11,14,570 and a Provincial and Local improvement of R4,94,510.

1898-99. Revenue and Expenditure in England.

41. The Sterling Revenue in England was higher by £10,061 and the Sterling Expenditure was less by £20,503.

1898-99. Exchange.

42. The fractional difference between the average rate of exchange and the rate of 16*d*. the rupee of the Revised Estimate caused an increase of expenditure of R1,71,970.

Section II.—Revised Estimate of 1899-1900.

1899-1900. Statement of the gross figures.

43. The following is a general comparison of the Budget Estimates with the Revised Estimates of 1899-1900:—

	Budget.	Revised.	Revised, better.	Revised, worse.
	£	£	£	£
Revenue.				
India	67,717,900	68,284,700	566,800	
England	207,100	247,700	40,600	
Total	67,925,000	68,532,400	607,400	
Expenditure.				
India—				
Imperial, Provincial, and Local	49,388,100	49,681,200		293,100
Adjustment of Provincial and Local Surplus or Deficit	—616,500	—199,000		417,500
Net	48,771,600	49,482,200		710,600
England	16,531,600	16,497,400	34,200	
Total	65,303,200	65,979,600		676,400
Surplus	2,621,800	2,552,800		69,000

1899-1900. General features.

44. The striking feature of the year is the recurrence of famine, involving an expenditure on direct relief of £2,054,800, over three crores of rupees, in addition to indirect expenditure and to loss of revenue—the reduction below the Budget Estimate under the one head of Land Revenue is £1,187,100, over a crore-and-three-quarters of rupees. To help in meeting this unforeseen expenditure, we have had, in addition to the unappropriated portion of the famine grant of over a crore, improvements in net Revenue under Opium, Mint, Railways, and Irrigation amounting to nearly 2 crores, savings in expenditure on the Army and plague preventive measures amounting to nearly a crore-and-a-half, and savings of nearly half a crore in consequence of the rate of exchange having been more than a farthing above the extremely cautious rate of 15¾*d.* the rupee which was adopted in the Budget Estimate. These improvements have diminished the reduction in the estimated surplus of the year, £2,552,800 as compared with £2,621,800, to the insignificant amount of about ten lakhs of rupees. It is very probable that the actual surplus in the Accounts of the year will exceed that of the Budget Estimate.

45. In India there is an increase of Revenue of R85,01,000 or £566,800, and an increase of Expenditure of R43,96,000 or £293,100. These variations are divided between the Imperial and Provincial-Local sections of the accounts thus: a deterioration under Imperial of R21,57,000 or £143,800, and an improvement under Provincial and Local of R62,62,000 or £417,500. In England the Revenue is higher than the Budget Estimate by £40,600 and the Expenditure less by £34,200, giving an improvement of £74,800, which, deducted from the net deterioration on the Imperial section in India of £143,800, results in a reduction of the surplus by £69,000.

1899-1900. Revenue in India.

46. The important increases of Revenue in India are—

	R
Opium	60,20,000
Salt	6,15,000
Customs	8,12,000
Forest	7,49,000
Telegraph	13,50,000
Mint	45,24,000
Railways—	
State, Gross Receipts more R1,45,87,000 } Guaranteed, Net Receipts less R23,75,000 }	1,22,12,000
Irrigation, Major Works	20,89,000
Army	11,28,000

1899-1900. Opium.

47. The increase in Opium Revenue occurs in Bengal, and is mainly due to the average price realised at the monthly sales having been R1,221 a chest, while the price was taken at R1,100 a chest in the Budget Estimate: on the 40,800 chests taken in the Budget Estimate as to be sold, this rise in price accounts for an improvement of R49,36,800. The sales in the last three months of the year were also increased by 900 chests, the receipts from which at the average rate realised amount to R10,98,900. The receipts from the pass duty on the exports of Malwa Opium from Bombay are expected to be slightly less than in the Budget Estimate, and the receipts on Excise Opium slightly higher.

1899-1900. Salt.

48. The Salt Revenue has improved in Madras by R8,57,000, the fall from the abnormally high receipts of 1898-99 having been less than anticipated, and in Bengal by R6,40,000, low prices and the favourable circumstances of the year in that Province having stimulated imports; while it has decreased by R2,15,000 in Bombay due to the famine, and by R6,17,000 in the Northern India Salt Department in consequence of the drought in Rajputana which has caused a deterioration in the quality of the salt produced at Sambhar Lake and a diminution in the sales at that source.

1899-1900. Customs.

49. The Customs receipts have improved in the three Maritime Provinces unaffected or only slightly affected by famine by a total of R14,24,000, but in Bombay the famine and plague have caused a decrease of R6,05,000.

1899-1900. Forest.

50. The Forest Revenue in Burma has improved by the large sum of R12,33,000 due to the high price of teak inducing large extractions: Bengal shows an increase of R1,55,000; but in Bombay there has been a falling-off of R3,16,000, in Madras of R1,20,000, and in the Central Provinces of R1,38,000, all attributed to famine.

51. The abnormally large increase in Telegraph receipts is caused by the interest in the war news from South Africa and by the great use of telegrams in connection with the movements of grain caused by the famine.

1899-1900. Telegraph.

52. The increase in the Mint receipts is exceptional. The larger part of it, R32,00,000, represents the profit on the coinage of about one crore of rupees from purchased silver bullion, the Government of India having found it necessary to resort to coinage to meet the great demand for rupees which has been so marked a characteristic of this cold weather: that demand is surmised to have been caused by the withdrawal of rupees from the trade centres to meet famine expenditure, and by the exceptionally large rice crop in Burma.

1899-1900. Mint.

The coinage of dollars has also been much greater than was assumed in the Budget Estimate; and the receipts in Bombay have consequently increased by R4,79,000.

The famine has caused a large demand for copper coin, on the coinage of which there is a gain, brought to account when the coins pass into circulation: the increase from this cause amounts to R8,50,000.

There is a small set off to these large receipts in the increased charges of the Mints, amounting to R2,23,000.

53. The large improvement in Railway earnings is due partly to the ordinary development of traffic and the earnings of new lines and additions to existing lines, and to a brisk coal trade, but mainly to the increase in grain traffic to meet the requirements of the famine-stricken districts, and to the carriage of troops to the seaports for despatch to South Africa.

1899-1900. Railway Receipts.

The improvement has been fairly generally distributed, the only two lines of which the receipts will fall far short of the Budget Estimate being the Great Indian Peninsula Railway,—the failure of the cotton and grain crops in the districts served by that Railway and the continued prevalence of plague have seriously interfered with its traffic,—and the North-Western Railway,—the traffic on that Railway varies from year to year, up and down, more than on any other Railway, with the greater or smaller movement of troops to or from the North-West frontier: the famine has also diminished the receipts of the line, and the exports of wheat have been much smaller than last year.

54. There has been a large development of Irrigation, the larger portion of the increase occurring in the Punjab: this is partly due to the failure of the rains.

1899-1900. Irrigation Revenue.

55. The increase in Army Receipts is due chiefly to the recovery of the value of stores, etc., sent with the troops to South Africa.

1899-1900. Army Receipts.

56. The more important decreases in Revenue are:—

1899-1900. Decreases in Revenue in India.

	R
Land Revenue	1,78,07,000
Provincial Rates	17,97,000
Interest	7,57,000

57. The Land Revenue in Bengal and Assam is expected to be slightly higher than the Budget Estimate, but the only Province in which a substantial increase has occurred is the extraordinarily prosperous Province of Burma. There an increase of R21,11,000 has been taken. In every other Province there are very serious decreases. In Bombay the falling-off is R84,37,000, in the Punjab R37,00,000, in the Central Provinces R35,43,000, and in the small Provinces administered directly by the Government of India, of which the most important are Ajmer, Baluchistan, and Coorg, R2,63,000: all of these are direct consequences of the famine prevailing in those Provinces, which has necessitated heavy suspensions and remissions. In Madras the unfavourable character of the north-east monsoon led the Local Government to anticipate that considerable suspensions would be necessary in February and March, and a decrease of R18,89,000 has been taken in that Province. In the North-Western Provinces and Oudh a decrease of R23,01,000 is shown: the collections of the arrears remaining over from the last famine are expected to be smaller than assumed in the Budget Estimate.

1899-1900. Land Revenue.

58. The decline in the Revenue from Provincial Rates follows generally in distribution the decline in Land Revenue and is due to the same causes.

1899-1900. Provincial Rates.

1899-1900. Interest Receipts.

59. The fall in Interest receipts is not a real reduction in Revenue. The interest on the debt of the Bombay Port Trust falls due for payment on April 1, and the annual payment was included in the Budget Estimate. The payment was, however, made on March 31, 1899, and the receipts on account of that debt in 1898-99 were accordingly doubled while there are none this year.

1899-1900. Increase in Expenditure in India.

60. The important increases in Expenditure in India are:—

	R
Forest	4,52,000
Political	6,31,000
Famine Relief	3,06,86,000
State Railways, Working Expenses	59,24,000
Irrigation, Working Expenses	5,39,000

1899-1900. Forest Expenditure.

61. The increase in Forest Expenditure occurs in Burma, R1,43,000, and Bombay, R3,83,000, the expenditure in other Provinces differing but slightly from the Budget Estimate. In Burma the increase was required to earn the increase in Revenue noticed in paragraph 50. In Bombay the increase is caused by the sanction to a scheme for supplying fodder to the cattle in the famine-stricken districts of Bombay. It is expected that more than half of the cost will be recovered from the owners of the cattle, as they will be charged for the fodder supplied to them. Part of the expenditure in that scheme was incurred in the Central Provinces also, but other lapses reduce the total expenditure there almost to the Budget figure.

1899-1900. Political Expenditure.

62. The increase in Political Expenditure is due to the Amir of Afghanistan having drawn more of his subsidy than the amount due for the year: he draws his subsidy somewhat irregularly.

1899-1900. Famine Relief.

63. The very large expenditure on Famine Relief has been fully explained in other parts of this Statement.

1899-1900. Railway and Irrigation Expenditure.

64. The increases in Railway and Irrigation Expenditure were required to earn the increased Revenue discussed in paragraphs 53 and 54, the real gain being only the net amount.

1899-1900. Savings in Expenditure in India.

65. The necessity of meeting the large expenditure connected with the famine has led to the restriction of ordinary expenditure wherever possible; and there are savings under the great majority of heads. The more important decreases are the following:—

	R
3.—Land Revenue	8,47,000
Opium	6,01,000
13.—Interest	10,27,000
Law and Justice, Jails	6,58,000
Police	5,65,000
Medical	29,05,000
31.—Exchange	21,46,000
Construction of Protective Railways	49,00,000
Reduction or Avoidance of Debt	60,39,000
Military Works	6,70,000
Civil Works	57,67,000
Army	52,05,000

1899-1900. Land Revenue Expenditure.

66. Grain compensation allowances caused by famine prices have prevented any saving in the Land Revenue Expenditure in the Central Provinces and Bombay, in which the charges slightly exceed the Budget Estimate, and have reduced the savings in the Punjab. In Bengal there is an increase of R1,46,000, mostly under Survey and Settlement. But there are savings of R2,77,000 in Burma—where some schemes of improvement were not brought into operation so soon as anticipated and the charges for the collection of Revenue were overestimated; of R3,57,000 in Madras—where one scheme of improvement was partially postponed, and the progress of expenditure under several heads was less than provided for in the Estimates; and of R3,06,000 in the North-Western Provinces and Oudh, where it was found that the grants under several heads were not fully required.

1899-1900. Opium.

67. Though the poppy crop was a better one than we have had for many years, it was not quite up to the standard which we assume as the average, and for which we provide every year in the Budget Estimate. The payments to the cultivators for their opium were therefore smaller than taken in the Estimate, and there will be a saving of about six lakhs of rupees.

1899-1900. Interest Payments.

68. The Capital Expenditure on the construction of Railways in 1898-99 was higher than anticipated in the Revised Estimate for that year, because of the postponement from last year to this of the issue of Debenture Capital by the East Indian Railway Company : the advances on which interest is charged against Railway Companies were also higher than estimated ; and consequently the transfer from Ordinary to Railway Debt was increased above the Budget Estimate by R5,42,000, causing a saving of that amount in ordinary Interest payments. The remainder is due to arrear payments of Interest warrants having proved to be less than provided for in the Estimate of last March.

1899-1900. Expenditure on Jails.

69. Famine prices have caused small excesses over the Budget Estimates for Expenditure on Jails in Bombay and the Punjab. In all other Provinces there are savings, due partly to the Jail population having been less than anticipated, partly to the opening of new Jails having been postponed, and partly to the specially low price for provisions in the earlier months of the year when stocks were purchased.

1899-1900. Police.

70. In Bombay, the Punjab and the Central Provinces the Police Expenditure has exceeded the Budget Estimates in consequence of the famine necessitating large payments of grain compensation allowances. In the other Provinces there are substantial savings, due partly to economies such as the substitution of locally-manufactured for imported cloth for uniforms, partly to the absence of officers on leave, and partly to the slower introduction of some schemes of reform.

1899-1900. Medical Expenditure.

71. Only a small part of the reserve of R20,95,000, provided for new plague preventive expenditure as stated in paragraph 146 of the Budget Statement of last March, was required, and there is a saving of R19,42,000 in the India General Revised Estimate of Medical Expenditure. The Madras and Central Provinces Governments have also not found it necessary to spend so much as expected on plague prevention, and there are savings under the head in Madras of R10,19,000 and in the Central Provinces of R1,58,000. On the other hand, the Bengal Government increased its expenditure on those measures and there is an increase in that Province of R3,59,000.

1899-1900. 31.—Exchange.

72. The changes in the form of Accounts and Estimates described in paragraphs 4 to 6 of Part I of this Statement affect very materially the entries under the two heads XXIV and 31.—Exchange. In the Budget Estimate, as published last March in the old form, the final figure resulting from the calculations was R6,90,000 on the receipt side, under XXIV.—Exchange. The calculations under the new form give a figure on the charge side, under 31.—Exchange, of R31,96,000 (or £213,000). The explanation of this large difference is that under the new form the whole of the difference between the rate of exchange assumed in the Budget Estimate, 15¾*d.* the rupee, and the standard rate of 16*d.* the rupee is brought to account through the heads XXIV and 31.—Exchange, whereas under the old form that difference was (like the difference between the 2 shilling rate and the standard rate under both the old and new forms) distributed over the various heads of Revenue and Expenditure under which sterling transactions occur.

In the Revised Estimate, in the new form, the entry of R31,96,000 (£213,000) on the charge side, 31.—Exchange is reduced to R10,50,000 (£70,000). The reason of this difference is that the average rate of exchange of the year will be slightly over 16*d.* the rupee instead of 15¾*d.* the rupee taken in the Budget Estimate. This in itself would have caused the whole 32 lakhs to disappear; but the remittances of some Railway Companies were made at a lower rate than the average rate of Council Bills, which acted on the figure in the contrary direction.

1899-1900. Protective Railways and Reduction or Avoidance of Debt.

73. The entries under the two heads named in the margin in the Budget Estimate of this year together made up the amount required to bring the Famine Relief and Insurance Grant up to the sum of a crore and a half of rupees. As the expenditure on Famine Relief in the Revised Estimate far exceeds that sum,

there is no room for the expenditure under the two heads and the entries are omitted.

The amount shown under Reduction or Avoidance of Debt disappears absolutely from the Expenditure of the year. But the expenditure represented by the entry under 34.—Construction of Protective Railways has not been stopped: it has merely been removed to Expenditure not charged to Revenue under head 48.—State Railways—Construction. It may be mentioned here that this transfer would have been made even if the Famine Relief expenditure had not occurred and swallowed up the whole of the Famine Grant. For under the decision described in paragraph 7 of Part I of this Statement, expenditure on Railways of the class for which the entry in the Budget Estimate was made will in future be charged to head 48, and not to head 34.

1899-1900. Military Works Expenditure.

74. The reduction in the Expenditure in India on Military Works represents partly a transfer of Expenditure from India to England, and partly the usual lapses which always occur.

1899-1900. Civil Works Expenditure.

75. Assam is the only Province which shows an increase (R41,000) in the Expenditure on Civil Works: funds being available from Provincial Revenues the Chief Commissioner pressed on the repair of the damages caused by the great earthquake. The decrease in Burma (R2,65,000) is an ordinary one, the progress of expenditure not being so rapid as expected when the Budget grant was fixed. The savings in the other Provinces varying from R14,57,000 in Bombay to R5,62,000 in the Punjab may all be taken as being the result of the efforts of the Local Governments to reduce ordinary expenditure to provide funds for the famine, and to a small extent for other Provincial needs.

1899-1900. Army.

76. The main cause of the saving in Military Expenditure is the despatch, without replacement, of British troops to South Africa, and of two Native Infantry Regiments to Ceylon and Singapore, the charges for all of which are borne by Her Majesty's Government. This saving is estimated at R39,09,000.

There have also been savings in the charges for military operations and special services, R6,42,000: in Exchange Compensation Allowance R3,89,000, the rate of exchange having been over 16*d.* the rupee, whereas the Budget Estimate assumed a rate of 15¾*d.*: in Regimental Pay and Allowances R4,00,000: in the pay of officers transferred for plague duty to the Civil Department R3,64,000: in the annual relief movements R2,20,000: in the purchase of malt liquor R2,60,000: from the postponement of the purchase of a reserve of fodder because of the famine prices, R3,76,000: the postponement of other mobilization requirements R1,84,000: in the purchase of mules and horses in India R4,40,000; and under Medical, chiefly Cantonment General Hospitals, R4,13,000.

On the other hand, the high prices have caused an extra expenditure of R10,00,000—this would have been much greater had it not been that very low prices prevailed in the earlier months of the year: the orders issued this year regarding the messing allowance of British soldiers have entailed an additional expenditure of R9,85,000: there have been special grants of R1,32,000 for the purchase of land, and of R1,22,000 for the purchase of equipment of transport corps and supply trains; and the stoppage of the troopship service, causing a large saving in sterling expenditure as noticed below, has necessitated the chartering of two vessels to convey details to England at a cost of R4,10,000.

1899-1900. Revenue in England.

77. The Revenue in England is expected to exceed the Budget Estimate by £40,600, the bulk of which occurs under Interest. The Secretary of State had larger amounts available from his cash balance for temporary investment, and the rate of interest obtained was high during a portion of the year.

1899-1900. Expenditure in England.

78. The Expenditure in England is expected to be less than the Budget Estimate by £34,200. There is an increase of £71,500 in the payments of interest on India Bills partly owing to the rate of interest being higher and partly to some of the Bills being issued for six months and replaced within the year, which involves an interest charge this year for 18 months: £62,600 are to be spent on the purchase of land for the Store Department and for the installation of electric light in the India Office: the payments for the Indian troopship *Hardinge*, now being built, are increased by £110,700: the last quarterly payment in 1898-99 of the subsidy to the Admiralty for the Indian Defence Vessels was withheld pending settlement of a doubtful point, and the

sum of £15,200 has to be added to the pavments this year. On the other hand, the payments for the Indian Troopship Service are reduced by £124,800, the South African War having prevented the despatch of the usual reliefs to India: The expenditure on Army Stores has been less than expected by £205,900: and the non effective Army charges mainly pensions have been less than the Estimate by £73,800.

1899-1900. Exchange.

79. As explained in paragraph 5, exchange no longer appears separately on the Accounts and Estimates. But, of course, any rise or fall in the rate of exchange affects them to the same extent as before the change in form. In the Budget Estimate the rate of exchange for the year was taken at 15¾*d.* the rupee, and the average rate obtained on the Secretary of State's drawings will be slightly above 16*d.* the rupee: the Revised Estimate places the rate at 16·072*d.* the rupee. The net sterling expenditure in the Revised Estimate is £16,249,700. The equivalent of that amount is R24,76,14,000 at 15¾*d.* the rupee and R24,26,53,000 at 16·072*d.* the rupee. The difference between these two amounts, R49,61,000, represents the saving secured by the rise in the rate above that assumed in the Budget Estimate. In addition, the higher level of exchange has caused reductions in the payments of exchange compensation allowance amounting to R6,97,000.

Section III.—Budget Estimate of 1900-1901.

1900-1901. Statement of the gross figures.

80. The following is a general comparison of the Budget Estimate of 1900-1901 with that of 1899-1900:—

	1899-1900.	1900-1901.	1900-1901, better.	1900-1901, worse.
REVENUE.	£	£	£	£
India	67,717,900	69,978,300	2,260,400	...
England	207,100	177,500	...	29,600
TOTAL .	67,925,000	70,155,800	2,230,800	...
EXPENDITURE.				
India—				
Imperial, Provincial and Local	49,388,100	53,297,100	...	3,909,000
Adjustment of Provincial and Local Surplus or Deficit .	—616,500	—550,600	...	65,900
NET .	48,771,600	52,746,500	...	3,974,900
England	16,531,600	17,249,000	...	717,400
TOTAL .	65,303,200	69,995,500	...	4,692,300
SURPLUS .	2,621,800	160,300	...	2,461,500

1900-1901. Main features.

81. The famine, involving a direct expenditure of just over five crores of rupees besides loss of Revenue and indirect Expenditure, and the undertaking of new Military expenditure of nearly a crore are the leading characteristics of next year. To meet this outlay the surplus shown in the Budget Estimate of the present year of nearly four crores goes a long, though not the whole, way. But increases in Revenue and strict economies in other Expenditure suffice to enable us to show a small surplus in the coming year.

82. In India an increase of Revenue of R3,39,06,000 or £2,260,400 and an increase of Expenditure of R5,86,34,000 or £3,909,000 are estimated. This net deterioration of R2,47,28,000 or £1,648,600 represents an improvement in the Provincial and Local Section of R9,88,000 or £65,900 and a deterioration in the Imperial Section of R2,57,16,000 or £1,714,500. The Revenues in England are expected to be less by £29,600 and the expenditure greater by £717,400. The total Imperial falling off, £2,461,500, reduces the surplus to the small sum of £160,300.

1900-1901. Increases of Revenue in India.

83. The heads which mainly contribute to the large increase in Revenue in India above shown are —

	R
Railways, State, Gross Receipts more R3,63,12,000 . / Guaranteed, Net „ less R1,40,51,000 .	2,22,61,000
Opium	83,60,000
Customs	5,26,000
Post Office	7,75,000
Telegraph	10,50,000
Mint	34,87,000
Irrigation, Major Works	13,56,000
Army	17,45,000

1900-1901. Railway Receipts.

84. A considerable part of the increase under Railways is nominal only, being caused by the change in the status of the Great Indian Peninsula Railway for nine months of the year from a Guaranteed Railway, of which the receipts are shown net, to a State Railway, of which the gross receipts are shown on the Revenue side, and the working expenses on the Expenditure side. The amount of this nominal addition to the Revenue and Expenditure is R1,53,00,000, and that amount should be deducted from the figure above given to arrive at the real increase in Railway Revenue, which will then be R69,61,000.

The Railway Revenue is estimated at an amount less by R52,51,000 than the Revised Estimate of 1899-1900, because it is not considered prudent to assume that the whole of the increase secured by the very exceptional traffic of the present year will be retained in the coming year.

1900-1901. Opium.

85. Part of the increased Revenue from Opium is obtained by the sale of 3,600 more chests than were taken in the Budget Estimate of the present year: at the price of R1,100 a chest taken in the Budget Estimate of 1899-1900 this accounts for an increase of R39,60,000. The high prices secured at the opium sales this year, particularly in the last half of it, justify us in anticipating a higher average price than R1,100 next year: the average has been taken at R1,200 a chest; and this accounts for an increase of R44,40,000.

1900-1901. Customs Revenue.

86. The Customs Revenue in Bombay is expected to be lower than in the Budget Estimate of this year by R7,66,000 in consequence of famine and plague; but in the other Maritime Provinces increases aggregating R13,05,000 are anticipated. The Estimate is taken at about three lakhs lower than the Revised Estimate of this year: the decrease is distributed over the Rice Export Duty, Articles of Food and Drink, Silver, Cotton Goods, and Manufactured Articles.

1900-1901. Post Office Receipts.

87. The Estimate of Post Office Revenue assumes that the Revenue next year will exceed that of this year by about the same amount as the latter exceeded that of 1898-99, there being nothing abnormal in the receipts this year or last.

1900-1901. Telegraph Receipts.

88. The Telegraph Revenue having increased by an abnormal amount this year owing to special causes, the estimate for next year is placed somewhat lower than the Revised Estimate of 1899-1900.

1900-1901. Mint Receipts.

89. It has been decided to coin in the beginning of next year a further crore of rupees: this will yield a profit of R32,00,000. The gain on copper coinage is also taken higher by R2,00,000 than in the Budget Estimate of this year, and the receipts for Dollar coinage are also placed slightly higher, though much lower than in the Revised Estimate of this year.

1900-1901. Irrigation Revenue.

90. The Irrigation Revenue was especially high this year, and it is improbable (as it is most undesirable) that the seasons next year will be as favourable for irrigation. The estimate has accordingly been taken over seven lakhs lower than the Revised Estimate though thirteen and-a-half lakhs higher than the Budget Estimate of this year.

1900-1901. Army Receipts.

91. The increase in the Army Receipts represents recoveries from Her Majesty's Government of the value of horses, stores, etc., sent to South Africa with the troops.

1900-1901. Decreases in Revenue in India.

92. The important decreases in Revenue in India are:—

	R
Land Revenue	52,39,000
Excise	4,92,000
Provincial Rates	3,19,000

1900-1901. Land Revenue and Provincial Rates.

93. The famine will necessitate suspensions and remissions of Land Revenue and Provincial Rates next year as well as in the current year, though not to so great an extent. The decrease under the latter head would have been considerably greater were it not that the Madras Government has decided to increase the rate at which a local cess is levied and there is an increase under the head in that Province of R3,69,000.

1900-1901. Excise Revenue.

94. In ordinary times the Excise Revenue increases from year to year in all Provinces in which no special measure leading to a check has been adopted for administrative reasons. This normal increase is expected next year in Bengal, the North-Western Provinces, and Burma. In the latter Province, however, one such measure has been adopted leading to a loss of Revenue moderately estimated at R1,50,000 a year: it is the decision to stop the sale by auction of licenses to sell opium in Lower Burma in order to diminish the temptation to the licensees to traffic in illicit opium.

In Bombay and the Central Provinces the famine is expected to cause a serious decline in Excise Revenue, and in the Punjab the same cause has restricted the usual increase.

In Madras a very large decrease of R12,64,000 is anticipated by the Local Government. The Excise Revenue in that Province advanced more rapidly than that of any other Province till two years ago when it began to decline, and the Local Government expects that the decline will continue next year for special reasons some being connected with difficulties—temporary it is hoped—in the administration of the special system in force in that Province, and some with the unfavourable character of the seasons.

1900-1901. Increases in Expenditure in India.

95. The important increases in expenditure in India are:—

		R
3.—Land Revenue		10,18,000
Forest		5,76,000
Post Office		7,35,000
Police		9,33,000
Political		5,85,000
Scientific and Minor Departments		11,63,000
Famine Relief		4,99,68,000
37.—Construction of Railways charged to Revenue		12,42,000
State Railways, Working Expenses		1,93,58,000
Interest on Railway Debt	14,82,000	
Interest on Irrigation Debt	3,90,000	22,82,000
Interest on Advances chargeable against Companies	4,10,000	
Army		41,43,000

1900-1901. Land Revenue Expenditure.

96. The increase in the Expenditure under 3.—Land Revenue is partly caused by the famine, partly by pressing on Surveys and Settlements, partly by larger charges for the collection of the Revenue, and partly by carrying out various schemes for the improvement of District Administration.

1900-1901. Forest Expenditure.

97. The increase in Forest Expenditure occurs mainly in Burma, R4,61,000, necessary to earn the increased Revenue, and in Bombay, R1,03,000, caused by the fodder scheme mentioned in paragraph 61.

1900-1901. Post Office.

98. The increase in Post Office Expenditure is a necessary outcome of the development of this progressive department, and is less than the increase in Revenue.

1900-1901. Police Expenditure.

99. The more important increases in Police Expenditure occur in the Punjab R1,79,000, Burma R2,18,000, Bombay R2,85,000, and the Central Provinces R1,09,000. In the first two the cause is the intended increase to Border Military Police and in the two last the famine.

1900-1901. Political Expenditure.

100. The increase in Political Expenditure occurs mainly in the Punjab where it amounts to R4,82,000. It provides for the establishment of the Tochi Militia and for additional expenditure on the Kurram Militia and the Khyber Rifles, all these measures being connected with the scheme for withdrawing some of the outlying garrisons of the regular Army, which will result in a considerable saving on the whole.

1900-1901. Scientific and Minor Departments.

101. The larger part of the increase under Scientific and Minor Departments is caused by the provision for the Census which is to be taken on March 1, 1901. The amount of that provision is R7,32,000, being about the same as the provision entered in the Budget Estimates of 1890-91. The expenditure of the Meteorological Department shows an increase of R54,000, and that of the Civil Veterinary Department an increase of R1,84,000, part of which, however, is nominal only, being a transfer of the cost of the Hissar Cattle Farm from the head Army. In Madras there is an increase of a lakh and-a-half for the charges of the aluminium manufactory started in the School of Arts: the receipts from the sale of the articles will more than cover the charges.

1900-1901. Famine Relief.

102. The Famine Relief Expenditure has been explained in other parts of this Statement.

1900-1901. 37.-Construction of Railways.

103. The increase under 37.—Construction of Railways charged to Revenue is an item of Local Expenditure. The Tanjore Local Board intends to spend R12,73,000 next year, from the accumulations of the local railway cess, on the commencement of an extension of the Mayavaram-Mutupet Railway. To complete the extension it will be necessary for the Board to borrow, but the loan will not be issued in the coming year.

1900-1901. Working Expenses of State Railways.

104. It has been explained in paragraph 84 that from the increase shown under State Railways, a deduction of R1,53,00,000, the charges of the Great Indian Peninsula Railway for nine months, must be made to arrive at the real increase. The amount then becomes R40,58,000, an addition which is necessitated by the larger traffic expected to bring in the increase in Receipts of R69,61,000 mentioned in paragraph 84.

1900-1901. Interest on Railway and Irrigation Debt.

105. The increase in the Railway and Irrigation Debt is the interest on the new capital expenditure. The amount is transferred from Interest on ordinary Debt.

1900-1901. Army Expenditure.

106. The famine is responsible for a large part of the increased Military expenditure in India, the cost of food supplies for men and animals being taken R47,30,000 higher than in the Budget Estimate of the present year. The orders regarding the messing allowances of British soldiers involve a higher expenditure of R6,63,000. The cost of the annual reliefs is expected to be higher by R2,56,000. The purchase of horses to replace those sent to South Africa with Cavalry Regiments and Batteries of Artillery will cost R22,00,000; and the replacement of stores sent to South Africa with the Indian troops will cost R2,60,000. The maintenance of a larger number of transport animals adds R2,43,000 to the Estimates. A special purchase of 2,000 mules will cost R9,10,000 including the keep of the animals for a part of the year; and the purchase of 1,000 Persian mules for ordinary requirements R1,70,000. The new scheme regulating the promotion of Commissariat Officers will cost R1,00,000. The provision for "Regimental Pay and Allowances" has been raised by R1,30,000, and that for the Native Army Reserves, which have been increased in strength, by R1,39,000. Under Ordnance an increase of R1,87,000 has been taken, mainly to provide for larger purchase of hides for the Cawnpore Saddlery Factory from which large issues of leather were made to the South African force. The following additions have been made to the Estimates: R9,01,000 for the improvement of Commissariat-Transport arrangements: R5,64,000 for improvements in the organization of Horse and Field Batteries and additions to Mountain Battery establishments: R4,94,000 for the reorganisation of the four Heavy into two Howitzer Batteries: R4,00,000 for an addition of 92 officers to the Staff Corps: R3,81,000 for the increased cost of ammunition for the new rifle to be supplied to the Native Army; and R1,27,000 for the purchase of equipment to complete transport corps and supply trains.

On the other hand, the despatch of three Native Regiments to Ceylon, Singapore and Mauritius secures a saving of R6,40,000; and the expectation that the British troops sent to South Africa will not be replaced before October, a saving of R38,50,000. The grants for mobilization and clothing expenditure are less by R8,71,000, for Camps of Exercise by R1,45,000, and for Exchange Compensation Allowance by R3,35,000. And a smaller provision for special services has been made giving a reduction of R29,11,000: the bulk of this is due to the decision to withdraw regular troops from several outlying posts in the frontier, replacing them by Militia.

1900-1901. Decreases in Expenditure in India.

107. The important savings in Expenditure in India are:—

	R
Interest on Ordinary Debt	6,77,000
Medical	26,28,000
31.—Exchange	31,96,000
Protective Railways	49,00,000
Reduction or Avoidance of Debt	60,39,000
Guaranteed Railways, Surplus Profits, etc.	27,48,000
Military Works	14,87,000
Civil Works	41,05,000

1900-1901. Interest.

108. The Interest on Ordinary Debt is reduced by R22,82,000, being the amount transferred to Railway and Irrigation Debt, see paragraph 105; and a smaller provision has been made for arrear payments than in the Budget Estimate of the present year. On the other hand, we have made a provision of R20,00,000 for the interest and possible discount on the loan which is to be raised in India in the coming year.

1900-1901. Medical Expenditure.

109. The saving in Medical Expenditure is accounted for by the facts that it is unnecessary to repeat the provision of a reserve of R20,95,000 for plague preventive measures, and that the Madras and the Central Provinces Governments have reduced their provisions for that purpose by R9,77,000 and R51,000. On the other hand, the Bengal Government has provided R2,00,000 for plague preventive measures, and there are small increases in general Medical Expenditure in the other Provinces, some of them caused by famine.

1900-1901. 31.—Exchange.

110. The explanation of the difference under 31.—Exchange is given in paragraph 72.

111. The explanation of the reduction under Protective Railways and Reduction or Avoidance of Debt has been given in paragraph 73.

1900-1901. Surplus Profits, etc.

112. The reduction in the payments of surplus profits, etc., to Guaranteed Railways occurs mainly on the Great Indian Peninsula Railway, of which the earnings will be very low in the half-year ending June 30, the last in which such payments will fall due in respect of it, as it will then become a State Railway.

1900-1901. Military Works.

113. In the Budget Estimate of this year a special addition of 15 lakhs was made to the Military Works grant for the cost of defensive works on the frontier. The financial position does not admit of a similar addition next year.

1900-1901. Civil Works.

114. The great bulk of the expenditure on Civil Works is Provincial. Burma is the only Province of which the Provincial Revenues are in a really prosperous condition, but Bengal, the North-Western Provinces and Oudh, and Assam are fairly well off: all the others have difficulty in securing equilibrium in the Provincial finances. The Burma Government has provided for an increase in Public Works expenditure of R21,97,000. The Chief Commissioner of Assam estimates for a reduction of R8,63,000, but the reason is that the expenditure this year was exceptional, being the continuation of the repair of earthquake damages for which Imperial Revenues made a large special grant: the back of that special expenditure has been broken, and a reduction is possible next year. In all the other Provinces large reductions have been made to help the Local Governments to secure equilibrium in the Provincial Revenues. The amounts are:—

	R
Bombay	13,79,000
Bengal	11,90,000
The Punjab	10,57,000
Madras	8,52,000
The Central Provinces	5,31,000
The North-Western Provinces and Oudh	3,38,000

1900-1901. Revenue in England.

115. The sterling Revenue next year is taken less than in the Budget Estimate of this year by £29,600. Almost the whole of this decrease is due to the omission of receipts in connection with the Indian Troopship Service, a net amount for the Service being provided on the Expenditure side.

1900-1901. Expenditure in England.

116. The sterling expenditure is increased by £717,400. The larger items of increase are:—

£

37,500 in interest payments, the amount of India Bills being higher by £500,000, and the probable rate of interest being taken at 3 instead of 2½ per cent.

£

51,400 for Telegraph Stores, which require replenishment.

11,500 in payments for the Indo-European Telegraphs, the increase in the homeward traffic, and the carriage of a larger percentage by the Indo-European route being expected to continue.

114,800 in payments for the Troopship *Hardinge* under construction.

40,000 in payments of civil furlough allowances and pensions.

183,300 in the interest payments connected with the Great Indian Peninsula Railway. The Railway is to be purchased by the Government by means of terminable annuity, and the amount charged to Railway Revenue will include the part of the annuity which goes towards repayment of the capital.

62,900 in payments of interest on capital deposited by Railway Companies, caused by further receipts of capital.

321,700 in the payments for Ordnance and other Military stores. This is caused by the decision to re-arm the Native Army in India and to adopt other measures to increase the efficiency of the Army.

On the other hand, the Army non-effective charges are reduced by £69,500; and the payments to the War Office in respect of British Forces in India are expected to be less by £30,000 owing to the absence of troops in South Africa.

1900-1901. Exchange.

117. The adoption of the rate of 16*d.* the rupee in the Budget Estimate for next year yields a saving as compared with the Budget Estimate of this year, in which the rate of $15\frac{3}{4}$*d.* was adopted. The net sterling Expenditure next year is £17,071,500. The equivalent is R26,01,37,000 at $15\frac{3}{4}$*d.* the rupee and R25,60,72,000 at 16*d.* the rupee. The difference R40,65,000 represents the saving due to the rise in the rate of exchange. The saving in exchange compensation allowance from the same cause amounts to R6,81,000.

Section IV.—Statements comparing the figures of the Estimates under the more important heads of Revenue and Expenditure with those of past years.

LAND REVENUE.

119. The only remark which need be added to the explanations given in paragraphs 47, 67, and 85 is that in June last the Government decided to discontinue the purchases of Malwa Opium for excise purposes which have been made for six years. These purchases were resorted to only as a temporary measure in view of the abnormally small produce of the poppy crops and the consequent exhaustion of the reserve and great reduction in the annual sales. Now that somewhat better crops have enabled us to make moderate additions to the annual sales and to the reserve, it is undesirable to continue the purchase of Malwa Opium. This decision does not affect the provision for expenditure next year, as the practice is to provide for a normal crop, and no addition was made to the total provision because of the Malwa purchases.

SALT.

England	191	468	258	600	700	200

(a) Chiefly excise on local manufacture. | (b) Chiefly duty on imported salt.

120. The Salt Revenue this year, though higher than the moderate Budget Estimate, is considerably lower than the high figure attained in 1898-99. The famine has rendered it necessary to estimate the Revenue next year at an amount decidedly lower than what should now be taken as the normal in an ordinary year.

STAMPS.

	Accounts, 1896-97.	Accounts, 1897-98.	Accounts, 1898-99.	1899-1900.		1900-1901, Budget.
				Budget.	Revised.

England (Stores)	40,808	35,844	35,296	39,300	40,000	25,300

121. The usual increase in Stamp Revenue received a check in 1898-99 as occasionally happens. There has been some recovery this year, though not to the extent assumed in the Budget Estimate. A further recovery of an amount sufficient to bring the total up to the Budget Estimate of this year is anticipated next year.

EXCISE.

	Accounts, 1896-97.	Accounts, 1897-98.	Accounts, 1898-99.	1899-1900.		1900-1901, Budget.

EXPORT DUTIES—						
Rice	75,51,670	72,48,190	1,01,12,130	90,00,000	88,05,000	87,25,000
LAND CUSTOMS AND MISCELLANEOUS	5,68,010	6,51,230	6,11,490	7,12,000	7,47,000	7,32,000
GRAND TOTAL	4,49,14,770	4,64,12,950	4,80,21,620	4,64,87,000	4,72,99,000	4,70,13,000
Charges	20,33,860	21,13,790	21,48,440	23,21,000	22,85,000	23,53,000

124. The Revenue from Import Duties shows a considerable increase over last year and the Budget Estimate of this year. The main item of improvement is the new source of revenue from the countervailing Sugar Duties (see paragraph 26, Part I) which are expected to yield R7,09,000 this year and R7,66,000 next year. Important increases also occur under Liquors, Manufactured Articles and Cotton Goods, while there are decreases under the other subdivisions of the Tariff.

The Export Duties have fallen off in consequence of the famine which diverts rice from the foreign export trade to India.

ASSESSED TAXES.

	Accounts, 1896-97.	Accounts, 1897-98.	Accounts, 1898-99.	1899-1900.		1900-1901, Budget.

127. The only remark regarding the Interest Receipts and Expenditure, and the Debt Balances, which need be added to the explanations given in paragraphs 59, 68, 77, 78, 108 and 116, is that the famine is expected to cause this year a net reduction of over seven lakhs in the Savings Bank Balances, apart from the addition of interest: next year we assume that there will be a net withdrawal, apart from interest, of 20 lakhs.

128. The introduction of the one anna postage rate for letters to British Possessions, in the case of the Post Office, and the decision to deliver deferred messages by messenger as received instead of delivering them by the first post of the next day, in the case of the Telegraph Department, are the two administrative improvements which have, for a time, checked the rate of increase of the Revenue of these two progressive and most efficiently managed departments.

Notwithstanding, the figures in the above table show satisfactory progress. The Telegraph Revenue has also been affected by special causes which have been explained in paragraph 51, and both the Revenue Expenditure and the Capital Expenditure have to be specially high next year to enable the department to cope with the annually increasing traffic, to keep the older lines in proper repair, and to carry out the extensions which have been ordered.

129. The Mint figures are explained in paragraphs 52 and 89.

TOTAL EXPENDITURE CHARGEABLE TO THE FAMINE GRANT . .	2,56,52,120	5,71,60,730	1,50,00,000	1,50,00,000	3,24,37,000	5,25,81,000

132. The direct expenditure on Famine Relief is distributed among the Provinces and between Imperial and Provincial as under:—

	1899-1900 (Revised Estimate).			1900-1901 (Budget Estimate).		
	Imperial.	Provincial and Local.	TOTAL.	Imperial.	Provincial and Local.	TOTAL.
	R	R	R	R	R	R
India, chiefly Ajmer	17,48,000	...	17,48,000	17,54,000	...	17,54,000
Central Provinces	1,53,60,000	40,000	1,54,00,000	1,80,00,000	...	1,80,00,000
Bengal	...	93,000	93,000	...	4,68,000	4,68,000
North-Western Provinces and Oudh	...	1,10,000	1,10,000	...	2,00,000	2,00,000
Punjab	19 70,000	2,05,000	21,75,000	35,50,000	1,76,000	37,26,000
Madras	...	2,17 000	2,17,000	7,20,000	3,05,000	10,25,000
Bombay	1,09,70,000	30,000	1,10,00,000	2,47,92,000	60,000	2,48,52,000
England converted into Rupees at R15 = £1	79,000	...	79,000	...	...	...
TOTAL	3,01,27,000	6 95,000	3,08,22,000	4,88,16,000	12,09,000	5,00,25,000

133. The ordinary rule of the Provincial Settlements is that this expenditure is Provincial. But outlay on the scale necessitated by the present famine is beyond the power of the Provincial Revenues to meet, and it has been necessary for Imperial to come to the assistance of Provincial Revenues in Bombay, the Central Provinces, and the Punjab: the Government of India has also agreed to treat as Imperial any expenditure next year in Madras in excess of 3 lakhs.

134. In addition to the direct expenditure, the famine entails indirect expenditure and loss of revenue. The following table gives an estimate of these items:—

	1899-1900, Revised.	1900-1901, Budget.
Loss of Revenue—		
Land Revenue—	R	R
Remissions	1,97,00,000	45,00,000
Suspensions		13,00,000
Salt	5,00,000	10,00,000
Excise	9,00,000	12,00,000
Provincial Rates—		
Remissions	2,00,000	1,00,000
Suspensions	15,00,000	6,00,000
Forest	8,00,000	4,00,000
Railways (net)	...	30,00,000
	2,36,00,000	1,21,00,000
Increase of Expenditure—		
Compensation for dearness of provisions and other charges	37,00,000	71,00,000
Total estimated cost of famine in addition to the charge under 33.—Famine Relief	2,73,00,000	1,92,00,000

135. These do not exhaust the calls on our resources made by the famine. The present famine affects large tracts in Native States. The administration of famine relief is left to the rulers of the States, the Government of India merely offering advice through its political officers, and lending officers to such States as require that assistance. But the resources of the States are not in all cases equal to the strain on them, and the Government of India have freely promised help in the way of loans. The amount of those loans this year exceeds R48,00,000 and in 1900-1901 a provision has been made in the Ways and Means Estimate of R75,00,000.

Moreover, in British India one measure resorted to for combating famine is to increase the amount of agricultural advances: the increase on that account is R37,75,000 this year and about R20,00,000 next year.

136. The Revised Estimate of net receipts on State Railways in 1899-1900 is higher than the Budget Estimate by R86,63,000 or £577,600. The improvement is chiefly on the East Indian, Rajputana-Malwa and Bengal-Nagpur Railways and is due to general development of traffic following an increased open mileage, to heavier coal and food grain traffic and to the movement of troops sent to South Africa.

137. The increase in the Interest charges in India is due chiefly to the East Indian Railway Company not having raised during 1898-99 debentures

to the extent of £1,000,000 as was anticipated in the Revised Estimate for that year, in consequence of which the outlay on the line was provided from funds under the head 48 and interest charged in India.

138. The net receipts from State Railways in 1900-1901 are estimated at R82,91,000 or £552,700 higher than the Revised Estimate for 1899-1900. This increase is merely nominal as it is due to the inclusion under this head of the net receipts of the Great Indian Peninsula Railway which in the previous year were included in those of the Guaranteed Railways. Excluding the transactions of this Railway the results show a falling-off of R39,09,000 or £260,600, it is not considered prudent to anticipate a continuance of the exceptional traffic obtained in 1899-1900. The increase under working expenses is due, as explained above, to the inclusion of the transactions of the Great Indian Peninsula Railway under this head. The increase in Interest charges in India is due to the progress of Capital Outlay, and in England to provision having been made for the purchase of the Great Indian Peninsula Railway by means of an annuity, the interest charges in England being reduced for the same cause.

139. The Revised Estimate of net receipts from Guaranteed Railways is lower than the original Estimate by R23,75,000 or £158,400 due to a falling-off in traffic on the Great Indian Peninsula Railway consequent on the failure of the cotton and grain crops.

140. The decrease in surplus profits and other charges is due to the same cause.

141. The increase in the receipts from Major Works in 1899-1900 is due chiefly to the greater demand for canal water consequent on short rainfall in the districts served by the canals; the small decrease in the receipts from Minor Works is mainly due to the short supply of water in the tanks in Baluchistan. The Budget Estimate of receipts from Major Works anticipates a decrease of R7,33,000 as it is not expected that the seasons will be so favourable for Irrigation as in 1899-1900. The Estimate, however, provides for an increase of R5,35,000 in the revenue from the Chenab Canal, the direct receipts from which are expected to rise to R35,80,000 in 1900-1901, being about 50 per cent more than the actual receipts of 1898-99. The increase of Irrigation in 1899-1900 necessitated an increase in the charges for the collection of revenue as well as in the charges for maintenance and repairs.

142. The financial results obtained during 1897-98 and 1898-99 from Irrigation Works, for which Capital and Revenue Accounts are kept, are given below:—

		1897-98.	1898-99.
MAJOR WORKS.		R	R
Capital Outlay—			
Direct and Indirect	During the year	77,51,250	70,71,840
	To end of year	34,12,73,360	34,83,46,160
Revenue Account—			
Gross Revenue		3,38,26,840	3,26,50,990
Maintenance and Working		99,32,500	1,04,70,930
Net Revenue		2,38,94,340	2,21,80,060
Interest		1,28,42,500	1,31,26,950
Net profit		1,10,51,840	90,53,110
Percentage of net Revenue of the year on the Capital Outlay to end of the year		7·00	6·37
MINOR WORKS.			
Capital Outlay—			
Direct and Indirect	During the year	13,22,000	6,85,160
	To end of year	5,29,24,470	5,36,09,630
Revenue Account—			
Gross Revenue		58,86,930	58,44,310
Maintenance and Working		23,95,120	27,58,610
Net Revenue		34,91,810	30,85,700
Percentage of net Revenue of the year on the Capital Outlay to end of the year		6·60	5·75

The figures in this table are taken from the administrative accounts. In the case of Minor Works interest on the Capital Outlay is not charged, as the Capital Expenditure is incurred from Revenue.

India . . R	65,26,606	62,26,319	65,91,962	64,38,000	61,92,000	62,48,000
England . . £	26,224	28,911	30,519	29,600	29,000	27,300

143. The expenditure on Imperial Military Works during 1899-1900 is expected to be less than the Budget Estimate by R6,70,000. This is chiefly due to expenditure on defensive works on the frontier having fallen short of the estimate. No special grant for the frontier works has been made in 1900-1901.

144. Under Imperial Civil Works a lapse of R1,10,000 is expected in Baluchistan. The Budget grant for 1900-1901 is higher than that for 1899-1900 owing to provision being made for special works at Bangalore and for a contribution to the Simla Municipality for expenditure on the extension project.

145. The expenditure on Provincial and Local Civil Works during 1899-1900 is expected to fall short of the Budget Estimates by R48,43,000 and R8,12,000, respectively. Under Provincial, the Budget Estimate was abnormally high, as it provided for spending the contributions from Imperial to Provincial Revenues, aggregating about R60,00,000. Owing to the occurrence of famine, expenditure, especially in the Central Provinces, Punjab, and Bombay, was restricted. The only point deserving notice in connection with the Provincial Budget Estimates for 1900-1901 is that Burma provides for expenditure to the extent of about R20,00,000 more than in the previous year. The decrease under Local Civil Works is entirely due to restriction of expenditure in connection with famine.

146. In paragraphs 76 and 106, the numerous items accounting for the variations in the Expenditure under this large and important head have been detailed. But it will be convenient here to state the causes for the increase in expenditure next year in a somewhat different way.

147. We may take first the causes which are beyond the power of the Government of India to control. The famine adds R47,30,000 to the expenditure by increasing the price of food supplies. And the despatch of troops out of India, without replacement, secures a net saving of R42,40,000—the gross saving is R44,90,000, but the absence of the troops involves a reduction in receipts of R2,50,000. The net addition to the expenditure for unavoidable reasons is accordingly R4,90,000.

148. The other class of items consists of increases which are the result of orders of the Government of India or of the Secretary of State. The savings effected by such orders amount to R29,11,000, being the result chiefly of the decision to withdraw regular troops from several outlying posts on the frontier: there is some set-off against this saving in the Civil Estimates where provision is made for the Militia or Military Police which will replace the troops.

149. On the other hand, the Government of India has deemed it prudent to sanction several measures involving increased Military Expenditure considered necessary to improve the efficiency of the Army.

The first and most important of these is the re-armament of the Native Army with the Lee-Enfield Rifle. The manufacture and supply of the arms will necessarily be spread over some years, and the provision made next year is R44,50,000. This represents part of the increase shown in the above table in the Sterling charge for Ordnance Stores.

Next comes the provision of Lyddite shells for a howitzer battery and siege train howitzers for which a provision of R2,77,000 is made.

For the improvement of Commissariat-Transport arrangements the estimates provide R10,00,000.

An addition of 92 officers to the Indian Staff Corps is estimated to cost next year R4,00,000.

The four Heavy Field Batteries are to be reorganised into two Howitzer Batteries, improvements are to be made in the organisation of the Mounted Artillery Batteries, and additions have been sanctioned to the establishments of Mountain Batteries. The cost of these measures next year will be R10,59,000.

Four Mountain Batteries are to be armed with a new gun, costing R90,000.

Fifty miles of light railway material are to be purchased costing R8,00,000.

The purchase of 2,000 mules has been ordered costing, with their keep for a part of next year, R9,10,000.

A sum of R75,000 has been provided to admit of experiments being made to determine the best method of adding military balloons to the equipment of the army.

The total cost of these measures exceeds R90,00,000.

Section V.—Capital Expenditure on Public Works not charged against Revenue.

RAILWAY CONSTRUCTION.

150. As explained in paragraphs 16 to 19 of Part I, the Expenditure on Railway Construction for which the Government undertakes any financial responsibility or gives any direct guarantee will be R9,28,27,000 in the current year and R7,30,84,000 in 1900-1901, the amount having been R8,84,21,189 in 1898-99, and R8,82,27,000 in the Budget Estimate of this year. The distribution of the total

Expenditure on Railway Construction through State and Companies' Agency in each of the three years from 1898-99 to 1900-1901, is as follows :—

	1898-99, Accounts.	1899-1900, Revised.	1900-1901, Budget.
Expenditure in England.	£	£	£
1. State Lines	766,839	634,000	910,000
2. Old Guaranteed Railways	893,241	715,300	638,000
3. Extensions of ditto	77,584	76,100	120,400
4. Other Guaranteed or Assisted Railways .	746,056	908,300	702,200
TOTAL .	2,483,720	2,333,700	2,370,600
Equivalent in rupees of Expenditure in England.	R	R	R
1. State Lines	1,15,18,097	94,67,000	1,36,50,000
2. Old Guaranteed Railways at contract rates .	97,44,453	1,02,35,000	88,55,000
3. Extensions of ditto at prescribed rates	11,71,306	11,41,000	18,05,000
4. Other Guaranteed or Assisted Railways at contract rates	1,13,35,322	1,36,27,000	1,05,26,000
TOTAL .	3,37,69,178	3,44,70,000	3,48,36,000
Expenditure in India.			
1. State Lines	3,80,80,744	4,30,62,000	2,43,64,000
2. Old Guaranteed Railways (net repayments)	—47,92,616	—47,00,000	—67,27,000
3. Extensions of ditto ditto .	15,05,298	34,10,000	10,63,000
4. Other Guaranteed or Assisted Railways .	1,77,92,827	1,51,05,000	1,90,98,000
5. Branch Lines on firm guarantee . .	20,65,758	14,80,000	4,50,000
TOTAL INDIA .	5,46,52,011	5,83,57,000	3,82,48,000
TOTAL OF PROGRAMME .	8,84,21,189	9,28,27,000	7,30,84,000

151. The figures in the above table do not include the expenditure of Branch Line Companies not in receipt of a direct guarantee nor that of other Companies whose transactions are outside the Government accounts. Including this expenditure and also the expenditure from Provincial and Local Revenues on local lines, the total expenditure on Railway Construction in the three years may be stated as follows :—

	Accounts, 1898-99.	Revised, 1899-1900.	Budget, 1900-1901.
	R	R	R
Total as in table in paragraph 150 .	8,84,21,189	9,28,27,000	7,30,84,000
Branch lines not on firm guarantee	89,27,019	41,82,000	—55,000
Railways outside Government accounts	68,07,000	57,61,000	66,42,000

49.—Irrigation Construction.

159. The figures are :—

Accounts, 1898-99.	Budget, 1899-1900.	Revised, 1899-1900.	Budget, 1900-1901.
R	R	R	R
65,35,482	85,00,000	89,73,000	1,00,00,000

Owing to vigorous prosecution of work on the Jhelum Canal in the Punjab, an additional grant of R5,00,000 was made during the year. The Budget grant for 1900-1901 has been fixed at R1,00,00,000 to permit of work on the large projects now in hand being vigorously pushed on.

51.—Redemption of Liabilities.

160. The Budget Estimate for 1900-1901 provides £5,922,400 under this head representing the Permanent Debt brought on the Government books on account of the Debentures and Debenture Stock of the Great Indian Peninsula Railway Company for which the Secretary of State will incur the liability on the purchase of their undertaking.

Section VI.—Ways and Means.

HOME TREASURY.

161. The following are the details of the transactions of the Home Treasury in the Budget and Revised Estimate for 1899-1900 and in the Budget Estimate for 1900-1901 :—

	Budget, 1899-1900.	Revised, 1899-1900.	Budget, 1900-1901.

Add—Closing Balance	2,817,344	2,223,668	2,021,568
TOTAL	28,526,044	29,249,068	33,129,268

1899-1900. Home Treasury Ways and Means.

162. In preparing the Budget Estimates of the current year, the cash balance in the Home Treasury on the 1st of April 1899 was taken at £4,304,444, and it was assumed that with the sale of Bills on India to the amount of £17,000,000 the Secretary of State would be able, without any additions to the Sterling Debt, to meet a net disbursement of £18,487,100 during the year by drawing upon his cash balances to the extent of £1,487,100.

The East Indian Railway Company did not raise until May 1899 £1,000,000 Debenture Capital which they intended to raise in March: the sales of Council Bills in 1898-99 were less by £307,623 than the amount entered in the Revised Estimate; while, on the other hand, the net disbursements of the year were less than in the Revised Estimate of 1898-99 by £148,947. The actual cash balance on the 1st of April 1899 was consequently lower than that taken in the Budget Estimate by £1,158,676.

The heavy trade demands for funds in India enabled the Secretary of State to increase his drawings in the current year, and it is now expected that the total Bills and Transfers sold during the year will be £19,000,000 instead of the £17,000,000 entered in the Budget Estimate. But the balances in the Indian Treasuries were not sufficient to meet the whole of the drawings, and it was therefore decided to hold £1,500,000 out of the total drawings in a separate Currency

Account in the Bank of England under Act II of 1898. A sum of £500,000 has also been used for the purchase of silver for coinage into rupees in India, so that £17,000,000 out of the total drawings have been available for the ordinary disbursements of the Secretary of State. These disbursements, apart from the purchases of gold and silver mentioned above, are now expected to amount to £17,922,100, being £565,000, less than the amount, £18,487,100, entered in the Budget Estimate.

Deducting the decrease in the ordinary disbursements of £565,000 from the decrease of £1,158,676 in the opening balance, we get the diminution of the closing balance of 1899-1900 below the amount taken in the Budget Estimate, namely, £593,676, as shown in the Revised Estimate.

1899-1900. Temporary Sterling Loans.

163. No addition to the Sterling Debt was made by the Secretary of State during the year. But in accordance with the programme of the Budget Estimate, Temporary Debt for £4,500,000 was replaced by issuing an equivalent amount during the year. £2,500,000 were issued in May and £2,000,000 in September, the results of the loans having been as follows :—

Month of Issue.	Amount tendered.	Amount accepted.		Average rate of interest per cent per annum.		
	£	£		£	s.	d.
May 1899	7,290,000	1,500,000	for twelve months.	2	14	11½
		1,000,000	for six months.	2	10	2
September „	6,535,000	1,000,000	for twelve months.	3	4	2
		1,000,000	for six months.	3	9	9

As the two millions issued for six months fell due during the year, they had again to be replaced, raising the gross amount issued and discharged to £6,500,000 in the Revised Estimate. The additional issues of two millions have been made with the following results :—

Month of Issue.	Amount tendered.	Amount accepted.		Average rate of interest per cent per annum.		
	£	£		£	s.	d.
November 1899	2,580,000	500,000	for twelve months.	4	2	11
March 1900	4,232,000	1,000,000	Do.	3	18	1
		500,000	for six months.	3	17	5

The rates of interest payable on the temporary loans issued after May have been unusually high owing to the stringency in the London money market.

1899-1900. Capital of Railway Companies.

164. The net issues to Railway Companies in England during 1899-1900 are now estimated to be £1,101,400 against £475,700 entered in the Budget Estimate, showing an increase of £625,700. The usual details are as follows :—

	Budget.	Revised.
RECEIPTS.	£	£
Subscribed Capital—		
(*a*) State Lines	1,754,400	401,000
(*b*) Guaranteed Lines	964,200	200,000
Miscellaneous	3,000	4,800
TOTAL	2,721,600	605,800
ISSUES.		
For Discharge of Debentures—		
(*a*) State Railways	1,234,400	*Nil.*
(*b*) Guaranteed Lines	14,200	2,700
For Stores, Establishment Charges, etc.—		
(*a*) State Railways	997,200	910,000
(*b*) Guaranteed Lines	951,500	794,500
TOTAL	3,197,300	1,707,200

The decrease of £2,117,600 in the receipts on account of subscribed Capital is made up as follows:—

	£
Receipts on account of Capital, less by—	
Bombay, Baroda and Central India Railway	500,000
Great Indian Peninsula Railway	250,000
Indian Midland Railway	70,000
Southern Mahratta Railway	50,000
Madras Railway	2,700
	872,700
Deduct—	
Bengal-Nagpur Railway, more by	—1,000
	871,700
Debentures renewed instead of being replaced by fresh Capital—	
Bengal-Nagpur Railway	1,234,400
Madras Railway	11,500
TOTAL	2,117,600

The state of the London Money Market made it desirable to postpone the raising of fresh capital as much as possible.

165. As regards the reduced drawings for expenditure on stores, etc., the estimates generally prove too high, and in the current year this is likely to be the case as regards the programmes originally settled for the Bengal-Nagpur, the Indian Midland, the Madras, and Great Indian Peninsula Railways.

166. The following are the details of the remittance transactions of Railway Companies working State lines in India to whom advances of funds are made in England for the purchase of stores, etc., against adjustments in India by debit to the Railway accounts:—

	Budget.	Revised.
	£	£
Advances for Purchase of Stores—		
East Indian Railway	1,000,000	1,147,000
Rajputana-Malwa Railway	100,000	103,400
South Indian Railway	68,000	54,500
Bengal and North-Western Railway	70,000	52,000
TOTAL	1,238,000	1,356,900
East Indian Railway Debentures	500,000	1,008,000
Transfer fees, etc.	2,000	2,200
TOTAL	502,000	1,010,200
Net Remittance from India	736,000	346,700

As stated already in paragraph 162, the East Indian Railway Company issued in May 1899 £1,000,000 Debentures entered in March last in the Estimates for 1898-99. Only £8,000 will, therefore, have been raised in the current year against the Budget Estimate of £500,000, the issue of further amounts being deferred to next year.

The advances for purchase of stores do not differ much from the original estimates.

1899-1900. Family and other Remittances.

167. The Family and other Remittances during the year are now expected to result in a net receipt of £423,500 instead of a net payment of £268,800 entered in the Budget Estimate. The difference of £692,300 is due chiefly to the repayment by Her Majesty's Government of £650,000 in respect of disbursements in India in connection with the despatch of Troops to South Africa.

1900-1901. Home Treasury Ways and Means.

168. The net disbursements at the Home Treasury in 1900-1901 on account of Government Expenditure and Miscellaneous Family and other Remittances are estimated at £18,315,000. This amount it is proposed to provide in the following way, namely :—

(1) the Secretary of State intends to draw £16,440,000 by Bills on India, and to issue £500,000 additional India Sterling Bills in addition to replacing those outstanding at the end of this year;

(2) large amounts of additional capital will be issued by Railway Companies in England in 1900-1901, and there will be a net receipt in England of £672,900 from Companies;

(3) the sum of £500,000 spent by the Secretary of State in the purchase of silver this year will be refunded to him by releasing gold held in the Bank of England on Currency account, on the payment of its equivalent in India to the Currency Department out of the proceeds of the coinage;

(4) the total of the receipts in England mentioned above is £18,112,900 as compared with the total of £18,315,000 required and the remainder, £202,100, will be met by a reduction in the cash balances.

Purchase of the Great Indian Peninsula Railway.

169. In the table in paragraph 161, a sum of £5,922,400 is shown as Permanent Debt to be incurred during the year. This represents the Debentures and Debenture Stock of the Great Indian Peninsula Railway Company, for which the Secretary of State will incur the direct liability on the purchase of the Undertaking on the 30th of June next, and the amount will be brought to account as Debt incurred against the charge of the same amount as Capital Outlay on Railways not charged to Revenue under the head Redemption of Liabilities. This is part of the purchase money of the Railway. Under the contract of the Great Indian Peninsula Railway Company with the Secretary of State, dated August 17, 1849, the Secretary of State has given notice of his intention to purchase the Undertaking on the 30th of June next. The contract provides for the payment, at the option of the Secretary of State, of the share Capital of the Company either in cash or by annuities expiring on the 16th August 1948, the amount of the Capital being determined by the average price of the Stock for the three years preceding the date of notice to purchase. It has been decided to effect the purchase by means of an annuity. The exact amount of the annuity to be paid half-yearly has not yet been settled, but for the purpose of the estimates one half-year's annuity has been taken at £687,500 and entered as a charge in the Railway Revenue Account (see paragraph 116). The decision to make the payments by annuity avoids the necessity of any sterling loan for the discharge of the share Capital, and only the outstanding Debentures and Debenture Stock of the Company are entered in the estimates as an addition to the Debt.

170. According to the programme now announced, the Secretary of State will obtain £16,440,000 by sale of Bills on India in 1900-1901 and no additions to the Sterling Debt of Government will be made by new loans during the year except a Temporary Debt of £500,000 by means of India Bills. The programme is announced with the usual reservation and no pledge is given that the Secretary of State will adhere to it.

INDIA.

1899-1900. Main Features.

171. The main feature of the Ways and Means in India in 1899-1900 was a large reduction in the cash balances in the closing months of the year caused by the expenditure on famine relief.* No Rupee loan was required in the year: ordinarily our loans in India are raised in July or August, but the effects of famine were not felt till September and October, and the drain on the balances was not very heavy until after the period of low Treasury balances—November-December—had passed. The expenditure on the direct relief of distress in the current year will be about 308 lakhs and the loss of revenue and other increases of expenditure are estimated at a total of about 273 lakhs. Additional grants of over 86 lakhs were made during the year for loans to Native States and agriculturists for the relief of distress, and an addition of 51 lakhs was

made to the total grant for Capital Expenditure on Railways and Irrigation Works. A charge of over one-and-a-half crores was incurred on account of the troops sent from India to South Africa to be recovered from Her Majesty's Government in England. These increased outgoings were partly counter-balanced by an increase in the Railway revenue, an increase in the Opium receipts and by profits on the coinage of silver and copper. There was a substantial reduction in the Army expenditure: and expenditure on plague preventive measures was considerably lower than was taken in the Budget Estimate; and there were general economies in ordinary expenditure of Local Governments. The total reduction in the cash balances during the year is now expected to be 353 lakhs, while a reduction of 39 lakhs only was anticipated in the Budget Estimates.

The following table compares the leading figures of the estimates of the current and the next year:—

	1899-1900.				1900-1901.	
	Budget Estimate.		Revised Estimate.		Budget Estimate.

The headings in italics are connected with, and explained by, the corresponding figures of the Secretary of State's account in England. The others refer to purely Indian transactions.

172. A remarkable feature of the year 1899-1900 in the above table is that the net Revenue in India is taken in the Revised Estimate only 21½ lakhs less than in the Budget Estimate, notwithstanding the famine. The smallness of the reduction is partly due to the improvement in Revenue and economies in Expenditure mentioned in Section II, but three items may be mentioned here as largely accounting for it. First, 49 lakhs have been transferred from Expenditure against Revenue, under the Famine Grant to Expenditure not charged to Revenue (see paragraph 73), and the entry—No. 7—under the latter

head is increased by that amount. Second, the 60 lakhs taken in the Budget Estimate under Reduction or Avoidance of Debt are omitted altogether in the Revised Estimate, there being no unappropriated balance of the Famine Grant. Thirdly, some portion of the recoveries from Her Majesty's Government in connection with the despatch of troops to South Africa, though brought to account in India as Revenue, is paid in sterling to the Secretary of State.

1900-1901. Main Features.

173. The year 1900-1901 is expected to open with a cash balance of 1323 lakhs. A balance of 13 crores being low for the month of April, we have nothing available from the cash balances to help us in meeting the disbursements of the year, whereas in 1899-1900 we reduced the cash balance by 353 lakhs. The net Revenue in India in 1900-1901 is expected to fall short of the Revised Estimate of the current year by 236 lakhs, and the excess expenditure charged to Provincial Balances (No. 6) is greater by 53 lakhs. As compared with the current year the means at our disposal are therefore less to the extent of about six crores and a half. We have to make up the deficiency partly by loans in India and partly by reduction in the Capital Expenditure on Railways and in the Secretary of State's drawings. The reduction in the Capital Expenditure in India will be about 2 crores, and the net payments of Council Bills will be less by about 70 lakhs. The charges connected with the despatch of Troops to South Africa will also be smaller next year by about a crore. These items amount to 370 lakhs. We accordingly estimate that a new loan of three crores will be required in India which, after taking into account other unimportant variations, will leave us a balance of 1360 lakhs on March 31, 1901, being about 37 lakhs more than the opening balance of the year.

Discharge of 7s. per cent portion of the 4½ per cent Loans of 1879.

174. No new Rupee loans were raised in India in 1899-1900, but the small balance of the 7*s.* per cent portion of the Transfer loan of 1879 was discharged during the year. Under the terms of this portion of the loan, the Promissory Notes could be discharged on or after the 15th of September 1893 by the payment of the equivalent in rupees of eight pounds fifteen shillings sterling for each hundred rupees of their amount—the said equivalent being calculated at the rate of exchange of the year fixed for the adjustment of financial transactions between the Indian and Imperial Governments. This rate of exchange was considerably lower than 16*d.* from 1893-94 to 1898-99, and the seven shilling per cent portion of the Transfer loan of 1879 was not therefore included in the notices of discharge of Rupee loans issued since 1892-93. The rate of exchange for the year 1899-1900 was fixed at 16*d.*, and as that is the rate which will prevail in future years, and no further rise will occur, it was decided to pay off the small outstanding balance (R2,23,000) of the loan. Accordingly by Notification No. 2710, dated June 15, 1899, issued in a Gazette Extraordinary of the same date, this small remnant of the 4½ per cent loans was notified for discharge; the amount has been completely paid off during the year.

Savings Banks, etc.

175. The following table gives the details of the transactions of Savings Banks during the last few years and the estimated transactions for 1899-1900 and 1900-1901:—

Year.	Net additions to deposits, cash.	Interest.	Total Addition.
	R	R	R
1891-92	51,79,000	30,62,000	82,41,000
1892-93	54,89,000	33,94,000	88,83,000
1893-94	17,99,000	36,80,000	54,79,000
1894-95	—8,45,000	29,70,000	21,25,000
1895-96	24,77,000	33,85,000	58,62,000
1896-97	—58,11,000	34,66,000	—23,45,000
1897-98	—65,71,000	32,70,000	—33,01,000
1898-99	—8,84,000	32,29,000	23,45,000
1899-1900, Budget	12,65,000	33,66,000	46,31,000
1899-1900, Revised	19,000	33,23,000	33,42,000
1900-1901, Budget	—12,31,000	35,17,000	22,86,000

In the Budget Estimate of the current year, allowance was made for a small addition to the Savings Bank Deposits in 1899-1900. There was a considerable increase in the net deposits during the first six months of the year, but since October there have been heavy withdrawals partly in consequence of the famine and partly in consequence of the low price of Government Securities stimulating investments in them by withdrawals from Saving Banks. It is, therefore, now expected that there will, apart from Interest, be a net withdrawal of about seven lakhs from Savings Banks during the year. For the Budget Estimate of 1900-1901 a net withdrawal of 20 lakhs, apart from Interest, is assumed in view chiefly of the famine. The other Savings Bank accounts included in the figures in the above table do not show any noticeable variations.

Loans by Government.

176. The transactions during the year 1899-1900 under the head of Loans granted by the Government were affected by the famine. The net disbursements are now expected to amount to R76,66,000 against R24,88,000 entered in the Budget Estimate. Additional grants of over 86 lakhs were made during the year, for loans to Native States and Agriculturists, but, as usually happens, the allotments made at the beginning of the year to Provinces exempt from famine have proved too high, and the net excess issues on account of the loans are now taken at only about 52 lakhs.

In fixing the Budget Estimates of 1900-1901, the Government of India have been compelled to curtail grants of loans for ordinary Public Works undertaken by Local Bodies as much as possible in order that the famine requirements may be fully met; the total provision for loans next year is taken at R1,66,62,000, against which there will be recoveries on account of past loans amounting to R76,10,000, making the estimate of net issues during the year R90,52,000. Nearly three-fourths of the gross amount of the loans of R1,66,62,000 are required for relief of famine.

1900-1901. New Rupee Loan.

177. According to the programme now announced, it is the intention of the Government of India to raise in India three crores of rupees by new loans, but full liberty is reserved as usual to vary the programme as now announced to any extent that may be considered desirable.

March 21, 1900. J. F. FINLAY.

FORT WILLIAM,
NANCE AND COMMERCE DEPARTMENT;
The 21st March 1900.

APPENDIX II.

Memorandum by the Hon'ble Major-General Sir Edwin Collen, K.C.I.E., C.B., on Military, Military Works, and Marine Expenditure for the years 1899-1900 and 1900-1901.

The estimates with which the Military and Marine Department of the Government of India is concerned, are the following:—

I—Indian Military Estimates.
II—Home (India) Military Estimates.
III—Military Works Estimates.
IV—Marine Estimates.

2. They will be dealt with in the order given above, but I shall preface the detailed explanation of these estimates with some general remarks on the causes which lead to increased military expenditure under the first two heads in the coming year, and shall make a short statement in connection with the work of the military administration during the year 1899-1900.

3. Taking the Indian and the Home (India) Military estimates together, the expenditure for the year 1900-1901 is estimated to exceed the amount provided in the budget for 1899-1900 by R59,74,500 (£398,300). This figure, however, does not give the true increase to military expenditure in the coming year, as compared with the provision in the budget of the current year. To arrive at the true figure, abnormal causes of variation must be eliminated. In the first place, the large increase, amounting to R47,00,000 (£313,333), which has been provided in the budget for next year, to meet the expected rise in the cost of food supplies for men and animals, must be thrown out. Again, the savings amounting to R42,00,000 (£280,000) which will accrue owing to the absence of the troops lent for service in South Africa, and in the Mauritius, Singapur, and Ceylon, must be taken into consideration.

Eliminating both these items, the increase comes to R54,74,500 (£365,000). On the other hand, if a comparison be made between the budget of the coming year and the revised estimate of 1899-1900, it will be found (in this case taking the gross figures) that the increase is R1,84,00,000 (£1,229,200). To arrive at a correct comparison, so far as increased military expenditure is concerned, the abnormal items affecting this figure must also be eliminated. The result will be to show an increase in military expenditure in the budget of next year, as compared with the normal expenditure of the current year in accordance with the revised estimate (Home and Indian together) of R1,12,00,000 (£746,000). The increase in military expenditure is due to the provision for re-armament, increase of officers, transport, and other matters.

4. For some years past it has been evident that many improvements would be necessary, if the Army of India was to maintain its high standard of efficiency. Various proposals have been made, many of which have been thoroughly discussed, reported on by committees, and generally threshed out, while some of them have been the subject of correspondence between the Government of India and Her Majesty's Government. But except for war expenditure, or expenditure that was patent to every one as urgently necessary, such as the increase of pay to the Native Army, it has been impossible to obtain the money required for large improvements or changes, owing to the great financial difficulties caused by the depreciation of the gold value of the rupee and by famine, war, and plague. Thus in 1896, on the military side, we had to restrict expenditure in consequence of famine, and in 1897-98 we had the war expenditure to face, besides that which was entailed later on in connection with the garrison and defence of the frontier.

5. Last year the Government of India came to the conclusion that some of these projects of improvement were so pressing that they should be taken in hand, and an endeavour made to find the required funds. Notwithstanding the heavy expenditure to be met next year on account of famine, the stability of exchange and other beneficial causes have allowed a considerable extra expenditure for military purposes, although we have had to postpone many items, large and small, which might have found a place in the estimates had it not been for the visitation of famine. It was therefore decided, with the concurrence of Her Majesty's Government, to provide for

those measures which were considered to be the most important. We grouped the requirements under the following heads :—

First—Proposals necessitated by improvement in arms and ammunition;
Secondly—Proposals for improving manufacturing establishments;
Thirdly—Proposals for improvement of the organisation of the army in India;
Fourthly—Proposals for improvements of transport and commissariat arrangements.

6. In each of these groups there were several entries, and a selection had to be made. The most important measure proposed, in the *first* group or indeed in any group, is the rearmament of the native army and of the volunteer forces with the magazine rifle. The total cost of rearming the native army is calculated at R1,36,92,377. The rearmament of the volunteers will cost R15,44,085. The rearmament of the whole of the native army will take several years to complete, taking into consideration the probable funds likely to be available annually. We have provided for the rearmament of the field army this year. It must be recollected that there also will be considerable extra recurring expenditure for ammunition. The provision of apparatus for the manufacture of lyddite and for filling shells with this explosive, so that we may be independent of England in this respect, the rearmament of mountain batteries with the new 10-pounder B.-L. gun, R90,000, and the provision of mountings for Maxim guns to be made up in India, have all been included. After prolonged trials I hope that a satisfactory mounting for Maxim guns has been obtained for use with pack transport.

7. The *second* group includes proposals, alluded to by me in previous years, for improvement in the manufacturing establishments. The first is the institution of a cordite factory and the second is the establishment of a central gun-carriage factory. We have received the approval of the Secretary of State for the cordite factory, a suitable site has been selected, and we have provided in the Military Works estimates for a portion of the cost of the buildings. When this factory is in working order it will give us a saving of about R4,00,000 a year in comparison with the trade price at home. Only preliminary arrangements have been made in respect to the central gun-carriage factory.

8. In the *third* group, embracing matters connected with the organisation of the army, one of the first and most important is the addition of officers to the Native Army. This also I have alluded to in past years. A step has been made, and we have provided in the estimates for an increase of 92 officers. This number is made up by the addition of one officer to each battalion of native infantry in the Punjab and Bengal Commands, and a further increase of 28 officers in order to institute a general reform, *viz.*, the discontinuance of the present practice of appointing fresh officers to regiments in the place of absentees. In future two officers will be added permanently to the establishment of all native cavalry and infantry regiments, to provide for absences on furlough, etc. One of the advantages of this plan is that regimental establishments will be more permanent than heretofore. The cost of this addition of 92 officers will be R4,00,000 in the coming year.

9. The next proposal in this group is the reorganisation of horse, field, and mountain batteries in India, and the conversion of the existing heavy batteries into howitzer batteries. After the experience gained in 1897 we were confirmed in the opinion that the existing method of mobilising artillery in this country was defective. The question was considered by a committee, and they submitted proposals with the object of increasing the efficiency of batteries and ammunition columns, and of rendering them capable of being more rapidly mobilised. The proposals include the raising of another native mountain battery. The re-organisation of the heavy field batteries and converting them from four batteries of four guns each, drawn by elephants and bullocks, to two howitzer batteries of six guns each, we discussed last year, and it was agreed that, instead of four of these batteries of four pieces each, it would be better to have two more powerful howitzer batteries with horses for draught, and an additional mountain battery. Events have shewn that these heavy batteries should be more mobile and have a more powerful armament. The net results of these proposals would, if completely carried out, be an initial expenditure of about 12½ lakhs and an annual expenditure of 7½ lakhs, but for next year we have taken in the estimates a sum of R10,58,640.

10. The fourth group includes the various proposals which we have had under consideration for improving matters connected with the Commissiariat-Transport Department. This is also a subject to which I have alluded on previous occasions. With regard to the permanent re-organisation of the transport, all that can be said is that it is one involving large expenditure and great consideration. Connected with that are proposals for the increase of the Supply Branch of the Commissariat-

Transport Department, for the appointment of probationers, for the improvement of the Indian ambulance system, and the creation of a reserve of transport drivers. In this group also is the purchase of 2,000 mules in addition to the present complement. We have entered a certain sum provisionally in the estimates to meet charges on account of these measures. I may also mention that a system of time-promotion in the Commissariat-Transport Department has been adopted, which, although involving some increase of expenditure, will we trust prove more satisfactory than the present system.

11. In addition to the measures which can be placed in these groups we have provided for a certain amount of military light railway, and also for experiments with war balloons. Some of the foregoing items are only provisionally provided for, subject to the sanction of the Secretary of State to the detailed proposals. The total sum provided in the estimates of next year for all these measures comes to about R90,00,000.

12. Although we have not yet established a new permanent transport organisation, a great deal has been done in the past year to improve our transport according to our existing means. A system of collection of transport has been prepared, the numbers of animals to be produced from the various districts have been assigned, and in conjunction with the civil authorities, an endeavour has been made to arrive at an improved knowledge of the transport districts, and to provide for a better method of collection. We have also arranged for the organisation of our existing transport into self-contained units, *i.e.*, into corps and cadres, the latter of which can be filled up when an emergency occurs, and we have laid down an organisation for the numbers of transport animals which have to be purchased or hired on every considerable expedition. The concessions to be granted to owners of hired transport and hired attendants have been defined and published. This may sound an easy matter, but it involves the consideration of an immense number of details. We have also been arranging for special grants of land to camel owners on the Chenab canal so as to obtain, we hope, a large number of camels when required. Further, the Secretary of State's sanction has been obtained to the establishment of a reserve of drivers and artificers. We have provided for the reorganisation of the siege-train bullocks and for the redistribution of bullock transport in India. The equipment required to complete transport corps, supply trains, etc., has been detailed, and is provided for partly this year and partly in next year's estimates. The question of our reserves of mule saddles, gear, and equipment generally, has received consideration, and it is satisfactory to know that we have sufficient, with a large amount of manufacturing power behind.

13. During the financial year which is now coming to a close, India has been afflicted by famine and plague, but we have not had to send any expeditions into the field, with the exception of the small Mishmi expedition in the north-east of Assam. But famine and plague have both, although not in the same degree, affected the army. The rise in prices has increased our estimates and of course affects the Native Army; while with regard to plague we have been able to supply a large number of officers and men for work and it has affected military movements. Last September we despatched a small force to South Africa, and had the satisfaction of receiving the acknowledgments of Her Majesty's Government for the promptitude with which the force was equipped and sent off. Up to the beginning of this month we had sent over 8,000 officers and men, over 3,000 natives for non-combatant services, 6,700 horses, about 1,600 mules and ponies, and the necessary field hospitals and other equipments.

14. We have been able to assist the War Office in other ways during the South African campaign, and the possession of reserves and manufacturing power for army equipments have enabled us to meet their requirements. The army clothing department have turned out or have under supply 100,000 warm coats, 40,000 havresacks, 5,000 pairs jack spurs, 40,000 suits of khaki, and 45,000 helmets; the army boot factory at Cawnpore 70,000 pairs of boots; the harness and saddlery factory at Cawnpore made up and issued 2,650 sets of mounted infantry saddlery, of which 1,800 were completed in a fortnight and the remaining 1,050 at intervals of a few days, and we have also sent a large quantity of veterinary stores. The native cavalry of India, the Imperial service troops, and the splendid liberality of a number of Native States have enabled us to send 2,450 horses for mounted infantry work; the commissariat-transport department have collected and despatched one transport corps composed of 460 mule drivers and artificers, and 2,000 equipped bhistis. I should also mention the liberality of Khan Bahadur Dhanjibhoy of Rawal Pindi, who has presented a completely fitted train of twenty-five ambulance tongas; of Rai Bahadur Boota Singh, also of Rawal Pindi, who has given a number of tents for hospital purposes; and of several other Indian firms, who have come forward with gifts of various descriptions for the troops in South Africa.

15. On the frontier considerable saving has been effected by the withdrawal of a battalion of native infantry from Chitral, and it is also contemplated to withdraw

troops from certain advanced posts on the frontier as soon as the militia or police corps which are to be located at these posts have been organized. The troops have been withdrawn from Landi Kotal, and that post has been handed over to the Khyber Rifles. By the withdrawal of troops from other frontier outposts and in Burma, considerable economy will be effected; defensive works on the frontier have been steadily proceeded with, and we hope they will be completed in the coming financial year. An important redistribution of commands—long-needed, but delayed from various causes—which will greatly contribute to the efficiency of the army, will be effected on the North-West Frontier, will have effect from the 1st April, and certain reductions may be made in commands and staff in Burma. As regards the railways on the frontier, the Nowshera-Dargai line has been steadily progressing, and surveys made in other directions.

16. In what may be called our military domestic affairs, a good deal has been done. Continued attention has been paid to the all-important question of improving the health of the British troops in India and of checking the terrible ravages of enteric fever. With this object constant investigations have been conducted by Major Davies, Royal Army Medical Corps, and other special sanitary officers. The sanitation and water-supply of a number of cantonments have been carefully examined, and remedial measures are being pushed forward; further experiments have been made in the disposal of sewage, an officer has been specially deputed to study the question, drainage works have been extended, and inoculation for protection against typhoid is now allowed. In the same connection we are pursuing the policy of establishing dairies to supply the troops with milk and butter at places where no good supply by private enterprise exists; dairies have been opened at Lucknow, Cawnpore, Agra, and Belgaum, and others are contemplated. We are endeavouring to ensure continuous efficient management of these and of grass farms, by specially training officers and non-commissioned officers at the Allahabad farm, under the personal supervision of Captain Meagher, now Special Forage Officer for Bengal, a development of the training classes for non-commissioned officers and men which I mentioned last year. I shall not see the completion of this work, but our experimental combination of grass and dairy farms has been so far very successful, and I believe that if the work is persevered in, the whole of the forage for the mounted branches will be provided from these farms, and a large financial result will eventually be attained, besides advantages to the army in the supply of milk, dairy farm produce, and the fattening of slaughter-cattle.

17. I regret to say that the remount department has during the last year been overtaken by a serious catastrophe in the form of an outbreak of virulent glanders at the country-bred depôt at Hapur. The disease was imported into the depôt last spring. It has resulted in the loss of a number of valuable horses, and the supply of country-bred remounts to the army has necessarily been stopped through fear of spreading contagion. This is particularly unfortunate at the moment when the requirements of regiments sent to South Africa have occasioned an unusually large demand for remounts. This outbreak of glanders is not confined to our depôts. The disease has been virulent in several parts of Northern India, and the country-bred horse market has been injured by this and by the existing famine. We are making large purchases of Australian horses to replace those sent to South Africa. The supply of mules has fallen short of our requirements and we have been obliged to again resort to the costly expedient of purchasing outside India. The development of the mule supply in this country is receiving earnest attention.

18. The transfer of the direct control of the ordnance factories to the Director General of Ordnance has, I have reason to believe, already resulted in considerable saving owing to the facility afforded for regulating the supply of stores to meet the actual requirements of the service generally, for controlling demands for war material, and for comparing rates paid for labour and material in the different manufacturing establishments. The expansion of the manufacturing power of the ordnance factories has been and will continue to be a source of saving to Indian revenues. The factories in this country have been equipped with plant and skilled labour for the manufacture of all kinds of small arms, ammunition, fuzes and tubes, and almost all descriptions of projectiles likely to be required in India, and in addition are in a position to meet the requirements of steel in other departments. The gunpowder factory at Kirkee has been closed as we have the Ishapore Factory for the manufacture of black powder and large quantities of reserves. The question of our reserves of war material continues every year to engage attention, but I am satisfied that they are generally ample. We have been able to supply the War Office with tents, fuzes and tubes, ordnance stores of different kinds, signalling apparatus, etc.

19. Special commissioners have been employed in the investigation of the existing rules relating to compensation for dearness of food and forage, and other cognate matters, and we expect considerable economy to result from their labours. A committee has been examining the question of the supply of medical stores and equipments. Laborious work has been done in the direction of reducing returns and correspondence and in the curtailment of reports, although I cannot announce at this moment the actual results which will follow. Among miscellaneous items, I may mention that we have taken steps to improve the efficiency of coast defence lascars; native troops will be trained regimentally in army signalling; increased rates of wound pensions have been allowed to non-commissioned officers and men of the native army; increased rates of injury and family pensions or gratuities, for followers, to those who receive these by special award have been given; and the rates of the pensions of widows of warrant officers will be raised.

I shall now proceed to explain the details of the various estimates which I have to present. But before doing so, I must refer, however briefly, to the calamity which has overtaken the Government of India and the whole Army of India, by the death of the Commander-in-Chief, His Excellency General Sir William Lockhart. This is not the place to record his great services and distinguished career, but it is, I venture to think, eminently the occasion on which a colleague and friend may allude to the sorrow which is felt by all, and to the loss the Military Administration of this country has sustained, by the death of one whose every thought was for the efficiency and well-being of the Army.

I.—Indian Military Estimates.

Revised Estimates, 1899-1900.

Comparison—Revised for 1899-1900 and Budget for 1899-1900.

20. The revised Indian Military Estimates for 1899-1900, compared with the Budget for the year, show a net saving of R63,33,000 caused by an increase in receipts of R11,28,000 and a decrease in expenditure of R52,05,000.

21. The increase in receipts is chiefly due to credits on account of the value of animals and stores sent to South Africa, the cost of which is debitable to the Imperial Government.

22. The more important causes which have led to the decrease in expenditure are as under:—

(*a*) There is a decrease of R39,09,000 due to the despatch of the force to South Africa, India being relieved of all expenditure in connection therewith. This includes the saving on account of the two Madras Infantry battalions sent to Ceylon and Singapore.

(*b*) The actual strength of the Kohat-Kurram Force has been less than estimated for; and the Khyber Force was withdrawn earlier than anticipated. On the other hand, expenditure unprovided for has been incurred on account of the Mishmi expedition. The total decrease is R6,42,000.

(*c*) There is also a decrease of R3,89,000 on account of exchange compensation allowance, owing to exchange having been favourable during the year.

(*d*) Again, savings have accrued owing to the despatch of the 27th Madras Infantry to Mauritius, and to the transfer of the administration of the Somali Coast Protectorate to Her Majesty's Government. The employment of officers on plague duty has also the effect of relieving these estimates.

(*e*) Changes made in the sanctioned programme of reliefs, owing to the war in South Africa, scarcity and plague, have resulted in a saving of R2,20,000.

(*f*) In addition to the foregoing, the following are the chief causes which have contributed towards reducing expenditure:—

(*i*) Under Grant 3 (*Regimental Pay, Allowances and Charges*) there are savings to the extent of R4,00,000 owing to ordinary fluctuation.

(*ii*) Under Grant 4 (*Commissariat Establishments, Supplies and Services*) savings aggregating R2,60,000 are due to smaller purchases of malt-liquor owing to decreased consumption; and there is a considerable saving in connection with Commissariat-Transport.

(*iii*) Under Grant 5 (*Remount and Veterinary Establishments, Supplies and Services*) there are savings amounting to R2,80,000 due to the absence of officers on furlough and to smaller native establishments; to smaller purchases of young stock; and to a

more favourable rate of exchange for converting the fixed price of Australian horses bought.

(*iv*) Under Grant 9 (*Medical Establishments, Supplies and Services*) the savings aggregate R4,13,000 due to various causes.

23. On the other hand, there have been increases in expenditure, the more important of which are the following:—

(*a*) High prices of food supplies for men and animals owing to scarcity (R10,00,000).

(*b*) Larger payments of messing allowance to British soldiers in consequence of Army Order No. 78 of 1899 having been extended to India under which soldiers enlisted before 1st April 1898, who have not yet elected to draw messing allowance, can do so at any time; to arrival in India of drafts who were in receipt of the allowance; and to arrears, with effect from 1st June 1898, to men electing the new rules on or before 31st March 1899 (R9,85,000).

(*c*) Cost of chartering two vessels as transports to convey details to England (R4,10,000).

(*d*) Cost of equipment required to complete transport corps, supply trains, etc. (R1,22,000).

Estimates, 1900-1901.

Comparison—Budget for 1899-1900 and Estimate for 1900-1901.

24. The estimates for 1900-1901, in the net, amount to R16,33,55,000, or R23,98,000 more than the budget for 1899-1900. This is due to an increase in receipts of R17,45,000 and an increase in expenditure of R41,43,000.

25. In comparing the estimates of next year with the budget for the current year, it will be found that the increase in *receipts* is mainly due to credit having been taken for the value of horses forming the peace complement of units that have been despatched to South Africa, debits on account of which will be raised against the Imperial Government.

26. The more important causes of the increase in *expenditure* are the following:—

(*a*) The rise in prices of food supplies for men and animals; an increase of R47,30,000 is anticipated.

(*b*) The proposed purchase of additional horses to replace those sent to South Africa, R22,00,000.

(*c*) The purchase and maintenance of 2,000 additional mules, R9,10,000.

(*d*) For the improvement of commissariat-transport arrangements the sum of R9,01,000 has been provided.

(*e*) Messing allowance charges are likely to exceed the current year's provision to the extent of R6,63,000 as a larger number of British soldiers are now drawing the allowance, and those enlisted before the 1st April 1898 can elect to draw it at any time.

(*f*) A provision of R5,64,000 is made for improvements in the organisation of the artillery, and of R4,94,000 for the conversion of heavy into howitzer batteries.

(*g*) The sanctioned addition of 92 officers to the Staff Corps accounts for an increase of R4,00,000.

(*h*) Rupees 3,81,000 is provided for the ·303-inch ammunition to be supplied to the Native army as a part of the scheme of re-armament.

27. Among other causes of increased expenditure the following may be mentioned:—

The alteration in the establishments of Native army reservists in the four commands (R1,39,000); the maintenance of transport animals surplus to the ordinary complement to provide for garrison at present retained on the frontier (R2,43,000); the new scheme for promotion of officers of the Commissariat-Transport Department (R1,00,000); the annual reliefs next year are anticipated to cause additional expenditure to the extent of R2,56,000; the purchase of mules from abroad for ordinary requirements (R1,70,000); the equipment required to complete the transport corps, etc. (R1,27,000); R99,000 is provided for the formation of a reserve of mule-drivers and artificers; larger provision (R1,87,000) under the grant for Ordnance, due chiefly to increased purchase of hides for the Harness and Saddlery Factory, Cawnpore.

28. The foregoing increases in expenditure will, however, be partly counterbalanced by certain decreases, the more important of which are the following:—

(*a*) In consequence of the anticipated absence for half the financial year of British troops on service in South Africa, R38,50,000.

(*b*) Smaller provision to the extent of R29,11,000 in connection with military operations and special services.

(*c*) Saving in the Indian estimates in consequence of three Madras infantry regiments sent to Mauritius, Ceylon, and Singapore, the full cost of which is borne by Her Majesty's Government, R6,40,000.

(*d*) Owing to a more favourable rate of exchange having been adopted, charges on account of exchange compensation allowance next year are expected to be smaller, R3,35,000.

(*e*) R2,59,000 more than last year has been deducted from the Indian estimate in adjustment of excess provision in the home estimates.

29. A statement is appended showing the net amounts under each of the grants for effective and non-effective services, and for military operations :—

	Strength.	
	1900-1901.	1899-1900.
British Army	63,384*	71,495
Native Army	137,871†	142,237‡
Total .	201,255	214,732

* Exclusive of 9,108 men absent in South Africa and left at depôts in India.

† Exclusive of 2,785 men absent in South Africa, Ceylon and Singapore, 1,570 men stationed at Mauritius, and 192 men on the Somali coast.

‡ Exclusive of 784 men stationed at Mauritius.

	Military Operations Rs.	36,000	3,89,040	...	3,53,040	
	Grand Total Rs.	16,33,55,000	16,09,57,000	80,89,740	56,91,740	
		Net Increase .		Rs. 23,98,000		

* The bulk of subscriptions of officers to Indian Military Service Family Pensions is received in India, while most of the expenditure is incurred at home. The receipts in India, therefore, exceed the expenditure in India, and hence, as the figures in the above statement are *net*, there must be a minus entry.

II.—Home (India) Military Estimates.

Revised Estimates, 1899-1900.

Comparison—Revised for 1899-1900 and Budget for 1899-1900.

30. The second of the estimates with which the Military Department is concerned is the Home estimate for army effective and non-effective charges. The Home Budget estimates for 1899-1900 provided for a gross expenditure of £4,493,100, while in the Revised Estimates provision has been made to the extent of £4,101,700 or £391,400 less than the Budget Estimate.

31. This saving of £391,400 in the Revised, as compared with the Budget, Estimate for 1899-1900, is chiefly due to less charges for furlough allowances of officers of the Indian Service, and for furlough allowances and pay, during the voyage, of British forces serving in India; to smaller charges anticipated under "Indian Troop Service" owing to the curtailment of Indian reliefs in consequence of the despatch of troops to South Africa; to decrease in the payments for stores; and to less charges for pay and pensions of non-effective and retired officers of the Indian Service. These decreases are, however, partly counterbalanced by arrear payments in respect of the year 1898-99 to the War Office on account of the British Forces serving in India; by £16,200 having been included in the Revised Estimate on account of the purchase of mules; and by increased charges for the pay and expenses of military officers studying the Russian language.

32. The net figures of the Revised Estimate show a saving of £395,000 on those of the Budget Estimate for 1899-1900, due to a decrease in expenditure of £391,400 as explained above, and an increase in receipts of £3,600.

Estimates, 1900-1901.

Comparison—Budget for 1899-1900 and Estimate for 1900-1901.

33. The receipts and expenditure for 1900-1901 are as follows :—

	Receipts.	Expenditure.	Net expenditure.
	£	£	£
Effective	25,000	2,280,400	2,255,400
Non-effective	18,500	2,427,300	2,408,800
Total	43,500	4,707,700	4,664,200

34. Compared with the budget for 1899-1900, smaller receipts to the extent of £23,900 are anticipated in 1900-1901. The total gross expenditure for 1900-1901 is higher by £214,600 than the amount provided in the budget for the preceding year. This amount is more than accounted for by the increased provision for ordnance stores. The increase in expenditure is partly counterbalanced by smaller provision on account of pay and pensions of non-effective and retired officers of the Indian Service, as the payments on this account appeared to be decreasing, and the budget for 1899-1900 was too high.

35. The gross charges on account of effective services include payments to the War Office in respect of the British forces serving in India, amounting, as estimated in the coming year, to £700,000, as against £730,000 in the estimates for 1899-1900, owing to an expected refund next year in consequence of a portion of these forces being in South Africa at present. The other items included in the gross effective charges are furlough allowances and pay during the voyage of British forces serving in India (£108,000); furlough allowances of officers of the Indian Service (£230,000); Indian Troop Service (£250,000 net); passage of officers and troops otherwise than in transports (£19,000); miscellaneous (£22,000); and stores for India (£951,400).

36. The gross charges on account of non-effective services are made up of the retired pay, etc., of the British forces for service in India (£569,000); pay of the non-effective Colonels of Royal Artillery (£24,300); pay and pensions of non-effective and retired officers of the Indian Service (£1,710,000); miscellaneous pensions, etc. (£90,000), and the Indian Military Service Family Pensions (£34,000).

37. The net expenditure for 1900-1901 is more by £238,500 than that for the preceding year; and, as explained above, this is due to a decrease of £23,900 in receipts and an increase of £214,600 in gross expenditure.

38. The figures of actual expenditure in 1898-99, of the *budget* and *revised estimates* for 1899-1900, and of the *estimate* for 1900-1901, are given below in detail for convenience of comparison:—

	Accounts, 1898-99.	Budget Estimate, 1899-1900.	Revised Estimate, 1899-1900.	Budget Estimate, 1900-1901.
EFFECTIVE.	£	£	£	£
Payments to War Office in respect of British Forces serving in India	764,400	730,000	739,400	700,000
Furlough Allowances and Pay during voyage of British Forces serving in India	107,875	108,000	104,000	108,000
Furlough Allowances of officers of the Indian Service	203,833	230,000	220,000	230,000
Indian Troop Service	276,556	260,600	135,800	250,000
Passage of officers and troops otherwise than in transports	10,997	19,000	17,000	19,000
Miscellaneous	18,816	19,000	38,700	22,000
Stores for India	537,748	629,700	423,800	951,400

III.—Military Works Estimates.

39. Excluding English expenditure and exchange, the budget estimate for 1899-1900 amounted to R1,29,96,000; the revised estimate of expenditure amounted to R1,23,26,000. There has, therefore, been less expenditure in India of R6,70,000 which is due to the transfer of funds to England to meet additional expenditure on English stores, and the transfer of about R80,000 to the military estimates. The lapses on grants for works will be inconsiderable.

40. The budget estimate for 1900-1901, excluding English expenditure and exchange, amounts to R1,15,09,000, or R14,87,000 less than that of 1899-1900. The difference is due to no special grant being allowed for defence works on the North-West Frontier, as it was decided, owing to the great calls for famine expenditure, to reduce the ordinary Military Works grant so as to provide for any expenditure that may be necessary for the completion of frontier works.

41. The heads of the Military Works Estimate are in round figures—

	R
For original works, including those in progress and those to be commenced	43,98,400
„ repairs	33,21,300
„ establishment and tools and plant	29,01,700
„ Barrack Department establishment, supplies and tools and plant	7,71,600

42. Provision amounting to R4,47,000 is made for expenditure on fourteen water-supply projects, R1,95,700 for coast and inland fortifications, R10,00,000 for works on the North-West Frontier, and R3,00,000 for renewals. The remaining provision is for hospitals, barracks, and drainage works, and for Ordnance, Commissariat, Remount, and Marine Department requirements. Excluding renewals, provision is

M

made for 91 new works, of which 52 are in progress and 39 are to be commenced. A sum of R5,33,500 is provided for Minor Works costing less than R2,500 each.

43. The new organisation for the performance of Military Works Services was brought into effect on the 1st October 1899.

IV.—Marine Estimates.

44. During the latter half of the year 44 hired transports have been chartered and fitted up by the Royal Indian Marine on behalf of Her Majesty's Government for the conveyance to South Africa of 8,260 British officers, non-commissioned officers and men, 3,373 natives, 8,318 horses, mules, and ponies, besides field and other guns, ambulance tongas, etc. The arrangements, which imposed a heavy strain on the Dockyard resources of Bombay and Calcutta, were carried through with great promptitude and rendered feasible the expeditious despatch of the Indian contingent. The Government of India have expressed their entire satisfaction with the arrangements made and their acknowledgment of the services rendered by the Royal Indian Marine on this occasion under the supervision of Captain Goodridge, the Director, and of the Deputy Director at Calcutta, Captain Gwyn, whose extended tenure of the post has just expired.

45. A tender of £198,000 has been accepted for the construction in England of a new vessel, the *Hardinge*, to replace the *Warren Hastings* which was wrecked in 1897. It is expected that the new vessel will be delivered in India about January 1901.

46. The vessels of the Royal Indian Marine have been employed on the usual trooping service, but on account of the war in South Africa the Indian troop service transports were withdrawn from the Indian relief service after performing three outward and three homeward voyages. It has therefore been necessary to make special arrangements for sending home invalids, time-expired men, women, and children.

Revised Estimates, 1899-1900.

47. The net total of the Budget Estimate of the Royal Indian Marine for 1899-1900 was R13,70,000, the Revised Estimate stands at R9,22,000, showing a decrease of R4,48,000. This decrease is caused by excess receipts amounting to R2,92,000, and a reduction in expenditure to the extent of R1,56,000.

Comparison—
Revised for 1899-1900
and
Budget for 1899-1900.

48. The excess under receipts is chiefly due to large recoveries from the Home Government in connection with the employment of Royal Indian Marine vessels on Imperial service.

49. The decrease in expenditure is chiefly due to larger deductions on account of stores supplied, and work done in connection with the fitting of transports for South Africa, and to reduced expenditure on repairs and on coal for Her Majesty's ships of war in Indian seas, and on victualling establishments employed afloat.

50. The increase in expenditure is principally due to the payment of heavy arrears of exchange compensation allowance, and other matters.

51. Taking the increase against the decrease, there is a net decrease of R1,56,000, and adding these figures to the increased receipts, R2,92,000, the result is a decrease of R4,48,000 in the Revised as compared with the Budget Estimate.

Estimates, 1900-1901.

52. The net total of the Marine Estimate for 1900-1901 is R14,20,000 against R13,70,000, the total of the budget for 1899-1900, showing an increase of R50,000. This increase is caused by a decrease in receipts, amounting to R32,000, chiefly due to smaller anticipated recoveries in connection with the employment of Royal Indian Marine vessels on Imperial service, and by increased expenditure to the extent of R18,000.

Comparison—
Budget for 1899-1900
and
Estimate for 1900-1901.

CALCUTTA;
The 21st March 1900.

EDWIN H. H. COLLEN, *Major-General.*

APPENDIX III.

Memorandum by the Honourable Sir Arthur Trevor, K.C.S.I.

It has been customary since the establishment, under the Viceroyalty of Lord Elgin, of what is known as the Annual Railway Conference at Simla, for the Public Works Member of Council to append to the Financial statement for the year a memorandum designed to place the public in possession of the results of the Simla Conference so far as they appeared to be of public interest.

2. At the Conference held in August last, however, at which His Excellency Lord Curzon presided, it was determined to make certain changes, the object of which, stated shortly, was to remedy the somewhat formal and bureaucratic character which the deliberations of the Conference had assumed without sacrificing the assistance which a comprehensive annual survey of railway projects was calculated to afford in securing steady and fairly distributed progress in railway construction and avoidance of a policy of drift or caprice.

3. These changes were:—

I.—That for a construction programme limited to triennial periods and starting afresh at the end of each such period should be substituted a continuous programme, subject to annual revision, so as always to include the current and next two following years, and thus to be always two years ahead, the amount to be entered for the third year being arrived at in consultation with the Finance Department.

II.—That a Travelling Commission should be constituted as a tentative measure to conduct public enquiries at places where problems in which local interests are acutely involved may call for decision.

III.—That a catalogue of Railway projects, with summaries of their histories and information collected in connection with them, and of the views of the Government of India as to the manner in which they should be dealt with, should be prepared, kept up to date and published annually for the information of persons interested.

4. With the two first of these changes we are not here immediately concerned. The effect given to the last, in the issue of a compilation, entitled "Histories of Railway Projects", brought up to the date of the last Conference and now in the hands of the public, has superseded the necessity for a statement of the nature which has hitherto been customary. This compilation furnishes information in regard to all projects which have not been either (1) finally rejected or (2) included in the Railway programme for the years 1900-1901 to 1902-1903, and it is only in regard to the details of the Railway programme, and the modifications it has undergone, that the general information given under the appropriate heads of the General Financial statement still needs to be supplemented.

5. The programme in its latest shape is given in Statement A appended to this memorandum, and shows the demands for which place has been found in the three years ending 1902-1903 on the basis of an estimated expenditure of R7,30,84,000 in 1900-1901 and of a minimum of 6¾ crores in each of the next two years.

There are three projects noted on the margin which were included in the original programme, but which it has since been found necessary to strike out under pressure of the unprecedented demands on the Government balances arising from the famine, and consequent difficulties attending the provision of ways and means for anything more than the obligatory needs of open lines and works in progress.

Godra-Baroda Chord.
Dhulia-Amalner.
Condia-Jabalpur.

A fourth line, the Sakri-Jainagar branch of the Tirhoot State railway, has been omitted for the same reason. But proposals have been made for the financing of this line by the Bengal and North-Western Railway Board, which will, it is hoped, admit of its being constructed with no great delay independently of the programme.

If the Financial position improves, it may be found possible to supplement the minimum allotments of 6½ crores on which the programme for 1901-1902 and 1902 1903 has been provisionally based, and to apply the additional funds thus provided either to the acceleration of progress on the lines under construction or to the restoration of some or all of the new projects which have been struck out to a place in the programme, and to their commencement during 1902-1903, if not earlier.

6. The usual summary of Railway Progress will be found this year in Statement B, and in Statement C is given a list of railways on which earthwork has been commenced for Famine Relief purposes.

7. The capital expenditure on railways falling within the categories now included in the programme for the ten years from 1891-92 to 1900-1901 is shown below:—

Lakhs of rupees.

	1891-92.	1892-93.	1893-94.	1894-95.	1895-96.	1896-97.	1897-98.	1898-99.	Revised Estimate, 1899-1900	Budget Estimate, 1900-1901.
Capital expenditure on open lines.	185	108	120	184	167	240	179	221	359	266
On construction of new lines .	262	472	392	390	421	654	691	661	569	464
TOTAL .	447	580	512	574	588	894	870	882	928	730
Miles opened or to be opened during the year.	456	390	346	346	575	657	186	1,059	468	673

8. The earnings of railways during the current official year have been exceptionally favourable, and it is anticipated that the total earnings will exceed the estimate framed at the beginning of the year by about R1,24,00,000. This improvement is the result of a large traffic in grain owing to the famine, of a substantial addition to the open mileage, of the movement of troops in connection with the war in South Africa, and of a brisk coal trade. Of the railways which contribute to the increase, the East Indian Railway stands first with the large increase of R60,00,000, while the Rajputana-Malwa, Bengal-Nagpur, Oudh and Rohilkhand, Indian Midland and Bombay, Baroda and Central India railways shew increases of R40,00,000, R16,00,000, R12,00,000, R11,50,000 and R9,00,000, respectively, and certain other lines small increases which aggregate about R26,50,000. This improvement has been reduced to the extent of about R51,50,000, owing principally to a decline of R29,50,000 in the earnings of the Great Indian Peninsula railway, which is attributed to the failure of the cotton and grain crops, and of R13,00,000 on the North Western railway owing to a falling off in military traffic and a smaller export of grain to England. It is anticipated that the earnings this year are likely to exceed those of last year by nearly two crores of rupees.

9. There is one other point to which it may be useful to draw attention. The loss on the direct Railway Account, that is the amount by which the net earnings fall short of the interest charges which have to be met, including strategic railways and loss arising from the special exchange provisions of the older Railway Contracts, has been reduced from 2 crores 66 lakhs in 1896-97 to 1 crore 43 lakhs in 1897-98, 93 lakhs in 1898-99 and 74 lakhs, according to the Budget, and 1¼ lakhs according to the revised estimate for the year now closing. The improvement in the Revised as compared with the Budget figures for the year is, of course, due to some extent to causes which are abnormal, and it is probable that some of the ground which has apparently been gained may be lost in the coming year, the estimates for which show a deficit of nearly 73 lakhs. But the figures given show a diminishing tendency in the yearly deficit, which is at least encouraging.

CALCUTTA;
The 21st March 1900.

A. C. TREVOR.

STATEMENT A.

STATEMENT

OF

FORECAST OF CAPITAL EXPENDITURE ON RAILWAYS, 1900-1901 TO 1902-1903,

INCLUDING ALL OPEN LINES,

All lines under, or accepted for immediate construction, and branch lines under firm guarantee.

Branch lines under Rebate terms are excluded.

STATEMENT B.

Memorandum on the construction of railways.

1. At the commencement of 1899-1900, *i.e.*, on the 1st April 1899, the total length of railways open for traffic was 22,499·05 miles, made up as follows:—

		Miles.	Miles.
(i)	East Indian	1,712·25	4,190·83
	Bengal Central (*a*)	125·01	
	Bengal-Nágpur	1,184·41	
	Indian Midland	795·56	
	Bhopal-Itársi (*British section*)	(*b*) 13·11	
	Godhra-Rutlam-Nágdá	(*c*) 141·14	
	Wardha Coal	(*d*) 44·88	
	Dhond-Manmád	(*d*) 145·44	
	Bezwada extension (East Coast State)	(*e*) 20·58	
	Madras-Ennúr section (Bezwada-Madras)	(*f*) 8·15	
(ii)	North Western	(*g*) 2,817·61	4,893·54
	Hyderabad-Shadipalli	(*h*) 58·91	
	Oudh and Rohilkhand	950·76	
	Eastern Bengal	262·98	
	Calcutta Port Commissioners'	8·53	
	East Coast, including Bezwada-Madras	(*i*) 794·72	
(iii)	Great Indian Peninsula	1,288·00	2,588·13
	Bombay, Baroda and Central India	460·90	
	Madras	839·23	
(iv)	Delhi-Umballa-Kalka	(*j*) 162·23	643·55
	Tarkessur	(*j*) 22·23	
	Southern Punjab (*Delhi-Samásata*)	(*h*) 423·18	
	Tápti Valley	(*c*) 35·91	
(v)	Khamgaon	(*d*) 7·55	630·33
	Amraoti	(*d*) 5·44	
	Bina-Goona	(*b*) 71·74	
	Bhopal-Ujjain	(*b*) 113·52	
	Bhopal-Itarsi (*Native state section*)	(*b*) 41·28	
	The Nizám's Guaranteed State	(*k*) 330·13	
	Nagdá-Ujjain	(*c*) 34·32	
	The Gaekwar's Petlád	(*c*) 13·35	
	Kolar Gold-fields	(*f*) 10·00	
(vi)	Rajpurá-Bhátinda	(*h*) 107·94	123·86
	Jammu and Kashmir (*Native state section*)	(*h*) 15·92	
(vii)	Bengal and North-Western—		6,887·30
	Tirhoot section	341·80	
	Company's section (*l*)	743·18	
	Lucknow-Bareilly section (Rohilkund and Kumaon)	231·17	
	Rajputana-Malwa	(*c*) 1,673·93	
	Palanpur-Deesa	(*c*) 17·28	
	Southern Mahratta	1,042·04	
	Guntakal-Mysore frontier	(*m*) 119·50	
	Mysore section (Southern Mahratta)	296·00	
	South Indian	1,017·88	
	Máyavaram-Mutupet	(*n*) 53·99	
	Assam-Bengal	414·45	
	Burma	936·08	
(viii)	Eastern Bengal—		648·99
	Northern and Behar sections (*including the Kaunia-Dharlla, 2′ 6″ gauge, branch*)	478·47	
	Dacca section	85·92	
	Cawnpore-Burhwal (*Metre gauge link*)	(*t*) 79·60	
(ix)	Deoghur	4·79	285·86
	Rohilkund and Kumaon (*Company's section*)	53·92	
	Bengal Dooars	36·40	
	Dibru-Sadiya	77·50	
	Ledo and Tikak-Margherita Colliery	(*o*) 7·50	
	Ahmedabad-Parántij	(*c*) 54·59	
	Mymensingh-Jamalpur-Jagannathganj	(*s*) 33·07	
	Segowlie-Raxaul	(*u*) 18·09	
(x)	The Gaekwar's Mehsana	(*c*) 92·63	188·30
	Kolhapur	(*m*) 29·07	
	Yesvantpur-Mysore frontier	(*m*) 51·35	
	Mysore-Nanjangud	(*m*) 15·25	
(xi)	Jodhpur-Bikaner	406·00	922·04
	Udaipur-Chitor	60·86	
	Bhávnagar-Gondal-Junágad-Porbandar	(*p*) 333·84	
	Jetalsar-Rájkot	(*q*) 46·23	
	Jàmnagar	(*q*) & (*r*) 54·28	
	Dhrángadrá	(*q*) 20·83	
(xii)	West of India Portuguese	51·00	73·25
	Pondicherry	(*n*) 7·80	
	Káraikkal-Peralam	(*n*) 14·45	
(xiii)	Cherra-Companyganj (2′ 6″)	8·00	36·50
	Jorhát (2′ 0″)	28·50	
(xiv)	Darjeeling-Himalayan (2′ 0″)	51·00	172·21
	Bársi Light (2′ 6″)	21·75	
	Tárakeshwar-Magra (2′ 6″)	31·12	
	Tezpur-Balipara (2′ 6″)	20·10	
	Howra-Amta (2′ 0″)	28·62	
	Howrah-Sheakhalla (2′ 0″)	19·62	
(xv)	The Gaekwar's Dabhoi (2′ 6″)	(*c*) 78·80	102·78
	Rajpipla (2′ 6″)	(*c*) 23·98	
(xvi)	Cooch Behar (3′ 6″)		(*s*) 22·22
(xvii)	Morvi (2′ 6″)		94·36

	Miles.	Miles.
Standard gauge—		
(i) State lines worked by companies	4,190·83	
(ii) State lines worked by the State	4,893·54	
(iii) Guaranteed companies	2,588·13	
(iv) Assisted companies	643·55	
(v) Lines owned by native states and worked by companies	630·33	
(vi) Lines owned by native states and worked by State railway agency	123·86	
		13,070·24
Metre gauge—		
(vii) State lines worked by companies	6,887·30	
(viii) State lines worked by the State	648·99	
(ix) Assisted companies	285·86	
(x) Lines owned by native states and worked by companies	188·30	
(xi) Lines owned and worked by native states	922·04	
(xii) Foreign lines	73·25	
		9,000·74
Special gauges—		
(xiii) State lines worked by the State	36·50	
(xiv) Assisted companies	172·21	
(xv) Lines owned by native states and worked by companies	102·78	
(xvi) Lines owned by native states and worked by State railway agency	22·22	
(xvii) Lines owned and worked by native states	94·36	
		428·07
TOTAL		22,499·05

(*a*) Although for convenience, classed amongst State railways, this line is the property of the Bengal Central Railway Company.
(*b*) Worked by the Indian Midland Railway Company.
(*c*) Worked by the Bombay, Baroda and Central India Railway Company.
(*d*) Worked by the Great Indian Peninsula Railway Company.
(*e*) Although forming an integral part of the East Coast State Railway, this line is shown separately as it is worked by the Nizam's Guaranteed State Railways Company.
(*f*) Worked by the Madras Railway Company.
(*g*) Including 6·12 miles of military line not used for public traffic, the Mushkaf-Bolán railway and the Kotri-Rohri chord line.
(*h*) Worked by the North-Western State Railway.
(*i*) Excluding the Bezwada extension, *vide* foot-note (*e*), but including 2·66 miles mixed-gauge and 0·33 mile metre-gauge.
(*k*) Including 2·19 miles, Trimulgherry troop siding, constructed but not used for ordinary public traffic.
(*l*) Although for convenience classed amongst State railways, this line is the property of the Bengal and North-Western Railway Company.
(*m*) Worked by the Southern Mahratta Railway Company.
(*n*) Worked by the South Indian Railway Company.
(*o*) Worked by the Assam Railways and Trading Company.
(*p*) Including 4·60 miles of Bhavnagar Dock estates and Junagad quarry lines.
(*q*) Worked by the Bhávnagar-Gondal-Junágad-Porbandar railway.
(*r*) Including 3·99 miles of Bedi-Bandar Dock estate sidings.
(*s*) Worked by the Eastern Bengal State Railway.
(*t*) Excluding 3·66 miles of the Lucknow-Bareilly railway between Daliganj and Aishbagh, but including the length, Bara Banki to Burhwal, 16·70 miles, and the length over Cawnpore bridge 0·59 miles laid on mixed gauge.
(*u*) Worked by the Bengal and North-Western Railway Company.

2. And, the mileage under construction or sanctioned for construction on the same date was 3,568·22 miles(*d*), as follows:—

		Miles.	Miles.
Standard gauge—			
(i)	State lines worked by companies	435·31

(*a*) Commencement of work not yet authorized.
(*b*) The length between Basal (New Pind-Sultáni) and Jand, 16 miles, is a part of the open mileage of the Khusálgarh branch.
(*c*) The mileage given is exclusive of 55·08 miles of the existing Hyderabad-Shadipalli, standard gauge, railway to be converted to the metre gauge.
(*d*) Excluding the Bhátinda-Ferozepore conversion (54·59 miles).
(*e*) Excluding 8·00 miles of His Highness the Maharajah Scindia's private line.

3. During 1899-1900, *i.e.*, from 1st April 1899 to 31st March 1900, 710·91 miles of new railway have been authorized as follows:—

	Miles.	Miles.
Standard gauge—		
(i) State lines worked by companies . .	128·63	
(ii) State lines worked by the State	10·00	
(iii) Lines owned by native states and worked by companies	20·78	
		159·41
Metre gauge—		
(iv) State lines worked by companies . . .	355·47	
(v) State lines worked by the State . . .	38·88	
(vi) Lines owned by native states and worked by companies	29·60	
(vii) Lines owned and worked by native states . .	88·00	
		511·90
Special gauges—		
(viii) State lines worked by the State . . .	39·60	
		39·60
TOTAL . . .		710·91

And 1,275·22 miles have been or are likely to be opened to public traffic as follows:—

	Miles.	Miles.
Standard gauge—		
(ix) State lines worked by companies . . .	131·23	
(x) State lines worked by the State . . .	131·95	
(xi) Guaranteed companies .	38·39	
(xii) Assisted companies .	231·22	
(xiii) Lines owned by native states and worked by companies	73·63	
		606·42
Metre gauge—		
(xiv) State lines worked by companies . . .	146·19	
(xv) Assisted companies . .	63·24	
(xvi) Lines owned by native states and worked by companies	192·52	
(xvii) Lines owned and worked by native states . .	75·94	
		477·89
Special gauges—		
(xviii) State lines worked by the State	20·08	
(xix) Assisted companies . .	20·20	
(xx) Lines owned by native states and worked by companies . . .	138·63	
(xxi) Lines owned by native states and worked by State railway agency	12·00	
		190·91

(a) Although for convenience classed amongst State railways, this line is the property of the Bengal Central Railway Company.
(b) Worked by the Indian Midland Railway Company.
(c) Worked by the Bombay, Baroda and Central India Railway Company.
(d) Worked by the Great Indian Peninsula Railway Company.
(e) Although forming an integral part of the East Coast State railway, this line is shown separately as it is worked by H. H. the Nizam's Guaranteed State Railways Company.
(f) Worked by the Madras Railway Company.
(g) Including 6·12 miles of military line not used for public traffic.
(h) Worked by the North Western State railway.
(i) Excluding the Bezwada extension, *vide* foot-note (e), but including 2·66 miles mixed gauge and 0·33 miles metre gauge. Includes also Madras-Ennur section from 1st July 1899.
(j) Worked by the East Indian Railway Company.
(k) Including 2·19 miles, Trimulgherry troop siding, constructed but not used for ordinary public traffic.
(l) Although for convenience classed amongst State railways, this line is the property of the Bengal and North-Western Railway Company.
(m) Worked by the Southern Mahratta Railway Company.
(n) Worked by the South Indian Railway Company.
(o) Worked by the Assam Railways and Trading Company.
(p) Including 4·60 miles of Bhavnagar Dock estates and Junágad quarry lines.
(q) Worked by the Bhávnagar-Gondal-Junágad-Porbandar railway.
(r) Including 3·99 miles of Bedi Bandar Dock estate siding.
(s) Worked by the Eastern Bengal State railway.
(t) Excluding 3·66 miles of the Lucknow-Bareilly railway between Daliganj and Aishbagh but including the length, Bara Banki to Burhwal, 16·70 miles, and the length over Cawnpore bridge, 0·59 miles, laid on a mixed gauge.
(u) Worked by the Bengal and North-Western Railway Company.
(v) Including 27·88 miles of standard gauge line between Ferozepore and Kot Kapura and 26·71 miles of both standard and metre gauges between Kot Kapura and Bhatinda, worked over by the North Western State railway.
(w) Worked by the Oudh and Rohilkhand State railway.
(x) Worked by H. H. the Nizam's Guaranteed State Railways Company.

* Correction of mileage.

† Made up as follows:

Open at the commencement of 1899-1900	22,499·05
Add—Opened during 1899-1900	1,275·22
Add—Certain sidings of the South Indian railway opened for traffic during 1898-99 and 1899-1900	8·16

		26,781·94

6. It is expected that the following lengths of unfinished line will be opened for public traffic in 1900-1901 :—

	Miles.	Miles.
Standard gauge—		
(i) State lines worked by companies	131·34	
(ii) State lines worked by the State . . .	159·40	
(iii) Guaranteed companies .	37·31	
(iv) Assisted companies .	0·79	
(v) Lines owned by native states and worked by companies . . .	20·78	
(vi) Lines owned by native states and worked by State railway agency .	80·32	
		429·94
Metre gauge—		
(vii) State lines worked by companies . . .	175·25	
(viii) State lines worked by the State . .	73·93	
(ix) Assisted companies . .	111·09	
(x) Lines owned by native states and worked by companies . . .	230·28	
(xi) Lines owned and worked by native states . .	147·00	
		737·55
Special gauges—		
(xii) State lines worked by companies . . .	55·73	
(xiii) State lines worked by the State	39·60	
		95·33
TOTAL .		1,262·82

Leaving the undermentioned lines for completion in 1901-1902 or later:

	Miles.	Miles.
Standard gauge—		
(xiv) State lines worked by companies . . .	301·37	
(xv) State lines worked by the State . . .	10·00	
(xvi) Guaranteed companies .	59·71	
		371·08
Metre gauge—		
(xvii) State lines worked by companies . .	903·09	
(xviii) State lines worked by the State . . .	38·83	
(xix) Assisted companies .	45·66	
(xx) Lines owned by native states and worked by companies . .	167·45	
(xxi) Lines owned and worked by native states .	88·00	
		1,243·03
Special gauges—		
(xxii) Assisted companies .	93·00	
(xxiii) Lines owned by native states and worked by companies . .	31·81	
		124·81
TOTAL .		1,738·92

		Miles.	Miles.	Miles.
(i)	**East Indian—**			
	Barun to Daltonganj . . .	78·32		
	Sitarampore to Domohani . .	8·32

(a) Commencement of work not yet authorized.

STATEMENT C.

List of Railway Projects started as Famine Relief Works.

Name of project.	Length.	Cost.	REMARKS.
	Miles.	Rs.	
BOMBAY PRESIDENCY.			
1. Sabarmati-Dholka (metre gauge)	33·46	13,07,966	
2. Gaekwar's Mehsana Railway Kheralu-Dhabora extension (metre gauge)	8	...	
3. Godhra-Baroda Chord and doubling (5' 6" gauge)	44	34,12,000	
4. Visnagar-Vijapur (metre gauge)	16	...	
5. Nadiad-Kapadvanj (5' 6" gauge)	28	8,73,360	
6. Viramgam (or Patan)—Radhanpur, Sami-Radhanpur section (metre gauge)	16	...	
7. Velachha-Kankarar-Kosamba	...	...	
8. Barsi Light Railway, Barsi Tadwala extension (2' 6" gauge)	28	11,09,350	
9. Jamnagar-Salaya	...	...	
10. Bahadarpur-Songhir (2' 6" gauge)	...	...	
11. Dholia-Vankaner-Rajkot (metre gauge)	52·76*	...	* Conversion of existing 2' 6" gauge railway to metre gauge by Thakur Sahib of Morvi.
12. Petlad-Cambay (5' 6" gauge)	20·78	11,07,200	Since undertaken as a Railway Project.
CENTRAL INDIA.			
13. Gwalior-Sabalgarh (2' 0" gauge)	48	...	
NORTH-WESTERN PROVINCES AND OUDH.			
14. Agra-Delhi Chord (5' 6" gauge)	121·16	90,76,346	Partly in Punjab.
15. Meerut-Gurmuktesar (5' 6" gauge)	29	17,61,000	
PUNJAB.			
16. Ludhiana-Dhuri-Jhakal (5' 6" gauge)	80	38,82,764	Since undertaken as a Railway Project.
17. Suratgarh-Bhatinda section (Bikanir-Bhatinda Railway) (metre gauge)	88	19,12,800	
18. Rewari-Phalera Chord (metre gauge)	131·17	51,18,277	
19. Madhopur-Sikar branch	32	...	
20. Jech-Bar (5' 6" gauge)	...	...	
CENTRAL PROVINCES.			
21. Jabalpur-Gondia (2' 6" gauge)	252·67	85,10,901	
22. Vizianagram-Raipur (5' 6" gauge)	310·62	2,50,42,336	Partly in Madras Presidency.
23. Bilaspur-Mungeli	...	...	
AJMER-MERWARA.			
24. Nasirabad-Kekri (metre gauge)	9	9,00,000	
25. Bara-Ajmer-Marwar (metre gauge)	213	1,33,00,533	From Bara *viâ* Shahpura to Marwar.
BERAR.			
26. Akola-Basim-Khandwa (metre gauge)	150	1,00,00,000	Approximate cost.
27. Jalna-Khamgaon (2' 6" gauge)	77	...	

NOTE.—Where length and cost are not given the information is not available at present but surveys are being made.

COMMERCIAL AND

TABLE I.—MIS

	1891-92.	1892-93.	1893-94.

Finance and Commerce Department
March 20, 1900.

J. F. FINLAY,
Secretary to the Government of India.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Weather Review of India for the week ending at 8 a.m. on Saturday, March 10th, 1900.

A marked change has been observable in the weather conditions during the past week. The depression in North-West India at the close of the previous week and which advanced eastward and filled up during the first half of the week, under review, has been the last of the series of depressions which have been advancing eastwards from Persia so frequently during the latter part of the winter. Hot weather conditions have been established over the whole country and have been unusually strongly marked in the Peninsula where day temperatures were largely above the normal, (the highest being one of 108°·8 reported by Cuddapah on Tuesday), have been recorded during the week. Pressure was in defect on the first two days of the week in the area of the depression as it drifted across Northern India, but after the depression had filled up pressure increased and was in general excess during the remainder of the week. Anticyclonic conditions were fairly well marked in North-West India where the excess of pressure was largest, westerly winds have prevailed in the Gangetic plain and very low humidity percentages have been reported from North-West and Central India. With the exception of light snow in North Kashmir at the commencement of the week, precipitation has been confined to scattered showers given by thunderstorms and nor'westers in the Eastern Upper India hill districts, Assam, Bengal and Orissa. Hail accompanied thunderstorms at Balasore and Jessore on Wednesday.

Daily Summary.—*Sunday, March 4th.*—Pressure had risen slightly to rapidly in North-West and Central India, and the depression in North-West India had continued to fill up and was lying close to the hills in the North-Western Provinces. Another shallow low pressure area was shown over Ganjam, Orissa and part of Bengal. Light snow had fallen in North Kashmir, and thunderstorms had given showers in the Upper India hill districts, Assam and East Bengal. Mean temperature was in general excess except in Assam where it was in slight defect, and Gujarat, Berar, the West Coast and the Bombay Deccan where it was normal.

Monday, March 5th.—Pressure had risen briskly in Baluchistan, Sind, the North-Western Provinces, Chota Nagpur, Lower Bengal, Orissa and Ganjam. Light snow had fallen at Minimarg and light showers of rain in Assam. Temperature had risen rapidly in Assam and had fallen briskly to rapidly in Chota Nagpur, the North-Western Provinces, Rajputana, Gujarat and Central India. Mean temperature was in excess except in Gujarat, Berar and the West Coast where it was normal or in defect. The excess was from 5° to 5½° in Mysore, the North-Western Provinces and Orissa.

Tuesday, March 6th.—A general rise of pressure had taken place over the whole Indian region, the rise being rapid in the Punjab, Rajputana and the North-Western Provinces. A shallow depression was shown over the eastern districts of the Central Provinces where pressure was normal, but pressure was in excess elsewhere, the excess being considerable to large in Baluchistan, North-West India and Upper Burma. Practically no rain had fallen. Temperature had fallen briskly to rapidly in Sind, the Punjab and the North-Western Provinces and had risen rapidly in Berar and the Madras Deccan. Mean temperature was in moderate defect in Gujarat and normal in Assam, the

Punjab and the West Coast. The largest excess in the remaining provinces occurred in the Madras Deccan (8°), Chota Nagpur (6°) and Mysore (5½°).

Wednesday, March 7th.—The barometer had been steady or had risen slightly in the Central Provinces, Chota Nagpur and the adjacent districts of Central India and the North-Western Provinces and had fallen elsewhere. The shallow depression in the Central Provinces had filled up. Thunderstorms with hail were reported from Balasore and Jessore. Mean temperature continued in general excess, except in the North-Western Provinces, the Punjab, Central India and the West Coast where it was normal. The excess was most strongly marked in the Deccan, the south and east of the Central Provinces, Orissa, Chota Nagpur, Lower Bengal and Sind.

Thursday, March 8th.—Pressure had been steady or had changed by only small amounts, except in the Punjab and the south of the Peninsula where it had fallen slightly to briskly. A shallow low pressure area lay over the Deccan. Thunder-showers had been received at False Point, Cuttack and Gopalpore. Temperature had fallen briskly to rapidly in the North-Western and Central Provinces, Chota Nagpur, Bihar, Orissa, Bengal, Assam and Berar, and with the exception of Sind mean temperature was now normal or in defect over the whole of Northern India and also on the West Coast. It was 4° in excess in Sind and 7° in the Madras Deccan.

Friday, March 9th.—Pressure had risen slightly to briskly in North-East India and Upper Burma and had fallen slightly over the greater part of North-West and Central India. The shallow low pressure area was still shown over the Deccan but slightly to the westward of its position on Thursday. Practically no rain was reported. Mean temperature was in slight to considerable excess in the Punjab, Sind and Gujarat and was normal or in defect over the remainder of Northern India. It was in slight defect in the Central Provinces and in excess generally in the Peninsula, the largest excess occurring in the Madras Deccan.

Saturday, March 10th.—Pressure had changed irregularly in North-East India, had risen slightly to briskly in Gujarat, the West Coast, South India and Burma and briskly to rapidly elsewhere. Temperature had fallen rapidly in the Madras Deccan and South India and had risen generally over nearly the whole of Northern India. Mean temperature was from 2° to 3½° below the normal in Assam, Bengal and Bihar and from 3° to 5° above the normal in the Punjab, Sind, Gujarat, Berar and the Deccan. The only rain reported was a fall of three quarters of an inch at Mergui.

Temperature.—In North-East and Central India temperature has decreased during the week. In North-West India it also decreased during the first half but increased again during the latter half of the week. In the Peninsula it has been fairly stationary showing a steady excess over the normal but falling in most provinces at the close of the week. Day temperatures have exceeded 100° in several parts of the country, but the highest temperatures have been registered in Madras. The following gives the highest maximum temperature reported on each day of the week :—

Day	Temperature		Station
Sunday	107°·2	at	Cuddapah.
Monday	108°·3	„	Ditto.
Tuesday	108°·8	„	Ditto.
Wednesday	107°·3	„	Ditto.
Thursday	107°·3	„	Ditto.
Friday	105°·2	„	Ditto.
Saturday	103°·7	„	Surat.

The mean temperature of the week has been practically normal in Assam, Bihar, Gujarat, Central India and the West Coast and in excess in the remaining provinces. The excess averaged 5°·7 in the Madras Deccan, 4°·2 in Mysore, 3°·3 in South India, 3°·1 in Chota Nagpur and 3° in Orissa and Sind.

The following table gives mean temperature variation data of the week :—

Province.	Variation from normal of mean temperature of 24 hours preceding 8 A.M. of							Mean variation of week.

Mean for whole of India .	+3·1	+2·7	+2·9	+2·4	+1·4	+0·7	+1·2	+2·1

The mean temperature for the whole of India has been in excess on all days of the week except on the 9th when it was practically normal. For the whole week the variation from the normal was + 2°·1.

Rain.—A new rainfall period commences with this week. Showers due to nor'westers and thunderstorms have been received in Assam, Eastern and Deltaic Bengal, Orissa, the West-submontane and hills divisions of the North-Western Provinces, the hills, North and West divisions of the Punjab and the North and South divisions of the East Coast. The amounts received have been small, the Surma Valley being the only division in which the average rainfall has exceeded an inch, and have been equal to or in excess of the normal quantity in only the Surma Valley, Orissa and the North division of the East Coast.

The largest amounts received at individual stations during the week are :—

Assam (Surma)—	Karimganj (Sylhet)	2·55 inches.
Ditto	Hailakandi (Cachar)	2·35 "
Ditto	Silchar	2·14 "

W. A. BION,
for *Meteorological Reporter to the Government of India.*

SIMLA, *15th March 1900.*

T. W. HOLDERNESS,
Secretary to the Government of India.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Weekly Report on the state of the Season and Prospects of the Crops.

Madras.—*For week ending 17th March.*—A few scattered showers of rain fell in the extreme north and south of the Presidency but no rain fell elsewhere. The water supply under large works and in wells in many parts is lower than usual and is scanty for drinking purposes. There is very little field work going on in parts of Nellore and the Deccan except on irrigated land; harvests are almost over and the standing crop is mostly confined to irrigated areas where they are generally fair. The crops harvested are yielding indifferently; pasturage has almost dried up, but fodder of fair description is generally available for cattle. Prices are again slightly dearer except in the Circars, the Karnatak and on the west coast where they are stationary. Prices:—*Cholam*; Deccan, 11·3 to 12·6; Kistna, 14·2. *Ragi*; Deccan, 13·1 to 14·7 seers per rupee. In most of the affected taluks of Cuddapah, *Cholam* is 12·6 and *Ragi* 13·5 seers the rupee. Test works have been opened in the Anantapur district; test workers:—Deccan, 798 men, 1,515 women, 466 children and 361 unspecified and 227 in the Kistna District. There is a considerable decrease in the Kurnool District. Total, on works 3,367 besides estimated number 1,970 men and 1,570 women on weaver relief in the Cuddapah district.

Bombay.—*For week ending 19th March.*—Slight rain fell during the the week in parts of the Poona, Sholapur, Satara, Belgaum, Bijapur and Ratnagiri districts. The standing spring crops are in good condition in the Konkan and three districts of Sindh and in irrigated land in Baroda, Gujarat and the Deccan. Spring crops have been damaged by frost in parts of two districts of Sindh and have withered in places elsewhere. The reaping of remnants of spring crops has been completed in Sholapur, Satara and Belgaum and is progressing in the Konkan and other districts of the Karnatak, in three districts of Sindh, four of Gujarat, and four of the Deccan. Fodder supply is scanty in Broach and Dharwar and in parts of Sindh and the Deccan. Cattle are suffering severely owing to scarcity of fodder in Rajkot and Baroda, and in three districts of Gujarat and in parts of four districts of the Deccan. Prices have fallen in two districts, have risen in eight, and are stationary elsewhere.

Daily average numbers on relief for week ending 17th instant. British districts—On test works, 6,508; on relief works, 907,870; dependants, 246,762; total on works, 1,161,140. In poor houses, 22,396; on village relief, 66,367; total on gratuitous relief, 88,763. Native States—On relief works, 354,720; dependants, 61,672; total on works, 416,392; in poor-houses, 29,831; on village relief, 7,994; total on gratuitous relief, 37,825; grand total, 1,704,120.

Bengal.—*For week ending 19th March.*—There were slight local showers during the week in Midnapore, Howrah, Jessore, Jalpaiguri, Darjeeling, Pabna, Mymensingh, Faridpur, and Puri. The spring crops are being harvested. The collection of opium continues. Sugarcane is still being pressed, and the planting of fresh sugarcane has begun. Spring rice is doing well. Lands are being cultivated for autumn rice and jute. The *mahua* crop in Chota Nagpur and in Bhagalpur and the Sonthal Parganas is promising. The price of rice is reported to have risen in six districts and fallen in four; it is practically stationary in the rest. Fodder is generally sufficient, except in the Diamond Harbour sub-division of the 24-Parganas. Scarcity of water is reported from Angul and Singbhum and the Chuadanga sub-division of Nadia. Test works are in progress in Puri and Ranchi.

North-Western Provinces and Oudh.—*For week ending 21st March.*—Slight rain fell in Meerut, but none elsewhere. The harvesting of spring crops is well advanced and threshing is also in progress. Extra spring crops and sugarcane are still being sown and irrigated in Almora, Kheri and Bahraich. Lands are being prepared for autumn crops in Bijnor. The standing spring crops in unirrigated tracts are suffering from want of moisture. The collection of opium is going on and is nearing completion in Ballia and Basti;

the yield is reported to be good in Budaun and fair in Hardoi and Partabgarh. Fodder is dear in four districts; but elsewhere supplies and fodder are adequate. Prices have fallen in 18 districts, risen in six and are stationary in other districts. There were 2,410 persons on four relief works and 234 persons on gratuitous relief in the Jhansi district. The number of persons receiving relief in poor-houses was—Jhansi, 100; Mahroni, 48; Muttra, 212; and Agra 23 (of whom seven were immigrants).

Punjab.—*For week ending 21st March.*—A slight fall of rain is reported from Hissar, Rohtak, Lahore, Amritsar, Gujrat, Shahpur, Rawalpindi, Peshawar, Bannu and Dera Ismail Khan. Sowings of sugarcane, cotton and extra spring crops on irrigated areas are in progress in Rohtak, Gurgaon, Amballa, Jullundur, Ferozepore, Lahore, Amritsar, Sialkot, Gujrat aud Dera Ismail Khan. Ploughing and manuring of lands are in progress in Amballa for the autumn crops. Wheat and barley crops are being cut in Gurgaon, and those sown late are being irrigated. Prospects of the standing irrigated crops are said to be average to good in almost all the districts and those of unirrigated crops are either bad or far below average. Crops have suffered in parts of Rohtak where wells are brackish and in Gurgaon from want of rain, high winds, low water-supply and feebleness of the bullocks. The late sown unirrigated crops throughout the province urgently need abundant rain. The water-supply in the Kalapani stream of Dera Ismail Khan and that of wells in the Jullundur district is running short. Rape, gram and barley crops are being damaged by caterpillars in parts of Ferozepore. Cattle are reported to be in good condition in Amritsar and Peshawar, fair in Karnal, and lean and poor elsewhere. Fodder is said to be scarce in all districts, and this scarcity is keenly felt in the province, especially in the unirrigated tracts; green fodder is procurable in many districts, but not in sufficient quantity, and its price is high. Prices of wheat have risen in Hissar, Jullundur and Peshawar; have fallen in Gurgaon, Karnal, Sialkot, and Bannu, and are unchanged elsewhere. The price of gram has risen in Hissar and Gurgaon, and fallen in the districts of Ferozepore, Sialkot, Shahpur, and Dera Ismail Khan; they are unchanged elsewhere. The price of maize has risen in five and fallen in three districts, and is unchanged elsewhere; the prices of other good staples have either fallen or remain unchanged. Wheat is selling from 10¼ to 13¾; gram, 11½ to 14½; barley, 13 to 15; maize, 11 to 14½; bulrush millet, 8¾ to 12; great millet, 8¾ to 13; and rice from 9 to 10 seers per rupee. Numbers on Relief works—British districts—Relief workers, 135,648 against 135,081; dependants, 53,015 against 52,122; test workers, 15,276 against 28,108. In poor-houses—4,556 against 4,628; otherwise relieved, 21,676 against 21,647. Native States—Relief workers, 3,549 against 3,590; gratuitously relieved 3,820 against 3,862. No report has been received from Ferozepore.

Burma.—*For week ending 17th March.*—Lower Burma—Harvesting operations and outturn of crops continue as reported last week. Upper Burma—Harvesting of wet weather paddy has been completed every where; plucking of cotton is nearly finished in Thayetmyo. Prospects of dry weather paddy are good. *Taunggya* cultivation is in progress in Kyaukse. Early sesamum and early wet weather paddy nurseries are being sown. Insects still continue their ravages in the Madaya and Amarapura townships of the Mandalay district; but prospects are generally good. The price of paddy has risen slightly in Akyab and Yamethin and fallen slightly in Mandalay and Rangoon and considerably in Toungoo.

Central Provinces.—*For week ending 17th March.*—The weather is generally clear; days hot, but nights and mornings cool. Harvesting of spring crops is approaching completion in most districts; threshing and winnowing are in progress. Preparation of land for autumn sowings continues in parts of Nimar, Mandla, Nagpur, Wardha and Chanda. Water-supply and fodder are generally inadequate. Prices are steady in Betul, Chhindwara, Bhandara and Balaghat, but have slightly risen in Saugor, Damoh, Jubbulpore, Mandla, Nimar and Chanda. There are local fluctuations elsewhere; the cheapest prices are:—wheat, 11¾; gram, 14; rice, 12 and juar, 11 seers per rupee. The dearest prices are:—wheat, 7½; gram, 9½; rice, 9 and juar 9 seers per rupee. The numbers on famine relief have decreased in eight districts owing to the *Holi* festival, the decline occurring mainly in Chanda and Balaghat. There are 162 Public Works Department relief camps now open. The numbers on relief at

the end of the week were as follows :—Relief workers, Public Works Department, adults, 515,564; children, 88,566; village works, 328,377; grass cutting works, 18,133; weaver relief, 25,536; total 976,176. On gratuitous relief :—Dependants —adults, 5,402; children, 106,719; in poor-houses—adults, 449; children, 128. Kitchens—adults, 28,142; children, 199,662. Otherwise relieved—adults, 90,250; children, 18,338; total on gratuitous relief, 449,090. Total on all forms of relief, 1,425,266. Feudatory States :—Relief workers, 34,308; on gratuitous relief, 12,949; total 47,257. The return relates to eleven estates.

Assam.—*For week ending 20th March.*—Rain has fallen in all districts varying from 1 to 4 inches. Ploughing for early rice in the Assam Valley and pressing of sugarcane continue. Sowing of lowland winter rice has been commenced in Sylhet. The pruning of tea and gathering of mustard is nearly finished. The outturn of mustard is generally good. Gathering of pulses still continues in Goalpara; the outturn is fair. Plucking of tea has been commenced in places. Land is being prepared for jute in Goalpara and the Garo Hills. Fodder is scarce in the Naga Hills and the Khasia and Jaintia Hills. Prices:—Common rice, Silchar, 19; Sylhet, 17½; Dhubri and Tezpur, 16; Gauhati and Nowgong 18, and Dibrugarh 11½ seers per rupee.

Mysore and Coorg.—*For week ending 20th March.*—MYSORE: The standing crops are in fairly good condition in all districts except Kolar, where they are withering. Paddy is being sown in parts of Tumkur and is being harvested in parts of Bangalore, Mysore and Kadur. Prices have risen in Chitaldroog and Shimoga. Fodder and water are becoming scarce though still sufficient in parts.

COORG: *For week ending 20th March.*—*Ragi* threshing has been completed. Prices of food-grains are rising. Water and fodder for cattle are decreasing.

Berar and Hyderabad.—*For week ending 17th March.*—BERAR.—The weather is warm. Harvesting of irrigated wheat and gram is in progress; the breaking up of land for the ensuing crop continues except in the Buldana district. Fodder is scarce and the water supply insufficient. Prices :—Akola, 9½; Amraoti, 10½; Basim, 8¾; Buldana, 9½; Ellichpur, 9; Wun, 10 seers per rupee. The numbers on relief were :—Workers, 258,253; non-workers, 46,924; in poor-houses, 6,114; on village relief, 9,278; grand total, 320,569.

Hyderabad.—*For week ending 17th March.*—The rainfall during the week ended 14th March was 13 cents. and the total rainfall from 1st January 36 cents. Harvesting of spring crops is still progressing. The winter rice crop sown in land under wells is withering. Water supply is quite insufficient. Cattle are suffering much for want of pasture and fodder. Prices of grain have risen slightly. The total number of persons on relief works including dependants was 180,360 and of those gratuitously relieved 16,571. Prices :—wheat, 5¼; coarse rice, 6 and *juar* 8½ seers per current Sicca Rupee.

Rajputana.—*For week ending 14th March.*—Spring crops are fair on irrigated lands in parts of Sirohi, Kotah, Jhallawar, Baraoti and Tonk, Jaipur, Kishangarh, Alwar, Karauli, Bharatpur, and in some villages in Ajmer. Poppy juice is being collected in Kotah and Jhallawar. The outturn of spring crops is generally poor. The condition of cattle is unchanged and fodder continues to be very scarce. Prices are rising in 6 States, falling in 4 and are stationary elsewhere. The highest price is, Sirohi, 7½ seers, and the lowest, Bharatpur, 13 seers per rupee. Numbers on relief :—Ajmer-Merwara—Relief works, 86,125; gratuitous relief, 24,474 against 83,919 and 26,530 in last week. Natives States—Relief works, 358,621; gratuitous relief, 82,126; against 361,307 and 86,003 last week. Total for all Rajputana—On works, 444,746; on gratuitous relief, 106,600; against 445,226 and 112,533 in last week. Mewar shows decrease of 5,194 and Merwara 1,876 on gratuitous relief. The following deaths are reported from starvation :—Bundi, 20; Tonk, 64; Shahpura, 13; Partabgarh, 15; Kotah, 144; Jhallawar, about 50.

Central India.—*For week ending 14th March.*—No rain fell in Central India during the week. Agricultural operations are in progress. The condition of agricultural stock and pasturage is bad in Gwalior and Malwa and good in

parts of Bhopal, Bundelkhand and Baghelkhand. Prices are steady in Gwalior, Baghelkhand and Malwa, high in Bhopal and normal in Bundelkhand. Average prices:—In Gwalior districts, $12\frac{1}{2}$; Bhind, $12\frac{7}{8}$; Towerghur, $12\frac{1}{5}$; Gird, $12\frac{9}{16}$; Sikarwari, $11\frac{1}{2}$; Sabalgad, $12\frac{5}{16}$; Bhander, $12\frac{3}{16}$; Narwar, $12\frac{11}{16}$; Sheopur, $9\frac{6}{8}$; Bhilsa, $12\frac{1}{2}$; Asagarh, $12\frac{5}{8}$; Pachaur, $11\frac{1}{4}$; Bajrangarh (Bhopal), $10\frac{3}{16}$; Bundelkhand, 15; Baghelkhand, $11\frac{1}{2}$; Malwa, 10; Bhopawar, $8\frac{3}{4}$. The numbers on relief were as follows:—On works:—Gwalior, 1,327; Bhopal, 11,198; Bundelkhand, 3,144; Baghelkhand, 21,925; Malwa, 15,855; Bhopawar, 57,822. On gratuitous relief—Bhopal, 1,359; Bundelkhand, 582; Baghelkhand, 289; Malwa, 5,131; Bhopawar, 4,292. Figures from Indore have not been received.

Baroda.—*For week ending 10th March.*—There has been no change in the agricultural prospects. The condition of agricultural stock remains unchanged. Prices:—bajri, 17; jowar, 18; wheat, 17; rice, superior, 13; inferior, 17 pounds of 40 tolas per British Rupee. The average number of persons employed on relief works in Baroda territory was 48,857 and the number on gratuitous relief, 11,778.

Kashmir.—*For week ending 20th March.*—It has been raining during the last two days. The rain is benifiting the crops. Prices continue below normal. The price of rice is 27 seers per rupee.

JAMMU PROVINCE.—*For week ending 21st March.*—Good rain has fallen. Prices are falling slightly; wheat, from $10\frac{1}{2}$ to $16\frac{1}{2}$; maize, 12 to $20\frac{1}{2}$ seers per rupee. The recent rain is beneficial to standing crops. Fodder is scarce. Test works have been opened in this Province.

Nepal.—*For week ending 17th March.*—No rain. The weather has been threatening, but has cleared up and is now getting warm. The standing crops would be benefited by rain. The price of rice is 9 seers per rupee.

The number of persons in receipt of relief during the preceding and present weeks in each Province is shown in the following table:—

* 3,540 persons were on weaver relief.
† Figures for Ferozepore not received.
‡ Figures for Indore not received.
§ Figures relate to eleven States only.
‖ There was a decrease in eight districts owing to the *Holi* festival.

T. W. HOLDERNESS,
Secretary to the Government of India.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

(FAMINE.)

Return of the number of persons in receipt of relief in districts affected by scarcity.

NOTE.—The figures are compiled from returns obtained from Local Governments and Political Officers, and give the District details of the Provincial totals published weekly in the Crop and Weather Summary of the *Gazette of India.*

Non-labouring children and other dependants of relief workers are classed as on relief works when distinguished in the local returns from persons gratuitously relieved in poor-houses or at their homes.

The dates at the head of the table are the dates of the *Gazette of India* in which the Provincial totals were published. The figures, however, actually show the numbers on relief in each preceding week.

No.	Name of Province and District.	Population.	For the week ending the 24th February 1900.			For the week ending the 3rd March 1900.			For the week ending the 10th March 1900.			For the week ending the 17th March 1900.

T. W. HOLDERNESS,

Secretary to the Government of India

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

REVIEW ON THE ADMINISTRATION REPORT OF THE CIVIL VETERINARY DEPARTMENT FOR THE YEAR 1898-99.

Extract from the Proceedings of the Government of India, Department of Revenu , and Agriculture No. 5—138-4, dated 16th March 1900.

RESOLUTION.

Read—

The Annual Administration Report of the Civil Veterinary Department in India for the official year 1898-99.

The Report has as usual been punctually submitted. The difficulties with which the Department had to contend during the two previous years owing to famine and frontier campaigns were absent during the year under review: the Department is in consequence able to show satisfactory progress in its operations and a reduction in the cost of maintaining Government stallions.

2. The number of Government horse stallions actually employed at stud work was 321 against 314, and there was an increase in the number of mares covered from 14,467 to 15,694, the average per stallion being 48·84 against 46·08 last year. The number of foals dropped however fell from 4,269 to 4,045. The decrease is attributed to the poor condition to which many mares had been reduced in the famine year. Having regard to the results, it is a matter for consideration whether the average number of coverings required per stallion employed (both horse and donkey) is not excessive. On this point the Government of India desire to be furnished with the views of the Inspector General, Civil Veterinary Department. The careful mating of mares to stallions, upon which the success of horse-breeding operations so largely depends, also appears to the Government of India, to demand the most careful and unremitting attention on the part of the Inspector General, Civil Veterinary Department.

3. Owing perhaps to the larger number of Australian horses purchased by Native Cavalry there was a falling off in the number of country-bred remounts purchased for the army. The number of remounts purchased with reliable pedigrees, however, shows a very satisfactory increase. It is important that information should be collected and recorded in regard to the working capabilities of these animals, in order that the comparative value of different classes of sires may be estimated by the performances of their produce, and the Government of India are glad to learn that this important subject is not being overlooked.

4. There was a satisfactory increase in the number of branded mares. Very little advantage appears to be taken of the system of obtaining certificates of suitability for unbranded mares from District Officers which was introduced to meet the objections to branding supposed to exist in some districts. The Government of India are inclined to agree with the Inspector General that this system might now be abolished.

5. The Government of India notice with regret the unfavourable comments of the Inspector General on the English thoroughbred stallions selected and sent out to India during the year. The whole question of the purchase of stallions in England is now under the consideration of the Government of India, and further remarks on this subject are therefore unnecessary. It is, however, observed from table III of the Report that extremely low prices are realized for rejected stallions, especially in the case of those sold for no other fault than that they are not good stock-getters. The Government of India consider that a high caste Arab or thoroughbred English horse sold for such a reason should command a comparatively high price, and they are of opinion that such sales and indeed the sale of all sound young horses under similar circumstances should be widely advertised.

6. There was no improvement during the year in the condition of the Bombay market for Arab horse stallions. The falling off in the supply is attributed to the continuance of the plague in that city, the larger demand for Arab polo ponies, and the development of the waler market there. Notwithstanding the limited field of selection however, the Inspector General, Civil Veterinary Department, succeeded in purchasing the required number of high class animals. The increase which the Government of India have sanctioned in the price which may be offered for Arab stallions will, it is hoped, have some effect in improving the supply of first class horses.

7. The Inspector General, Civil Veterinary Department, reports that satisfactory progress continues to be made in mule-breeding, which he states is increasing in popularity, but a much larger number of donkey stallions than is at present available could be readily utilised. Much difficulty is experienced in obtaining a sufficient number of these stallions, and the possibility of opening up new sources of supply is now engaging the attention of the Government of India. The number of donkey stallions employed during the year was 314 against 291 in the previous year. They covered 18,739 pony and 1,379 donkey mares, which represents an average of 64·60 mares per stallion. In the previous year the coverings averaged 58·84. Notwithstanding this increase the number of foals dropped was less by 255 than in 1897-98. These statistics seem to indicate that the stallions were overworked, and the Inspector General should consider whether better results might not be secured with less waste of stallion power.

8. Owing to the plague and other causes, a number of Horse Fairs and Shows had to be abandoned during the year. The total number of animals shown was about the same as in previous years, whilst there was a satisfactory increase of about 2,000 in the number of animals competing for prizes. On the other hand, the number of remounts secured by the Army Remount Department continues to be disappointingly small, and there was a notable reduction in the number of animals bought by Native Cavalry Regiments. It has been arranged, as an experimental measure, that when a Civil Veterinary Officer attending a fair, considers that an animal rejected by the Remount Officer is likely to prove a suitable remount, it should be purchased by the Remount Department on the responsibility of the officer making the selection. The experiment should be continued, and the necessary instructions issued by the Inspector General to Civil Veterinary Officers concerned.

9. An important administrative change was effected during the year in connection with horse-breeding by the transfer of breeding operations in Sind from the Bombay to the Baluchistan Circle. The closer administrative supervision rendered possible by this arrangement will, it is expected, lead to the rapid development of a very promising field of work.

10. Another change of importance was the transfer, for reasons of administrative convenience, of the control of the Bacteriological Laboratory at Mukhtesar to the Director General, Indian Medical Service. This arrangement leaves unaffected the relations of the Civil Veterinary Department to the Laboratory in the work of research, and the former is able to render valuable assistance in supplying materials for investigation and in practically testing in the field the results gained in the Laboratory. Considerable progress was made in testing the various methods of inoculation against rinderpest, whilst the manufacture of mallein and other reagents was continued. It is greatly to be regretted that work at the Laboratory will for some time be restricted owing to the accidental destruction of the main building by fire in September last. Arrangements have, however, been made for the continuance of rinderpest experiments and the manufacture of serum for the purpose of inoculation.

11. Considerable attention has been paid by the officers of the Department to the investigation and prevention of cattle disease in its various forms. In most Provinces experiments have been conducted to test the value of bile inoculation as a prophylactic against rinderpest. The experiments with hides and bones of animals that have died from rinderpest have given most satisfactory results, and go to prove that there is no danger of infection to countries importing these commodities. Investigations have also been made with reference to Tick Pest and Warbles. The zeal with which these investigations have been undertaken by Veterinary Officers in addition to their heavy ordinary

duties merits acknowledgment. The large amount of original work performed by Veterinary Major Raymond in Bengal is particularly creditable.

12. By an amendment of the law relating to Glanders and Farcy which was enacted during the year, additional powers have been given to Inspectors under the Act which will, it is hoped, result in increasing the efficacy of measures to prevent the spread of this fatal disease which was very prevalent, especially in the Punjab and Bengal. The excellent organization for dealing with it which exists in Bombay where glanders was enzootic a few years back has proved very successful in keeping the disease in check, and the Inspector General is at present in communication with the Government of Bengal with a view to similar regulations being introduced in Calcutta. In connection with this subject the Government of India desire to again draw attention to the orders contained in their Circular No. 4—29, dated 6th February 1895, to the effect that the Civil and Military authorities should keep each other promptly and regularly informed of the outbreak of all contagious animal diseases.

13. The record of work done at the Veterinary dispensaries in the different provinces is encouraging, and the Government of India are pleased to notice the extension of these useful institutions in Bengal and the Central Provinces. The number of cases treated at these institutions increased from 19,975 in 1897-98 to 48,428 in the year under report. A steady increase is also recorded in the number of cattle treated by Veterinary Assistants outside dispensaries.

14. On its educational side the Department continues to show useful work. The results of the final examinations at the Veterinary institutions were for the most part satisfactory, especially in Bengal where the status of the school has now been raised to that of a college.

15. The assistance rendered by Native States and provincial and local authorities in the promotion of horse-breeding and the operations of the Department generally, remains to be acknowledged. The development of horse and mule-breeding continues to make progress in most Native States. During the year mules fit for ordnance purposes were purchased both from the Patiala and Faridkot States, and three remounts bred in the latter State obtained prizes at the Jellalabad Horse Show.

16. A marked improvement is also recorded in horse-breeding operations under local authorities. The number of stallions employed by them was 181 against 163 last year, the number of mares covered rose from 8,420 to 9,724, and 2,385 foals are known to have been dropped against 2,204 in the previous year.

17. The Government of India again record with pleasure their appreciation of the energetic and efficient manner in which Veterinary Colonel Queripel has administered the Department under his charge.

ORDER.—Ordered, that a copy of the foregoing Resolution be forwarded to the Local Governments and Administrations noted in the margin.

Ordered, also, that a copy be forwarded to the Military Department for information and favour of communication to the Director, Army Remount Department, the Commissary General-in-Chief, and the Adjutant General in India, for the information of His Excellency the Commander-in-Chief and of Officers Commanding Regiments of Native Cavalry.

Ordered, also, that a copy be forwarded to the Inspector General, Civil Veterinary Department, for information, and to the Director General, Indian Medical Service, for communication to the Imperial Bacteriologist.

Ordered, also, that a copy be published in the Supplement to the *Gazette of India.*

Secretary to the Government of India.

GOVERNMENT OF INDIA.

PUBLIC WORKS DEPARTMENT.

RAILWAY STATISTICS.

No. 165-R. Stat., dated Calcutta, the 15th March 1900.

Returns of accidents on Indian Railways for the nine months ending with the 30th September 1899.

Read again—

Government of India order No. 350 R. Stat., dated the 2nd September 1896.
Government of India order No. 132 R. Stat., dated the 6th March 1897.
Government of India order No. 153 R. Stat., dated the 22nd March 1898.
Government of India order No. 274 R. Stat., dated the 26th April 1899.

Read also—

The following note by the Director of Railway Traffic, dated the 7th March 1900, with abstract returns of accidents to trains, etc., on the open lines of railway in India for the nine months ending with the 30th September 1899.

I.—Accidents to trains, rolling-stock, permanent-way, etc.

Accidents to trains, rolling-stock, permanent-way, etc., during the nine months ending with the 30th September 1899, as shown under abstract No. 4 on pages 16 and 17 of the accompanying returns, caused the death of 29 and injury to 116 persons. The table below shows that although the total number of accidents was considerably above the average of the corresponding periods of the four previous years, the total number of persons killed was slightly below, and those injured was slightly above:

	Number.			Number of passengers and others.		Number of servants.		Total all classes.	
	Accidents reported to Local Governments under section 83 of the Indian Railways Act (IX of 1890).	Other accidents.	Total.	Killed.	Injured.	Killed.	Injured.	Killed.	Injured.
Standard gauge.									
Nine months ending with the 30th September 1899	65	2,593	2,658	(a) 7	(b)32	6	29	13	61
Average of the corresponding periods of the four previous years	73	2,097	2,170	(b)11	(c)54	7	24	18	78
Metre gauge.									
Nine months ending with the 30th September 1899	142	1,787	1,929	(d)4	(b)26	12	29	16	55
Average of the corresponding periods of the four previous years	92	1,550	1,642	(a)8	(b)18	5	11	13	29
Special gauges.									
Nine months ending with the 30th September 1899	19	70	89	...	...	...	...	...	...
Average of the corresponding periods of the four previous years	15	52	67	(e)1	(e)1	...	1	1	2
Total all gauges for the nine months ending with the 30th September 1899	226	4,450	4,676	(b)11	(f)58	18	58	29	116
Average of the corresponding periods of the four previous years	180	3,699	3,879	(c)20	(g) 73	12	36	32	109

(a) Out of these, one was not a passenger.
(b) Out of these, three were not passengers.
(c) Out of these, five were not passengers.
(d) Out of these, two were not passengers.
(e) Not a passenger.
(f) Out of these, six were not passengers.
(g) Out of these, nine were not passengers.

2. The following table compares the variations in the mean mileage worked, the train-mileage run and the number of accidents with the average, and shows that, with an increase of 12·67 per cent. in the mean mileage worked and of 9·25 per cent. in the train-mileage run during the nine months ending with the 30th September 1899, the number of accidents increased by 797, or 20·55 per cent., as compared with the average of the corresponding periods of the four previous years:

	INCREASE OR DECREASE AS COMPARED WITH THE AVERAGE OF THE CORRESPONDING PERIODS OF THE FOUR PREVIOUS YEARS.					
	Accidents.		Mean mileage.		Train mileage.	
	Number.	Per cent.	Miles.	Per cent.	Miles.	Per cent.
Standard	+488	+22·49	+ 1,619	+13·87	+3,445,611	+ 9·56
Metre	+287	+17·48	+ 785	+9·65	+1,273,076	+ 8·07
Special	+22	+32·84	+ 141	+49·30	+ 110,088	+29·90
TOTAL	+797	+20·55	+ 2,545	+12·67	+4,828,775	+9·25

3. The following table shows the principal variations in the number of accidents of different classes on the standard and metre-gauge lines, as compared with the average of the corresponding periods of the four previous years:

Gauge and classification.	Increase or decrease.			Percentage of increase or decrease.
	Serious.	Minor.	Total.	
Standard gauge.				
Trains or engines travelling in the wrong direction through points	...	—34	—34	—51·52
Trains running over cattle on the line	+4	+89	+93	+9·80
The bursting of tubes, etc., of engines	...	+27	+27	+24·77
The failure of machinery, springs, etc., of engines	...	+34	+34	+11·49
The failure of tyres	—1	+44	+43	+860·00
The failure of couplings	—1	+68	+67	+95·71
Broken rails	...	+21	+21	+77·78
The flooding of portions of permanent-way	—4	—21	—25	—56·82
Fire in trains	—1	+34	+33	+42·86
Fire at stations, or involving injury to bridges or viaducts	...	+19	+19	+70·37
Under the head "Other accidents"	+4	+193	+197	+123·90
Metre gauge.				
Passenger trains or parts of passenger trains leaving the rails	+53	—2	+51	+141·67
Goods trains or parts of goods trains, engines, etc., leaving the rails	—3	—22	—25	—39·68
Trains running over cattle on the line	—5	+76	+71	+7·91
The bursting of tubes, etc., of engines	...	+21	+21	+47·73
The failure of machinery, springs, etc., of engines	—1	+27	+26	+23·86
The failure of axles	+6	+6	+12	+30·77
The failure of couplings	—3	+35	+32	+36·78
Broken rails	—1	+17	+16	+66·67
The flooding of portions of permanent-way	+13	+2	+15	+35·71
Slips in cuttings or embankments	—1	—12	—13	—61·90
Under the head "Other accidents"	—4	+69	+65	+95·58

It will be observed from the foregoing that the increases on the standard gauge lines occurred under "Trains running over cattle on the line," 93 accidents or 9·80 per cent.; under "The bursting of tubes, etc., of engines," 27 accidents or 24·77 per cent.; under "The failure of machinery, springs, etc., of engines," 34 accidents or 11·49 per cent. ; under "The failure of tyres," 43 accidents or 860·00 per cent.; under "The failure of couplings," 67 accidents or 95·71 per cent.; under "Broken rails," 21 accidents or 77·78 per cent.; under "Fire in trains," 33 accidents or 42·86 per cent.; under "Fire at stations, or involving injury to bridges or viaducts," 19 accidents or 70·37 per cent.; and under the head "Other accidents," 197 accidents or 123·90 per cent. On the metre-gauge railways the noticeable increases occurred under "Passenger trains or parts of passengers trains leaving the rails," 51 accidents or 141·67 per cent.; under "Trains running over cattle on the line," 71 accidents or 7·91 per cent.; under "The bursting of tubes, etc., of engines," 21 accidents or 47·73 per cent.; under "The failure of machinery, springs, etc., of engines," 26 accidents or 23·86 per cent.; under "The failure of axles," 12 accidents or 30·77 per cent.; under "The failure of couplings," 32 accidents or 36·78 per cent.; under "Broken rails," 16 accidents or 66·67 per cent.; under "The flooding of portions of permanent-way," 15 accidents or 35·71 per cent.; and under the head "Other accidents," 65 accidents or 95·58 per cent.

4. Under the head "Passenger trains or parts of passenger trains leaving the rails," the largest number, *viz.*, 38, occurred on the Assam-Bengal railway; next to that line comes the Eastern Bengal State railway (metre-gauge section) with 20 accidents; under the head "The bursting of tubes, etc., of engines," the largest number, *viz.*, 62, occurred on the Madras railway; next to that line comes the North Western State railway with 33 accidents; under the head "The failure of machinery, springs, etc., of engines," the largest number, *viz.*, 101, occurred on the East Indian railway; next to that line come the North Western State railway with 86 accidents and the Great Indian Peninsula and Bombay, Baroda and Central India railways with 45 accidents on each, respectively; under the head "The failure of tyres," the largest number, *viz.*, 43, occurred on the Madras railway; under the head "The failure of couplings," the largest number, *viz.*, 58, occurred on the Bombay, Baroda and Central India railway; next to that line come the Rajputana-Malwa, the East Indian, and the Bengal and North-Western railways with 32, 31 and 28 accidents on each, respectively; under the head "Broken rails," the largest number, *viz.*, 24, occurred on the North Western State railway; under the head "The flooding of portions of permanent-way," the largest number, *viz.*, 21, occurred on the Burma railways; under the head "Fire in trains," the largest number, *viz.*, 44, occurred on the Great Indian Peninsula railway; next to that line comes the East Indian railway with 43 accidents; under the head "Fire at stations or involving injury to bridges or viaducts," the largest number, *viz.*, 20, occurred on the East Indian railway; and under the head "Other accidents," the largest number, *viz.*, 190, occurred on the East Indian railway; and next to that line come the Rajputana-Malwa and the North Western State railways with 58 and 54 accidents on each, respectively.

5. The number of cattle accidents was largest on the South Indian railway, *viz.*, 202; next comes the Eastern Bengal State railway (standard gauge section) with 193; then the East Indian railway with 172 accidents, the Southern Mahratta railway with 171, the Rajputana-Malwa railway with 167 and the North Western State railway with 157.

In relation to the train-mileage run, the highest proportion was on the Udaipur-Chitor railway, which gives an average of 1 accident in 5,801 train-miles run; the Jodhpur-Bikaner railway coming next with an average of 1 in 7,014; then the Bengal Dooars, the Eastern Bengal State (standard gauge section), the Nizam's Guaranteed State, the Assam-Bengal and the Tapti Valley railways with averages of 1 in 7,259, 1 in 7,560, 1 in 7,947, 1 in 8,823 and 1 in 8,943, respectively. The lowest proportion was on the Great Indian Peninsula railway, *viz.*, 1 in 329,728 train-miles run; the Darjeeling Himalayan railway coming next with 1 in 126,546; then the Bombay, Baroda and Central India railway with 1 in 82,055, the East Indian railway with 1 in 62,437, the North Western State railway with 1 in 50,163 and the Burma railways with 1 in 45,673.

6. Taking the total number of accidents to trains, rolling-stock, permanent-way, etc., on each railway as given in table No. 3, the proportion of accidents to train-mileage run was the highest on the Cooch Behar railway, which gave an average of 1 in 2,681 train-miles; next come the Bengal Dooars, the Rohilkund and Kumaon, the Tezpur-Balipara, the Assam-Bengal, and the Dibru-Sadiya railways with averages of 1 in 3,629, 1 in 3,991, 1 in 4,081, 1 in 4,260, and 1 in 4,357, respectively. The lowest proportion was on the Great Indian Peninsula railway, *viz.*, 1 in 33,250; the Oudh Rohilkhand State railway coming next with 1 in 18,698; then the North Western State railway with 1 in 17,010, the East Indian railway with 1 in 16,806 and the Gaekwar's Dabhoi railway with 1 in 16,072.

II.—Accidents from other causes not involving accidents to trains, etc.

7. The casualties to passengers, servants in the employ of railways or of contractors, and to others, from causes not involving accidents to trains (which are detailed in abstract No. 2) are compared separately, for each gauge, with the average of the corresponding periods of the four previous years in the table below:

Gauges.	Nine months ending with the 30th September 1899.								Average of the corresponding periods of the four previous years.							
	Passengers.		Servants.		Others.		Total.		Passengers.		Servants.		Others.		Total.	
	Killed.	Injured.	Killed.	Injured.	Killed.	Injured.	Killed.	Injured.	Killed.	Injured.	Killed.	Injured.	Killed.	Injured.	Killed.	Injured.
Standard	29	107	104	198	298	83	431	388	37	104	96	190	301	77	434	371
Metre	16	32	18	61	131	43	165	136	12	43	31	59	120	47	163	149
Special	...	5	...	6	1	...	1	11	...	1	...	3	1	1	1	5
Total	45	144	122	265	430	126	597	535	49	148	127	252	422	125	598	525

It will be seen from the foregoing table that the number of persons killed was almost the same as, and injured, slightly above, the average of the corresponding periods of the four previous years.

III.—*Accidents in which the movement of vehicles used exclusively upon railways was not concerned.*

8. The following table shows, for the several gauges, the number of persons reported to have been killed or injured by accidents in which the movement of vehicles used exclusively upon railways was not concerned. Comparative average figures for the corresponding periods of the three previous years are also given:

	Nine months ending with the 30th September 1899.		Average of the corresponding periods of the three previous years.	
	Killed.	Injured.	Killed.	Injured.
Standard	23	147	31	120
Metre	11	28	15	34
Special	1	...	...	1
Total	35	175	46	155

IV.—*Statistical results.*

9. The following table gives certain statistical results for the period under review, comparing the number of passengers killed and injured by accidents to trains and from all causes with the number carried and the number of passenger-units carried one mile. Comparative results based on the average figures of the corresponding periods of the four previous years are also given :

Particulars.		Nine months ending with the 30th September 1899.				Average of the corresponding periods of the four previous years.			
		Standard.	Metre.	Special.	Total.	Standard.	Metre.	Special.	Total.

Number of passengers killed and injured from all causes . .	No.	171	73	5	249	198	77	1	276
Proportion of above to number carried	No.	1 in 392,385	1 in 575,406	1 in 194,413	1 in 442,066	1 in 331,141	1 in 539,612	...	1 in 390,518
Proportion of passengers killed and injured from all causes to number of passenger-units carried one mile	No.	1 in 17,830,467	1 in 20,344,749	1 in 3,522,871	1 in 18,280,285	1 in 15,137,657	1 in 19,950,741	...	1 in 16,483,545

It will be seen that the comparison is generally favourable.

V.—*Number of persons killed and injured by accidents to trains, rolling-stock, etc., during the third quarter of 1899.*

10. The following table gives the number of accidents, as classified in abstract No. 4 of the returns, which resulted in loss of life or injury to persons, and shows the railways on which they occurred :

Railway.	Number of accidents reported during the third quarter of 1899.	Passengers and others.		Servants.		Total.	
		Killed.	Injured.	Killed.	Injured.	Killed.	Injured.

(a) Excluding the Howrah-Amta, Howrah-Sheakhalla, and Ranaghat-Krishnagar railways, also the Tezpore-Balipara and Tarakeshwar-Magra railways in the case of unit-mileage of passengers.

11. A brief description of some of the accidents which resulted in loss of life, injury to persons or serious damage to rolling-stock is given below:

North Western State railway.—On the 14th July 1899, an up mail train, when leaving Kotri station, was put on the wrong line through the points not being properly set, and collided with a load of vehicles standing there. Three passengers were slightly injured, and the rolling stock considerably damaged.

Bengal and North-Western railway.—On the 12th July 1899, a collision occurred between an up and a down goods train between Dighwara and Goldinganj stations. The rolling-stock was considerably damaged. *A detailed report of this accident will be found in Appendix A to the abstract returns of accidents.*

On the 28th September 1899, a ballast train, proceeding from Nanpara station to Bahraich station ran into a camel between Nanpara and Matera stations, and the engine and several trucks were derailed. Two railway servants were killed and eight injured. The rolling-stock was considerably damaged.

Rajputana-Malwa railway.—On the 18th August 1899, an up mail train ran into a bullock cart between Ajmer and Saradhana stations, resulting in the engine and several carriages being derailed. The cartman and two passengers were killed and four seriously injured. The rolling-stock and permanent-way were also considerably damaged.

Burma railways.—On the 31st August 1899, a down goods train collided near Pazundaung north distant signal with a shunting train which had pulled out of Pazundaung station, and had been unable to back in. One railway servant was killed, and three were injured. The rolling stock was considerably damaged.

ORDER.—Ordered, that the above note, with the abstract returns and appendix thereto, be communicated, for information, to the Local Governments and Administrations, and to the officers noted in the margin.

The Governments of Bombay, Bengal, North-Western Provinces and Oudh, Punjab, and Burma.
The Chief Commissioners of the Central Provinces, Assam, and Coorg.
The Resident at Hyderabad.
The Resident in Mysore.
The Agents to the Governor General for Rajputana, Central India, and Baluchistan.
The Consulting Engineers to the Government of India for Railways, Calcutta, Lucknow, and Assam.
The Managers, North Western State, Oudh and Rohilkhand State, Eastern Bengal State and East Coast State railways.
The Engineers-in-Chief, Indus Bridge Works, Hardwar-Dehra and Ghaziabad-Moradabad railways.

Ordered, also, that copies be forwarded for the information of Her Majesty's Government.

Ordered, further, that the above note, with the abstract returns, be published in the Supplement to the *Gazette of India*.

W. J. McELHINNY, *Captain, R.E.,*
Offg. Under Secy. to the Govt. of India.

Documents accompanying.

Abstract returns of accidents for the nine months ending with the 30th September 1899 with appendix thereto.

Enclosure to Government of India Order No. 165 R. Stat., dated the 15th March 1900.

ABSTRACT No. 1.

GENERAL TOTAL.

NUMBER of PERSONS reported, during the NINE MONTHS ending with the 30th September 1899, as KILLED or INJURED on ALL RAILWAYS open for TRAFFIC in INDIA, distinguishing between PASSENGERS, RAILWAY SERVANTS, and OTHER PERSONS; and distinguishing also, in the case of the two former classes, between ACCIDENTS caused by ACCIDENTS to TRAINS, ROLLING STOCK, PERMANENT-WAY, etc., and ACCIDENTS happening otherwise.

J. E. O'CONOR,
Director-General of Statistics

T. W. HOLDERNESS,
Secretary to the Government of India.

Calcutta, the 24th March 1900.

GOVERNMENT OF INDIA.

FINANCE AND COMMERCE DEPARTMENT.

STATISTICS AND COMMERCE.
CUSTOMS.

No. 1456 S. R., dated Calcutta, the 21st March 1900.

READ—

Customs Circulars Nos. V and VI of 1900.

ORDERED, that the circular be published for general information in the Supplement to the *Gazette of India*.

J. F. FINLAY,
Secretary to the Government of India.

Customs Circular No. V of 1900.

From—The Secretary to the Government of India, Finance and Commerce Department, No. 669 S. R., dated the 8th February 1900,

To—The Governments of Madras, Bombay, Bengal, and Burma.

I am directed to request that, with the permission of His Excellency the Governor in Council / His Honour the Lieutenant-Governor, the Collector of Customs may be instructed to treat as component parts of machinery wire-gauze and felt (whether woollen or cotton) imported in endless pieces by the owners or agents of paper mills for use in the mills. These articles will thus be free of import duty in future.

Customs Circular No. VI of 1900.

From—The Secretary to the Government of India, Finance and Commerce Department, No. 955 S. R., dated the 27th February 1900,

To—The Secretary to the Government of Bombay, Revenue Department.

I am directed to acknowledge the receipt of your letter No. 127, dated the 8th January 1900, regarding the proposal that Indian produce and manufactures imported by sea from foreign Indian ports into British India should not be required to be accompanied by a definite indication of origin under section 10 (1) (*e*) (i) and (ii) of the Indian Merchandise Marks Act, IV of 1889, when bearing the name of a British Indian trader or dealer.

2. In reply I am to say that the proposal is sanctioned. I am to add that the Government of India will not object to a similar exception being made in favour of goods from Africa and Persia, such as elephants' tusks, wet and dry dates, etc., if the Government of Bombay think fit to make it.

GOVERNMENT OF INDIA.

No. 1501-A., dated Calcutta, the 23rd March 1900.

The undermentioned paper is published in the *Gazette of India* :—

INDIA OFFICE,
London, 1st March 1900.

Financial,
No. 29.

To His Excellency the Right Honourable the Governor General of India in Council.

MY LORD,

Withdrawal of the unlimited undertaking to sell telegraphic transfers at $16\frac{5}{32}d$. per rupee.

I have considered in Council the letter from your Excellency dated the 25th of January, No. 24, forwarding a copy of the correspondence which you have had with the Bengal and Bombay Chambers of Commerce, and with the Associated Exchange Banks established at Bombay, respecting my withdrawal, on the evening of the 10th of January, of the undertaking given in January 1898, to sell, until further notice, telegraphic transfers on India, without limit, at a price not exceeding $16\frac{5}{32}d$. for the rupee.

2. I observe that, in the Resolution of the Committee of the Bengal Chamber of Commerce, it is stated that they viewed with great alarm the consequence to the trade of India, "from the stoppage, at the beginning of the busy season, by the Secretary of State, without any notice, of the sale of telegraphic transfer remittances from London at 1*s*. $4\frac{5}{32}d$. under the Gold Notification Act No. II of 1898."

3. There is some confusion in this phrase which it is desirable to correct. Act II of 1898 was passed, in a time of great stringency in India, when, as explained by Sir James Westland in your Legislative Council, on the 14th of January, " supplies of gold (beyond what happens at the moment to be in India) cannot be obtained until three or four weeks have passed "; and it was therefore provided that currency notes might be issued in India to an amount equal to the value of gold held by the Secretary of State in England ; and by the Notification issued on the 21st of January it was announced that those notes would be issued at a rate corresponding to 16*d*. per rupee, with the addition of such further quantity of fine gold as the Secretary of State should from time to time determine to be sufficient to cover all costs and charges incidental to the transmission of gold to India. Sir James Westland at the same time stated that the Secretary of State in Council was prepared to sell, until further notice, telegraphic transfers, at a price not exceeding $16\frac{5}{32}d$. for the rupee.

4. The two transactions, though taking place at the same time, and both of a temporary character, were not dependent the one on the other. The object of the Act, which was at first to last only for six months, was to enable your Government to make use of the rupees in the Currency Reserve sooner than would otherwise have been practicable. The engagement of the Secretary of State in Council ensured to the trade, until further notice, a supply of rupees at a specified price; but those who tendered for rupees at that price were in no way concerned in the question whether gold was to be held under the Act II of 1898, a point which was entirely dependent on the extent to which your treasuries would be able to meet the demand for remittance, without resorting to the Currency Reserve.

5. In July 1898, when the Act would otherwise have expired, the question of the Indian Currency legislation was under consideration; and it was thought

undesirable to allow the power which it gave, of relieving tension in the Indian money market, to lapse, at all events for a time. The Act was therefore prolonged for two years. Nothing was said on that occasion as to the engagement to sell telegraphic transfers at $16\frac{5}{32}d$ per rupee, which could be withdrawn at any moment; but obviously it would have been impossible to engage to supply rupees for a long period at a definite price, when the gold value of the rupee might have been materially altered as the result of the examination of the subject.

6. It was not until the 30th of September 1899 that application was made for any telegraphic transfers at so high a price as $16\frac{5}{32}d$. per rupee. The expenditure for the relief of famine, not only in British India, but also in the Native States, was threatening about the same date to cause a serious drain on your cash balances. Nevertheless, your Excellency desired me to draw freely, while the demand was large; but on the 24th of October, when upwards of 200 lakhs of telegraphic transfers at $16\frac{5}{32}d$. had been met from your treasuries, you were compelled to ask that no more might be allotted except against gold to be held for the Currency Reserve under Act II of 1898.

7. The large quantity of gold that was being accepted by the Currency Department in India was also causing some uneasiness, and led me on the 10th of November to inquire what amount or proportion of that metal it was, in your opinion, safe to hold in the Currency Reserve. You suggested a limit of 5,000,000*l*.; but this was exceeded in the middle of January, and it became desirable to begin paying gold from your treasuries.

8. In the meantime the demand for remittance to India assumed great proportions. Up to the 9th of January the amount of telegraphic transfers sold at $16\frac{5}{32}d$. per rupee had risen to 334½ lakhs, and 850,000*l*. of gold was held by the Secretary of State for the Currency Reserve. On the 10th of January 53 lakhs were sold, making it necessary to purchase 350,000*l*. more gold; and it became clear that there was a considerable risk of your being unable to meet the payments on account of such transfers, without reducing the number of rupees in the Currency Reserve below that which was requisite to ensure the convertibility of your notes.

9. It was, moreover, evident that if the engagement to sell an unlimited amount of telegraphic transfers at the fixed price was to be cancelled, this must be done without allowing any interval to elapse between giving notice and taking action upon it; since otherwise the demand for remittance during such interval would in all probability have been excessive.

10. It was therefore decided, on the afternoon of the 10th of January to announce that the engagement of January 1898 was withdrawn; but, in order to meet the requirements of the trade, while checking the strain on your resources by raising the price gradually, applications for transfers were not refused, and nearly 70 more lakhs were sold in the course of the next week.

11. Thus, while undue pressure on your resources was avoided, the consequent inconvenience to the mercantile world was as far as possible reduced; and, as soon as the banks were able to obtain supplies of gold for import into India, matters resumed their normal course.

12. I cannot close this explanation without observing that the present difficulty is another instance of the dangerous extent to which the banks rely on the Government balances for support, and fail to make provision beforehand to meet the demands which they are well aware must arise in the busy season.

I have the honour to be,

My Lord,

Your Lordship's most obedient humble Servant,

(Signed) GEORGE HAMILTON.

PART VI.

Proceedings of the Council of the Governor General of India, assembled for the purpose of making Laws and Regulations.

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

PROCEEDINGS OF THE COUNCIL OF THE GOVERNOR GENERAL OF INDIA, ASSEMBLED FOR THE PURPOSE OF MAKING LAWS AND REGULATIONS UNDER THE PROVISIONS OF THE INDIAN COUNCILS ACTS, 1861 AND 1892 (24 & 25 VICT., CAP. 67, AND 55 & 56 VICT., CAP. 14).

The Council met at Government House, Calcutta, on Wednesday, the 21st March, 1900.

PRESENT:

His Excellency Baron Curzon of Kedleston, P.C., G.M.S.I., G.M.I.E., Viceroy and Governor General of India, *presiding*.
His Honour Sir John Woodburn, K.C.S.I., Lieutenant-Governor of Bengal.
The Hon'ble Major-General Sir E. H. H. Collen, K.C.I.E., C.B.
The Hon'ble Sir A. C. Trevor, K.C.S.I.
The Hon'ble Mr. C. E. Dawkins.
The Hon'ble Mr. T. Raleigh.
The Hon'ble Mr. Denzil Ibbetson, C.S.I.
The Hon'ble Mr. P. M. Mehta, C.I.E.
The Hon'ble Nawab Mumtaz-ud-daula Muhammad Faiyaz Ali Khan.
The Hon'ble Mr. J. K. Spence, C.S.I.
The Hon'ble Mr. G. Toynbee.
The Hon'ble Mr. D. M. Smeaton, C.S.I.
The Hon'ble Mr. J. D. Rees, C.I.E.
The Hon'ble Maharaja Rameshwara Singh Bahadur of Darbhanga.
The Hon'ble M. R. Ry. Panappakkam Ananda Charlu, Vidia Vinodha, Avargal, Rai Bahadur, C.I.E.
The Hon'ble Kunwar Sir Harnam Singh Ahluwalia, K.C.I.E., of Kapurthala.
The Hon'ble Mr. J. T. Woodroffe.
The Hon'ble Mr. H. F. Evans, C.S.I.
The Hon'ble Rai Bahadur B. K. Bose, C.I.E.
The Hon'ble Mr. Allan Arthur.

THE LATE SIR WILLIAM LOCKHART.

His Excellency THE PRESIDENT addressed the Council as follows:—

"Before we proceed to the business of the sitting, I must say a few words concerning the sorrowful fatality which has robbed us, since our last meeting, of one of the most distinguished Members of this Council. The late Commander-in-Chief, Sir William Lockhart, had only been for less than a year and a half a

Member of this body. So far as I remember, he never once spoke here, and I dare say, had his life been spared to the full limit of his term of office, would never have spoken. He did not care for speech-making; and his keenest interest did not lie in administration. He was essentially a man of action, whose character had ripened, and whose reputation had been won, on the battle-field and in the camp. It was among the wild tribes of the frontier, and amid the soldiers of the Army, whom he loved and led to so many victories, that the gift of leadership, which he combined with a singular gentleness of disposition, was best seen, and was most widely known. By force of this ascendency, he rose to the great position of Commander-in-Chief of the Army in India, an office which he filled not merely by titular appointment, but in an equal degree by popular acclaim. He has not lived to continue to the Army in his exalted station the services which he had already rendered to it in so many campaigns. In the prime of life, and in the plenitude of his powers, an inscrutable destiny has struck him down. But he leaves a record of combined gallantry and judgment in the field, and of the power of inspiration over his followers, which are among the attributes of great Commanders, and which entitle him to a high place in the illustrious roll of Indian Captains. It may be permitted to myself, who had known him for many years, long before a happy fortune made me his Colleague in the Government of India, to add that, by his premature death, we have lost not only a brave officer and gifted General, but a chivalrous and noble minded gentleman, and a most lovable man."

QUESTIONS AND ANSWERS.

The Hon'ble RAI BAHADUR ANANDA CHARLU asked :—

"1. Will the Government be pleased to state whether, since the brief discussion in March last in the Council, they have received any memorial or representation from, or on behalf of, the Native Christian Community of Madras complaining of hardships entailed on them in the shape of succession duties, etc., by and under the Indian Court Fees Act?

"2. Will the Government be pleased to state whether the Government, in recognition of the said hardships, either wholly or partially, contemplate any legislation to remedy the same?

"3. Will the Government be pleased to state whether, in case legislation is contemplated in that behalf, it will be convenient so to arrange as to admit of the same being discussed and passed at the next cold weather session at Calcutta?"

The Hon'ble MR. DENZIL IBBETSON replied :—

"In July, August and September last the Government of India received through the Government of Madras several memorials from Native Christian Communities in that Presidency regarding the hardship caused to them by the incidence of the succession duties.

"2. The Local Governments and Administrations have been consulted upon various suggestions which have been put forward for the alteration of the law. Until their replies have been received and considered, the Governor General in Council is not prepared to make any announcement as to the course which will be pursued."

The Hon'ble MR. ALLAN ARTHUR asked :—

"Will the Government of India be pleased to state whether it is their intention to pass an Act having for its object the renewal, on its expiry on 20th July next, of Act II of 1898, commonly called the Gold Note Act?"

The Hon'ble MR. DAWKINS replied :—

"Yes, it is the intention of Government to prolong Act II of 1898, which expires in July next, for a further period of two years from that date. But it must be distinctly understood that this prolongation implies no undertaking on the part of the Secretary of State to sell remittances under the Act at any specified rate."

CENTRAL PROVINCES SETTLEMENTS.

The Hon'ble MR. IBBETSON said :—" I beg to lay upon the table information regarding[1] settlements of the Central Provinces, which the Hon'ble Mr. Bose asked for on the 16th February last."

[1] See Appendix attached.

FINANCIAL STATEMENT FOR 1900-1901.

The Hon'ble MR. DAWKINS introduced and explained the Financial Statement for 1900-1901. He said:—

"PART I.

"INTRODUCTION.

"1. In introducing the Financial Statement last year my predecessor dwelt with cautious satisfaction on the rapid recovery of the country from the effects of famine. It was generally hoped, and not without reason, that the two years of good harvests which had contributed to this recovery, were ushering in a period of agricultural prosperity, and that the word famine would not be on men's lips again for some time. That hope was doomed to cruel disappointment. While the ravages of plague continue, India has once more been afflicted by a visitation of famine nearly as widespread as the greatest famines of the century, and, in many respects, unprecedented in intensity. The significance, therefore, of the figures which I have to submit to this Council will very largely relate to the agricultural situation.

"2. The Indian Financial Statement has to deal with three years. In the first year of the present triad, 1898-99, the total revenue was £67,595,815 and the expenditure charged against Revenue was £64,954,942. The accounts therefore yield a surplus of £2,640,873, a surplus due to the abundant harvests of 1897 and 1898. The results of those good harvests continued to make themselves felt in the earlier months of the year now passing away, 1899-1900. My predecessor had estimated a surplus of £2,621,800. He had, moreover, taken exchange at a very prudent figure, and it was anticipated that this surplus would be considerably exceeded. It has been slightly reduced. The Revised Estimates for 1899-1900 show a Revenue of £68,532,400 and an Expenditure of £65,979,600, while the surplus works out at £2,552,800. It is needless to say that famine, in the closing months of the year, has caused the disappointment. If the crops had not failed the year would have closed with a surplus in the neighbourhood of £4,500,000 or of 6 to 7 crores. Without famine, again, the year upon which we are shortly entering, 1900-1901, might have been expected to show an ample surplus. The Budget Estimates are—

	£
Revenue	70,155,800
Expenditure	69,995,500
Surplus	160,300

"Accounts of 1898-99.

"3. Turning now to the examination of the total results of each year, the differences between the Accounts of 1898-99, which were published two months ago, and the anticipations formed in March 1899, will be seen in the following table:—

		Revised Estimate.	Accounts.	Accounts, better.	Accounts, worse.
REVENUE.					
India	Rx.	101,217,400	101,062,361	...	155,039
England	£	232,500	242,561	10,061	...
Exchange	Rx.	116,200	121,771	5,571	...
TOTAL	Rx.	101,566,100	101,426,693	...	139,407
EXPENDITURE.					
India—					
Imperial, Provincial, and Local	Rx.	71,603,300	71,510,267	93,033	...
Adjustment of Provincial and Local Surplus or Deficit	Rx.	+1,417,900	+1,467,351	...	49,451
NET	Rx.	73,021,200	72,977,618	43,582	...
England	£	16,323,700	16,303,197	20,503	...
Exchange	Rx.	8,161,800	8,184,568	...	22,768
TOTAL	Rx.	97,506,700	97,465,383	41,317	...
SURPLUS	Rx.	4,059,400	3,961,310	...	98,090

"The differences are small and do not call for comment. It will be noticed that the figures in the above table are set forth in a different form from that adopted in the statements in the Appendices to this Budget Statement. The change in the form of the Appendices is the result of a decision to make an important change in the form of the Estimates and Accounts which I will now explain. The table in the preceding paragraph is the last place in which the now familiar but much misunderstood headings of "Rx." and "Exchange" will appear in this or in future Financial Statements.

"Change in the Form of Accounts.

"4. The method in which our combined accounts of transactions in India and in England have hitherto been stated may be shortly described as follows. In respect of Revenue and Expenditure, including Expenditure not charged against Revenue, we had, first, columns showing the rupee transactions in India in tens of rupees; secondly, a column showing the sterling figures in pounds sterling; thirdly, a column headed "Exchange" showing the addition required to the sterling figures in order to convert them into rupees, or rather tens of rupees, this addition being the difference between the equivalent of the sterling at a conventional rate of exchange of *2s.* the rupee and at the average rate obtained for Council Bills for the year; and, lastly, a column which gave the figures of the preceding columns added together and exhibited the total of the rupee and sterling transactions in tens of rupees. These entries showed with absolute accuracy the figures for rupee and sterling transactions both separately in tens of rupees and in pounds sterling, respectively, and when combined, in tens of rupees, while the rupee equivalent of the sterling figures was readily ascertainable by adding together the columns for £ and "Exchange." Nevertheless the method of stating exchange in a separate column gave rise to misapprehension. The figures under the head Exchange, of great magnitude since exchange fell largely below the former rate of *2s.* the rupee, were frequently confounded by the public with real losses by exchange. To prevent this misapprehension, the meaning of the word Exchange, as used in the Accounts and Estimates, was clearly explained in footnotes, but these did not suffice wholly to disabuse the public, or even English financial experts, of the erroneous impression. Footnotes are not always read. Moreover, the separation of a portion of the rupee equivalent of the sterling figures under the title of "Exchange" was often criticised on the ground that it was based on the assumption of a fictitious rate of exchange, namely, *2s.* the rupee, and that the figures in the column did not really represent Rx. or indeed any other monetary unit. However, in the absence of any stable rate of exchange between India and England, it was not till now found practicable to devise a better method of converting and combining the rupee and sterling accounts. Next, in respect of the figures falling under the Debt and Deposit heads, the rupee figures were shown in one column headed "Rx." and the sterling figures in another headed "£", figures relating to exchange being shown in the "Rx." column, but not distributed over the separate heads; the sterling figures and the ten rupee figures, without any addition for exchange were, however, added together in the column for the total. These combined totals under the separate heads indicated no precise facts, for they represented neither a stated number of tens of rupees nor of pounds sterling, and in recognition of this the total column had no heading assigned to it. The Government of India had always recognised that this plan of stating the combined accounts was open to serious criticism, but they acquiesced in its continuance, because complications of this nature seemed inseparable from a system wherein transactions stated in two currencies having no stable relation in value are combined in one account.

"5. The adoption of a gold standard for India, on the basis of R15 = £1, having linked the Indian currency with that of Great Britain, and having given a stable rate of exchange that will only vary within the gold points on either side of *16d.* to the rupee, it has been decided to remove the misapprehension connected with the present method of statement of exchange in our accounts, and to outflank the difficulty of stating the totals of the Debt and Deposit figures, by the simple expedient of stating the figures in fifteens of rupees instead of tens of rupees. This is equivalent to converting the whole account of revenue and expenditure into sterling at the rate of *16d.* the rupee, and the combined figures under the Debt and Deposit heads represent with close accuracy so many pounds sterling. Advantage of the opportunity has

been taken to discontinue altogether the use of the symbol "Rx.," with which the misapprehensions described above were undoubtedly connected.

"The main changes in the form of the estimates and accounts are—

(1) The Imperial and Provincial-Local Revenue and Expenditure in India are shown in separate columns in rupees instead of in tens of rupees as formerly;

(2) The totals under each head in the India columns are stated in £ at the rate of R15 to the £;

(3) The column headed "Exchange" is omitted;

(4) The "total" column is the sum of the Indian total column and the sterling column;

(5) Any small differences connected with exchange caused by variations of the actual rates from the fifteen rupee standard are brought to account through the heads XXIV.—Exchange as Revenue, or 31.—Exchange as Expenditure, as the case may be.

"6. Having thus explained the reasons and nature of the change of form, I give in the new form the same comparison that was given in the old form in the table in paragraph 3:—

	Revised Estimate.	Accounts.	Accounts, better.	Accounts, worse.
REVENUE.	£	£	£	£
India	67,478,300	67,353,254	...	125,046
England	232,500	242,561	10,061	...
TOTAL	67,710,800	67,595,815	...	114,985
EXPENDITURE.				
India—				
Imperial, Provincial, and Local	47,735,500	47,673,511	61,989	...
Adjustment of Provincial and Local Surplus or Deficit	945,300	978,234	...	32,934
NET	48,680,800	48,651,745	29,055	...
England	16,323,700	16,303,197	20,503	...
TOTAL	65,004,500	64,954,942	49,558	...
SURPLUS	2,706,300	2,640,873	...	65,427

"The final result is not of course affected by the change in form. The surpluses of £2,706,300 and £2,640,873 in the new form are the equivalents at 16*d.* the rupee of the surpluses of Rx. 4,059,400 and Rx. 3,961,310 in the old form. The same is true of the total Revenue and of the total Expenditure in any Accounts and Estimates in which the average rate of exchange is taken at exactly 16*d.* the rupee, but not in any in which the average rate differs from that standard. The rate was 16*d.* the rupee in the Revised Estimate of 1898-99, and the total Revenue shown in the new form, £67,710,800, is the equivalent at 16*d.* the rupee of the total Revenue shown in the old form, R1,01,56,61,000, and the total Expenditure, £65,004,500, the equivalent of R97,50,67,000. But in the Accounts the average rate of exchange slightly differed from the standard rate, being 15·9784578*d.* the rupee. The total Revenue in the new form, £67,595,815, converted into rupees at 16*d.* the rupee, is less than the total in the old form by R3,29,700; the total Expenditure, £64,954,942, similarly converted is less than the total in the old form, R97,46,53,830, by the same amount.

These differences are caused by the alteration in the treatment of the difference in the equivalents of the sterling figures when converted at 16*d*. the rupee and at the actual average rate. That difference under the old form was distributed over the various heads of Revenue and Expenditure, and under the new form is not so distributed but brought to account through the head XXIV or 31.—Exchange.

"The Famine Relief and Insurance Entry.

"7. Before leaving these arid questions of Accounts, I should also like to draw attention to the change (in the Revised Estimates of 1899-1900 and the Budget Estimates of 1900-1901) in one entry, under the head of Famine Relief and Insurance, which may have escaped Honourable Members. The recent Famine Commission suggested that the full amount of one-and-a-half crores or £1,000,000 should be provided in the Estimates for the Famine Grant, a recommendation in which the Government entirely agreed. That is to say, the Famine Grant, or the unappropriated balance thereof, will, in ordinary years, when receipts exceed expenditure, be a surplus within the surplus. But the allocation of this first surplus in recent years has been obscured by the practice of charging against it expenditure on works which are not exclusively of a protective, *i.e.*, famine character. To make the situation clear it has now been decided that protective works, the cost of which may be charged against the Famine Grant, shall include only such works as may be sanctioned solely and exclusively in view of their value as a protection from famine. This is an extension to Railway works of a practice which has been uniformly followed in respect of Irrigation works. The programme of purely protective Railway works has been practically exhausted, and that of Irrigation works has been much reduced of late years, and, though the latter may be capable of some expansion, the expenditure on these works will not be large, while the amount required to cover the loss on the Indian Midland and Bengal-Nagpur Railways, which it was specially decided to charge to the grant some years ago, will not usually exceed R30,00,000. There will therefore, now that the grant is relieved from charges for such Railways as the East Coast and South Indian, be a large balance in normal years when there is no direct expenditure on famine, a balance likely to increase as the loss on the Indian Midland and the Bengal-Nagpur lines diminishes. It has hitherto been the practice to show this unappropriated balance under the heading of Reduction of Debt, a heading which has puzzled people who ask how there can be a reduction of debt in a year when fresh loans are raised or in which no debt is discharged? We hope to clear up the difficulty by altering this heading to that of Reduction or Avoidance of Debt. It may lead people to grasp more readily what is actually happening in a normal year. In such a year the Indian Government raises more revenue than it actually requires to meet its ordinary charges against revenue by the amount of the unappropriated balance of the Famine Grant. This amount is devoted to expenditure on public works which would otherwise have to be provided by loan. For instance, in a normal year, in which ordinary revenue and expenditure balanced, the Government of India instead of raising a loan of three crores for public works would be able to reduce the three crores by the unappropriated balance, say a crore, of the Famine Grant. Less debt would be incurred in normal years and the credit of Government would be higher, when it was compelled to borrow.

"Part I and Part II.

"8. Another change is introduced into the Financial Statement this year. Honourable Members are aware that Part I of the Financial Statement is the only part which is actually inflicted on their suffering ears. Part II, Details of Accounts and Estimates—on which no doubt they fling themselves eagerly when this meeting terminates—was separated off from the main statement some ten years ago, in order to release the main statement (Part I) from being overloaded. Sir David Barbour, a master of clear exposition, effected the separation. Since that time Part II has always been compiled by the Financial Secretary but has issued under the signature of the Finance Member. I think sufficient experience has been obtained to show that the permanent relegation of the Details of Accounts and Estimates to a second chapter or part is useful. It is proposed to continue this practice and to publish Part II with Part I. But as Part II is prepared by the Financial Secretary, it should bear his signature, and its relation to Part I should be explained.

" Revised Estimates of 1899-1900.

"9. It has already been stated that the surplus of £2,621,800 taken last year, which there was so much reason to think would be exceeded, has remained practically the same, being £2,552,800. Receipts improved by £607,400, but the expenditure increased by £676,400, reducing the anticipated surplus by £69,000. The principal differences will be seen in the following statement:—

" Estimates of 1899-1900.

Principal Heads of Revenue.	REVENUE. Budget Estimate.	Revised Estimate.	Difference, + Better —Worse.
	£	£	£
Land Revenue	18,427,900	17,240,800	—1,187,100
Opium	4,002,500	4,403,800	+401,300
Salt	5,838,100	5,879,100	+41,000

Surplus	2,621,800	2,552,800	—69,000

"10. Revenue shows a falling-off of £1,187,100 or 178 lakhs under the head of Land Revenue. This is mainly due to shorter collections and to remissions rendered

necessary by famine. The principal losses occurred in the Central Provinces 35 lakhs, Punjab 37 lakhs, and in Bombay 84 lakhs. The collections in Madras also fall short of the Budget Estimate by about 19 lakhs owing to scanty crops. Opium, however, has come to the rescue with 60 lakhs owing to Bengal Opium fetching better prices. Customs show an increase of over 8 lakhs; a loss in the excise duty on cotton goods on the Bombay side and in the export duties on Burma rice diverted to India, is more than counterbalanced by the new countervailing duty on beet sugar and a larger import of spirits. Receipts from Post Office, Telegraph, and Mint improved by £422,900 or over 63 lakhs. The Mint brought in over 45 lakhs, 32 lakhs came from the profit on new silver coinage, and the remainder was derived from profits on a large coinage of copper coin required for famine relief, and on an increased dollar coinage for the Far East. An increase of 13½ lakhs occurred also under the Telegraph earnings, due to the great number of telegrams relating to the war in South Africa and to transactions in grain, many of them speculative. The famine was also largely responsible for an increase in gross receipts of nearly £820,000 or nearly a crore-and-a-quarter under Railway receipts. The real increase from this cause was even larger than this figure would make it appear, for the Railway earnings had fallen off in the earlier months of the year, and there was a good deal of lee-way to be made up in the autumn. The Railways that contributed principally to this result, taking the difference between the Budget and Revised Estimates of their net earnings, were the—

			Lakhs.
Rajputana-Malwa with a net improvement of			30
East Indian	,,	,,	26
Bengal-Nagpur	,,	,,	16
Oudh and Rohilkhund	,,	,,	12
Indian Midland	,,	,,	7

"On the other hand, the check in the export trade to our western seaboard, due to plague and famine, resulted in a net loss on the Great Indian Peninsula of 30 lakhs and on the North-Western of 13 lakhs. The net increase in the total Railway receipts, in spite of the large increase in gross receipts, did not exceed 73 lakhs or £484,400. There was also a net improvement under Irrigation of over 14 lakhs, largely owing to the failure of rain in the Punjab.

"11. There is not much to arrest the attention of any one running his eye down the comparative column in the Expenditure figures, until the entry of Famine Relief and Insurance is reached, except a satisfactory reduction under Salaries and Expenses of Civil Departments of about 20 lakhs, due almost entirely to the fact that the reserve for Plague expenditure was scarcely trenched upon, the Provincial Governments having generally kept the expenditure on plague within their Provincial grants. The difference shown in the statement above in the entries in the Budget and Revised Estimates under Famine Relief and Insurance is £1,319,800 or nearly two crores. This is, of course, the difference under that entry. But, with reference to my previous explanation, I may point out that the entry under Famine Relief and Insurance does not show the whole of the Famine Grant. To any critic who might ask where, then, in the Budget Estimate is your total crore-and-a-half, the answer is that part of the Famine Grant is shown in the Railway Revenue Account. It may be well to clear up this matter, once for all, since there has been some misunderstanding about it, by running through the total provision for famine purposes made in the Budget and Revised Estimates. Last March the total Famine Insurance Grant, £1,000,000 or one-and-a-half crores, was appropriated as follows: 113 lakhs to Famine Relief and Insurance, including Famine Protective Works and Avoidance of Debt, while 37 lakhs was taken in the Railway Revenue Account to cover the net loss on the Bengal-Nagpur and Indian Midland Railways. The total provision made for famine purposes in the Revised Estimate is £2,162,400 or 324 lakhs. Of this, £2,054,800 or 308 lakhs will, it is expected, be devoted to direct famine relief in British districts. A small sum of £18,000 or 2¾ lakhs will also be applied to certain Protective Irrigation Works. Both of these sums are charged under Famine Relief and Insurance. An amount of £89,500 or 13½ lakhs taken in the Railway Revenue Accounts will suffice to make good the interest on the Bengal-Nagpur and Indian Midland Railways owing to the improved earnings, mainly on the former Railway. Of the expenditure on direct famine relief the Central Provinces, where the famine made itself earliest felt, absorb 154 lakhs, Bombay takes 110 lakhs, the Punjab accounts for 22 lakhs, Ajmere 17 lakhs, and other Provinces 4 lakhs.

"I may also mention here that loans have also been made to Native States to the amount of 48 lakhs, but these are, of course, not charged against Revenue.

"The increase of £339,300 in the Expenditure chargeable to the Railway Revenue Account was required to earn the larger Revenue. The large saving of £405,200 in the grants for Buildings and Roads represents the usual lapses from the grants for Civil Works which were especially large this year owing to the exigencies of famine requiring greater attention to relief works and to economies in ordinary expenditure. Army expenditure shows a reduction of £738,400 owing chiefly to the despatch of troops to South Africa, Ceylon, and Singapore, the cost of which will be borne by Her Majesty's Imperial Government, and a considerable decrease in the payments for Ordnance stores in England also contributed to the result. The correcting entries after "Total Expenditure, Imperial and Provincial," relate to the net improvement in the Provincial Accounts as compared with the Budget Grants. The Famine expenditure has been mainly Imperial, and certain Provinces, principally Burma and Bengal, exempt from famine, have participated in the general improvement that, apart from famine, has taken place, to the extent of some 70 lakhs.

Before dismissing the fiscal history of the passing year, it may be noted with satisfaction that we were not obliged to have recourse to a loan. My predecessor left me with high balances, and it was decided last March to husband the anticipated surplus of the year in view of the pending report of the Currency Committee. We have not found it necessary to use a single rupee of the surplus for the purposes of our currency reforms, and it was therefore available and sufficed for all our other purposes.

"Rate of Exchange.

"12. The rate of exchange taken for the Budget Estimate last March was 15¾*d.* I think Sir James Westland would be the first to admit that he caused some surprise by taking so modest a figure. However that may be, the average rate during the first six months of the year was 16·002*d.*, but the average rate up to February 28 was 16·069*d.* The expectation is that this year will exemplify the oscillation of the rate in future; that is to say, that in the slack season it will be lower and may approximate to 1*s.* 3⅞*d.*, and in the busy season it will be steady at 1*s.* 4⅛*d.* We expect, when this year closes, to have remitted by Council Bills, including those issued against gold received in London, £19,000,000 equal to 2,837 lakhs of rupees.

I need hardly say that for next year we have taken 1*s.* 4*d.* as the rate, and with this remark I may pass to the Budget Estimate.

"Budget Estimate.

"13. It has already been stated that the Budget Estimate for 1900-1901 gives £70,155,800 as the Revenue, £69,995,500 as the Expenditure, and £160,300 or 24 lakhs of rupees as the Surplus. Following the usual practice I may now run through the various heads, illustrating them by comparison with the same heads in the Revised Estimate of the year which is still with us. The statement below will make the comparison easy:—

"Budget Estimates of 1900-1901 compared with the Revised Estimates of 1899-1900.

	Revised Estimate, 1899-1900.	Budget Estimate, 1900-1901.	Difference, + Better — Worse
Revenue—			
Principal Heads of Revenue—	£	£	£
Land Revenue	17,240,800	18,078,700	+837,900
Opium	4,403,800	4,559,800	+156,000
Salt	5,879,100	5,845,100	—34,000
Stamps	3,231,700	3,267,400	+35,700
Excise	3,860,600	3,819,300	—41,300
Customs	3,153,300	3,134,200	—19,100
Other Heads	5,959,700	6,019,000	+59,300
TOTAL PRINCIPAL HEADS	43,729,000	44,723,500	+994,500

TOTAL EXPENDITURE CHARGED AGAINST REVENUE	65,979,600	69,995,500	—4,015,900
SURPLUS	2,552,800	160,300	—2,392,500

" 14. Land Revenue, it will be seen, has been taken at £837,900 or one crore and a quarter higher in the Budget than in the Revised Estimate. It is hoped that famine will have disappeared by the end of next September. The increases in the different Provinces are, Bombay 67 lakhs, Madras 31 lakhs, and Punjab 27 lakhs. There is not much that calls for comment under the other Principal Heads. We have taken Opium at £4,559,800 or 684 lakhs. It is very difficult to forecast the course of prices. But the average price this year has been R1,221 a chest, and recent prices have been so good as to warrant us taking an average price of R1,200 a chest next year. The small decreases under other Principal Heads are due to famine. Passing further down the columns there is a decrease of £68,800 or over 10 lakhs under Post Office, Telegraph, and Mint. It will be remembered that there was an item of 32 lakhs in the Revised Estimates, profits on silver coinage. To what extent we may have to issue fresh silver coinage next year, after the very large additions that have been made to the volume of our rupee currency this year (this subject will be gone into more fully in another place), is uncertain. But meanwhile we are equipping ourselves with a further half million pounds worth of silver. The Secretary of State has bought this amount, which we expect to receive in April. The profit on coining it is taken at 32 lakhs, the same amount as this year. Profits from copper coinage, however, are not likely to be as large as this year, and we take 3 lakhs less under Telegraph revenue. The anticipated receipts from Railways require some explanation,

and it is necessary to cast a glance down to the Railway Revenue Account entry below under Expenditure. A great part of the increase in the receipts is only nominal, because in the last nine months of the year the Great Indian Peninsula will be a State Railway. In the case of a Guaranteed Railway, which the Great Indian Peninsula will continue to be for the first three months, the net receipts only are shown on the Revenue side of the account, and the working expenses are not shown in our expenditure. In the case of a State Railway, gross receipts, of course, are shown on the Revenue side, and working expenses on the Expenditure side. The acquisition of the Great Indian Peninsula, therefore, means a larger addition to either side of the account. Apart from this change in accounting, the Railway Revenue for the year is 53 lakhs less than the Revised Estimates, but we hope that grain traffic will not again be stimulated by Famine.

"15. To pass to Expenditure, under Direct Demands on Revenue there is an increase of 28 lakhs, 18 lakhs of which occur under Land Revenue mainly owing to Famine establishments. The increase of £139,000 or 21 lakhs under Post Office, Telegraph, and Mint is attributable to the normal growth of the first two Departments. Any increase under Salaries is usually jealously noticed. The increase of 46 lakhs in respect of Civil Departments is due to a variety of causes. Eight lakhs under Jails are due to Famine, *i.e.*, high prices of food grains; 15 lakhs under Police are largely due to the same cause; Scientific and Minor Departments get 14 lakhs, of which 7 lakhs will go to Census, and the increased expenses of Law Courts will take over 7 lakhs. The striking item in the expenditure columns is, unfortunately, famine relief. I have explained how the total expenditure of £2,162,400 or 324 lakhs in the Revised Estimate is arrived at. The total expenditure for famine purposes of all kinds next year will be £3,505,400 or 526 lakhs, of which all but 5 lakhs will go to direct famine relief in British India, while 20½ lakhs will be provided to make up the loss on the Indian Midland and Bengal-Nagpur Railways. Bombay alone requires over 248 lakhs and Central Provinces 180 lakhs. The Punjab demands 37 lakhs; Ajmer will want 16 lakhs, and other Provinces, chiefly Madras, will want 19½ lakhs. We are meeting the demands of the Provincial Governments in full. We are also assisting the Native States by loans to the amount of nearly 75 lakhs. Grants under the head of Buildings and Roads have been generally reduced in the Provinces owing to famine, but Burma, where the Provincial finances are prosperous, proposes to spend an additional 21½ lakhs out of its wealth on these objects. Military Works expenditure has once more been confined within 115 lakhs. Army Services show an increase of £1,229,200 or 184 lakhs. Of this amount, 37 lakhs must be put down to higher prices of food supplies for men and animals, 22 lakhs are on account of replacement of additional horses sent to South Africa which will be eventually recovered from Her Majesty's Government, and 13 lakhs are on account of the Troopship Service, the cost of which was abnormally low this year owing to the partial suspension of the Home reliefs. Eliminating these items, I may state the increase to Military Estimates at 112 lakhs, of which the re-armament of the Native Army absorbs more than a third. The increase in the Military Estimates is, of course, a payment towards National Insurance. The Military Estimates, and their bearing on our Military policy, are explained by the Honourable Military Member in his Memorandum.

"Railway Construction.

"16. Under existing arrangements it is the practice of the Government of India to prepare triennial programmes of Railway Construction embracing all Capital expenditure for which Government undertakes any financial responsibility or gives any direct guarantee. The figures for any year included in the triennial programme are also examined in October or November of the preceding year, and the programme of expenditure of the ensuing year is then finally settled in communication with the Secretary of State with reference to immediate requirements for expenditure and to the general Ways and Means of Government.

17. The last triennial programme of Capital outlay on Railways was prepared in November 1898 and contemplated an expenditure of just over 20 crores in the three years from 1899-1900 to 1901-1902 distributed as follows:—

	£		R
1899-1900	£4,515,100	equivalent to	6,77,27,000
1900-1901	£4,485,600	" "	6,72,84,000
1901-1902	£4,547,300	" "	6,82,10,000
	13,548,000		20,32,21,000

For reasons already explained by Sir J. Westland last year, it was decided in 1899-1900 to add to the amount originally contemplated, a considerable amount which, as he said, might "be regarded as arrears of the old programme handed on to the new one" and the grant announced in the Budget Statement was for R8,82,27,000. But this increased grant has been exceeded, and we found ourselves obliged to make additional grants of 46 lakhs during the year to meet expenditure beyond their allotments in which the East Indian and the Assam-Bengal Railways had involved themselves.

"18. The expenditure of R6,72,84,000 proposed for the year 1900-1901 in the triennial programme adopted in November 1898 included 1⅛ crores for new projects. But when, in October last, we resurveyed the programme in the light of the situation at that date, it was found impossible to restrict the expenditure on open line Capital, and on projects already begun, to the amounts contemplated in November 1898. It would have been necessary, in order to meet this class of demand, and also to provide for the new projects set down for the year, to increase the total expenditure on Railway Construction to R8,22,84,000. The enormous demands for famine which were looming on the near horizon, prevented any thought of expansion. All new projects had, to our great regret, to be swept aside, and even outlay on works in progress did not escape some reduction. Instead of increasing the figure of R6,72,84,000 we reduced it in October to R6,54,00,000, but special additional provision has been made for the Assam-Bengal Railway since October, and the final figure for next year will be R7,30,84,000 or £4,872,300. The totals, £6,188,500 or R9,28,27,000 in the Revised Estimates and £4,872,300 or R7,30,84,000 in the Budget, are distributed as follows:—

	Revised, 1899-1900.	Budget, 1900-1901.
	R	R
I. State lines managed by the State or Companies	5,25,29,000	3,80,14,000
II. Lines of Old Guaranteed Companies and extensions	1,00,86,000	49,96,000
III. Lines of other Guaranteed or Assisted Companies	2,87,32,000	2,96,24,000
IV. Branch lines on firm guarantee	14,80,000	4,50,000
TOTAL	9,28,27,000	7,30,84,000

"Capital Expenditure on Irrigation.

"19. For some years it has been the practice to provide a fixed grant of 75 lakhs a year for Capital expenditure on Irrigation Works. In the Budget Estimate of the current year the grant was raised to 85 lakhs. We desired to raise the grant substantially during the year, but our necessities curtailed the proposed increase to some 5 lakhs which, moreover, the Department undertook to spend on works providing labour in famine districts. This year's grant will, therefore, absorb about 90 lakhs. Looking to the very remunerative character of the greater part of our Irrigation outlay, and to the immense value in times of scarcity of the food supplies which can be relied upon with confidence to come from the irrigated areas, the Government of India has resolved to spare no effort to make ample provision for irrigation. In pursuance of this policy it has been decided, in spite of our difficulties, to raise the irrigation grant in the Budget to a full crore.

"20. The following are the details of the estimates:—

	Revised, 1899-1900.	Budget, 1900-1901.
	R	R
Mandalay Canal	11,00,000	9,00,000
Lower Ganges Canal (including Fatehpur Branch)	9,45,000	4,16,000
Chenab Canal	9,15,000	7,90,000
Jhelum Canal	26,86,000	34,14,000
Jamrao Canal	12,07,000	7,51,000
Other Projects	21,20,000	37,29,000
TOTAL	89,73,000	1,00,00,000

" Remittance and Debt.

"21. The following are the usual details of the requirements of the Secretary of State:—

(A)

	Revised, 1899-1900.	Budget, 1900-1901.
Requirements on Government Account—	£	£
Excess of expenditure on Revenue Account	16,249,700	17,071,500
Expenditure not charged to Revenue	644,000	6,835,900
Net payments on Remittance Account, etc.	—419,700	330,000
Total Requirements	16,474,000	24,237,400
Transactions of Railway Companies—		
Net receipts on account of Capital	1,606,300	3,413,500
Payments for Stores, etc.	3,054,400	2,740,600
Net Outgoings	1,448,100	—672,900
Net Funds required	17,922,100	23,564,500

The following figures show how the above requirements will be met:—

(B)

	Revised, 1899-1900.	Budget, 1900-1901.
	£	£
By sale of Council Bills	19,000,000	16,440,000
Transfer of gold to or from Currency under Act II of 1898	—1,500,000	500,000
Purchase of silver for coinage	—500,000	...
By addition to Permanent Debt	...	5,922,400
Increase of Temporary Debt	...	500,000
Reduction of Cash Balance	922,100	202,100
	17,922,100	23,564,500

" According to the programme announced in the last Financial Statement the Secretary of State intended to renew £4,500,000 Temporary Debt on the security of India Bills, and no addition to the Permanent Debt of Government was intended. This intention has been carried out, but the amount of Temporary Debt created and discharged has been £6,500,000 owing to some of the India Bills having been issued for six months and having consequently to be replaced twice within the year.

"22. The heavy trade demands for remittances during the year enabled the Secretary of State to raise his drawings on India from £17,000,000 to £19,000,000, but owing to the Famine expenditure, the treasury balances in India were not sufficient to meet the demand in full, and £1,500,000 out of the total drawings were met out of the Currency reserve, the gold being set apart in England under Act II of 1898. The Secretary of State has also employed £500,000 of the proceeds of Council Bills for the purchase of silver for coinage into rupees, the Government of India having decided that a further coinage of rupees, in addition to the coinage of the present year, is desirable. Thus the net addition to the Home Treasury balances by means of Council Bills in the year has been £17,000,000, the same amount as was entered in the Budget Estimate. A sum of £650,000 will be received from Her Majesty's Government in repayment of the disbursements in India in connection with the despatch of Troops to South Africa. With other insignificant differences the total reduction of cash balance during the year is now estimated at £922,100 against £1,487,100 taken in the Budget Estimate.

"23. It will be seen from Statement A in paragraph 21, that the gross requirements of the Secretary of State for 1900-1901 amount to £24,237,400. The first item is "Excess of Expenditure on Revenue Account" £17,071,500. The second item, £6,835,900 opposite "Expenditure not charged to Revenue," is exceptional in character. Part of this expenditure is, as usual, for stores, but the far greater part, £5,922,400, is really a book entry connected with the purchase of the Great Indian Peninsula Railway, and will be explained below. The gross requirements are reduced by the surplus of the money raised by Railway Companies over the issues to be made to them (that is, by £672,900). Therefore the net requirements become £23,564,500. Statement B will show how it is proposed to meet this net requirement. The Secretary of State's drawings will be limited to £16,440,000 to which are added £500,000 from an increase in Temporary Debt in the form of India Sterling Bills, while £202,100 will be taken from the Cash Balance in London. In addition, the Secretary of State will receive a further sum of £500,000 from gold forming part of the Currency Reserve, but held in London, on the payment of the equivalent in India into the Currency Reserve here from silver purchased this year for coinage in India. The entry opposite Permanent Debt of £5,922,400 completes the £23,564,500. It represents the Debentures and Debenture Stock of the Great Indian Peninsula Railway Company, which will be purchased on June 30. This is really no increase to the Permanent Debt, and no new liability, for, when the Great Indian Peninsula was a Guaranteed Railway, the Secretary of State was always ultimately liable. It is in fact a book entry: and balances a book entry of a corresponding amount included under the item of £6,835,900 in the statement of the Secretary of State's gross requirements. Owing to the assistance procured in these various ways the Secretary of State avoids raising fresh Permanent Sterling Debt.

"We estimate that in India we shall have to borrow for Way and Means up to three crores of rupees.

"24. These announcements, both as regards the amount of Council Bills and as regards loans in England and in India, are made with the usual reservation of entire liberty to the Secretary of State and the Government of India to vary the amounts as may be found convenient.

"Financial Changes in 1899-1900.

"25. In turning to the financial changes of the year, it must be premised that under the pressure of famine Government can do little more than cope with immediate difficulties, and mark time so far as the fiscal system is concerned. Nevertheless, this year has witnessed the working of new economic legislation destined, perhaps, to be far-reaching in its effects. I refer to the Tariff Amendment Act whereby countervailing duties were imposed on bounty-fed beet sugar. The Act received the assent of the Governor General on March 20, 1899, but, as it did not apply to sugar in transit, its actual operation dates from the current financial year. Responsibility for the actual introduction of a more momentous measure belongs exclusively to the twelvemonth now terminating. India has at length emerged from a period of transition in her currency, has reached the goal to which she has been struggling for years, has established a gold standard and a gold currency, and has attained that practical fixity in exchange which has brought a relief alike to the private individual and to the Government finances. Yet, it is not only as regards currency that India has been called upon to set her house in order. Her equipment as regards banking is admittedly unsatisfactory and retards her development. There is, indeed, unanimous agreement on this point, although, as is natural, in a matter of extreme intricacy and where divergent, or apparently divergent, interests are concerned, there are various opinions as to the really weak places in the equipment, and as to the remedies to be applied. The outgoing year has witnessed no legislation on this important subject, but there have been discussions which, I venture to think, have contributed to clear up some of the issues involved, and the Secretary of State has the views of the Government of India now under consideration. I may perhaps beg the indulgence of Council if I proceed to touch in some detail on these three important events which distinguish the year, countervailing duties, currency legislation, and the examination of our banking position.

"Countervailing Duties.

"26. The countervailing duties on bounty-fed beet sugar came into force, as I have said, in the current year, practically not until May. We have, therefore, the experience

of less than a year to guide us, and indeed the figures from May 1899 to January 1900 are all that are now available. It is most unfortunate that trade was conducted under abnormal conditions of plague, or of plague and famine, during this period, and we cannot, in consequence, even look to these months as throwing light on the effect of the measure under normal conditions. Nevertheless, the figures will have considerable interest for Council, though I should myself like further experience, under more normal conditions, before drawing any final conclusion. Austria is our great purveyor of beet sugar. The total exports of beet sugar from Austria-Hungary to all the world are worth about £5,500,000, and constitute one-twelfth part of that empire's entire exportations; Austria-Hungary is therefore likely to fight hard for this trade. The total amount 498,484 cwt. received by India from Austria during the nine months I have taken was 26 per cent less than the amount in the corresponding period of 1898-99 and 25 per cent less than that of 1897-98. German beet sugar, which had been largely displaced by its Austrian rival before our legislation was undertaken, dwindled from 300,604 cwt. in the nine months of 1898-99 to 31,138 cwt. in the nine months ending last January. The total imports of beet sugar, 530,705 cwt., the additional duties on which are expected to yield in the whole year some 7 lakhs, were accordingly 44·6 per cent *less* than in the corresponding months of 1898-99 and 63·5 per cent *less* than in the corresponding months of 1897-98, but they were 63·3 per cent *more* than the average in the same months of the five preceding years. The fluctuating character of the importation is very noticeable. Nevertheless, the diminution in the imports this year compared with the last two years is striking, and taken by itself the decline might be held to indicate that the import of beet sugar had been arrested; but, at the same time, it must be remembered that there was a quite sudden and abnormal expansion of imports in 1897-98, that stocks were unusually large in Bombay in 1898, and that the entire decline in the imports of beet sugar has occurred in Bombay and Karachi, indicating also, I am afraid, that the purchasing power of the people on our Western sea-board has been sadly reduced by their accumulated disasters. The total import of sugar into India during the nine months was beet sugar and cane sugar together, an aggregate of 2,308,432 cwt. or 11·7 per cent less than in the previous corresponding nine months, 22 per cent less than in the same months of 1897-98. The value in sterling was £1,681,138. The decline in beet has been in part made up for by larger imports of cane sugar. As regards these, I find that the imports from Mauritius are smaller than last year but larger than the year before; those from Java and China rose considerably. Passing to the influence of the Act upon prices, it is notable that prices rose immediately after the Act, though they are now tending to decline, and the rise in prices may, I think, be assigned principally to the measure. Producers of cane-sugar in China and Java have profited by the rise in price. How far it has benefited Indian producers it is impossible as yet to say. We are awaiting replies from the Local Governments on this point, and are not yet able to say whether native refining industries have received any stimulus.

"Trade and the 1s. 4*d*. Rate.

" 27. Before proceeding to the second event, which distinguishes the financial year, the introduction of the gold standard and gold currency, I would, as a preliminary, invite attention to the volume of trade in the past ten months. Special reason exists for looking closely into these figures both with regard to the trade balance on which India depends to meet her foreign obligations, and with regard to the sterling rate fixed for the rupee. Strong objections were taken to stereotyping the rupee at 1*s*. 4*d*. on the ground that the trade of 1898-99 was altogether unprecedented and abnormal, that such a volume of trade was unlikely to recur, and that the normal volume of trade required a rupee at a lower sterling ratio. It was further urged that a rupee appreciated to 1*s*. 4*d*. would check exports, and would, in particular, exercise an evil influence on our opium revenue and trade with China. How far have these objections been supported by facts, how far do the figures of the year indicate what is the normal volume of Indian trade? The answer to these questions will, I think, dispel any apprehensions that may still linger as a consequence of the objections mentioned. It might, indeed, have been expected that our trade would not have kept at the level of 1898-99. It has been carried out under conditions which have certainly checked anything like a normal rate of growth. Plague has been with us the whole time, the failure of the rains and famine came early, and the cotton-spinning and weaving industry has been more or less in a

critical condition owing, I think, to over-production in relation to the Chinese market. In spite of these adverse conditions the total volume of our trade, excluding Government transactions, measured in sterling compares as follows with the trade of the corresponding ten months of preceding years:—

First Ten Months.	Imports.	Exports.	Total Trade.
	£	£	£
1897-98 . . .	48,932,487	55,976,774	104,909,261
1898-99 . . .	44,252,991	65,045,099	109,298,090
1899-1900 . . .	50,367,975	64,993,058	115,361,033

The import trade completely recovered from its depression, at any rate as far as the earlier months of the year were concerned. Some part in this increase is due to fresh capital coming out to India, and the imports of gold, in sovereigns from Australia and in gold yen from Japan, play a large part. But it was the effect of the 1*s*. 4*d*. rupee on the export trade that was chiefly dreaded, and it was in respect of exports that 1898-99 was declared to be an unprecedented year. The figures do not bear this out, although there has been a serious decline in the export of wheat and in the export of rice, owing, as regards the latter, to the rice, which would otherwise have been exported to foreign countries, being diverted to the famine districts in India. Nevertheless, in spite of this, the decline in the whole value of the exports is a very small fraction. Whether February and March, with the continued diversion of rice to India, and the failure of cotton and oil-seeds in Western India owing to the drought, will yield results on the same scale as the months under review, is doubtful. But I think it is clear that our exports, even under the depressing circumstances of this year, show that 1898-99 was in no sense an exceptional year, and that their expansion in happier times may confidently be counted upon. I have alluded to the diversion of Burma rice to India. The extent to which Burma is becoming the food reservoir of India is remarkable, as the following figures will show:—

First Ten Months.	Total quantity of Burma rice produced.	Quantity of rice sent to India.	Value of Burma rice crop [based on Rangoon prices in the rice season].
	Tons.	Tons.	£
1896-97	2,384,000	168,500	12,800,000
1897-98	2,611,000	500,300	12,400,000
1898-99	2,243,000	259,000	10,650,000
1899-1900	2,790,000	427,700	14,100,000

Rice indeed is our premier export crop. The hopes that were once founded upon wheat have been disappointed. In the last six years the average annual value of the wheat trade has been about £2,700,000, that of the rice trade over £8,500,000. Wheat in India is a very uncertain crop, and the demand for it hardly exists except when crops are short elsewhere. But Lower Burma has never known a failure of the rice-crop; the demand for Burma rice is constant, and the Burma crop is a dominating factor in the markets of Europe, Asia and South America. Looking further into the figures of our exports it is notable that the export of food grains is about £5,050,000 less than last year, but other articles have come to the rescue, including, amongst many others, tea, raw sugar, wool, jute and its manufactures, coffee, hides, opium.' The increase in the last item but one, hides, is not, however, a matter for congratulation, as it is largely due to the mortality among cattle in consequence of drought. But the statistics for opium do not support the allegation that the enhancement of the rupee, and the fall in the China exchange on India, would check the opium revenue. The demand in China has been brisker, and the average price R1,221 realized per chest is higher than the average prices R1,023 and R1,055 in 1897-98 and in 1898-99. I trust that this examination of our trade will be considered sufficient to allow me now to pass to the gold standard without further discussion of the sterling rate adopted for the rupee.

"Gold Legal Tender.

" 28. The measure passed on the 15th September to make gold legal tender in India was the outcome of the Indian Currency Committee's Report. Clear and convincing as the Report was, and desirable as it seemed to give immediate effect to its recommendations, the Government was subjected to considerable pressure to defer action when the Report appeared. We received urgent representations from several important quarters to hold our hands. It was contended that in making the sovereign legal tender Government abandoned the advantages which the monopoly position of the rupee gave for

attracting gold; that the moment the sovereign was legal tender, it would cease to reach Government, it would be absorbed, would disappear like rain into the sea, etc., so that the gradual accumulation of gold would be arrested, and that Government would be driven into borrowing for its stock of gold. We considered these objections carefully, but decided that the case for postponing action was not made out, and believed that exchange would tend to settle, at any rate in the busy season, at the maximum level possible under our policy, and that gold would not be deflected but would still reach us. The result is well known. The alarmist predictions of our friends have not been verified. Instead of gold ceasing to reach us we have almost been swamped with gold. Difficulties, of a temporary character, it is true, have arisen from its plethora, not from its scarcity, so true is it that the unexpected always happens.

"29. I do not venture to claim for one moment that Government foresaw the enormous inrush of gold which has been brought about by the withdrawals of silver up-country on account of famine relief by unusual movements of grain, and by the requirements of an exceptionally large rice crop in Burma and also by capital coming out to India. But it is not unfair to claim that the reasons which decided Government to take instant action have proved sound, and that, independently of the abnormal causes to which I have alluded, the operation of other causes on which Government relied has not disappointed us. As I have said, we have been nearly swamped (temporarily) by gold. The amount in our currency reserve on April 1, 1899, was £2,030,000. It stood on March 7, 1900, at £7,069,800; the amount accumulated in London under Act II of 1898 stood at £1,500,000 making the aggregate £8,569,800. The difficulty has been that of meeting the demand for rupees in exchange for notes or gold tendered to us. To meet this demand we could rely in the first place upon the silver liberated from the currency reserve by the gold taking its place. But it is obvious that a certain number of rupees must be kept to meet the needs of the public, and that the stock of rupees must not, therefore, be unduly reduced, while the amount of gold that can conveniently be kept in the actual currency reserve in India must depend partly on the extent to which gold will pass into circulation. It has been decided as a tentative measure to hold £5,000,000 in our reserve in times of low balances, though this normal amount may be increased in the time of high balances, and to pay out any gold in excess of the £5,000,000 minimum reserve. Now, if we had only paid out silver up to the extent of five millions of gold, we should of course have released 7½ crores of rupees. But the gold which has been passed into us for silver in India amounted up to the 10th of March to £7,208,000 and has drawn out from us 10 crores and 81 lakhs of rupees. In addition there was the amount paid out on account of gold received in London, so that our balance of coin in silver rupees began to run low. We decided, therefore, to re-coin some uncurrent silver we had by us and also to buy new silver for coinage. Our new rupee coinage will amount to about 2½ crores. We neither propose to add more rupees than are necessary of new coinage to the circulation, nor to hamper trade by refusing rupees for gold or notes presented.

" To sum up, before the beginning of the present year we had added 305 lakhs from our reserve to the volume of silver circulation in exchange for gold presented to us. In this year we have added 776 lakhs in exchange for gold presented in India, and 225 lakhs in exchange for gold paid in at home, a total for the year of 10 crores 1 lakh. To enable us to make these additions we have had to coin new rupees, amounting to about 1½ crores, and to ensure our meeting further demands we have decided upon supplementary coinage to the extent of 1 crore, a total, as stated above, of 2½ crores.

"The Rupee Currency.

" 30. This brings us to the important question of the relation of the silver currency of India to the functions which it has to perform. Perhaps it is not rash to assume that in 1893 the silver currency was redundant. It is impossible to arrive at mathematical accuracy on this subject; but its importance is extreme, and although I am aware that I shall be treading on controversial ground, it is not right to pass by on one side. There are such enormous deductions to be made from the quantitative theory in western countries amply equipped with credit money, with progressive transport, and with constant reductions in the number of hands employed in given industries, that the theory virtually disappears from sight, and that the quantity of standard coin offering in the market probably operates only in so far as Bank

reserves may be concerned. But in India where these deductions cannot be largely made, and where other conditions do not change rapidly, the quantity of currency being supplied and offering in the market must have a very material effect in regulating its value in exchange with other commodities. Therefore the relation between the volume of the currency, and the duty that is thrown upon it, is very important in India, not only as regards rupee prices in the country, but as regards exchange through the influence of rupee prices on exchange. I am not of course denying that exchange also depends upon the relation between our exports and imports, but it must not be forgotten that the volume of currency as influencing rupee prices is another material factor. To put it in an extreme form, could it be denied that if the quantity of currency offering in the country was suddenly doubled, other things being equal, that is to say, other conditions remaining unchanged, prices would not also tend to double, and exchange to fall in a corresponding ratio? Therefore our currency policy, as a whole, must be affected by the relation between the volume of currency and the number of transactions, and it is essential that the currency should adapt itself automatically to the requirements of trade. Looking to the events of this passing year my own impression is that the redundancy or superfluity of the silver currency that formerly existed has been absorbed. At the same time the normal march of affairs has been complicated by unusual factors, such as the famine and drain of silver to relief works, and there is need for caution. We shall be in a much better position to form a sound opinion as to the sufficiency or otherwise of our silver currency when silver coin flows back to trade centres from famine districts, and when we have had the experience of contracted trade in the summer months. The influence of the return of this silver and of the after-effects of famine must be awaited with some anxiety on the part of Government—an anxiety which, however, will be mitigated by the fact that the accumulation of gold, available for foreign remittance, has been much larger than we could have reasonably expected. I say the after-effects of famine because I believe, though it may seem paradoxical, that famine stimulates exchange. Or, rather, that this is the immediate effect of famine owing to the withdrawal of rupees from trade centres and the consequent greater demand for the rupees left in those centres, while the curtailment in exports resulting from shorter crops does not influence exchange until some months after famine has made its appearance and after the expenditure on famine relief has begun. However, under our present system the volume of the silver currency may be fairly regarded—under normal circumstances, for I must except famine demands—as adjusting itself automatically to the duty thrown upon it; in other words, to the demands for it. I should indeed shudder if it were left to the Government to determine, with nothing to guide it, whether the currency was or was not redundant, and to take action accordingly. It would be more than difficult to steer a middle course between the Scylla of stringency with lowering of prices and the Charybdis of dilution of the currency with depression of exchange. But henceforward the Government will be guided by the trade demand for our silver-circulating medium, for our notes printed on silver as we may really regard our rupees as being, the trade demand expressing itself in the presentation of gold. As long as Government refrains from coining rupees, except upon the demand of trade, there can be no dilution of the currency. There can be no contraction, as long as trade, if it needs rupees, has only to tender a sovereign to obtain silver coin in exchange, coin already in our balances or new silver coin if the balances will not suffice. The only difficulty will consist in closely watching the times and seasons so that the supply may be there to meet the demand and not be forestalled, as rupees take time to coin. But experience will soon supply indications for the future. It has already been stated that we are in process of equipping ourselves with additional silver to the value of one million sterling. The only other intervention of Government that I can foresee will possibly be recourse to shipping surplus gold to Europe as a temporary corrective in abnormal times, such as upon the return from up-country of silver coins after a famine. It might, under such circumstances, be desirable to restrict Council Bills temporarily. But the inflow and outflow of gold through private agency, according as the demand varies in either direction, is expected to become a regular factor in Indian business.

"Gold in Circulation.

"31. Having thus dealt with the general question of our currency, I may now turn to an interesting point: how far gold coins are passing and are likely to pass into general circulation? It has been said that we resolved when our gold reserve exceeded

the fixed minimum of £5,000,000 to pay out gold. We began to give out gold on January 15. I may perhaps explain that Government has no intention of forcing gold upon a reluctant public, although, now that the public has spontaneously taken a certain number of sovereigns, we thought it was not unjustifiable to familiarize people more widely with gold by cashing Postal Orders in Presidency towns of the value of R15 or £1 in gold coins, and we also propose to pay certain salaries in gold in the Presidency towns. Recipients of these gold coins can, of course, always get silver for them, if they really desire silver, by tendering them at the Currency Offices. The amount of gold taken out from the Currency Offices voluntarily by presenters of notes from January 15 to March 10 has been £130,700. Calcutta easily ranks first on the list of towns that are taking to the use of gold. Calcutta has absorbed £84,309. I believe that the rate at which gold is taken is likely to increase slowly, and that gold will pass gradually into general circulation in our sea-ports and large towns. No expectation was ever formed, nor is there any reason to desire, that gold would penetrate into the interior, or that the large mass of transactions in the country would ever be conducted except through the medium of silver and copper. Gold is behaving very much as we anticipated. We have been frequently told, and with perfect justice, that we could never claim to have a true gold standard in India until we were prepared to exchange gold for rupees as well as rupees for gold. By being prepared to exchange I do not mean that we should accept a legal liability to give gold for rupees, but that in practice, as for example in France, anybody who wanted gold for internal purposes should be able to obtain gold freely, without let or hindrance. Theorists, indeed, argue that neither France nor the United States possess a gold standard in the full and complete sense of the words. But I think no one will dispute that if we can advance to the same position as France we shall have attained a gold standard for all practical purposes. A year ago it seemed that we should probably have to sit for a long while under the reproach of our critics, and put up with what has been termed an "exchange standard." It then appeared impossible that in twelve months we should be paying out gold to anybody who asked for it. We are doing so now. Whether we shall be able to continue to do so without check or interruption, whether now we have once started giving gold for rupees we may not have to suspend temporarily, is not a matter about which confident prediction can be made. But it would be reasonable to say that the auguries are not unfavourable for our being able to pursue the path on which we have entered. Our position in respect of gold is strong. In India and in London we have accumulated nearly £8,600,000. We have, as I have explained, set aside £5,000,000 for the present as our minimum reserve against eventualities, against the contingency of the Secretary of State's being obliged to restrict or curtail his drawings and to ask us to ship home gold to enable him to meet his obligations. Any gold received in excess of this minimum, or of such minimum gold reserve as may, with further experience, be established, we shall be ready to pay out as we are paying it out. But the probability is that the gold reserve, ultimately available for foreign remittance, will continue to exceed the minimum experimental reserve. Gold is still coming in, though the inflow is expected to slacken, and may, with confidence, be expected to reach us at least in every busy season. And in addition to the gold received from abroad, we may reckon upon the gold mined in India. It has been decided to constitute a branch of the Royal Mint at the Bombay Mint for the coinage of gold. The terms of the proclamation to be issued under the Imperial Coinage Act have been settled, and we are merely awaiting now until the Royal Mint has satisfied itself as regards the Mint premises and appliances at Bombay. A representative of the Royal Mint is starting this week for Bombay to report. The gold from the Mysore mines is, indeed, already reaching us in anticipation of coinage, and we count upon receiving an annual increment to our stock of gold of from one-and-a-half to two millions from this source. And may I perhaps express satisfaction in passing that we have been able to assist the Indian gold mining industry by saving it the freight and charges incidental to the transmission of its gold to London?

"Exchange and Telegraphic Transfers.

"32. It is but a few years ago, since a Finance Member exclaimed at this season 'Exchange is still the only burden of my song,' and on looking back through the Financial Statements and discussions of the last twenty years exchange is writ large, very large, on every page. There is little to be said about exchange this year. The object of the Government, a stable exchange between the gold points, *i.e.*, an exchange

varying between 1*s.* 3¾*d.* and 1*s.* 4⅛*d.* or, in the case of telegraphic transfers, 1*s.* 4 5/32nds., has been maintained. Indeed there would be nothing to be said about exchange, were it not for the fact that for a brief period, and for exceptional reasons, exchange advanced above 1*s.* 4 5/32nds. I refer to the action of the Secretary of State in deciding in January to limit telegraphic transfers under Act II of 1898, whereby silver can be obtained from the currency reserve against the deposit of gold in London: to limit them, I should explain, by progressively enhancing the price for such accommodation. The situation that dictated such action was to some extent caused by the Exchange Banks, who, as profitable employment for money existed in London, had not brought out money to India at the beginning of the season. Indeed the Exchange Banks in December urged that any loans which Government might be able to make to the public should be made to them as well as to the Presidency Banks, or failing this, if the loans were made through the Presidency Banks, they demanded to have a first refusal of this money to the exclusion of merchants, European and Native. The request was refused.

"33. The season opened, therefore, without the assistance of the money that is usually brought out before Christmas by the Exchange Banks. But after Christmas, when rates grew easier in England, there was a sudden demand for transfers to obtain money here, while at the same time there were unprecedented demands for coin to move a record rice crop in Burma, together with an increasing drain of silver to the famine districts, and an inflow of gold exceeding expectations. The silver coin reserve of Government in consequence rapidly neared a point at which it was impossible to continue to meet unlimited transfers. Therefore the Secretary of State decided to limit the demands by gradually raising the rate, thus meeting the most urgent demands, and weeding out the less urgent, while warning those whose demands were not so urgent to ship gold to India. No other course was practical. The liability of the Secretary of State to keep the tap turned on indefinitely at 1*s.* 4 5/32nds. has been asserted. But I cannot see that any positive liability exists, and I wonder if those who assert its existence would have preferred that the stability of our currency (whose situation they were well able to appreciate and follow) should have been affected by the reserve of rupees being dangerously reduced? There is another observation to be made, though I am afraid it may be resented in certain quarters because it is inconveniently true. The incident exemplifies the difficulties which Indian trade is likely to run into, if the Banks and merchants trust to Government always meeting their demands from its resources instead of supplying themselves with funds.

"Banking Discussion.

"34. I have already stated that the current year has been marked by much discussion on the banking situation in India. It was inevitable that this discussion should arise. Recent years in India have abounded in periods of stringency, and more than one exceptional measure, such as the reduction of the silver in the currency reserve, has been taken to deal with an imminent crisis. It has long been clear that something is amiss, if not actually rotten, in the State of Denmark. Writing in December last the Bengal Chamber recorded a deliberate opinion that its members "are convinced that in the busy season the banking facilities of India are not sufficient for the trade and satisfactory development of the country, and at times of pressure the existing arrangements for giving relief seem to them to be quite inadequate." These are grave words. That discussion indeed has not supervened earlier may be attributed to the existence of general hesitation while India was passing through the transitional stage immediately following the closure of the Mints. But the moment India emerged from that stage the subject pressed for consideration, and this is an answer to the somewhat wild statement that Government has forced on this question, because the establishment of a gold standard was not proceeding fast enough in its judgment, in order to hasten this desired consummation. In so far as the establishment of a gold standard (which has perhaps proceeded even faster than our desires) has had any influence on the matter it is this. We have been told to expect with a stable exchange that British capital will more readily seek investment in India, and indeed there are more than indications that reasonable expectations will not be disappointed, for a not inconsiderable amount of capital has come out. The tide has turned. But if capital seeks India more readily, investments will no doubt be made in mines, railways and industrial enterprize generally, and there will arise a demand for banking facilities in connection with these investments. The revision of our banking situation was, therefore, in nowise part of a design to hurry

on the gold standard, but followed upon the initiation of that standard. The matter was brought to a head by a request, and a very natural request from the Presidency Banks, for the extension of their statutory powers. We thoroughly sympathized with that request; not so much in the interests of the Banks, as in the interests of the development of India. But a doubt existed, and had previously found expression, how far, in view of their capital and resources, it was prudent to extend the operations of Banks which are the custodians of the public balances, and in whose cash balances the Government account bulks so largely. The Bank of Bengal stated in a letter of the 2nd of December last that the Directors were of opinion that the restrictions imposed on their operations might be "withdrawn with safety and advantage without *in ordinary times* overtaxing the resources of the Banks," and added that they "would not be disposed to countenance any great extension of the Bank's investments in securities which might not be easily realizable." But we have to legislate for extraordinary as well as for ordinary times, and the securities of Assisted Railways and District Boards will probably not be easily realizable for some time to come. The discussion of the banking situation to my mind has been of great utility, and I cannot believe that the discussion, to which valuable suggestions have been contributed from many quarters, and in which the public has taken so much interest, will not, sooner or later, result in some important improvement. The Government of India for its part carefully considered the various representations and arguments that have been made, and has submitted comprehensive recommendations to the Secretary of State. No answer has yet been received, nor, considering the importance of the subject and the shortness of the time, could an answer have been received. As anything which can elucidate the subject is not amiss, I may perhaps before leaving the question offer one explanation. Considerable criticism has been directed against the proposed project of a "State Bank." It was not unnatural perhaps that some misconceptions should arise until the exact recommendations of the Government are made public. But, on the other hand, nothing has been stated by the Government, nothing was said by myself, when I had the honour to explain in Council, in answer to the Honourable Mr. Arthur, the suggestions I should make to Government, on which an allegation could be founded that the creation of a State Bank was contemplated. It is right to say this to remove the apprehensions that have been expressed in certain quarters of State intervention, State competition and other unspeakable horrors. What I then said I would suggest to Government for consideration was that a Central Bank of India, with branches possessing large local autonomy, might be formed by the amalgamation of the three Presidency Banks; that this Bank might, under certain conditions and restrictions, have access to London; and that to this Bank, as to an Agent, might (though this is not an essential condition) be entrusted the management of the Paper Currency. The arrangement as regards the note issue would be analogous to that which obtains in England. As regards its banking side, the Bank would have, as the Presidency Banks have now and as the Bank of England has now, the custody, at any rate to a large extent, of the public balances; and as in the case of the Bank of England, the profit derivable from the Government balances would be considered in fixing the remuneration of the Bank for doing the public business. If anybody cares to call a Bank framed on these lines, a Bank in which the Government holds no shares, on whose Board it has no Director, in whose banking profits it has no interest—if there is anybody who desires to term such an institution a State Bank, and to detect behind it the gruesome spectre of State competition, of course he is at liberty to do so. But he must then be equally prepared to call the Bank of England a State Bank, which it notoriously is not in the accepted meaning of language.

"Government Balances.

"35. There is yet another question at which I beg leave to glance in connection with the history of the year. I mean the utilisation of the Government balances in the busy season It may be as well, perhaps, though the matter has been frequently discussed and explained of late, to go over the ground once more. Government keeps its working balance in the Government Treasuries, the Reserve Treasuries and the Presidency Banks. Government Treasuries are maintained where there are no Presidency Banks or their branches. The Reserve Treasuries were instituted by Lord Northbrook to give Government control over a certain sum of money for emergencies, Government having been resisted and hampered on two occasions when it required to withdraw its own funds from the Banks for pressing needs. As regards the Presidency Banks, Government

keeps a balance at their Head Offices maintained at a fairly constant figure, and this balance may, in fact, in so far as it exceeds what is really required for treasury purposes, be considered as additional to the real working balance of Government. But there are seasons when the Government receipts exceed the amount required for its working balances and for the constant balance at the Banks. It might be supposed that this excess should naturally go into the balances at the Presidency Banks, and that the Government balance should shrink or expand according to the receipts or outgoings of Government. It has, however, been the arrangement, and a deputation from the Bengal Chamber of Commerce in 1898 recognised that it was advantageous, to have a fairly constant balance with the Presidency Banks, while the excess receipts of which I have been speaking flow into the Reserve Treasuries which, rather than the Banks, are thereby primarily exposed to the sudden and fluctuating demands which war and famine and all the exigencies of a great Government may entail. So far, therefore, as the Government balances in the Presidency Banks do not, as might be expected, mount up in the busy season, which is also the season of revenue collections, the Government is not open to the reproach of locking up its balances. I do not see that the arrangement could be changed under present circumstances, and Government could hardly move in the matter except at the request of the business community who were a party to it. Whether it would be not more natural to pass in all the Government receipts if the Banks had a larger capital and larger resources, and the Government could always count on getting its own money without serious disturbance, and whether the Reserve Treasuries are not an anomaly, but a disagreeable necessity, due to existing circumstances, are other and larger questions. If the Reserve Treasuries did not exist, if there was a Bank powerful enough to ensure Government obtaining any money it called for, a larger part of the money collected by Government would be returned into ordinary channels and be available for trade. The real gist, however, of the accusation that Government locks up its balances is concerned with the granting or refusal of temporary loans in the busy season from those funds which I have described above as the receipts in excess of our working balance. That was a subject which was gone into last year, and the Secretary of State has laid down and made public the conditions under which such loans may be granted. There is no unreadiness to make loans under those conditions ; but the history of this year enforces the danger of relying on such loans. We had one application this year for a loan for 30 lakhs to Bombay to avert, so we were assured, a most imminent crisis. We were not in a position to make the loan ; and moreover those who principally urged us to make the loan, who were representatives of the Exchange Banks, could always have procured funds for their customers through the Secretary of State's telegraphic transfers. Indeed this was admitted: but it was urged that transfers at the rate at which the Secretary of State was then selling were to be boycotted. The crisis was conjured without our assistance: but I refer to it as showing the danger of relying upon Government assistance and indicating doubts as to the sufficiency of banking strength in Bombay. To have a crisis threatened in an Imperial City of the importance of Bombay for want of R30 lakhs points to a very narrow margin.

" Conclusion.

" 36. Famine has left a deep impress upon the financial history of this year, and will make an even deeper impress upon the year we are shortly entering. But looking back on the past twelvemonth we may congratulate ourselves, at least, on having passed to a gold standard through the continued closure of the Mints and the ordinary operations of trade without having added to the indebtedness of India. The uncertainties in both public and private finance owing to a fluctuating and falling exchange have, it may be hoped, become a thing of the past. In the year now passing away India has been able not only to relieve the suffering population in her midst, but to invest revenue in productive public works. She will not be able to escape borrowing in the coming year. But the difficulties will be chiefly those of Ways and Means. Nevertheless, after providing for famine and after making a substantial addition to the payment for national insurance, the Indian Government can count upon a surplus with reasonable confidence."

LOWER BURMA COURTS BILL.

The Hon'ble MR. IBBETSON moved that the Report of the Select Committee on the Bill to consolidate and amend the law relating to the Courts in Lower Burma be taken into consideration.

The Hon'ble MR. WOODROFFE said:—" When this Bill was before the Select Committee a representation was made by the Chamber of Commerce of Rangoon setting forth that, in order to avoid the necessity of appeals from a Judge of the Chief Court to another Bench of that Court, it was desirable that there should be a clause inserted in the Bill empowering the Chief Court to direct the trial of important cases by a Bench of two Judges in the Chief Court and thus give an appeal direct to Her Majesty in Council. I believe I may say that the desirability of avoiding such appeals commended itself to my Hon'ble Colleagues no less than to myself, and I desire to explain that the reason why we did not need to insert any special provision to that effect in the Bill was because it seemed to us that what the Chamber of Commerce desired can be obtained under the Bill as it stands. By clause 9 of the Bill it is provided that the jurisdiction of the Chief Court may be exercised by a single Judge of the Court subject to any Rules made under this Act and by section 14 provision is made for the hearing of an appeal from a single Judge of the Chief Court. There is no right of appeal from a Bench consisting of two or more judges. If therefore under the power given in clause 9 of the Bill the Chief Court shall, on any particular occasion on which it may seem to it desirable to do so, direct that a Bench shall be formed of two Judges to hear any important case, an appeal will lie direct to Her Majesty in Council. In this way the object which the Chamber of Commerce had in view will be attained. That, My Lord, is the practice which obtains in the High Court at Calcutta. In any important case the Chief Justice is moved to appoint a Bench of two Judges to sit upon the Original Side, and if those two Judges agree, there is no further appeal in India. The appeal lies direct to Her Majesty in Council. I desire, My Lord, to make these few observations in order that the Chamber of Commerce may not be under the impression that the very desirable suggestion, so far as it was in substance made by them, had not been taken into consideration. It is in fact attained by the Bill as it stands. Subject to the notes of dissent recorded by the Hon'ble Mr. Smeaton and myself I venture to think that this Bill is one which may well be passed by this Council."

The motion was put and agreed to.

The Hon'ble MR. WOODROFFE moved that the word "ordinarily" in clause 5 of the Bill, as amended by the Select Committee, be omitted He said:—" The word to which I take exception is, it is true, to be found in Punjab Chief Court Act, but of the great and growing importance of Burma there can be no doubt and it is a province of the Empire in which a condition of things exists as markedly different from those that prevail in the Punjab as north is from south. In Burma we have great centres of commercial activity. The country is a largely exporting country. As we have just heard the rice trade of Burma forms one of the most important items of Indian export and there are therefore constantly arising in the great commercial centres of Burma, and notably in Rangoon, a class of cases requiring that knowledge and experience which is obtainable only, or mainly at least, in the Courts. It therefore seems to be desirable that this 5th clause should provide that two at least of the Judges of the Chief Court should be Barristers of not less than five years' standing and that the people of Burma should have the security of knowing that two Judges of the Chief Court will always be Barristers. I do not put forward this amendment solely or even mainly in the interest of the profession to which I have the honour to belong. It is true that the Bar in Burma represented the desirability of securing that there should always be at least two Barristers on the Bench of the Court. Such a representation, had it stood alone, might naturally have been received with some distrust, but with the Bar Memorial there was also placed before the Select Committee that

which struck me at least as of far greater importance than the representation of the Bar—the representation of the Chamber of Commerce to the identical effect of the proposition which was put forward by the Bar. Indeed with the Burma Bar, I should have liked to have had it secured that not less than one half of the Judges should be Barristers. It was represented, however, to us that if the Chief Court should consist of five Judges, that might unnecessarily hamper the Government, who under such a clause would be bound to appoint three Barrister Judges. Yielding to that argument I have limited my amendment to the extent in which it now appears. The Select Committee have observed in their Report that it is clear that the term "barristers" is meant to denote practising lawyers and not merely titular members of the legal profession. The general public, I have no doubt, attach some occult and mysterious influence to that which is known in my profession as 'eating dinners.' I venture to assure them that there is no necessary connection between eating dinners and learning law, and to re-assert the unanimously expressed opinion of the Select Committee that these Barrister Judges should be appointed only from those who have actually practised their profession, either here or at home, in one of the Supreme Courts. With these observations I beg leave to move that the word 'ordinarily' be omitted from this section so as to secure that there shall always be at least two Barrister Judges in that Court. I may add, My Lord, that there is another reason which occurs to me for accepting this amendment, namely, that until this Bill shall become law an appeal lies in most cases from the Courts in Burma to the High Court in Calcutta. There was thus secured to the people of Burma the advantage of having cases of any considerable magnitude tried and determined by a Bench of the High Court in Calcutta, on which in most cases coming from Burma, as involving questions of Commercial law, it is almost invariably the practice of the Chief Justice to place a considerable number of Barrister Judges. I think that the people of Burma, if they are not to have an appeal to the High Court in Calcutta, ought to have in the Chief Court, which is now about to be constituted, the advantage of having that professional assistance in the decision of their cases which my amendment involves."

The Hon'ble MR. IBBETSON said:—"My Lord, I cannot advise the Council to accept this amendment. I fully recognise the great importance, on the broadest possible grounds, of that special knowledge and experience to which the Hon'ble and learned Advocate General has alluded being fully represented on the Bench of the Chief Court at Rangoon. Section 5 of the Bill provides that of the four Judges of the Court two shall be barristers of not less than five years' standing. That is the intention of the law and that is the intention of the Government. But instead of providing, as the Hon'ble Mr. Woodroffe would have it provide, that the two Judges shall be *always*, it provides that they shall be *ordinarily*, barristers of not less than five years' standing. Now the word 'ordinarily' was deliberately inserted in the section, not with any idea of leaving a loophole by which the plain intention of the law might be evaded, but in order to provide for difficulties which have been felt elsewhere in respect of temporary vacancies. Chief Court Judges, like other hard-worked men, occasionally require short leave. Now there are obvious objections, which I think will be patent to all, to a member of the local bar ascending the Bench for three or four months, and then resuming his pleadings before the Court of which he was but recently a member. On the other hand, it is not always possible to persuade a competent barrister to leave Calcutta, or Madras, or wherever his avocations may lie, and to move to Rangoon for the sake of officiating for a few months only as a Judge of the Chief Court. And if the Council accept this amendment, the practical result will too often be, I fear, to make it impossible for the barrister Judges to take leave at all, because of the difficulty of replacing them.

"It is true that the difficulty might often be surmounted by appointing what the Select Committee call a 'titular' barrister—that is, one who is a barrister in name only. But in the first place, even a titular barrister may not always be available for the temporary vacancy. And in the second place, the Government of India would rather not be compelled to adopt a course which is at best a merely nominal compliance with the law. They would prefer to recognise the

fact, honestly and openly, that it is occasionally impossible to procure a suitable practising barrister to fill a temporary vacancy, and to reserve to themselves a certain discretion to meet this difficulty. In that preference, I believe the Council will support them".

The Hon'ble MR. MEHTA said:—"I beg to support the amendment of the Hon'ble the Advocate General. I confess I have always a very great dread of the use of such loose words like "ordinarily" in a legislative Act, because they can be easily made to mean anything but ordinarily. My learned friend, the Hon'ble Member in charge of the Bill, says that the power is intended only for exceptional cases, but there is nothing in the section which would limit the operation of the word "ordinarily" to such exceptional cases, and we find that it is not at all uncommon that advantage is taken of the use of a loose word like "ordinarily" to do something which is not ordinary".

The Hon'ble MR. SMEATON said:—"This matter was discussed in considerable detail by the Select Committee, and I found myself obliged with some reluctance to enter a note of dissent with regard to the word "ordinarily" I feel myself bound, from my knowledge of the different conditions of Burma from those of the Punjab, on the model of whose Chief Court Act this Bill has been framed, to adhere to the dissent which I have recorded, and to support the amendment which has been proposed by the learned Advocate General. The intention seems to me, both from the text of the clause and from such of the correspondence as has been available, to have been that there shall always be two Barrister Judges, and I cannot see why, if that be the intention, there should be any word or phrase in the section which would cause a misunderstanding. In my opinion there should always be two Barrister Judges on the Bench of the Chief Court in Lower Burma in view of the circumstances of Rangoon and the ports which are, as Your Excellency knows, widely different to those of the Punjab. The difficulty about an officiating vacancy I confess I can hardly think is likely to be greater than in the case of a corresponding officiating vacancy in the ordinary revenue or judicial administration. Both classes of work require experts, and I fail to see that there is any lack of competent men from whom to choose, either from the local Bar or, as I can understand has not unusually been the case elsewhere, from the Bench of the Small Cause Court. No one, My Lord, esteems and admires the qualities of the members of my own service more than I do, but I am free to admit that officers who in Burma are charged with three or four different classes of functions, as Revenue Officers, Executive Officers, Judicial Officers, Police Magistrates, and so forth—I certainly should not be surprised to find that these busy and often overworked officers if suddenly confronted with an officiating vacancy in the Chief Court of Burma would find extreme difficulty in disposing of the very thorny shipping, and delivery, and other contract disputes which constantly arise in Rangoon and in other large ports of Burma—disputes arising on arbitrations under the rules of the Chamber of Commerce—of a highly technical character—disputes as to freight and Insurance, Insolvency and Admiralty business, etc. I should not be surprised if an overworked and overloaded member of the Civil Service should find himself in extreme difficulty in dealing with matters of this kind. These to my mind, and I think the Council will agree with me, need a trained practitioner to deal expeditiously with them, and a long officiating appointment of a civilian layman might very seriously retard work, and as we are all aware the law's delays has been very grievously complained of in Rangoon for the past 10 or 12 years. But besides these grounds on which I support the amendment of the Hon'ble the Advocate General, I find a Statute of 1867, No. 16, which was enacted to remove doubts as to the power of the Governor General in Council to appoint persons to act temporarily as Judges. The Act runs as follows:—'In every case in which the Governor General in Council or the Local Government, as the case may be, has power under any Act or Regulation to appoint a Judge of any Court in British India, such power shall be held to include the power to appoint any person capable of being appointed a permanent Judge of the said Court to act as a Judge of the same Court for such time as the Governor General in Council or the Local Government, as

the case may be, shall direct.' This, subject to the better opinion of the Hon'ble the Legal Member, appears to me to indicate that officiating appointments to the two Barrister Judgeships should be of Barristers only because, as I take it, only they, that is, Barristers, can be held to be capable of being appointed permanent Judges on these two reserved places. If this interpretation is correct—and I say so with some diffidence—then it seems to me that the word "ordinarily" is in conflict with the law of 1867, which law I understand is still in full force. With these remarks, My Lord, I support the amendment moved by the Hon'ble the Advocate General".

The Hon'ble RAI BAHADUR ANANDA CHARLU said:—"I had, and stil have, my doubts on this point. At the Select Committee it was my vote that settled the question. I have been talking the matter over with the Hon'ble the Advocate General, and I think it, on the whole, safe to support his amendment".

The Hon'ble MR. RALEIGH said:—"The object of requiring that two Judges in the new Chief Court should be Barristers is to have Judges who are qualified in point of experience to deal with important questions of mercantile law, which are likely to arise in such a centre as Rangoon. As to the importance of this provision of the Bill I entirely agree with every word that has been said by the Hon'ble the Advocate General and by the Hon'ble Mr. Smeaton. The object of inserting the particular word now in question is simply to give those who appoint the Judges a rather freer hand than they would have if the word were not there in supplying temporary vacancies. I think that if Mr. Ibbetson, who is in charge of the Bill, were to bring us some of the correspondence in his Department and to show the Council in detail what the difficulty of providing for these temporary appointments is, that the Council would be almost convinced that this word ought to stand. The difficulty of providing for the temporary appointment of a Barrister Judge is very great indeed. You are asked, perhaps, to appoint a member of the local Bar, and then you find the local objections are too strong to be overcome. You then try to get a competent member of the Bar of one of the High Courts, and you find that a short appointment is not sufficient to induce him to interrupt his work. You then perhaps fall back upon a Barrister Judge of one of the Small Cause Courts, and immediately you have a complaint that you are taking him away from important work which may fall into arrears, and that what he is doing is quite as important as the work you require him for. It is simply in consequence of these personal difficulties, often very serious, that it is thought desirable to have a certain freedom, if the necessity cannot be avoided, to appoint a Civilian for a short time to take the place of a Barrister Judge. It is not contemplated that a layman should be appointed for a long time to take the place of one of the Barrister Judges, still less is it intended that there should be a succession of temporary appointments. Any such succession of appointments would, I think, be an abuse of the Act, because it would deprive Rangoon for a considerable period of the very advantage which the clause intends to confer upon it, but simply in view of the extreme difficulty which has been found in making these temporary appointments, I think we are justified in asking the Council to allow the word 'ordinarily' to stand."

His Excellency THE PRESIDENT said:—"I should like only to add one word to this discussion. I hope I may regard myself as a reasonably impartial person in the matter, and, having listened without any previous prejudice or prepossession to the remarks made on both sides, I must say that the case as submitted by the Hon'ble the Advocate General, and supported by two or three Hon'ble Members, seems to me to rest in the main upon a vague suspicion of what the conduct of the Government may be in the future. An idea seems to linger in their minds, though I hope not born of previous experience, that the Government may, in future, endeavour to evade the ordinary application of the law, and in particular, the clearly defined import of this particular Bill. Such a suspicion on their part I regard as both ungenerous and unfounded. On the other hand, the Hon'ble Mr. Ibbetson, who is in charge of the Bill, has stated with the utmost clearness—and has been followed and supported in the same

line by the Hon'ble Mr. Raleigh—what appears to me to be an unanswerable objection to the omission of the word 'ordinarily.' He has given the grounds on which that word has been introduced, and the reasons for which the Government cannot consent to its removal. To that statement on behalf of Mr. Ibbetson I must confess that I have not yet heard any reply on the part of the Members who have taken the opposite view; and in so far as I am entitled to give an opinion, I would, with the utmost confidence, recommend the Council to support the Hon'ble Mr. Ibbetson, and to reject the amendment that has been submitted".

The motion was put and negatived.

The Hon'ble MR. IBBETSON moved that the following amendments be made in clause 19 of the Bill, as amended by the Select Committee, namely:—

(1) that before sub-clause (*a*) the following sub-clause be inserted, namely:—

"(*a*) declaring what persons shall be permitted to practise as petition-writers in the Courts in Lower Burma, regulating the conduct of business of persons so practising, and determining the authority by which breaches of rules under this clause shall be tried."

and the present sub-clauses (*a*) to (*h*) be renumbered (*b*) to (*i*) respectively:

(2) that to the clause the following sub-clause be added, namely:—

"(2) Whoever commits a breach of any rule made under sub-section (*1*), clause (*a*), shall be punishable with fine which may extend to fifty rupees."

He said:—"As a matter of courtesy to my Hon'ble Colleagues on the Select Committee which considered the Bill, I must briefly explain the circumstances under which I bring forward this amendment. The provisions which I now propose to insert formed part of the Bill as introduced. When they came under consideration in Committee I was in favour of retaining them. But I think I was alone in that view. At any rate, a majority was against me, including my hon'ble friend who specially represents the interests of Burma. The provisions in question were therefore omitted. When I found that the Report of the Select Committee put prominently forward views that were the exact opposite of those which I held, I felt obliged to qualify my signature by a few words of dissent; but there the matter ended, so far as I was concerned, and I never dreamed for one moment of pressing my opinions upon the Council, in opposition to those of my colleagues.

"On Sunday night, however, the Hon'ble Mr. Raleigh received a telegram from the Lieutenant-Governor of Burma to the effect that His Honour, the Recorder of Rangoon, the Judicial Commissioner of Lower Burma and the Government Advocate, were all of opinion that it was very desirable to re-insert these provisions if possible. He felt that, on what is after all mainly a matter of administrative detail, the wishes of the responsible head of the Province were entitled to the very greatest consideration. And he therefore suggested that I should submit the matter to the judgment of the Council by moving the amendment to which I am now speaking.

"As for the merits of the matter, the case, as I understand it, lies in a nut shell. In a very great part of the business even of the subordinate Courts, and still more in the miscellaneous transactions of the Government offices, there is no need whatever for the costly aid of the professional lawyer, and nothing could be more undesirable than that the villager should be compelled to resort to it. At the same time, he requires some assistance in preparing his written applications, and in complying with the technicalities of official procedure; and that assistance he receives, of a quite sufficiently skilful nature, and at a very reasonable charge, from the petition-writer. I fear I must admit that the character of the petition-writer is not always above suspicion, and that some of the fraternity are responsible for a good deal of the chicanery that goes on in the Courts of India, as in those of other countries. But on the whole he discharges very useful functions; and at any rate, he is absolutely indispensable and unavoidable.

"This being the case, the question is whether we should, or should not, take power to control his doings. The argument of the majority of the Select

Committee is, that if the Chief Court does this, it creates (I use the words of the Report),—it 'creates a class of practitioners, possessing no proper qualification, but enjoying a kind of professional status by reason of their being licensed by the Chief Court.' Now in the first place, it seems to me that it does not 'create' them. They are there already and cannot be got rid of. In the second place, the proposed power will enable the Chief Court to insist upon some moderate measure of 'qualification.' And if there are scoundrels among them, so much the more reason surely for enabling the authorities to get rid of, at any rate, the worst of them. The proposed power of regulation will apply only to those who habitually 'practise' as petition-writers; and it will still be open to every petitioner to write his petition himself, or have it written by a friend; though I am afraid the old adage will often hold good, that 'The man who is his own petition-writer, has a fool for his client.' At any rate, it seems to me that it is absurd for us to shut our eyes and pretend that we cannot see the petition-writer; to refuse to 'recognise' him, and by so doing, to deprive ourselves of the opportunity of keeping him in order. I am old enough to have seen both systems at work in the Punjab; and I have no hesitation in expressing my opinion that, while there are objections to each, the balance of advantage is strongly on the side of regulation."

The Hon'ble MR. WOODROFFE said:—"I would support the Bill as it last left the Select Committee. The clause of the Report of the Select Committee sets forth the circumstances of the case sufficiently aptly. It is there stated 'Clause 19, sub-clause (*1*) (*a*), of the Bill referred to us gave to power to the Chief Court, with the sanction of the Local Government, to declare what person should be permitted to practise as petition-writers and to regulate the conduct of business by such persons. It appears to us that the effect of such an enactment would be to create a class of practitioners, possessing no proper qualification, but enjoying a kind of professional status by reason of their being licensed by the Chief Court. The petition-writer is a familiar adjunct to the Courts in Burma and elsewhere; but we are disposed to think that litigants who deal with him should be left to make their own bargains.'

"I am not, My Lord, in the short observations that I propose to make, at all oblivious of the due weight which should be given to the recent representation of His Honour the Lieutenant-Governor of Burma, but this matter is one which probably has not come before His Honour in any such manner as to give him personally any experience of petition-writers. The Legal Practitioners Act deals with various classes of practitioners. There are advocates, vakils, and mukhtars. I venture to think, from an experience of many years, we have gone quite low enough. The Report speaks of the petition-writer as a familiar adjunct to the Court. There are, unfortunately, about the Courts in India unclean animals of every sort, and I know hardly any more unclean, certainly none that tend more to bring the administration of justice into disrepute than such persons as are here intended to be provided for. We know them not in the High Court of Bengal. They now, I think, find a place in the definition of the word 'tout,' in the Legal Practitioners Act. They are I believe, to be found in the purlieus of the Police Courts of this city. The slightest acquaintance with the character of these persons would, I think, be sufficient to satisfy Members of Council that the Select Committee acted most wisely in saying that they would not give these gentry any sort of professional status whatever. There is no necessity whatever for doing so, and it is open to anybody who desires to present a petition, and who does not desire to avail himself of what the Hon'ble Member in charge of the Bill describes as costly professional assistance, to get any of his friends, or neighbours even, to draw up his petition; but why we should go to the extent of giving persons of this kind a professional status in the Chief Court of Burma I cannot conceive. In this matter the Hon'ble Member in charge of the Bill has correctly stated that he was alone in his view, and the condemnation of that class of persons was effected by the otherwise unanimous vote of the Select Committee, including the Hon'ble the Legal Member."

The Hon'ble RAI BAHADUR ANANDA CHARLU said:—"The motive of this amendment is unexceptionable, but its utility or its remedial capacity is more than questionable. There can be no such class as practising petition-writers: and it is not easy to see what qualifications can be laid down as proof of fitness. All that a petition-writer has to do is to put the facts and arguments, relied on by a petitioner, into decent English or Vernacular. This measure of ability is possessed by some who—underpaid in their respective callings—earn a few pence by writing petitions. It is inadvisable to discourage men of this sort; for they are likely to be cheaper and better qualified than such as may set up for professional petitioner-writers. This latter class is doomed as such, and it is everywhere else dwindling in numbers and status. To recognise it—even for the purpose of chastening it—will, too surely, be to give it a lease of life, which will not belong to it in the natural course of things. The legal profession is ramifying all round, and may, sooner or later—sooner than later I think—put an end to the proscribed class. The better ones will get absorbed by the profession as assistants, clerks, etc., while the incapables will die out. So long as we cannot take power—and I do not see how we could—to authorise rejection of petitions, emanating from others than those we recognise, I fail to perceive how any good can be sensibly wrought. The petition-writer does not sign, and some one else's caligraphy might be utilised. The game we wish to go after will keep out of the Court or Cutcherry precincts and will virtually degenerate into creatures of high subordinates and will both elude our grasp and evade our laws Nothing so satisfactory as leaving such things to laws as to natural selection and as to the survival of the fittest."

The Hon'ble MR. REES said:—"My Lord, considerable prejudice against petition-writers is common to Judges and Magistrates, both of the Barrister and Civilian class. Certainly I share it, whether coming under the former class, or that which 'has eaten dinners,' a process which I regret to hear the learned Advocate General say argues the possession of no legal knowledge whatever.

"I should have thought too that in Burma, more than elsewhere, in a happy land with no undenominational education, where everyone can read and write, the Courts could have done without the amateur vakil, which is what the petition-writer practically is.

"I would therefore have voted for leaving this Bill as the Select Committee left it, though in 1896 I ventured to say, when the Touts Bill was before Council, that I did not think the whole class was quite so outrageously bad elsewhere, as it was represented to be, and as the Advocate General represents it to-day to be in Bengal.

"I am, however, much impressed by the telegram received since the Select Committee reported the Bill, and am unwilling to vote against the consensus of the highest legal authority in Burma, backed by the Lieutenant-Govornor, who must, it is presumed, have had the same opportunities as other public servants for forming an opinion of this class.

"It seems to me, moreover, that the argument that what is good for the Punjab may not be good for Burma, which was forcibly stated on the last amendment, is of equal application here, and that the experience of Bengal should not necessarily prevail in regard to the neighbouring Province across the Bay."

The Hon'ble MR. SMEATON said:—"The Hon'ble Mr. Ibbetson has very frankly stated the whole of the *pros* and *cons* on this particular amendment. In the Select Committee I took the view of the *cons* for the reasons which he has so frankly stated, and which have been enlarged upon by the Hon'ble the Advocate General. To the view I then took I still adhere, but in the face of the remarkable consensus of official opinion telegraphed from Rangoon, and, in particular, the desire of the Lieutenant-Governor that the sub-clause be restored, I shall, with Your Excellency's permission, abstain from voting."

The Hon'ble MR. MEHTA said:—"The object of the amendment is no doubt excellent. But my hon'ble friend the mover has himself shown that the amendment will not succeed in accomplishing that object. He told us that it was not intended that parties should be precluded from drawing up their own petitions or taking the assistance of their friends to do so. In that case, the

petition-writers have only to keep clear of the immediate purlieus of the Court to render the amendment absolutely nugatory."

The Hon'ble MR. RALEIGH said :—" On this particular question I voted against my honourable friend in charge of the Bill in Committee. It is usual for Members of the Executive Council to settle their domestic differences before appearing in public. But I ought to say a few words as to the history of the amendment. The sub-clause by which petition-writers were to be regulated was objected to by the body which represents the Bar at Rangoon, and I had a certain amount of professional sympathy with what they said. You require your legal practitioners to undergo certain examinations to prove themselves fit to practise, and you reward them with a monopoly of recognition of the Courts. We all know that there are irregular legal assistants of various kinds, but so far as I am individually concerned I would have been perfectly content that the petition-writer should not be regulated by law. But the matter presents itself to my mind now in this way. Nobody can say that this question is a question of first importance. It is a matter in which we must all defer to local opinion, and when I find that the Lieutenant-Governor of the Province, the Judicial Commissioners, and the Recorder of Rangoon all ask for the inclusion of this sub-clause, I simply give way and vote for my honourable friend's amendment."

The motion was put and agreed to.

The Hon'ble MR. IBBETSON moved that the Bill, as amended, be passed.

The Hon'ble MR. SMEATON said :—" My Lord, I think the Council have already had enough of the Burma Courts Bill. But after hearing the Hon'ble Financial Member's pregnant remarks in his very interesting and instructive Financial Statement, in regard to the dominant character of Burma trade in the markets of this world perhaps I may claim a little indulgence from Hon'ble Members to make a few remarks on a Bill which is destined, indirectly to have no small influence on the trade of the Province.

" Before it is finally passed in to law I think I may, on behalf of the Province which I represent, express our gratitude and satisfaction with the result of the labours of the Select Committee on the Bill in the final shape in which it now stands before the Council. The task of the Select Committee has been by no means a light one, because it has had to produce for Burma, a Bill on the model of the Punjab Act, although these two Provinces are in many respects altogether dissimilar. It is perhaps impossible to satisfy everybody, but on the whole, I think, the Bill as it now stands fairly meets the claim of Lower Burma, for an efficient Chief Court. Upper Burma has, for the very sound reasons given by the Local Government, and which I need not here recapitulate, been wisely left out of the Bill and kept under its existing and very efficient judicial administration. The Chief Court has two functions : an appellate and revisional jurisdiction as well as control throughout Lower Burma, and an original jurisdiction in Rangoon. In respect of the first of these functions, I desire to emphasize two features of the Bill which are of paramount importance. The first will be found in sub-clause (*2*) of clause 18, which requires periodical personal visitation and inspection, by a Judge of the Chief Court, of the subordinate Courts, throughout the Province. There is, so far as I know, no such precise obligation imposed by law, on any High Court or Chief Court in India: but I entirely concur in the Hon'ble Mr. Ibbetson's declaration in Select Committee that there is no more important clause in the Bill than this. The necessity of such visitations and inspections [is fully recognised by all who have the interests of justice in Burma at heart. Unfortunately the reputation of many of the subordinate Courts in Lower Burma, at present, is far from what it should be, and complaints are rife. A faithful compliance with the requirements of the clause which I have just quoted, will, it is hoped, remedy this ; and no doubt the Local Government will see to it, that the Rules made by the Chief Court under clause 19 (*g*) for the visitation and inspection] of the subordinate Courts, are adequate for the purpose, and punctually carried out. In Upper Burma, to my personal knowledge, the reputation and the work of the subordinate Courts at present compare not unfavourably with those of Lower Burma, although the Upper Province can only

be said to have had a properly equipped judiciary for about ten years—whereas Lower Burma has been under settled rule, and under a regular judicial system for nearly half a century. One, if not the chief, reason of this is that in Upper Burma the Judicial Commissioner has always kept up and still keeps up a periodical personal inspection of the subordinate Courts, and is in touch with every judicial Officer. The second feature of the Bill which (in full agreement with the Hon'ble Member in charge of the Bill) I desire to emphasize is the wise latitude given by section 30 for second appeals on the facts in land suits, and in certain other unclassed suits which are of very great interest and importance to the people. Burma is not to be judged by Indian standards. The Burmese are not so litigious as the people of India, and their land suits properly so called are usually of small money value, though none the less of importance to the people themselves. There is no class of big landlords as in Bengal and in the North-Western Provinces; the holdings are all small, and mortgages, often of a doubtful and puzzling nature, and conditional sales, are frequent. The second appeal on the facts in these suits will be a guarantee that justice in respect of rights in land shall not miscarry.

"I would here however parenthetically point out that the subject of rights in land will hardly be adequately dealt with in the absence of a Tenancy law. At the present time there is no such law in Burma. There are hundreds of thousands of agricultural tenants, holding under petty landlords, but they have no legal status, and they are entirely at the mercy of their landlords, both as regards their rents and the occupation of their lands. A Bill however is I believe under consideration for remedying this state of things.

"Sub-clause (*b*) of the proviso to section 30 is a most useful and valuable provision, and will be appreciated by the Burmese, inasmuch as it allows a second appeal in suits connected with marriage, divorce and inheritance. These matters, which touch the most intimate domestic relations of the people are governed by the text of the Buddhist scriptures modified by custom. The customary law is only now slowly crystallizing, and it is of very great importance that the process should be aided by well-considered judgments of a competent Supreme Court on the various groups and kinds of facts brought before it.

"In respect of the second function to which I have referred, I think that the Court which the Bill establishes will be a good working tribunal for disposal of the somewhat intricate questions of commercial law and practice, which frequently arise in the rapidly growing commercial centre of the Province. With these remarks, My Lord, I beg to support the motion that the Bill be passed into law."

The Hon'ble MR. WOODROFFE said:—"Before this motion is put, I desire, speaking for myself, to state that I absolutely disclaim the existence in my mind of any such unworthy suspicion as has been referred to by His Excellency the President. I trust this disclaimer may be accepted in the same frank manner as I make it".

The motion was put and agreed to.

CURRENCY CONVERSION (ARMY ANNUAL) ACT, 1899, CONTINUANCE BILL.

The Hon'ble MAJOR-GENERAL SIR EDWIN COLLEN moved that the Bill to amend and provide for the further continuance of the Currency Conversion (Army Annual) Act, 1899, be taken into consideration.

The motion was put and agreed to.

The Hon'ble MAJOR-GENERAL SIR EDWIN COLLEN moved that the Bill be passed.

The motion was put and agreed to.

The Council adjourned to Wednesday, the 28th March, 1900.

Explanation regarding Cesses.

Name of cess.	PERCENTAGE ON LAND REVENUE.	
	First regular settlement.	Revised settlement.
	Per cent.	Per cent.
Road Cess . .	2	3(c)
School Cess . .	2	2
Post Office Cess	½	½
Patwari Cess(a) . .	...	(d) 5 (average).
Additional Rates(b)	...	2
	4½	12½

(a) No patwari cess was levied at the last settlement, but the landlords were liable to pay the cost of the preparation of annual returns.

(b) During the currency of the last settlement an additional rate of 2 per cent. (Act X of 1878) was imposed.

(c) Road-cess at re-settlement has been levied at 3 per cent. except in Sambalpur where it has remained at 2 per cent.

(d) The patwari cess as fixed at the revised settlement varies from district to district and an average has been struck out for the Province as a whole.

PART I.

Government of India Notifications, Appointments, Promotions, etc.

LEGISLATIVE DEPARTMENT.

NOTIFICATIONS.

Calcutta, the 29th March, 1900.

No. 6.—With reference to Notification No. 18, dated the 3rd October, 1899, Mr. H. W. C. Carnduff, I.C.S., Deputy Secretary to the Government of India in the Legislative Department, is granted an extension of furlough for two months and three days with effect from the 4th May, 1900.

No. 7.—Mr. R. Greeven, B.A., Barrister-at-Law, I.C.S., District and Sessions Judge, Ghazipore, is appointed to act as Deputy Secretary to the Government of India in the Legislative Department with effect from the 5th April, 1900, during the absence on furlough of Mr. H. W. C. Carnduff, I.C.S., or until further orders.

J. M. MACPHERSON,

Secretary to the Government of India.

HOME DEPARTMENT.

NOTIFICATIONS.

PUBLIC.

Calcutta, the 27th March 1900.

No. 887.—Under the provisions of section 9 of the Statute 24 and 25 Victoria, Cap. 67, the Governor General in Council is pleased to direct that His Excellency's Council shall assemble at Simla in the jurisdiction of the Lieutenant-Governor of the Punjab.

No. 888.—In exercise of the power conferred by section 7 of the Indian Explosives Act, 1884 (IV of 1884), the Governor General in Council is pleased to make the following additions to the rule published with Home Department Notification No. 660, dated the 23rd March 1899, conferring certain powers on the Chief Inspector of Explosives with the Government of India :—

Additions.

After the words "Chief Inspector," wherever they occur, the words "and Inspector" should be added.

ESTABLISHMENTS.

The 28th March 1900.

No. 232.—The Honourable Mr. D. M Smeaton, C.S.I., of the Indian Civil Service, is placed on special duty for a period of three weeks in connection with the Indian Famine Charitable Relief Fund, with effect from the 29th instant.

No. 236.—The Hon'ble Mr. Justice Wilkins is permitted to resign Her Majesty's Indian Civil Service, with effect from the 6th April 1900, or the subsequent date on which he may sail from India or relinquish charge of office in the event of his not taking subsidiary leave.

No. 241.—The Governor General in Council has accepted the resignation tendered by the Hon'ble Mr. Justice Wilkins of his office of Judge of the High Court of Judicature at Fort William in Bengal, with effect from the 6th April 1900, or the subsequent date on which he may sail from India or relinquish charge of his office in the event of his not taking subsidiary leave.

EXAMINATIONS.

The 30th March 1900.

No. 195.—Lieutenant-Colonel G. S. A. Ranking, Secretary to the Board of Examiners, Calcutta, is granted furlough for six months with effect from the 4th April 1900 or the subsequent date on which he may avail himself of it.

No. 196.—Colonel T. E. Spencer, Officiating Superintendent, Army Clothing, Bengal, is appointed to officiate, in addition to his own duties, as Secretary to the Board of Examiners, Calcutta, during the absence on furlough of Lieutenant-Colonel G. S. A. Ranking, or until further orders.

MEDICAL.

The 27th March 1900.

No. 649.—The services of Lieutenant J. B. Corry, R.E., are placed temporarily at the disposal of the Government of Bombay for employment on plague duty.

No. 652.—The services of Captain F. A. Smith, M.B., I.M.S. (Bombay), are placed temporarily at the disposal of the Foreign Department.

No. 655.—The services of Captain G. W. Jenney, M.B., I.M.S. (Bombay), are replaced at the disposal of the Military Department.

The 30th March 1900.

No. 666.—Lieutenant-Colonel S. H. Browne, M.D., C.I.E., I.M.S. (Bengal), Principal of the Lahore Medical College, is granted furlough out of India on medical certificate for 18 months under Article 340(*a*) of the Civil Service Regulations, with effect from the 2nd April 1900, or the subsequent date on which he may avail himself of it.

No. 667.—With effect from the date of assuming charge, Lieutenant-Colonel F. F. Perry, F.R.C.S., I.M.S. (Bengal), Professor of Surgery, Lahore Medical College, is appointed to officiate as Principal of that College in addition to his own duties, during the absence on furlough on medical certificate of Lieutenant-Colonel S. H Browne, M.D., C.I.E., I.M.S. (Bengal), or until further orders.

No. 668.—With effect from the date of assuming charge, Major H. Hendley, I.M.S. (Bengal), Civil Surgeon of Umballa, is appointed to officiate as Professor of Medicine in the Lahore Medical College during the absence on furlough on medical certificate of Lieutenant-Colonel S. H. Browne, M.D., C.I.E., I.M.S. (Bengal), or until further orders.

No. 676.—The services of Lieutenant A. V. Searle, 20th Madras Infantry, are placed temporarily at the disposal of the Government of Bombay for employment on plague duty.

SANITARY.

PLAGUE.

The 30th March 1900.

No. 996.—Whereas the Governor General in Council is satisfied that there is a danger of an outbreak of dangerous epidemic disease at Bindhachal in the North-Western Provinces, if pilgrims or other persons from the Bombay Presidency (including Sind), the Bellary and Salem Districts of the Madras Presidency, Bengal, the Jullundur District of the Punjab, the Central Provinces and the Hyderabad and Mysore States are permitted to assemble at that place on the occasion of the ensuing Bindhachal Nauratra fair:

In exercise of the powers conferred by section 2, sub-section (*1*), of the Epidemic Diseases Act (III of 1897), the Governor General in Council is pleased to direct that no tickets to travel by railway to the stations of Mirzapore, Bindhachal and Gaipura on the East Indian Railway, shall be sold from the 28th March to the 8th April 1900 (both days inclusive) within the Bombay Presidency (including Sind), the Bellary and Salem Districts of the Madras Presidency, Bengal, the Jullundur District of the Punjab, the Central Provinces and the Hyderabad and Mysore States to any pilgrim or other person intending or believed to be intending to proceed on pilgrimage to the Bindhachal Nauratra fair.

No. 1007.—Whereas the Governor General in Council is satisfied that there is a danger of an outbreak of dangerous epidemic disease at Ajodhya in the North-Western Provinces and Oudh, if pilgrims or other persons from the Salem and Bellary Districts of the Madras Presidency, the Bombay Presidency (including Sind), Bengal, the Jullundur District of the Punjab, the Central Provinces and the Hyderabad and Mysore States are permitted to assemble at that place on the occasion of the ensuing Ram Naumi fair:

In exercise of the powers conferred by section 2, sub-section (*1*) of the Epidemic Diseases Act (III of 1897), the Governor General in Council is pleased to direct that no tickets to travel by railway to the stations of Fyzabad, Ajodhya, Ajodhya Ghat and Darshannagar on the Oudh and Rohilkhand Railway and Nawabganj, Katra and Ajodhya (Lakarmandi Ghat) on the Bengal and North-Western Railway shall be sold from the 4th to the 9th April 1900 (both days inclusive) within the Salem and Bellary Districts of the Madras Presidency, the Bombay Presidency (including Sind), Bengal, the Jullundur District of the Punjab, the Central Provinces and the Hyderabad and Mysore States to any pilgrim or other person intending or believed to be intending to proceed on pilgrimage to the Ram Naumi fair at Ajodhya.

No. 1018.—Whereas the Governor General in Council is satisfied that there is a danger of an outbreak of dangerous epidemic disease at Conjeeveram town in the Chingleput District of the Madras Presidency, if pilgrims or other persons from the Bombay Presidency (including Sind), the Province of Bengal, the Allahabad District of the North-Western Provinces, the Jullundur District of the Punjab, the Central Provinces and the Hyderabad and Mysore States are permitted to assemble at that place on the occasion of the ensuing Brahmotsavam festival of Sri Devaraja Swami:

In exercise of the powers conferred by section 2, sub-section (*1*) of the Epidemic Diseases Act (III of 1897), the Governor General in Council is pleased to direct that no tickets to travel by railway to the Arkonam Junction and the stations of Palur, Conjeeveram, Walajabad, Villiyampakkam and Chingleput on the South Indian Railway shall be sold from the 4th to the 24th May 1900 (both days inclusive) within the Bombay Presidency (including Sind), the Province of Bengal, the Allahabad District of the North-Western Provinces, the Jullundur District of the Punjab, the Central Provinces, and the Hyderabad and Mysore States to any pilgrim or other person intending or believed to be intending to proceed on pilgrimage to the Brahmotsavam festival of Sri Devaraja Swami at Conjeeveram.

PORT BLAIR.

The 29th March 1900.

No. 207.—Mr. E. H. Man, C.I.E., Deputy Superintendent, Port Blair, is granted privilege leave for three months and ten days, with effect from the 10th May 1900.

JUDICIAL.

The 30th March 1900.

No. 487.—The following revised draft of a Notification, which it is proposed to issue in exercise of the powers conferred by section 4, sub-section (*1*), of the Indian Petroleum Act, 1899 (VIII of 1899), is published for the information of all persons likely to be affected thereby, and notice is hereby given that the said draft will be taken into consideration by the Governor General in Council on or after the 1st June 1900.

2. Any objection or suggestion, which may be received from any person with respect to the draft before the date aforesaid, will be considered by the Governor General in Council.

DRAFT NOTIFICATION.

In exercise of the power conferred by section 4, sub-section (*1*), of the Petroleum Act, 1899 (VIII of 1899), the Governor General in Council is pleased to direct that the following addition be made to Part III of the first schedule to the said Act:—

"6. Application of the test to viscous fluids or preparations, such as

solutions of India-rubber in mineral naphtha, or thick paint made with that material:—

About a teaspoonful of the substance to be tested is placed in the cup, and the cover fitted with a thermometer is put on.

The cup thus prepared for the test is then cooled down until the thermometer indicates a temperature of 50° F. This may be accomplished either by placing the prepared cup in a refrigerator, or by immersing it up to its projecting collar in water which is maintained at a sufficiently low temperature until the result specified has been obtained.

The prepared cup thus cooled is then transferred to the water bath the temperature of which has previously been raised to 76° F. (The scale of the thermometer in the water bath should range from 60° to 180° F.)

The test is then applied as described in section 4 of this part. If no flash has taken place when the temperature in the cup has reached 75°, the test need not be continued.

The temperature at which the flash occurs is the observed flashing point of the substance and, subject to correction of atmospheric pressure as prescribed in the Act, is the true flashing point."

ECCLESIASTICAL.

The 27th March 1900.

No. 133.—The Governor General in Council is pleased to direct that the following be substituted for Rules VI and XXXV of Part IV of the Ecclesiastical Rules published with Home Department Notification No. 178, dated the 21st May 1897.

Rule VI.—The number of sittings to be provided will be calculated on the following scale:—

UNIT.	Protestants.	Roman Catholics.
Battalion of British Infantry	450	340
Head-quarters Wing, British Infantry	250	190
Detached Wing, British Infantry	200	150
Regiment of British Cavalry	275	210
Battery of Royal Horse or Field Artillery	70	55
Garrison Company, Royal Artillery	65	50
Mountain Battery, Royal Artillery	50	35
Heavy Field Battery, Royal Artillery	45	35
Convalescent Depôts and Miscellaneous detachments, per section of 100 men.	45	35

NOTE.—These numbers include soldiers' families.

Rule XXXV.—The number of sittings for which compensation is allowed will be regulated by the highest attendance at a parade service during the year of soldiers and their families (two children up to the age of 16 being counted as one adult) actually quartered in the station, subject to the following maximum limits:—

UNIT.	Church of England.	Roman Catholics and each denomination of Protestants recognized by the Government of India.
Battalion of British Infantry	450	340
Head-quarters Wing, British Infantry	250	190
Detached Wing, British Infantry	200	150
Regiment of British Cavalry	275	210
Battery of Royal Horse or Field Artillery	70	55
Garrison Company, Royal Artillery	65	50
Mountain Battery, Royal Artillery	50	35
Heavy Field Battery, Royal Artillery	45	35
Convalescent Depôts and Miscellaneous detachments, per section of 100 men.	45	35

NOTE.—These numbers include soldiers' families.

The 28th March 1900.

No. 151.—The services of the Reverend R. H. Stevenson, a Senior Chaplain of the Church of Scotland, are replaced at the disposal of the Government of Madras.

J. P. HEWETT,

Secretary to the Government of India.

The 26th March, 1900.

No. 1203—11-7.—Munshi Gholam Rasool Beg, Head Draftsman, Office of the Archæological Surveyor, North-Western Provinces and Oudh Circle, is appointed to be in charge of the current duties of that Office, with effect from the forenoon of the 11th January, 1900, during the absence, on three months' privilege leave, of Mr. E. W. Smith, Archæological Surveyor, North-Western Provinces and Oudh Circle.

T. W. HOLDERNESS,

Secretary to the Government of India.

FOREIGN DEPARTMENT.

NOTIFICATIONS.

Fort William, the 26th March, 1900.

No. 1441-*I.-A.*—In exercise of the powers conferred by sections 4 and 5 of the Foreign Jurisdiction and Extradition Act (XXI of 1879), and of all other powers enabling him in this behalf, the Governor General in Council is pleased to prescribe the following rules for the destruction or other disposal of useless records, books and papers in the Courts and Revenue Offices of the Civil and Military Station of Bangalore :—

1. With the previous sanction of the Governor General in Council, the Resident in Mysore may, from time to time, make rules respecting the disposal, by destruction or otherwise, of such records, books and papers belonging to or being in the custody of the Courts of Civil and Criminal Jurisdiction and the Revenue Offices, as the Resident may consider useless or unworthy of being permanently preserved :

   Provided that nothing herein contained shall be deemed to authorize the destruction of any document which, under the provisions of any law for the time being in force, is to be kept and maintained.

   All such rules shall be published in the *Gazette of India*, and shall thereupon have the force of law.

2. All rules for the destruction or other disposal of useless records, books and papers belonging to or in the custody of any Court or Revenue Office, now in force, shall continue to have the force of law until they are rescinded by rules made under the preceding rule; and no suit or other proceeding shall be instituted, maintained or continued against any person for the disposal, by destruction or otherwise, of any records, books or papers in accordance with any such rules.

No. 293 of 1899.—Charles Howard Windle, Deputy Traffic Manager of the Calcutta Port Trust, and Basil Devenish Meares, civil engineer, of Calcutta. *The attachment of corrugated iron sheets to roof purlins.* (Specification filed 20 March 1900.)

No. 304 of 1899.—Ludwig Mach, physician, of Villa Brueninghaus, Kalaische strasse, Jena, Germany. *A new and improved alloy of aluminium and magnesium.* (Specification filed 12 March 1900.)

No. 305 of 1899.—Adolph Ernest Orr, executive engineer, in the Public Works department, of Hissar, Punjab. *A new or improved method of pulling punkahs and apparatus therefor, to be called "The Fan Punkah."* (Specification filed 23 March 1900.)

No. 310 of 1899.—John Walter Ottley, C.I.E., Colonel, late Royal Engineers, of 53 Cromwell Houses, London, and Henry Vero Biggs, D.S.O., Major, Royal Engineers, of Wrington, in the county of Somerset, England. *Improvements in fittings and attachments for coats, jackets, military tunics and the like.* (Specification filed 17 March 1900.)

No. 326 of 1899.—The American Cotton Company, a corporation organized under the laws of the state of New Jersey, and having its principal place of business at 27 William street, Borough of Manhattan, city county and state of New York, U.S.A. *Improvements in cotton baling apparatus.* (Specification filed 17 March 1900.)

No. 332 of 1899.—William Samuel Laycock, manufacturer, of Victoria street works, city of Sheffield, England. *Improvements in hand brakes for railway vehicles.* (Specification filed 17 March 1900.)

No. 337 of 1899.—Charles Clifford Bruckner, manufacturer, of 72 Morningside avenue, city county and state of New York, U.S.A. *Improvements in incandescence vapour lamps.* (Specification filed 17 March 1900.)

No. 338 of 1899.—Alfred Henry Francfort, mechanical engineer, of 63 Fifth avenue, New York, city county and state of New York, U.S.A. *An acetylene gas apparatus.* (Specification filed 17 March 1900.)

No. 339 of 1899.—Henri Dolter, engineer, of 41 Rue Taitbout, Paris, in the Republic of France. *Improvements in apparatus for electric traction.* (Specification filed 17 March 1900.)

No. 359 of 1899.—The General Electrolytic Parent company, limited, chemical manufacturers, of Farnworth-in-Widnes, in the county of Lancaster, England. *Improvements in or connected with electrical conductors and anodes for electrolytic and similar purposes.* (Specification filed 17 March 1900.)

No. 366 of 1899.—Richard Francis Marsh, engineer, of East Maitland, in the colony of New South Wales, Australia. *An improved rotary motor to be operated by fluid pressure.* (Specification filed 17 March 1900.)

No. 369 of 1899.—Henry Alexander Hancox, draughtsman, and Robert James Hancox, engineer both of 151 Mansfield street, Balmain, Sydney, in the colony of New South Wales. *Improvements in rotary engines, alike adaptable to rotary pumps.* (Specification filed 17 March 1900.)

No. 370 of 1899.—Isaac Shone and Edwin Ault, civil engineers, both of 47 Victoria street, Westminster, London. *Improvements in and relating to ejectors for raising sewage and other liquids.* (Specification filed 23 March 1900.)

No. 375 of 1899.—William Silver, engineer, of Tamworth, in the colony of New South Wales. *Improvements in railway car couplings.* (Specification filed 17 March 1900.)

No. 381 of 1899.—Charles Brezzo, professional chef, of Menzies Hotel, corner of Bourke and William streets, in the city of Melbourne, in the colony of Victoria. *An improved refrigerator.* (Specification filed 17 March 1900.)

No. 387 of 1899.—Fatehmahomed Imamsaheb, carpet maker, residing at old Downey road, Byculla, Bombay. *Improvements in fibre extracting machines.* (Specification filed 26 February 1900.)

No. 434 of 1899.—Thomas Steel Perkins, electrical engineer, of Idlewood, in the county of Allegheny, state of Pennsylvania, U.S.A. *Improved starting mechanism for electric motors.* (Specification filed 8 March 1900.)

No. 451 of 1899.—Ernest Oscar Mawson, executive engineer, Public Works department agency engineer, Rajkote, Kathiawar. *Improvements in thermantidotes.* (Specification filed 19 March 1900.)

No. 7 of 1900.—Benjamin Garver Lamme, electrical engineer, of 230 Stratford avenue, and John Purington Mallett, electrical engineer, of 6728 Simen avenue, both in Pittsburg, in the county of Allegheny, state of Pennsylvania, U. S. A. *Improvements in electrical machines.* (Specification filed 8 March 1900.)

No. 8 of 1900.—Benjamin Garver Lamme, electrical engineer, of 230 Stratford avenue, Pittsburg, in the county of Allegheny, state of Pennsylvania, U. S. A. *Improvements in single phase alternating current generators.* (Specification filed 8 March 1900.)

No. 50 of 1900.—David Louis Baumgarten, manufacturer, of Pike's Building, E., 4th street Cincinnati, county of Hamilton, state of Ohio, U. S. A. *Acetylene gas generators.* (Specification filed 23 March 1900.)

No. 51 of 1900.—Henry Alonzo Buck, engineer, of 11 Montague street, Russell square, London. *A new method of and means for generating steam in steam-engines.* (Specification filed 21 March 1900.)

No. 52 of 1900.—Henry Alonzo Buck, engineer, of 11 Montague street, Russell square, London. *An improved rotary engine.* (Specification filed 21 March 1900.)

No. 53 of 1900.—Gilbert Wright, electrical engineer, of 409 Ross avenue, Wilkinsburg, in the county of Allegheny, state of Pennsylvania, U. S. A. *Improvements in circuit breakers.* (Specification filed 15 March 1900.)

No. 54 of 1900.—Gilbert Wright, electrical engineer, of 409 Ross avenue, and Christian Aalborg, electrical engineer, of 212 Franklin street, both of Wilkinsburg, in the county of Allegheny, state of Pennsylvania, U. S. A. *Improvements in automatic circuit breakers.* (Specification filed 15 March 1900.)

No. 55 of 1900.—Benjamin Garver Lamme, electrical engineer, of 230 Stratford avenue, Pittsburg, in the county of Allegheny, state of Pennsylvania, U. S. A. *Improvement in alternating current induction motors.* (Specification filed 15 March 1900.)

No. 56 of 1900.—Gilbert Wright, electrical engineer, of 409 Ross avenue, and Christian Aalborg, electrical engineer, of 212 Franklin street, both of Wilkinsburg, in the county of Allegheny, state of Pennsylvania, U. S. A. *Improvements in switches for electric circuits.* (Specification filed 15 March 1900.)

No. 1270 P.—THE fees prescribed in the fourth schedule to the Inventions and Designs Act of 1888 have been paid for the continuance of exclusive privilege in respect of the undermentioned inventions for the periods shown against each:—

No. 20 of 1892.—Harry Heatly. *Improvements in mechanism for actuating punkahs and thermantidotes.* (From 31 March 1900 to 31 March 1901.)

No. 1 of 1893.—Jacques Aime Vagner. *A novel system of burner for mineral oil.* (From 11 April 1900 to 11 April 1901.)

No. 115 of 1893.—Charles Cheers Wakefield. *Improvements in sight feed lubricators for steam engines.* (From 9 May 1900 to 9 May 1901.)

No. 24 of 1894.—P. Donaldson. *An oriental sanitary latrine for natives of India.* (From 25 January 1900 to 25 January 1901.)

No. 176 of 1894.—George Kift Winter and George Bliss Winter. *Improvements in block signalling apparatus.* (From 4 March 1900 to 4 March 1901.)

No. 270 of 1894.—Thomas Henry Lee Bake and Henry Alfred Leverett. *Improvements in tanning skins and hides.* (From 22 March 1900 to 22 March 1901.)

No. 295 of 1894.—George Alexander Kennedy, William Senior and Ira Wood. *Improved apparatus for securing card clothing to the flats of carding engines* (From 25 March 1900 to 25 March 1901.)

No. 232 of 1895.—Robert Rickie. *Improvements in sugarcane crushing mills.* (From 25 March 1900 to 25 March 1901.)

No. 1271 P.—WHEREAS the inventors of the undermentioned inventions have respectively failed to pay, within the time limited in that behalf by the fourth schedule to

the Inventions and Designs Act of 1888, the fees hereinafter respectively mentioned, it is hereby notified that under the provisions of section 8, sub-section (2), of the said Act, the exclusive privilege of making, selling and using the said inventions in British India, and of authorising others so to do, has ceased :—

No. 155 of 1895.—James Connor. *A combined wood and cast iron plate sleeper.* (Specification filed 14 December 1895.)

No. 201 of 1895.—Gopal Mahadeo Vidwans. *Improved tea coffee or hot water boiler.* (Specification filed 16 December 1895.)

No. 248 of 1895.—Charlton James Wollaston. *Improvements in electric batteries.* (Specification filed 12 December 1895.)

No. 316 of 1895.—William Speirs Simpson. *Improvements in or relating to chains of cycle and like gear and in gear wheels therefor.* (Specification filed 12 December 1895.)

Fee in respect of the continuance of an exclusive privilege—

4 (*a*) After the filing of the specification and before the expiration of the fourth year from the date of the filing thereof—

The sum of R50 for each of the above inventions.

No. 216 of 1892.—Bruce Green. *Improvements in or connected with coin-freed on coin-operated sight-testing apparatus.* (Specification filed 12 December 1892.)

Fee in respect of the continuance of an exclusive privilege—

4 (*d*) After the expiration of the sixth year and before the expiration of the seventh year from the date of the filing of the specification—

The sum of R50 for the above invention.

NOTICES.

All communications relating to Act V (the Inventions and Designs Act) of 1888 should be addressed to the "Secretary to the Government of India, Department of Revenue and Agriculture (PATENTS BRANCH), CALCUTTA."

The Office of the Secretary under the Act is open for the transaction of business from 11 A.M. to 4 P.M. on all days except Sundays and gazetted holidays.

The Government of India are advised that, as trade marks are not "designs" within the meaning of the Act, they cannot be registered under Part II.

The fees payable under the fourth and sixth schedules are now collected in cash and applicants are warned that they must be responsible for any delay in cashing cheques.

Copies of the weekly notifications, and of the quarterly lists, of applications and specifications filed in the Secretary's office are now on sale to the public at one anna and eight annas a copy, respectively.

Attention is requested to the rules made by the Government on the 10th October, 1895, in regard to the preparation of applications, specifications and drawings.

All applications made under the Inventions and Designs Act, V of 1888, will from this date (December 19th, 1896) lie in the visitor's room of the Patents Office for ten days from the date of the *Gazette of India* in which their filing may have been notified; or, if the tenth day is a holiday, till the evening of the office day next following.

At the time of delivering or sending an application for leave to file a specification, the applicant shall cause a duplicate copy of the application to be delivered or sent therewith to the Secretary.

S. C. HILL,

Offg. Secy. under the Inventions and Designs Act, 1888.

Ditto ditto . .	2nd April	Per land route *viâ* Chittagong.
Ditto ditto A.M. At 5-30	3rd ,,	Ditto.
Port Blair	12th ,,	Per Steamer *Shahjehan.*
South Africa	31st Mar.	*Viâ* Tuticorin and Colombo.

*Although the date entered in column 2 is, as far as can be calculated, the latest safe date of posting for the next Mail Steamer, full allowance being made for the steamer being in advance of her published timing, Mails for the places mentioned in column 1 are despatched daily to Colombo, so that they may proceed by any steamer that has been unusually accelerated or retarded, or by any special opportunity that may be afforded by a steamer not belonging to one of the regular lines.

The letter-box for Inland articles will be cleared for the forenoon Mails at the following hours:—

For Goalundo and Chittagong Express train at 5-30 A.M.

For Eastern districts as far as Dacca at 6-30 A.M.

For Midnapore, Orissa and Madras Presidency at 7-30 A.M.

For Bombay Mail *viâ* Nagpur at 7-30 A.M. and with a late fee of ½ anna up to 8 A.M.

For Khulna Line at 8-15 A.M.

The letter-box will be cleared for the evening Mails without late fee at the following hours, *viz.*:—

For E. I. Railway Loop Mail at 2-30 P.M. and up to 2-55 P.M. with a late fee of ½ anna.

For Darjeeling and Assam at 3-25 P.M. without late fee, and 3-50 P.M. with late fee of ½ anna.

For the Bombay Mail *viâ* Jubbulpore carrying also Mails for Ceylon at 6 P.M.

For the Punjab Mail at 7-30 P.M.

For Midnapore District only at 7-30 P.M.

For Khulna Mail at 7-30 P.M.

For Eastern Bengal Mail at 7-30 P.M.

Late letters bearing a fee of ½ anna will be received for the Bombay Mail *viâ* Jubbulpore up to 6-30 P.M. and for other Mails from 7-30 to 8 P.M., and from 8-0 to 8-45 P.M. with a late fee of 1 anna for the Punjab and Eastern Bengal Mails only.

Late registered articles will be received between the following hours:—

For Offices served by the Bombay Mail *viâ* Allahabad and Jubbulpore from 5 P.M. to 6-15 P.M.

For Offices served by the Punjab Mail from 6 P.M. to 7 P.M.

For Offices served by the Eastern Bengal Mail from 6 P.M. to 7 P.M.

For Offices served by the Khulna Mail from 6 P.M. to 7 P.M.

The late fee on each registered letter will be two annas, which must be prepaid in stamps on the letter.

Articles for Burma and for Port Blair by Sea are received without late fee up to 7-30 P.M., after which hour they are received fully prepaid and bearing an extra stamp of ½ anna up to 8 P.M.

On the latest safe day of despatch of the Mail for the Australasian Colonies *viâ* Tuticorin, the letter-box for Foreign articles will be cleared for the last time for articles without the late fee at 6 P.M., and late letters and papers fully prepaid will be received up to 6-30 P.M.

On the day of despatch of the Mail for Europe (Thursday), the letter-box for Foreign articles will be cleared for the last time for articles without the late fee at 6-30 P.M., and late letters and papers fully prepaid will be received up to 6-45 P.M. Late registered articles will be received from 5 to 6 P.M On other days the letter-box for Foreign articles will be cleared for the last time without the late fee at 6 P.M., and late letters and papers will be received up to 6-30 P.M. for despatch by any Foreign Mails *viâ* Tuticorin, Madras, or Bombay the same night and up to 8-30 P.M., late letters and papers up to 9 P.M., for any Foreign Mails despatched by Sea. The late fee for Foreign articles is 4 annas, which must be prepaid in stamps affixed to the articles.

JOHN OWENS,

Presidency Postmaster, Calcutta.

NOTICE.

It is notified, for information of Military and Civil officers, that services of Shams-ul-Ulama, Shaikh Mahmud Gilani, Persian Instructor, and Mr. R. F. Azoo, Arabic Instructor, have been specially retained by Government for giving instruction to candidates intending to present themselves for examinations in Arabic and Persian before the Board of Examiners. Gentlemen requiring their tuition should communicate with them at the office of the Board of Examiners.

ROORKEE TREATISE ON CIVIL ENGINEERING IN INDIA.

Royal Octavo, with numerous Plates.

Volumes I and II are published in separate convenient sized Sections, as below, but can be bound up if required:—

VOLUME I.*

Section	I.	Building Materials (1898),	R2-0.
"	II.	Masonry (1898),	R1-4.
"	III.	Carpentry (1898),	R1-8.
"	IV.	Earthwork (1892),	R1-4.
"	V.	Tools and Plant (never published).	

VOLUME II.*

Section	VI.	Buildings (1899),	R1-4.
"	VII.	Bridges (1897),	R4-4.
"	VIII.	Roads (1897),	R1-8.
"	IX.	Railways (1891),	R1-4.
"	X.	Irrigation Works.	(Under revision.)

ROORKEE MANUAL OF APPLIED MECHANICS.

Vol. I. Direct and Transverse Strain, principally by Analytical Methods. R7

" II. The Stability of Structures, mostly by Graphic Methods (in the Press).

MANUALS.

VII. **Surveying** (by Major Firebrace, R.E.) (7th edition, with Curve Table). R3.

XIII. **Drawing** (by Lieut. R. Pulford, R.E.). † R6.

XIIIa. **Drawing, First Principles of Geometrical** (by do.) R1-4.

XIV. **Simple Applied Mechanics**, (3rd edition), Parts I and II in one. R1-8.
Simple Applied Mechanics, Part II (1st edition). 8a.

XV. **Examples of Estimating.** Comprising a progressive series of Estimates (with Plans of Buildings and Bridges, worked in detail). By P. Keay, Esq., and revised by C. C. Sullivan, Esq., Head Master (5th edition). R3-12.

XVI. **Earthwork Estimating**, with Practical Tables and Diagrams. By Major A. M. Brandreth, R.E. R1.

XVII. **Specimens of Printing** used in the College Drawing Course and Entrance Examinations. 6a

Note.—The complete Treatise forms the course of the Civil Engineer and Upper Subordinate classes at the Thomason College in Civil Engineering. The other Manuals are the complete course for both Classes in the several subjects of which they treat.

MISCELLANEOUS.

ENGINEERING WORKS.

Curve Tables, complete, for laying any curve. 4a.

Scantlings of Timber for Roofs. Tables and investigation of formulæ for determining size of timbers for Flat Roofs from 8 to 22 feet span, and for Trussed Roofs from 16 to 50 feet span (2nd edition). By P. Keay, Esq., Head Master. 12a.

Notes on Chemistry of Building Materials. R1-8.

Tate's Mechanism. R1.

Barman's Descriptive Mineralogy. R2-4.

* Date of Edition on sale.
† Originally published at R15, reduced to R6.

Useful Rules and Tables relating to Measurement of Timber. Rules for computing the cubic contents of Round Logs, as well as of Sawn Timbers, with Tables, etc. By Rai Kunhya Lal. R2-8.

O'Callaghan's Earthwork Tables for India, in one large sheet, 12a.; mounted on cloth and bound. R1-12.

Tables for Computing Earthwork in Distributaries and small open Channels, in use in Irrigation Department, N.-W. Provinces. 12a.

Tyndall's Hand-Book of Specifications. (In the Press.)

The Indian Engineer's Pocket Book. R1.

Wooden Bridges and Designs. By Rai Kunhya Lal. (In the Press.)

Blasting under Water (2nd edition). 10a.

Waugh's Instructions for Topographical Surveying. R1.

Analysis of Lime and Cement Stones. By Murray Thomson, Esq., M.D., F.R.S.E. 6a.

Chart, giving by a graphic method the discharges of earthen channels up to 40 feet bed width, very useful for Projects. R1-6.

SCIENCE BOOKS.

Wilson's Inorganic Chemistry. R1-8.

MATHEMATICAL.

Boileau's Tables of Wages and Rent, and of the value of goods. Tables for converting Seers and Chittacks into decimals of a Maund, and Annas and Pies into decimals of a Rupee. With a few others of general utility (4th edition). R1-8.

Boileau's Tables of Log sin² ½ P (for computing time 4a.)

Cape's Logarithms, with Tables of Squares, Cubes, etc. R1-4.

Cape's Geometry. R1-4.

Cape's Mechanics 8a.

Todhunter's Plane Trigonometry. R2-8.

Todhunter's Differential Calculus. R2-8.

Military Topography. 8a.

HINDUSTANI

Elements of Hindustani Grammar. 8a.

Technical Dialogues—English and Urdu. R1.

A Vocabulary of Common and Technical Words in English-Urdu. 12a.

History of India (*Itihas Timirnásak*), Hindi, Parts I and II. Both 6a.

Short Account of Ganges Canal (English and Urdu). Each 4a.

Apparatus for Printing can be made up at the Roorkee Workshops, and all particulars obtained from the Superintendent.

CIRCULARS.

Circulars containing the Rules of admission to the different classes of the College will be forwarded to applicants.

J. CLIBBORN, *Lieut.-Col., I.S.C.,*
Principal, Thomason Civil Engineering College, Roorkee.

THE INDIAN LAW REPORTS.

PUBLISHED UNDER AUTHORITY.

The Indian Law Reports, published under the authority of the Governor-General in Council, appear in monthly parts, published as soon as possible after the first of each month, at Calcutta, Madras, Bombay, and Allahabad, and comprise four series,—one for the Calcutta High Court, a second for the Madras High Court, a third for the Bombay High Court, and a fourth for the Allahabad High Court. The cases heard by the Privy Council on appeal from each High Court are reported in the series for that High Court. Cases heard by the Privy Council on appeal from Provinces in India not subject to any High Court are reported in the Calcutta Series.

The Calcutta Series is distributed by the Bengal Secretariat Book Depôt, and the Madras, Bombay, and Allahabad Series are distributed direct from Madras, Bombay, and Allahabad, respectively.

In supersession of the previous advertisements, on and from the 1st January, 1889, the terms of subscription and sale will be as follows for current issues, as well as for back numbers of the Reports from 1876 :—

Terms of subscription payable annually in advance.

For the Complete Series, *including postage* . . . R22-8

	Without postage.	With postage.
	R a. p.	R a. p.
For the Calcutta Series	10 0 0	12 8 0
„ each of the Madras, Bombay, and Allahabad Series	6 0 0	7 0 0
„ a part of the Calcutta Series purchased separately, *inclusive of postage in India*.	...	2 0 0
„ a part of each of the Madras, Bombay, and Allahabad Series purchased separately, *inclusive of postage in India*	...	1 0 0

The following is the rate at which deductions will be made for parts out of print and at which duplicate copies will be supplied to subscribers when required in place of copies lost in transit :—

	For town.	For mofussil.
	R a. p.	R a. p.
For the Calcutta Series ; per copy . .	0 8 9	0 10 0
„ each of the Madras, Bombay, and Allahabad Series ; per copy . . .	0 5 3	0 5 9
„ the Calcutta Series. For the year . .	7 2 6	8 6 3
„ each of the Madras, Bombay, and Allahabad Series. For the year . .	4 4 6	4 11 0

Persons desiring to subscribe for, or purchase, the Report should apply to—

Superintendent, Government Press, Madras.
The Superintendent, Government Central Press, Bombay.
The Curator of Government Books, North-Western Provinces and Oudh.
The Officer in charge, Bengal Secretariat Book Depôt.

Orders and subscriptions for 1894 should be at once registered and remitted by money-order payable to the Accountant and Treasurer, Bengal Secretariat, Calcutta.

Advertisements will be received for publication on the wrapped of the Indian Law Reports, Calcutta Series, at the following rates payable in advance :—

	One page.	Half page.	Quarter page.
For one issue	R 20	R 14	R 9
„ three issues	„ 55	„ 36	„ 24
„ six „	„ 100	„ 68	„ 45
„ nine „	„ 145	„ 96	„ 64
„ twelve „	„ 180	„ 120	„ 80

Several volumes of the BENGAL LAW REPORTS, from August 1868 to December 1875, and FULL BENCH RULINGS, Parts I and II, are available at the following rates :—

	Without postage.	With postage.
	R a. p.	R a. p.
Bengal Law Reports, for one year . .	20 0 0	22 8 0
Single copies, Rs per copy.		
Full Bench Rulings, Parts I and II . .	20 0 0	22 8 3

Bengal Secretariat Book Depôt, Writers' Buildings, Calcutta. Remittances to be forwarded to the Accountant and Treasurer, Bengal Secretariat, Writers' Buildings, Calcutta.

All the wanting parts of the INDIAN LAW REPORTS (complete series) having now been reprinted, the complete Reports from 1876 to 1893 may be purchased for all the years, or for any particular year, on application to the Officer in charge of the Bengal Secretariat Book Depôt.

The subscription Rs22-8 per annum, should be remitted in advance to the Accountant and Treasurer, Bengal Secretariat.

NOTICE.

It is hereby notified, for general information, that subscription to the complete series of the Indian Law Reports should be registered during the first three months of each calendar year. Subscribers are therefore requested to send in their subscriptions of the complete series before the 31st March in each year. Those who register their names after that date will understand that copies will be supplied only if available.

PURE SULPHATE OF QUININE.

Manufactured at the Bengal Government Cinchona Plantation.

From 1st April, 1900, the price of this Quinine will be as follows :—

1-pound tin,	R18,	or, post-free,	R18-12.
½ „	R 9,	„	R9-8.
¼ „	R4-8,	„	R5.

Analysis shows this Quinine to be of the purest manufacture ; and it is guaranteed to be free from wilful mixture with the inferior alkaloids, Cinchonine and Cinchonidine. It is for sale only to Government officers, and only for cash, and may be had from the Superintendent, Botanic Garden, Seebpore, near Calcutta.

বঙ্গদেশের গবর্ণমেণ্টের সিন্‌কোনা আবাদে প্রস্তুত বিশুদ্ধ কুইনাইন।

১৯০০ সালের ১লা এপ্রেল হইতে এই কুইনাইনের নিম্নলিখিত মূল্য হইবে, যথা—

১ এক পৌণ্ড টিন	১৮৲	বা ডাকমাশুল বিনা	১৮৸৹
½ আধ „ „	৯৲	„	৯॥৹
¼ পিকি „ „	৪॥৹	„	৫৲

পরীক্ষা করিয়া দেখা গিয়াছে যে এই কুইনাইন অতি বিশুদ্ধ রূপে প্রস্তুত করা হইয়াছে, এবং ইহা যে সিন্‌কোনাইন ও সিন্‌কোনিডাইন নামক অপকৃষ্ট ক্ষারের সহিত ইচ্ছা পূর্ব্বক মিশান হয় নাই তাহার গারাণ্টী দেওয়া যাইতেছে। ইহা নগদ মূল্যে কেবল গবর্ণমেণ্টের কর্ম্মচারীগণের নিকট বিক্রয় করা যাইবে, এবং কলিকাতার নিকট শিবপুরের কোম্পানির বাগানের সুপারিণ্টেণ্ডেণ্টের নিকট পাওয়া যাইতে পারে।

No Official Orders or Notifications, the Publication of which in the GAZETTE OF INDIA *is required by Law, or which it has been customary to publish in the* CALCUTTA GAZETTE, *will be included in the* SUPPLEMENT. *For such Orders and Notifications the body of the* GAZETTE *must be looked to.*

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Weather Review of India for the week ending at 8 a.m. on Saturday, March 17th, 1900.

The principal features in the meteorology of the past week have been the large changes in pressure and the very large excess of temperature, both of which were most strongly marked in North-West India and Baluchistan. There has been very little rain, only a few thunderstorms having been reported chiefly from Bengal and Assam. On Saturday Minimarg in North Kashmir received a light fall of snow equivalent to a quarter of an inch of rain and Chaman a very light shower of rain.

At the commencement of the week pressure was in general excess, the excess being largest in North-West and Central India, but the barometer began falling on Monday and continued falling by large amounts on Tuesday and Wednesday. By Thursday pressure was as largely in defect as it had been in excess on Sunday and the deficiency was most pronounced in North-West India, where a shallow depression with pressure more than two-tenths of an inch in defect in its central area, was shown lying over the South-West Punjab and the western desert. The cause of this large and rapid fall of pressure was probably the accumulative effect of temperature, which had been largely above the normal in North-West India and Baluchistan since the close of the previous week, and the depression in that region was probably an early appearance of the usual hot weather depression over the western desert. The distribution of pressure hence changed considerably and has been approaching the distribution usually obtaining during the hot weather. The area of highest pressure has been gradually transmitted southwards, and on Wednesday, Thursday and Friday pressure was highest over the West and South of the Peninsula.

Daily Summary.—*Sunday, March 11th.*—Pressure had been steady in Burma and had risen slightly to briskly in Baluchistan and India and was in excess in all parts of the country, the excess being largest in Rajputana and the Central Provinces. A few thunder-showers had been received in Bengal and Orissa. Mean temperature was in considerable to large excess in North-West

India and Baluchistan. It was normal or in slight to moderate defect in North-East India, Orissa, Central India, the Central Provinces and Upper Burma.

Monday, March 12th.—Pressure had given way slightly to briskly in Northern India and had been steady or had fallen slightly in Burma and the Peninsula. Mean temperature was normal or in defect in Burma, North-East India, Central India and the Central Provinces. It was in slight to moderate excess in the Peninsula and in large excess in North-West India, the excess being larger in the hills than in the plains. Colombo reported one-tenth of an inch of rain.

Tuesday, March 13th.—Pressure had fallen over the whole country, the fall being brisk to rapid in Northern India and slight to brisk in the Peninsula and Burma. The large excess of pressure had to a great extent disappeared. Thunderstorms had given showers at Ratnagiri and Tavoy. Mean temperature was normal or in slight excess in Madras, the Bombay Deccan and the West Coast; normal or in slight to moderate defect in North-East India and was in large excess in North-West India, the excess being very large in the hills.

Wednesday, March 14th.—A large general fall of pressure had occurred over the whole Indian region. The fall had been slight to brisk in Burma, East Bengal and the south and west of the Peninsula, but in other parts of the country it had been rapid, ranging from one to two-tenths of an inch. Pressure was in general defect, the deficiency in the West Punjab slightly exceeding two-tenths of an inch in amount, and a low pressure area was shown lying over the West Punjab and the western desert. Mean temperature was in slight to moderate defect in Orissa and Madras, but was in large to very large excess in North-West India and several stations reported maximum temperatures exceeding 105°. Mergui had received a light shower of rain.

Thursday, March 15th.—The barometer had been steady or had fallen slightly except in North-West India and Baluchistan, where it had fallen slightly to briskly. The depression over the western desert had intensified and pressure was nearly a quarter of an inch below the normal in its central area. Mean temperature was normal or in defect over nearly the whole of the Peninsula and in excess in Northern India. The excess was considerable in Gujarat and was large to very large in other parts of North-West India. The excess was shown chiefly in day temperature which was from 15° to 20° above the normal at several stations in the Punjab and Upper Sind. No rain was reported except a few drops at Mergui.

Friday, March 16th.—Pressure had given way briskly in Baluchistan, but had been steady or had fallen only slightly in India and Burma, and the distribution of pressure was hence practically unchanged. Temperature had fallen rapidly in Gujarat and Berar, but with the exception of Gujarat mean temperature continued in large to very large excess in North-West India and also in Central India. It was from 3° to 5° above the normal in North-East India and the Central Provinces and was normal or in slight excess or defect in the Peninsula. Mymensing had received half an inch of rain.

Saturday, March 17th.—The barometer had been steady or had fallen slightly in Baluchistan, Sind and the West Punjab, and had been steady or had risen slightly to briskly elsewhere. The deficiency of pressure had hence decreased, except in North-West India where the depression had intensified. The largest deficiency was ·287 inch at Dera Ismail Khan. Light snow had fallen in North Kashmir and thunderstorms had given showers in Assam and North Bengal. Mean temperature was still in large to very large excess in Baluchistan, the Punjab, Sind, Rajputana, the North-Western Provinces and Chota Nagpur, but day temperature had decreased briskly to rapidly, except in Chota Nagpur.

Temperature.—The chief feature in last week's temperature conditions was unusually high temperature prevailing in North-West India, the excess being larger in the hills than in the plains. Mean temperatures from 10° to 15° higher than usual were reported from several stations and day temperatures ranged up to 20° above the normal. The largest variations from the normal in the plains occurred in the Punjab, where the mean temperature for the whole province averaged from 9° to 12° above the normal during the latter half of the week. The mean temperature for the whole week was 8·8 in excess in the Punjab, 6°·9 in Rajputana and 6°·6 in Sind. In Gujarat the excess ranged from 6½° to 7° on the 11th, 12th and 13th, but temperature then decreased and at the end of the week was only 1°·4 above the normal. In North-East India, Central India, Orissa and the Central Provinces temperature was normal or in

general slight to moderate defect during the first half of the week, but temperature increased during the latter half and with the exception of Assam, where thunderstorms had caused a fall of temperature, it was in moderate to large excess. Conditions have been fairly uniform in the Peninsula, and variations from the normal have on the whole been small.

The mean temperature of the week was normal in Burma, Assam, Bengal, Orissa and Madras. It was from 1° to 3° above the normal in Bihar, Chota Nagpur, Central India, the Central Provinces, Berar, the West Coast and the Bombay Deccan; from 3° to 5° in the North-Western Provinces and Gujarat and from 6½° to 9° in the Punjab, Rajputana and Sind.

The following gives the highest maximum temperature reported on each day of the week:—

Sunday	107°·1 at Surat.
Monday	108°·1 „ Ditto.
Tuesday	108°·1 „ Ditto.
Wednesday	107°·6 „ Ditto
Thursday	108°·4 „ Jacobabad
Friday	108°·4 „ Ditto.
Saturday	104°·4 „ Ditto.

The following table gives mean temperature variation data of the week :—

Province.	Variation from normal of mean temperature of 24 hours preceding 8 A.M. of							Mean variation of week.
	11th.	12th.	13th.	14th.	15th.	16th.	17th.

South India	+2·4	+2·3	+0·8	−1·5	−0·4	+1·4	+1·4	+0·9
Mean for whole of India	+1·4	+1·7	+1·8	+2·0	+2·9	+3·2	+3·2	+2·3

The mean temperature for the whole of India was in excess on all days of the week. The excess was only 1°·4 on Sunday but increased to 3°·2 on Friday and Saturday. For the whole week it was 2°·3.

Rain.—Showers, chiefly due to thunderstorms, have been received during the week in Assam, Bengal, the Central and Submontane Punjab, the Konkan, Bombay Deccan and South Madras. The average rainfall of the division has exceeded half an inch only in the Surma and Brahmaputra valleys and has exceeded the normal in only North Bengal, the Konkan and Bombay Deccan, the normal amount in the last two divisions being *nil.*

The last three columns of the table at the end show that the rainfall of the period 4th to 17th March has been above the normal in the Konkan and Bombay Deccan alone.

The largest amounts received at individual stations during the week are:—

Assam	Sunamgunj (Sylhet)	4·06 inches
Ditto	Cherra Poonjee	1·93 „
Ditto	Dhubri	2·10 „

W. A. BION,
for *Meteorological Reporter to the Government of India.*

SIMLA, *22nd March 1900.*

T. W. HOLDERNESS,
Secretary to the Government of India.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Weekly Report on the state of the Season and Prospects of the Crops.

Madras.—*For week ending 24th March.*—A few trivial showers fell in parts of the southern districts; no rain has fallen elsewhere. Water supplies are diminishing as usual and growing scanty in many parts, but water is generally sufficient for drinking. The standing crop is confined to areas under irrigation where the crop is good; and to some cotton and castors which are poor. Small harvests from irrigated crops are yielding fairly, except for crops above mentioned, and a little preparation for next season's field work is proceeding; pasture has dried up but fodder is sufficient in most parts and cattle are in fair condition. Prices have risen generally—The price of *cholam* in the Deccan is about 12; and ragi 14 seers per rupee, and in Kistna rather cheaper. The number of test workers was:—Kistna, 1,274 men; 1,171 women; 390 children; total 2,835. In the Deccan—1,686 men; 2,671 women; 675 children; total 5,035; besides 1,900 men, 1,580 women, total 3,480 weavers in Cuddapah; grand total on relief, 11,350. Revised returns show that the numbers relieved in the Deccan during the week ending 17th March were 3.560 besides weavers.

Bombay.—*For week ending 26th March.*—Slight rain fell during the week in parts of four districts of Sindh; none elsewhere. The famine is unabated, and affects the same area as before. The standing spring crops have been a total failure in Gujarat and the Deccan, except in Broach and in irrigated lands in Baroda, the Panch mahals, Surat, Khandesh, Nasik and Sholapur. In the Konkan where their area is insignificant, and in Sindh where they obtain canal irrigation, the crops are in good condition. The reaping of spring crops is progressing in those districts where they have been saved. The preparation of lands for next season is progressing in several districts. There has been severe mortality among cattle in Gujarat owing to scarcity of fodder. In parts of Sindh, the Deccan, and the Karnatak also, fodder is very scanty and cattle are suffering severely. Prices have fallen in five districts risen in two and are stationary elsewhere.

Daily average numbers on relief for the week ending 24th instant.—British districts—On test works, 5,761; on relief works, 893,995; dependants, 257,128; total on works, 1,156,884; in poor houses, 21,896; on village relief, 70,082; total on gratuitous relief, 91,978. Native States—On relief works, 363,204; dependants, 66,130; total on works, 429.334; in poor houses, 33,371; on village relief, 5,825; total on gratuitous relief, 39,196. Grand total, 1,717,392.

Bengal.—*For week ending 26th March.*—There has been rain in various parts of Bengal Proper, and a few slight showers are also reported from Saran, Darbhanga, Monghyr, Purnea, Balasore, Puri, and Singhbhum. The harvesting of the spring crops is proceeding rapidly. The collection of opium is almost finished. Spring rice is doing well. Lands are being ploughed, and the sowing of autumn rice is beginning. The planting of sugarcane is going on in some districts. The price of rice has risen in nine districts, fallen in nine, and is stationary in the rest. Fodder is generally sufficient.

North-Western Provinces and Oudh.—*For week ending 28th March.*—Rain fell in 20 districts, the largest amounts being in Dehra Dum, 44; Etah, 83; Pilibhit, 34; and Gonda, 90 cents. Harvesting of spring crops is being actively carried on and is approaching completion in some districts; threshing and winnowing are in progress; lands sown with extra spring crops, and sugarcane are being irrigated. Some damage by hail to spring crops has been caused in Meerut, Aligarh, Muttra, and Gorakhpur; while rats have also done some injury to standing crops in Kheri. There was a good deal of rust in barley in Allahabad, especially in later sowings. The collection of opium continues. Supplies and fodder are sufficient. Prices have fallen in 12 districts, risen in 9, and are stationary elsewhere. There were 2,609 persons on four relief works,

and 198 persons on gratuitous relief, in the Jhansi district; the number of persons receiving relief in poor houses was :—Jhansi, 94; Mahroni, 44; Muttra, 231; and Agra, 20 (of whom 7 were immigrants).

Punjab.—*For week ending 28th March.*—Showers of rain have fallen in all districts except in Hissar and Bannu; the rainfall exceeded ½ inch in Delhi and parts of Karnal, Ferozepore and Sialkot. Heavy rain fell in the Sub-montane tahsils of Rawalpindi. Sowings of sugarcane, cotton, and extra spring crops are proceeding in Gurgaon, Rohtak, Jullundur, Ferozepore, Lahore, Amritsar, Sialkot and Gujrat and are completed in Umballa. The ploughing and manuring for the autumn crops have begun in Umballa, Jullundur, and part of Bannu. Melons and tobacco are being sown in Sialkot and bulrush millet in Mooltan. The spring harvest has commenced in Hissar and Delhi. The prospects of the standing irrigated crops are said to be average to good in all districts, and those of unirrigated crops are either bad or below average. The standing crops are reported to have been damaged by hailstones and high winds in Rohtak, Delhi and Sialkot. Rape, gram and barley have also been damaged by caterpillars in parts of the Ferozepore district. Cattle are reported to be in good condition in Amritsar and Peshawar, fair in Karnal, improving in Sialkot and poor and lean elsewhere. Dry fodder is reported to be very scarce in all districts. Green fodder is procurable, but its price is high. The price of wheat has fallen in thirteen districts and has not risen anywhere, the price of gram has risen in Hissar, has fallen in Gurgaon, Umballa, Jullundur, Mooltan, Lahore, Amritsar, Sialkot, Gujrat, Shahpur, Rawalpindi, Peshawar and Bannu, and has remained unchanged elsewhere. The price of maize has either fallen or has remained unchanged in all districts; the prices of other food staples also have either fallen or are unchanged throughout the province except bulrush millet which has risen in the Rohtak district. Wheat is selling from 10½ to 15½; gram, 11¼ to 15½; barley, 13 to 17; bulrush millet, 8¾ to 14; greatmillet, 8¾ to 13; maize, 12½ to 14¼; and rice, 9 to 10 seers per rupee. There has been a decrease in the numbers on relief works of nearly 19,000, since last week. A test work has been started in Gujranwala. Numbers on relief works:—British districts:—Relief workers, 125,198 against 135,648, dependants 47,256 against 53,015; test workers, 12,547 against 15,276. In poor-houses, 4,110 against 4,556; otherwise relieved 22,188 against 21,676. Native states:—Relief workers, 9,982 against 3,549; gratuitously relieved 9,593 against 3,820.

Burma.—*For week ending 24th March.*—In Upper Burma the cultivation of dry weather paddy continues and standing crops are doing well. Gathering of gram and peas and reaping of wheat continue in Minbu. Early sessamum and early wet weather paddy nurseries are still being sown in Kyaukse, while ploughing for early wet weather paddy has commenced in the Northern Shan States and transplanting has been completed in the Southern Shan States. In Myingyan the tobacco, maize and bean crops have been injured by catterpillars. Reaping of jowar is completed in Magwe. The price of paddy has risen considerably in Thatôn, Amherst and Pakokku and has fallen slightly in Rangoon and Thongwa.

Central Provinces.—*For week ending 24th March.*—The weather is occasionally cloudy and hot. A heavy shower of rain due to thunderstorms fell in Bhandara; light showers were received in the Chanda, Balaghat, Raipur, Bilaspur and Sambalpur districts. Harvesting of spring crops is approaching completion; threshing and winnowing continue; preparation of land for autumn sowings continues in parts of Nimar, Mandla, Nagpur, Wardha and Chanda. The recent cloudy weather has been detrimental to the *mahua* crop in Saugor. Water-supply and fodder are generally deficient. Prices are steady in Damoh, Jubbulpore, Chhindwara, Balaghat, Raipur and Sambalpur; but have slightly risen in Mandla and Bilaspur; there are local fluctuations elsewhere; the cheapest prices are:—wheat, 11; gram, 14; rice, 12; and juar, 11 seers per rupee: the dearest prices are:—wheat, 8; gram, 9½; rice, 9; and juar, 9 seers per rupee. With the completion of harvesting and the return of persons who took a day or two to celebrate the *holi* festival, the numbers on famine relief have increased by 87,567, of which Balaghat alone accounts for 34,000. There are 166 Public Works Department relief camps now open. The numbers on relief at the end of the week were as follows:—Relief workers; Public

Works Department, adults, 571,309; children, 100,517; on village works, 331,110; on grass-cutting works, 16,310; weaver relief, 25,726; total 1,044,972. Gratuitous relief—dependants—adults, 5,623; children, 112,038; in poor-houses—adults, 342; children, 136; kitchens—adults, 34,156; children, 211,051; otherwise relieved—adults, 86,894; children, 17,612; total on gratuitous relief, 467,861; total on all forms of relief, 1,512,833; the return from Betul has not been received; hence last week's figures have been adopted. Feudatory States—Relief works, 32,350; gratuitous relief, 13,432; total 45,782; there is a net decrease of 1,475 which is attributed to the *holi* festival; the return relates to 11 states.

Assam.—*For week ending 27th March.*—Rain has facilitated cultivation. Ploughing for early rice in the Assam Valley and sowing of low-land winter rice in Sylhet continue; the gathering of mustard has been finished; the outturn is generally good. Pruning of tea and pressing of sugarcane is nearly finished. Lands are being prepared for jute in Goalpara and the Garo Hills and for sugarcane in Darrang and Sibsagar. Plucking of tea continues. Gathering of pulses is finished in Goalpara; the outturn is fair. Fodder is scarce in the Naga Hills and the Khasi and Jaintia Hills. Prices:—Common rice, Silchar, 19; Sylhet, 17¾; Dhubri and Tezpur, 16; Gauhati and Nowgong, 18; Sibsagar 12; and Dibrugarh 11½ seers per rupee.

Mysore and Coorg.—*For week ending 27th March.*—MYSORE:—The standing crops are withering in parts. Prices have risen slightly in Tumkur, Hassan and Chittaldroog and have fallen at Shimoga. The paddy has been harvested in Mysore and Chitaldroog. Fodder and water are reported to be scarce in parts all over the State, excepting in the Kadur district.

COORG:—*For week ending 27th March.*—Rain much needed for coffee blossom. The public health is fair. Water and fodder for cattle are decreasing. Prices of food grains are rising.

Berar and Hyderabad.—*For week ending 24th March.*—BERAR. The weather is warm. Harvesting of irrigated wheat and gram is nearing completion. Ploughing on fields for ensuing crop is in progress. Fodder and water are inadequate. Prices:—Akola, 9½; Amraoti, 10½; Basim, 8¾; Buldana, 9½; Ellichpur, 9½; and Wun, 10 seers per rupee. The numbers on relief were:—Workers 273,771; non-workers, 64,979; in poor-houses, 6,847; on village relief, 9,353; grand total, 354,950.

HYDERABAD: *For week ending 24th March.*—No rain fell during the week. The total rainfall from 1st January is 36 cents. The spring harvest is nearing completion. The winter rice crop, wherever sown, is withering for want of water in wells; the deficiency of water is much felt in the dominions. The prices of grain have risen slightly; they are:—Wheat, 5⅛; coarse rice, 5⅞; and jawari 8 seers per current sicca rupee. The total number of persons on relief works including dependants was, 226,004 and gratuitously relieved 20,409.

Rajputana.—*For week ending 21st March.*—Slight showers are reported to have fallen in two districts of Marwar and Bharatpur. A severe hailstorm occurred in Alwar. Agricultural operations are in progress where possible. The standing crops are in good condition in parts of Dholpur, Karauli, Kotah, Jhallawar, Jaipur and Alwar; but the spring outturn is generally poor. Damage was done to standing crops by high winds in Marwar and by hail in Bharatpur and Alwar. The condition af cattle is unchanged, and fodder is still scarce. Prices are falling in 6 States and remain stationary in others. The highest price was:—Kherwara, 7 $\frac{7}{16}$ seers, and the lowest—Jaipur, 14 seers. Numbers of relief:—Ajmer Merwara—Relief works, 88,175; on gratuitous relief, 23,794; against 86,125 and 24,474 last week. Native States—Relief works, 350,287; on gratuitous relief, 107,138; against 358,621 and 82,126 last week. Total for all Rajputana—Relief works, 438,462; on gratuitous relief, 130,932; against 444,716 and 106,600 last week. Jaipur shows a marked increase of 11,719 on gratuitous relief, Marwar, 5,334; and Sirohi, Tonk, Kishangarh, and Kotah, from 1 to 3 thousands.

Central India.—*For week ending 21st March.*—No rain fell in Central India during the week. Agricultural operations are in progress. The standing crops are indifferent in Gwalior, fair in Bhopal and Malwa, good

in Baghelkhand and bad in Indore. There has been no change in the condition of the agricultural stock and pasturage since last report. Prices are steady in Gwalior, Baghelkhand, Malwa, and Indore, high in Bhopal and normal in Bundelkhand. The average prices in seers per rupee were :—Gwalior, 12; Bhopal agency $10\frac{5}{16}$; Bundelkhand, 15; Bagkelkhand, $11\frac{1}{2}$; Malwa, 10; Bhopawar, $8\frac{3}{4}$. In Indore wheat was selling at $7\frac{1}{2}$ and *juar* at $8\frac{3}{4}$ seers per rupee. The numbers on relief were as follows :—On relief works—Gwalior, 1,402; Bhopal, 17,977; Bundelkhand, 2,840; Baghelkhand, 12,179; Malwa 22,140; Bhopawar, 47,211; Indore, 4,116. On gratuitous relief—Bhopal 3,791; Bundelkhand, 1,742; Baghelkhand, 336. Malwa, 5,282; Bhopawar, 3,121; Indore, 6,759. There were 18 persons on test works in Gwalior.

Baroda.—*For week ending 17th March.*—There is no change in agricultural prospects, the condition of agricultural stock, or in prices of food grains. The average number of persons employed on relief works in Baroda territory was 46,534, and the number on gratuitous relief, 13,566.

Kashmir—*For week ending 27th March.*—The weather is fine. Prices continue below normal. The price of rice is 27 seers per rupee.

JAMMU PROVINCE.—*For week ending 28th March.*—No rain has fallen. The standing crops are in fair condition excepting Kundi. Fodder is scarce. Prices are falling slightly; they are—wheat, from 12 to $16\frac{1}{2}$; maize, 13 to $20\frac{1}{2}$ seers per rupee.

Nepal.—*For week ending 24th March.*—There have been thunderstorms for two days with very slight rain. The price of rice is nine seers per rupee.

The number of persons in receipt of relief during the preceding and present weeks in each Province is shown in the following table :—

† The return from the Betul district has not been received :—hence last week's figures have been adopted.

T. W. HOLDERNESS,
Secretary to the Government of India.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

(FAMINE.)

Return of the number of persons in receipt of relief in districts affected by scarcity.

NOTE.—The figures are compiled from returns obtained from Local Governments and Political Officers, and give the District details of the Provincial totals published weekly in the Crop and Weather Summary of the *Gazette of India*.

Non-labouring children and other dependants of relief workers are classed as on relief works when distinguished in the local returns from persons gratuitously relieved in poor-houses or at their homes.

The dates at the head of the table are the dates of the *Gazette of India* in which the Provincial totals were published. The figures, however, actually show the numbers on relief in each preceding week.

CALCUTTA,
27th March, 1900.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

ESTABLISHMENT BY THE AUSTRIAN GOVERNMENT OF A COMMERCIAL OFFICE IN PARIS DURING THE EXHIBITION OF 1900.

Extract from the Proceedings of the Government of India, Department of Revenue and Agriculture, No. 1233—12-2 (Commercial Exhibitions), dated Calcutta, the 28th March 1900.

RESOLUTION.

THE Governor General in Council is pleased to direct that the following letter, No. 218, dated the 5th March 1900, from the Consul General for the Austro-Hungarian Empire in British India, Bombay, regarding the establishment by the Austrian Government of a Commercial Office in Paris during the Exhibition of 1900, be published in the *Gazette of India* for general information.

(True extract.)

T. W. HOLDERNESS,

Secretary to the Government of India.

Letter from the Consul General for the Austro-Hungarian Empire in British India, Bombay, No. 218, dated Bombay, the 5th March 1900.

I have been informed that the Austrian Government have established in Paris during the World's Exhibition there a Commercial Office, whose principal duty will be to assist visitors in the Austrian section of the Exhibition.

The office was opened on the 1st January 1900 and is situated Paris, 15, Avenue d'Antin. Visitors applying there will receive all information that they may require about Austrian Exhibits, and, if they so desire, will be accompanied by Experts and Interpreters.

PUBLIC WORKS DEPARTMENT.

RAILWAY STATISTICS.

STATEMENT OF APPROXIMATE GROSS EARNINGS OF INDIAN RAILWAYS FROM 1ST JANUARY TO 18TH MARCH 1899, AND FROM 1ST JANUARY TO 17TH MARCH 1900.

N.B.—As regards the figures in column *Total earnings from 1st January 1900*, audited figures have been used, as far as possible.

Railway.	Average earnings per mile per week during the 1st-half of 1899.	Week ending 18th March 1899. Mean mileage worked.	Week ending 18th March 1899. Earnings. Total.	Week ending 18th March 1899. Earnings. Per mile open.	Week ending 17th March 1900. Mean mileage worked.	Week ending 17th March 1900. Earnings. Total.	Week ending 17th March 1900. Earnings. Per mile open. PART VI.

Proceedings of the Council of the Governor General of India, assembled for the purpose of making Laws and Regulations.

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

PROCEEDINGS OF THE COUNCIL OF THE GOVERNOR GENERAL OF INDIA, ASSEMBLED FOR THE PURPOSE OF MAKING LAWS AND REGULATIONS UNDER THE PROVISIONS OF THE INDIAN COUNCILS ACTS, 1861 AND 1892 (24 & 25 VICT., CAP. 67, AND 55 & 56 VICT., CAP. 14).

The Council met at Government House, Calcutta, on Wednesday, the 28th March, 1900.

PRESENT:

His Excellency Baron Curzon of Kedleston, P.C., G.M.S.I., G.M.I.E., Viceroy and Governor General of India, *presiding*.
His Honour Sir John Woodburn, K.C.S.I., Lieutenant-Governor of Bengal.
The Hon'ble Major-General Sir E. H. H. Collen, K.C.I.E., C.B.
The Hon'ble Sir A. C. Trevor, K.C.S.I.
The Hon'ble Mr. C. E. Dawkins.
The Hon'ble Mr. T. Raleigh.
The Hon'ble Mr. Denzil Ibbetson, C.S.I.
The Hon'ble Mr. P. M. Mehta, C.I.E.
The Hon'ble Nawab Mumtaz-ud-daula Muhammad Faiyaz Ali Khan.
The Hon'ble Mr. J. K. Spence, C.S.I.
The Hon'ble Mr. G. Toynbee.
The Hon'ble Mr. D. M. Smeaton, C.S.I.
The Hon'ble Mr. J. D. Rees, C.I.E.
The Hon'ble Maharaja Rameshwara Singh Bahadur of Darbhanga.
The Hon'ble M. R. Ry. Panappakkam Ananda Charlu, Vidia Vinodha, Avargal, Rai Bahadur, C.I.E.
The Hon'ble Kunwar Sir Harnam Singh Ahluwalia, K.C.I.E., of Kapurthala.
The Hon'ble Mr. H. F. Evans, C.S.I.
The Hon'ble Rai Bahadur B. K. Bose, C.I.E.
The Hon'ble Mr. Allan Arthur.

DISCUSSION OF THE FINANCIAL STATEMENT FOR 1900-1901.

His Excellency THE PRESIDENT said:—"It has been suggested to me by more than one Hon'ble Member that it may be a convenience, both to the Member concerned and to the rest of Council, if, in the case of his having a

speech of great length to make, he be given permission to lay it upon the table, and to deliver only a summary of it, or such portion of it as he may think desirable. Whilst I have no wish to curb the natural eloquence of Hon'ble Members, I think that this is an excellent suggestion, and, if any Hon'ble Member proposes to take advantage of it to-day, I will not stand in his way. The speech, even if not delivered here, will, of course, appear in its entirety in the Press, and will thus appeal to the wider audience for whom it is probably intended."

The Hon'ble MR. DAWKINS moved that the Financial Statement for 1900-1901 be taken into consideration. He said:—"I do not propose to make any general remarks at this moment. I think it will be better to wait for the observations of Hon'ble Members and then to supply any information in answer to these observations, which it may be in my power to give. But there is one matter which perhaps I may call attention to. The Government has just concluded an arrangement with the State of Marwar for converting the local currency into British rupees We have undertaken to convert up to two crores of local currency into British rupees, the Durbar engaging to deal with any excess that may be found to exist over that amount. The Government has had much satisfaction in making this arrangement although our finances derive no profit whatsoever from the transaction, but it will be of great assistance to the people of the State, whose difficulties in these days of famine have been much increased by the existence of this depreciated and depreciating currency. I venture to hope that the intelligent and public-spirited action of the Maharaja of Jodhpur may find imitators. Considerable difficulties, I believe, exist elsewhere owing to these depreciated currencies, but this is not a matter in which Government can take the initiative; that must be left for the Native States, though I think I can say that if any Native States care to approach the Government they will be sure of meeting with treatment as liberal as our duty to our own taxpayers permits us to afford."

The Hon'ble MR. ALLAN ARTHUR said:—"My Lord, as junior member of Your Lordship's Council, it affords me much pleasure to congratulate the Government of India on the state of their finances as disclosed by the Budget. It has been pointed out by a leading newspaper that the Government have to thank certain fortuitous circumstances for the satisfactory position shown, but, when it is considered that a famine of unprecedented magnitude, following closely on another of great severity, has to be provided for in order to avert terrible disaster, it will be generally admitted that, given normal seasons, the finances of India are in a condition to enable the Government to resume expenditure, temporarily suspended, on Railways, Roads and other works, to the advantage of the country, and thereafter to show a handsome surplus. I should like to congratulate the Hon'ble Member on the very interesting statement he has made in laying his figures before the Council, and to mention that the reception by the Mercantile community of his first statement is tinged with the regret that it is also his last. The innovation the Hon'ble Member has made in showing the various items of revenue and expenditure in pounds sterling is a welcome change to those who were puzzled by the mystical 'Rx.' It simplifies the Budget and is to be welcomed as apparently the first indication the Government of India have given of their entire confidence in the success of their currency policy. The Government might further indicate this confidence by guaranteeing interest on Government Paper at 1-4 Exchange. The main objection would appear to be that the change would put a considerable profit into the pockets of present holders, but it would start a move in the direction of English investment and would simplify to an extraordinary degree the question of borrowing in rupees.

"My Lord, the question of the Gold Note Act is one which has a considerable interest for the Mercantile community, and my remarks upon it are of considerable length. I take advantage of Your Excellency's permission to lay on the table a note[1] on the subject. The Hon'ble the Financial Member may wish to make some remarks on points upon which I have touched and I would summarize them

[1] *Vide* Appendix I.

very shortly. With reference to a remark of his that the season opened without the assistance of the money that is usually brought out before X'mas by the Exchange Banks, I point out in fairness to these Banks that for the last three months of 1899 much heavier remittances were made from England than were made during the same period in the preceding five years. I then go on to show that the result of the Secretary of State's Notification in connection with the Gold Note Act was to force Exchange up to 1*s*. 4⅝*d*., and that owing to the over-financing, which the Notification caused, the rate has since declined to a point below 1*s*. 4*d*. to the disadvantage of the Government of India. I suggest that the refusal of the Secretary of State to have a maximum rate may be taken as a sign of weakness, and that a sudden retreat from a situation he had taken up cannot fail to constitute an unsolid foundation in the public view. I refer to certain remarks made by Your Excellency on the great advantages of attracting British capital to India, and on the necessity of Government doing everything in their power to minimize fluctuations in Exchange, so that capital may flow freely between England and India. I point out that, in order to prevent excessive fluctuations, Government should fix on a maximum rate of Exchange, beyond which the rupee must not be allowed to go, and that in order to make the Gold Note Act operative, the Government, seeing that they are responsible for the laws and regulations under which money can be imported from abroad or manufactured locally, should be prepared to give rupees in exchange for gold to an unlimited extent at the maximum rate fixed upon, which facility would only be availed of in times of pressure. And, finally, I suggest that Government should take power to purchase silver for coinage purposes against gold deposited under the Act, so that they may have no difficulty in meeting the demand for rupees, which they have recently experienced, and place the profit on such purchases to a special account for the maintenance of the Currency policy as recommended by the Indian Currency Committee.

"The concluding part of the note deals with the absence in India itself of a really effective last resort. The Bank of Bengal have advocated the desirability of the Presidency Banks being given access under certain restrictive terms to the Paper Currency Reserves in times of extreme pressure. I agree that there are difficulties as suggested by the Hon'ble Member, but think that the facility asked would be seldom, if ever, availed of, that the knowledge that there is a really effective last resort in India would be of immense assistance to those who are responsible for the financing of the internal trade of the country, that the difficulties the Hon'ble Member foresaw may not be so great as he anticipated, and that, as the facility asked for would be of great benefit to the internal trade of the country, the proposals of the Bank of Bengal should not be finally rejected.

"My Lord, there are two points in the Budget, which appear to me to be most satisfactory. They show a progressive spirit, and cannot fail to have the approval of those who believe in insurance against misfortunes. I refer first to the increased grant to Irrigation works. It has sometimes been said that the Government of India played with the important question of Irrigation, but this is a reproach which can no longer be levelled at them, and in this connection it is very satisfactory to learn that an officer of great experience is being put in charge of the Irrigation Department. The other point is in connection with Military expenditure, and the Military Department are to be congratulated on having prevailed on the Government to agree to re-arm the native army and the Volunteers with the Magazine rifle, to establish a cordite and a central gun carriage factory, to increase the number of officers with native regiments, and to ensure the greater mobility of the artillery. I notice that no mention is made in the Hon'ble the Military Member's interesting statement as to when the Volunteer re-armament is to take place, and I should like to point out that the arms issued to Volunteers are in many cases so worn out that it is most desirable to replace them with as little delay as possible. I should also like to draw attention to the fact that Calcutta with its thousands of Volunteers has most scanty and inconvenient accommodation in the matter of rifle ranges.

"My Lord, there is only one other matter I should like to touch upon, and that is the very handsome Revenue Surplus from the Telegraph Department. It is somewhat ungenerous to adversely criticize a Department

which has done and does splendid service throughout the Indian Empire, but, when I know that a friend of mine, who despatched a deferred telegram from Simla at the same time as he left Simla himself and arrived at my house in Calcutta just three days before the telegram, which is only one of many similar instances that I could give, and when I see a surplus on Telegraph Revenue account of 49⅓ lakhs of rupees, I cannot help remarking, to quote from my hon'ble friend's Financial Statement, that there is something not altogether right in the State of Denmark. I notice that a deficit is budgetted for for next year in the Department, but that is after debiting Capital Expenditure to Revenue, and I trust that no erroneous idea that the deficit is a real deficit and that the Department is working at a loss will be allowed to stand in the way of money being spent on additions to the Signalling staff or whatever is required to ensure a deferred telegram being transmitted from one to another part of the country more quickly than a railway passenger."

The Hon'ble RAI BAHADUR B. K. BOSE said:—" My Lord, the remarks I am going to submit will be confined to matters relating to the Province I have the honour to represent.

" In explaining the Financial Statement for 1899-1900, Sir James Westland laid before the Council two statements showing the progress of Provincial Finance from 1892 to 1899. Regarding the Central Provinces the following remarks occur: ' Fairly continuous progress,—a small drop in 1894-95 due, as the details show, to failure of land revenue. Recovery in 1895-96 Then a serious loss of revenue in the two famine years, 1896-97 and 1897-98. But complete recovery in the early future is anticipated.' The hope that the Province was about to enter on an era of renewed prosperity has not unhappily been realized. The year opened with disappointment and threatens to end in disaster. 1893-94 was the last year when the Province enjoyed as a whole the blessings of a good harvest. The fairly unbroken progress made till then was, in my humble opinion, due to the farseeing and generous policy of a long-term settlement coupled with an assessment which, on the whole, was moderate and in many districts exceptionally so, for the advantages accruing during the continuance of the settlement from extension of cultivation and rise in prices remained with the people. As the official records of the period show, a contrary policy had brought the country to the verge of ruin. A succession of bad seasons has, however, undone to a great extent the good results of that generous policy. To add to the difficulties of the people, the cycle of bad years has synchronized with the period during which many of the enhanced assessments of the new settlement have come into force. The Budget for 1900-1901 shows under receipts a smaller sum as land revenue, though the basis of the estimate is the revenue as enhanced, temporary remissions and suspensions accounting for the decrease. The percentage of enhancement inclusive of the resulting enhancement in cesses, but exclusive of the increase in the rating of sír land from a low to a full valuation, has been in one district 111 per cent. on the old demand, 70 to 99 per cent. in seven, 50 to 61 per cent. in five, and below 35 per cent. in two districts. The last two are districts where the percentage of assets taken as revenue and cesses at the old settlement was as high as 80. The above enhancements are said to be warranted by the progress of cultivation and rise in prices since the old settlement. Admitting the full force of this statement, the question still arises whether, in view of the altered circumstances of the country, the policy which led to these enhancements should not now be reviewed. I beg to be permitted to lay on the table a note[1] dealing with this subject in some detail.

For details *vide* annexures A and B to the note in Appendix II.

" Under the circumstances set forth in the note, I venture to hope that there will be a re-adjustment of both revenue and rent charges on land on a basis more in consonance with existing facts. In order that the agriculturists may reap the benefit of such a policy, if generously adopted, the next step needed is to relieve them of their present burden of debt. In some tracts they were so swamped with debt that no measure which did not bring about a settlement of their existing liabilities could save them from a position of virtual serfdom

[1] *Vide* Appendix II.

to their creditors. Mr. Commissioner Fuller, with the approval of the then Chief Commissioner, the Hon'ble Mr. Ibbetson, elaborated a scheme which has been most successfully worked in some of the worst tracts. The scheme involved a settlement of debts through Panchayats working under control of Government officers. As would appear from the Government Resolution of November last, the creditors were found so reasonable that in one tract they gave up debts amounting to about 10 lakhs. In another tract out of debts aggregating about 40 lakhs and owed by about 15,000 tenants and 'pattídárs' about 28 lakhs, a sum nearly equal to ten times the revenue, were remitted. The conspicuous success of the experiment would justify its wider application. The secret of success was that by working through the people, the local public opinion was enlisted in its favour. But there is always a small minority of creditors, who are not amenable to reason. It is these men who bring discredit on the whole class and who need looking after. Whether in selected localities, composition on a fair basis through conciliators acting under Government control should not be provided for by statute where the voluntary system fails, in the case of agriculturists whose debts exceed a certain number of times the rental, is a question worthy of consideration. I believe that worked with caution and with due regard to the interests of both debtors and creditors, such a measure for settlement of debts which are impossible of repayment and which injure the former without benefiting the latter, would do good to all.

"The position of the agriculturist thus assured, the next step must be to provide him with loans for cultivation on fair terms. This was done in the case of those relieved under Mr. Fuller's scheme, who needed such help, by 'takkáví' loans. 'Takkáví' operations have, mucht o the benefit of the country, largely increased within the last 12 years. In 1889 the sum loaned was under half a lakh. In 1897-98 it exceeded 10 lakhs. I am unable to make out how much has been put down for the next year. In the year following the last famine about 15 lakhs 70 thousand were advanced. Besides, 29 lakhs were given from the Charity Fund. I am afraid there will be greater need for similar help this time. One great objection to a wider application of 'takkáví' operations is that the State thereby incurs a responsibility which may result in loss to the public revenue. But I take leave to point out that the new Tenancy Act, as I read it, has made a change in the borrowing power of the tenant. While he cannot mortgage his holding to a private creditor, no such disability attaches to him as regards statutory loans. Except where a mortgage registered before the Act and valid under the old law exists, the land of the tenant would furnish adequate security for the sum he would ordinarily need for his cultivation. But at the same time it must be confessed that the State cannot take the place of the village Sowkar. How to provide the landholders with cheap banking facilities, so that they may borrow without hopeless and lifelong embarrassment is a question which it would be improper for me to discuss now. But all the same its importance cannot be overrated.

"If only arrangements could be made to give the landholder what he actually needs for his land at a fair rate of interest, he cannot in the future get himself involved. For the new Tenancy Law has cut down his power of transfer. The fall in the Registration income during 1898-99 of 18 per cent., an income the lowest realized during the past seven years, is said to be partly due to this legislation, which has practically made the cultivating right in sír non-transferable when the village is ancestral property and has further made non-privileged tenant-right inalienable. In my humble opinion the fetters thus imposed on the power of transfer are in accordance with the spirit of the ancient usages and laws of the people. Power to transfer ancestral property, except for certain family purposes, did not exist under the old Mitákshará Law. This salutary rule has, in the case of fathers, been rendered almost nugatory by recent judge-made law, and the new legislation in so far as it partially restricts the power of alienation and thus prevents to some extent dissipation of family property by the improvidence of individual members, is a step in the right direction. As a matter of fact, in pre-British days neither the málguzár nor the tenant had any right to transfer, and even after the country became British this power did not

exist. In the case of the former, it was for the first time brought into existence as a free gift from the Crown at the proprietary settlement. As after-experience has shown, this measure, though conceived in the best interest of the people, has resulted in the extinction of many old families, the natural leaders of the village communities. The law assumed in these cases an equality of advantages and intelligence, which did not as a matter of fact exist; and the rigid enforcement of the so-called doctrine of freedom of contract undid the good expected from the conferral of absolute proprietary right. It was found in 1888 that during the 20 odd years which had elapsed since the Settlement, over one-fifth of the málguzári area had changed hands. Since then the evil became accentuated. The partial withdrawal of the former unrestricted right of transfer is a tardy measure of protection to the old landholding class. I admit the new law makes a village a less profitable investment to the capitalist and thus works to his detriment; but the good of the country at large demands that his interest should in this case give way to the interest of the great agricultural community, on whose welfare the progress of the country must rest.

"In addition to these measures, if irrigational facilities be increased the position of the landholders will be much assured. Your Excellency was pleased to say last year: 'The subject of irrigation is one that appeals very closely to my concern. We are all familiar with the aphorism about the service of the statesman who can make two blades of grass to grow where only one grew before; and in India we need not be reminded of the direct and almost immediate benefit to the agrarian class that results from an increase in the area of cultivation.' One noteworthy fact that has struck me in connection with irrigation expenditure is, that the Central Provinces do not appear to have participated in its benefit. Up to the end of 1896-97 the sum spent under the two main heads of productive and protective works was nearly 33 crores and a half, but as far as I can make out, the Central Provinces are conspicuous by their absence in the accounts relating to this expenditure. It may be that rivers which can serve as source of supply for canals are wanting, but what I am unable to make out is, why the question of having storage-tanks has never attracted attention. It cannot be said there is nothing in the country to suggest the utility of such works. We have many such tanks, made mainly in pre-British days, in what is known as the lake regions in the Central Provinces. Here an irrigation tank is an irregular sheet of water, its bank formed by hills and its dyke shaped out of spurs from them, thrown athwart the hollow The largest of them has a circumference of 17 miles. By two short bunds, the waters of scores of hills have been impounded into a lovely lake, which spreads its fertilising streams over large areas of surrounding cultivation. Where the crude untrained village headman succeeded, British scientific skill is bound to attain greater success. In a question like this I speak with great diffidence, but I believe that the tracts of high-lands and valleys, which abound in the Central Provinces, would, if looked into, furnish suitable sites for several such tanks. Two or three of them have been made of late years to supply drinking water to municipal towns, but their importance for irrigation does not appear to have received consideration. Probably the omission may be due to the fact that as enjoying the benefit of both the Bombay and Bengal monsoon current, agriculture in the Central Provinces was, until within recent years, considered immune. But now that this belief has been dispelled, I would respectfully draw attention to the importance of tank irrigation. As pointed out by the Famine Commission of 1880, the true value of these works should not be measured by their financial success, but account must also be taken of the protection they give in years of drought, while in seasons of average rainfall they give certainty to agriculture, increase the crop-outturns, and enable more valuable crops to be grown. In the Budget for 1900-1901 irrigation grant has been raised to a full crore, and I may be permitted to hope that the Central Provinces will not be forgotten when the distribution of this grant takes place. In connection with this subject, it is gratifying to find that

	Rs.
Productive	31,25,29,480
Protective	21,09,92,530
TOTAL .	52,35,22,010

more attention is being paid to irrigation-works as a measure of famine relief. These works show better results for the money spent than roads which are taken in hand merely to create employment for the people but which the country does not need, or which for want of repairs disappear in a few years after their construction.

"I cannot conclude without a word of reference to the famine which, for the time being, overshadows all other questions in my province. In replying to a municipal address, Mr. Fraser, our present Chief Commissioner, said with reference to the famine: 'But these feelings are mingled with deep anxiety and intense distress at the unprecedented calamities which have fallen upon the people. I am sustained in my anxiety and distress by the legacy which Mr. Ibbetson has left me in the elaborate instructions which, with his wonderful capacity, for work, he has framed for all departments of famine administration. I am sustained by the knowledge that I am surrounded by officers not only of capacity but of high purpose. And I am also sustained by the knowledge that the officers of Government will receive from the leaders of the people generally hearty co-operation and support . . . The Government of India have declared their intention to help us in every possible way in our struggle.' It is somewhat early to speak of the success of the policy the key-note of which was struck in these words. But if a thorough grasp of the situation, if ceaseless watching of the pulse of the distressed districts and skill in combining all forms of relief on the part of the head of the Administration, and if loyal support, incessant toil, and untiring devotion in the cause of humanity on the part of the local officers can command success, then is the success assured. The mortality returns are always most important guides in estimating the degree of success. An examination of these returns since the distress began discloses the gratifying fact that though overwhelmed by a calamity of even greater magnitude than that of 1896-97, when the deathrate at times went up as high as four times the normal in some tracts, the deathrate this time has not only not gone beyond the normal, but has actually been sub-normal in some months in some districts. But the famine with all its sufferings will, as we hope and pray, soon be a thing of the past; but the memory of the heroic efforts that are being made and the devotion and self-sacrifice that are being shown to repair its terrible havoc, a grateful people will not willingly let die. They are not given to noisy demonstrations, either of joy or grief; but whenever in the future when prosperity will once more smile over the land, they will, after the day's toil is over, gather together of an evening at the temple of their village God and the talk would turn upon the dark days of the great famine, the kindly remembrance of all that was done for them will stir their innermost heart, and they will pronounce with the deepest veneration and gratitude the names of those who gave their life-blood to save them, and chief among these names will be that of Your Excellency."

Deathrate in December 1899—2·16.
Do. in December 1898—2·20.

The Hon'ble MR. EVANS said;—"Last year the late Finance Member found himself in the happy possession of a surplus of nearly four crores, and the question was raised whether the existence of that surplus called for or justified the remission of existing taxation. The soundness of the conclusion at which Your Excellency's Government arrived that any such step would be inadvisable, has been fully established by the events of the last 12 months; and Sir James Westland acted wisely in turning a deaf ear to the suggestions that were then made that he should avail himself of the opening which the prosperous condition of the finances seemed to give him of resorting to the popular step of taking off taxation. Of the two reasons then given for keeping a hold on the surplus, one has fortunately not taken practical shape, and I may be permitted to take this opportunity of adding my own congratulations to the many which Your Excellency will doubtless receive from my Hon'ble Colleagues on the complete success that has attended the introduction of a gold standard with the boon of a fixed exchange, the most important event that has taken place in the financial history of this country for many years. The second reason given by the late Finance Member for

maintaining the existing taxation was based on the peculiar characteristic of the finances of this country which renders it unwise to be hasty in dealing with what may be only a temporary superfluity of funds as if it were necessarily permanent in character. Sir James Westland remarked that 'the Government of India regarded themselves as under an obligation in the face of the deficits of the preceding two years to recover their position by accumulating counter-balancing surpluses.' The revenue of this country is derived mainly from sources dependent on its agricultural wealth and prosperity. Recent years have given remarkable examples, some saddening, some cheering, of the extraordinary vicissitudes that affect the agriculture of this country. The failure of the seasonal rains in 1897 involved wide areas and a large population in the sufferings arising from scarcity and famine. Equally remarkable was the rapid recovery that occurred in 1898, in which year, speaking from my personal experience in the Province I have the honour of representing, it was difficult to believe that the country had but a few months previously gone through a crisis which had afflicted more or less seriously eight of the nine divisions of that Province. It was this rapid revival of the resources of the country that gave the late Finance Member the large balance in his Budget. Had it been possible or prudent to regard that return of prosperity as certain to continue even for a short time, the case would have been different That it would not have been prudent to take such a view has been proved to our sorrow by the return in an even more extensive character of agricultural disaster and distress. But while we may feel that the events of the last 12 months have taught us the wisdom of regarding with some distrust the promises of returning prosperity, we have also the consolation that rapid and unexpected as are the agricultural catastrophes that overwhelm this country, its recovery from those disasters has in times past been equally and as wonderfully rapid and complete. If, then, on the one hand it is rash to presume on a continuance of good seasons, we have learnt that we should not be led by the occurrence of such calamities to despair of an early return of prosperity, and we may join with some confidence in the hope expressed by the Finance Member that famine will have disappeared by the end of next September, to which anticipation practical effect has been given by estimating the land-revenue for the coming year at one crore and a quarter above the amount which it is expected will have been realized during the current year. Turning to the figures for that year, it is a remarkable and satisfactory feature in the revised estimates that the loss in land-revenue due to the failure of the rains will have been very largely recouped by gain in the revenue derived from Railways and Irrigation ; and we may hope that whenever a disastrous agricultural season occurs, there will be some considerable compensation, from a financial point of view, in the additional receipts derived from these two sources. It is also a matter of congratulation that in spite of the unexpected excess of over 1¼ million sterling expended on famine relief, the surplus at the end of the current year will be nearly, if not quite, as great as was estimated when no fears of such a disastrous season were entertained. On the other hand, that a considerable portion of the surplus is due to what may be fairly described as an accidental saving in military expenditure and the unfortunate, though necessary, reduction in the expenditure on Buildings and Roads, is a fact that cannot be ignored. One of the many lamentable effects of an unexpected deficiency in the funds at the disposal of the Government of India, whether that deficiency be due to famine or war, has always been the inevitable reduction made in the expenditure on that useful object, Roads and Buildings. The expenditure on Roads and Buildings presents few of the attractive features of the outlay on Railways and Irrigation, but the material wealth and comfort of the people are largely affected by it. It is then all the more satisfactory to note that the expenditure on Civil Works has risen from 447 lakhs in 1896-97 to 477 lakhs in the current year and to 494 lakhs, the estimated expenditure on this object in the present Budget.

"The repeated occurrence of failures in the seasonal rains and the calamitous and widespread results arising therefrom naturally suggest inquiry as to the extent to which the Government of India proposes to devote its resources to the development of Railways and Irrigation, the two great weapons with which this country can strive to avert the attacks of famine, and mitigate their

severity. Unmixed satisfaction must be felt by all that in spite of the difficulties arising from the demands on account of famine relief during the current year and the year before us, the outlay on Railways will, even making allowance for 'the arrears of the old programme handed on to the new one,' referred to by Sir James Westland, exceed the expenditure foreshadowed in the last triennial programme of capital outlay on Railways prepared in November, 1898.

"The North-West Provinces and Oudh are singularly favoured in the extent of their railway system, but there is admittedly still room for progress, and the Province has welcomed the construction of the line from Ghaziabad to Moradabad and looks forward to the early authorization of the commencement of work on the line from Shekohabad to Farrukhabad and the Agra and Delhi chord line. Still more gratifying is it to learn that Your Excellency's Government has resolved in spite of all difficulties to raise the grant for capital expenditure on Irrigation by one-third above the amount provided by the practice of recent years. The marvellous prosperity of a tract of country enjoying the benefits of irrigation when there has been a failure of the annual rains, as compared with the unhappy condition of other areas even in its immediate neighbourhood and subject to the same climatic conditions, which are not so fortunate, affords ample proof of the wisdom of making every effort to provide funds for this branch of expenditure. Amongst the projects mentioned in the programme of Irrigation Works to be undertaken in the coming year I am glad to find mentioned the completion of the Fatehpur Branch of the Lower Ganges Canal, which will give water to a tract that suffered severely from the want of it in 1897.

"My Lord, we have been informed that the heavy demands made by the various provinces for their support against the calamity of famine will be met in full and that a helping hand will be given to the Native States that are in the same difficulties. That Your Excellency's Government has been able to meet this strain on its resources without either calling on the tax-payers to assist by fresh contributions to the public treasury or asking for aid elsewhere must be a source of legitimate pride to all who feel an interest in the welfare of this great country."

The Hon'ble KUNWAR SIR HARNAM SINGH said:—"My Lord, it is gratifying to observe that the Finance Member has been able to present to the Council a Financial Statement of the most remarkable character. It is remarkable in more than one sense. There is not only no deficit, but there is an actual surplus and we are led to expect a brighter future. The unique character of the statement would have been complete if some of the taxes which are pressing heavily on the people had been taken away. These would have been taken away I am sure, had it not been for the large famine expenditure which has been incurred. When it was announced that India was suffering from an unparalleled famine, people were apprehensive that there would be a heavy deficit; but the financial gloom has been dissipated by the waving of the magic wand of the Finance Member, and despondency has been converted into hopefulness. People's anxiety has been greatly relieved and the conspicuous ability with which the Indian finances have been managed during the passing year has been keenly appreciated.

"I am glad to note that it has been pointed out that the unappropriated balance of the famine grant has in recent years been employed on works which are not exclusively of a protective, *i.e.*, famine character; and that it has now been decided that protective works, the cost of which may be charged against the famine grant, shall include only such works as may be sanctioned solely and exclusively in view of their value as a protection from famine. This is a welcome departure, and the decision which has been arrived at will be calculated to remove a great deal of misapprehension which exists on the subject. In normal years there will be a large balance when there is no direct expenditure on famine. The Finance Member proposes to show this unappropriated balance under the heading of Reduction or Avoidance of debt. I do not clearly understand in what respect this would be an improvement upon the former heading of Reduction of Debt. The heading proposed will to my mind be as puzzling as the former one.

"We are told that in a normal year in which ordinary revenue and expenditure balanced, the Government of India instead of raising a loan of three crores

for public works would be able to reduce the three crores by the unappropriated balance, say a crore, of the famine grant. Could not the same result be obtained by investing the unappropriated balance in a separate fund, which may be called the Famine Fund, and appropriating a certain definite portion, say one crore, in aid of public works if they are of a protective, *i. e.*, famine character? The advantage of a separate fund would be, I venture to think, twofold. First, the practice pointed out by the Finance Member of charging against it expenditure which is not exclusively of a famine character, will be guarded against; and second, after defraying expenditure for protective works, a balance, however small, will be left behind to form the nucleus of a permanent Famine Fund, which will increase from year to year, when there is no direct expenditure on famine, and the expenditure on protective work diminishes. In making this suggestion I bear in mind the fact that substantially there would be no difference as regards the appropriation of the surplus of the famine grant, but still the method I venture to suggest might be calculated to create a better understanding of the famine policy of the Government of India.

"It seems to me that in the Budget Estimate for the coming year a rather sanguine view has been taken of our sources of revenue. These sources do not appear to me to be so elastic as they are taken to be. I am rather doubtful as to whether these sources are capable of yielding the revenue which has been estimated. I will give an illustration of what I mean. Land revenue has been taken at one crore and a quarter higher in the budget than in the revised estimate. It is hoped that famine will have disappeared by the end of next September. The increases in the different provinces are, Bombay 67 lakhs, Madras 31 lakhs, and Punjab 27 lakhs. I have considerable misgivings as regards the estimated increase of revenue in the Punjab, the Province I have the honor to represent. In 1896-97 the total land revenue realisations on account of the demand of the year amounted to 2 crores and 32 lakhs. The collections were abnormally low in consequence of the suspensions of fixed land revenue allowed on account of drought. The realisations of the next year amounted to 2 crores 51 lakhs. In the following year, which was a year of comparative plenty, following a year of drought and famine, the realizations came up to 2 crores and 63 lakhs. I would call the attention of Your Excellency to the rate of increase of revenue during these three years. The first year was a year of drought; in the second year the pressure of famine had considerably diminished, but the Province had not recovered its normal condition; the third year was a year of plenty, the arrears of revenue were to a great extent realized and the Province showed a large increase of revenue. I find from the last Punjab Administration Report that the increase during that year was due partly to a rise in the income from fluctuating land revenue occasioned by favourable seasons and good canal working, and partly to large receipts on account of *nuzarana* and sales of land on the Chenab Canal. In the second year there was an increase of about 18 lakhs, and in the third year, as compared with the previous year, there was an increase of about 12 lakhs. If the large receipts on account of *nazdrana* and sales of land in the third year be taken away from these 12 lakhs, the increase shewn would be considerably diminished. I am inclined to think, my Lord, that the realizations of the third year were abnormal, and that the Budget estimate ought not to have been based on the collections of this year. In 1897 there was only an increase of 18 lakhs as compared with the previous year, and this increase might be taken as a standard; but then it must be considered that the produce of the land would be greatly diminished after a second famine within a period of three years. The mortality of the agricultural cattle will be considerable; those which were spared at the first famine would not be spared at the second and an adequate supply of fresh cattle would be difficult to be obtained in the coming year. Large tracts of land will be lying waste and revenue realizations are sure to be affected. It should also be borne in mind that low prices following on a plentiful harvest always reduce the receipts of cultivators and their decreased income naturally influences the revenue collections. It is these considerations which lead me to think that the increase of land revenue in the Punjab amounting to 27 lakhs is, in my humble opinion, overestimated. What I have said with regard to the Punjab applies *mutatis mutandis* to other Provinces affected with famine.

"I note with satisfaction that rupees one crore has been allotted to canals and tanks for irrigation purposes.

"There can be no question that the Tariff Amendment Act will be productive of the very best results. Few measures have ever passed through this Council, to quote Your Excellency's words, 'with a greater weight of a qualified and homogeneous opinion behind them.' The Act was passed with the object of relieving India from an external competition which was shown to have already produced serious consequences upon Indian agriculture and manufacture, and which if unarrested was likely to produce a continuous and dangerous decline. An industrial and agrarian grievance was redressed by the passing of this Act and sanguine hopes were entertained that the Act would encourage and stimulate the development of an important indigenous industry which was on the verge of being extinguished. Sufficient experience has not yet been obtained of the operation of the measure to enable the Government of India to form a correct estimate of its consequences. The countervailing duties on bounty-fed beet sugar came into force in the current year, practically not until May. It is true, as the Hon'ble Finance Minister says, that trade was conducted during the latter part of last year under abnormal conditions of plague, or of plague and famine, and it is impossible to look to this period as throwing light on the effect of the measure under normal conditions. But still as the figures from May 1899 to January 1900 are available, a rough idea might have been given with regard to the immediate results of the measure. It has been shown that prices have been influenced by the Act. The rise in prices may have benefited China and Java, but it has not been, as it will be readily admitted, to the interest of Indian consumers. The question to determine is how far the Act has benefited Indian producers and what stimulus has been given to native refining industries. It is impossible, the Finance Minister tells us, to answer that question at present. Till that question is satisfactorily settled it would be idle to speculate on the benefits to be derived from the measure.

"I believe, my Lord, that the introduction of the gold standard and the gold currency will have far-reaching effects. It is quite true that India has at length reached the object which she is struggling for years to attain. By the introduction of this measure a practical fixity in exchange is expected to be obtained. This is certainly to the immense advantage of both the Government and the people. But, my Lord, permit me to say that this economic legislation is entirely new to the country. The people have been accustomed for centuries to the silver currency and it will take them some time to appreciate the advantages of the gold currency. The full effect of the measure passed on the 15th September to make gold legal tender in India has not yet been realized by the people. I am aware that Government has no intention of forcing gold upon a reluctant public, but still I take the liberty of saying that the recent notification issued with the object of familiarising people with gold currency by cashing postal orders in Presidency-towns of the value of Rs. 15 or £1 in gold coins, and the proposal to pay certain salaries in gold cannot but be viewed with misgivings. A sovereign is not sold for Rs. 15 in the bazar. The value varies with the current rate of exchange. The value of a sovereign will thus be sometimes more and sometimes less than Rs. 15. At present, after the issue of the Postal notification, a sovereign is sold in the bazar, I am told, with a *batta*, that is to say, its full value is not Rs. 15. The money-changers are shrewd men of business and they would on no account cash a sovereign, unless they see that some advantage is to be gained by paying the full value Ordinary people have dealings with these money-changers and seldom or never go to the Currency Office to cash their sovereigns. When such is the situation, and when no absolute fixity of exchange has yet been obtained, would it not be expedient to take precautionary measures, and instead of pushing on gold currency, to introduce it gradually in the market after familiarising the people with its advantages? I have no doubt that the people will take to it after a time, but just now the experiment is novel and it is not looked upon with a favourable eye. There is another point in this connection to which I wish to draw the attention of the Council. There is a tendency for hoarding which will be encouraged and not checked by the present measure. I believe, however, that when sovereigns are freely and widely circulated and are easily sold in the bazar for their full value, this vicious habit will be eradicated.

"My Lord, what has been observed by the Hon'ble Mr. Bose in regard to the

Revenue Settlement in his Province deserves careful consideration by the Government of India. I am bound to admit that in my Province the Government has been very liberal, and no one can reasonably complain of heavy assessment. I am sure that in this the Hon'ble Mr. Ibbetson will bear me out. I would, however, point out in the interest of both landlord and tenants that it is desirable that the revenue settlement should be of at least thirty years' duration. I am strongly of opinion that when a district is properly surveyed, rights recorded, and lands classified, it should not be disturbed again with the view of increasing the revenue demand at the expiry of the settlement period, unless sufficient reasons, such as extension of cultivation and appreciable rise in prices of food grain, are shown. As to what trouble and harassment the people are subjected at the time of fresh settlement I would quote the words of Sir A. Colvin :—

' In 1874, twenty-six years will have elapsed from the date on which the two first of the districts now comprised in North-West Provinces were placed in the hands of a Settlement-officer. Others were begun twelve years ago and are not yet sanctioned ; one of these is not yet even completed. These facts are significant to those who know what the settlement of a district means ; the value of property depreciated, until the exact amount of the new assessment is declared, credit affected, heart-burning and irritation between landlord and tenant, suspicion of the intentions of the Government, a host of official underlings scattered broadcast over the vexed villages. Nothing can equal the injury inflicted by a slow, uncertain settlement, dragging its length along, obstructed by conflicting orders and harassed by successive administrations, and finally threatened with annihilation at the moment when it seems to have nearly finished its course. —Little wonder that we hear of the land needing rest !'

" So far as I understand Government policy has of late been calculated to avoid these harassments to the people, but I venture to think, my Lord, that a definite declaration should be made on the subject by the Government.

" My Lord, it is a matter for congratulation that, notwithstanding the excessive expenditure entailed by famine, the Government of India has not found it necessary to resort to any fresh taxation. It cannot, however, be safely said that the finances of the Indian Empire are in a sound condition. No country would be justified in boasting that its finances are healthy and prosperous unless it can show that in time of emegency it can fall back upon a tax or taxes which would yield sufficient revenue to meet the deficit. I cannot shut my eyes to the fact that India is heavily taxed and that any further taxation would be repulsive to the people.

" Let us hope, however, that the country will soon emerge from plague and famine ; and with the free and wide circulation of gold, the disappearance of fluctuations in exchange and the careful husbanding of the resources of the Empire, our financial stability will be fully established, and Your Excellency's Government will then be enabled to give relief to the people in the way of reducing taxation, *e.g.*, the salt tax and the lower range of the income tax. Such a boon would be hailed by the whole country and would signalise Your Excellency's administration in the annals of India."

The Hon'ble RAI BAHADUR ANANDA CHARLU said :—" No man with a soul, not altogether dead to all finer sensibilities, will hesitate to give Your Excellency's Government the very highest praise for cheerfully and unreservedly taking upon your shoulders the entire burden of the famine expenditure in the present crisis. There are, indeed, in the Budget before us. some clear indications—I should say for the first time perhaps—of how the fund, originally designed solely as an insurance against famine and asserted year after year as applied to that object, was not always administered in *strict* adherence to principles initially declared. But, in the face of the hearty consecration, as it were, of the entire available resources of the State, by Your Excellency's Government, to safe-guard life in the present juncture and in the face of the no less colossal effort made by your predecessor's Government to seize the Indian Hydra by the throat and strangle it year before last, even the worst caviller will have no heart and no wish to quarrel with the past doings. There is further little use in crying over spilt milk. A

word or two may not, however, be out of place in regard to the future treatment of famine grants. In this view I, for one, will summon up courage to enquire whether, in order to minimise such heroic resolves and such wholesale appropriation as in the present trial, Your Excellency's Government will not, once and for all, debar future possibilities of deflection, by constituting them into what in law is termed trust property, clothed with all the rights to be kept apart, to be invested, to made to multiply, to be immune from all loss and to have all damage made good from funds, for the relief of which they have been drawn upon. A suggestion, somewhat of this kind, made when the fund was first created, was met with an outburst of temper and it was roundly denounced as amounting to a calumny; but the circumstance did not prevent the happening of precisely what had been feared. The process of laying unappropriated balances of famine grants under contribution for other than famine works, on the argument of avoidance of debt, is open to four salient objections. First, the sums so taken out do not revert *with interest or profits*. Secondly, the loss entailed by miscalculations or by other causes is made a charge on the fund. Thirdly, it virtually reduces the famine grant to the residue, *i.e.*, by so much as is drawn away from it. Lastly, by affording facilities to borrow without having to pay interest or profits, the usual unconscious increase in the readiness to borrow would follow - often by discounting fears which the absence of such facilities would inevitably accentuate. The best of men and the most calculating of men have not been proof against the insensible growth of this insidious tendency to be-little after-consequences in such circumstances; and it is best to reckon with this datum of wide-spread human nature.

"Another point which is connected with famine and which famine brings into disagreeable prominence is that something must be radically wrong when the failure of rain means failure of irrigation even in extensive tracts set down as tank-fed tracts, which are therefore not solely dependent—*mana-vari* as we call them in our Presidency—on the fall of rain. Now that it is declared in the budget that the programme of purely protective Railway works has been practically exhausted, one big drain on the famine grant may be said to be at an end, and the prospects of irrigation may be taken vastly to brighten; for there has all along been a contrast, as it was bound to be, between the way the claims of the railway and the claims of irrigation were respectively met. I say 'as it was bound to be,' because the cause of railway is virtually the cause of enterprise, of commerce, of manufacture, of railway rolling stock and of ambitious engineering; and the representatives of each and all of these necessarily unite their lusty voices and focus their cultured and energetic intelligence on it—a species of advantage which the unlettered and enert peasantry can never hope to command.

"The cause of the raiyat population must, of course, be the cause of the whole staff of executive Government, embracing all grades from the topmost to the lowest round in the ladder; and it augurs well for that population that, even in this year of sore and straitened circumstances, no less than a crore of rupees is granted for their special benefit, although large slices of it are ear-marked for specific irrigation works and although only a small fraction is available this year for the creation, extension and the repairs of the vast number of tanks and reservoirs, which play no insignificant part in aggravating or diminishing the ill-consequences of absent rains. Let me take my own Presidency for an example. There a large part, if not the major part, is dependent on tanks, reservoirs and similar contrivances to catch and collect water: and yet it is a mere toss-up whether they should be empty and bring on famine for want of rains as in the year before last or whether they are filled, partially at least, as this year and render scarcity scarce. Such instances cannot but prove that something more than the excavation of canals on a grand scale remains to be done and re-done continuously and at frequent cost. An indispensible condition precedent for realising the actual needs in this direction is the establishment of a system, under which every year statements, accessible to the raiyats concerned, shall be prepared for each tank or reservoir, irrespective of its size and irrespective of the obscurity of the village to which it belongs, showing (1) its traditional or recorded capacity to hold water, (2) the actual

quantity it did hold, (3) if the actuals fall short of the traditional or recorded quantities, the *reasons* for the same and the suggestions for their *remedy*, and (4) whether it is in good repair and whether any improvement or extension is advantageously possible. Along with these statements, reports must also be called for as to the several places where facilities exist for a series of wells by way of a complement of irrigational contrivances, in order that, whenever the clouds play us false, we may penetrate beneath the soil and evoke the services of the water-supply available there. There is indeed the system known as *Varakam* under which individual raiyats, who choose to do so, might obtain from Government monetary help for sinking a well here and a well there. But instances of such solitary or isolated action can never suffice, and it is beset further with difficulties which either greatly discourage or effectually frustrate it. The thing is fully worthy of systematic or organised effort on the part of Government. To admit of the creation of a system of wells, in the requisite adequacy and in full efficiency, the statements and reports I have alluded to ought to be embodied in our Yellow Book in full detail and must form the basis of the estimates in respect of irrigation by the Government of India, which is the authority, and the sole authority, to provide funds for their execution. Unless I am greatly mistaken, materials in this amplitude and minuteness happen not to be within the reach of those who are the ultimate dispensers of the funds which must be forthcoming. It is time, high time, that the rapid recurrence of famine, which we are bitterly experiencing, should direct and concentrate the entire forces of the executive Government on how best to render irrigation as complete as there is room for rendering it so. If there is force in the remark that the raiyats should take the precaution to lay by a store of money or grain against the possible dearth of the ensuing year, there is no less force in holding that every year the purveyors of water for purposes of agriculture should be equally providential in the matter of supply, expected of them.

"As bearing on the same subject of famine, the question of a permanent settlement of the land assessment is of vital importance. It was mooted so long ago as within the first few years of this country passing under the direct rule of the Queen-Empress; and there was a perfect accord to the effect that a fixed rent, fixed in perpetuity, should alone be claimable by the Government. Amid much difference of opinion on a number of other points of no less weight, this one was, I thought, conceded on all hands—the only reason why the thing was not accomplished at once was that some years should elapse before the full rent-value of all tracts was ascertained, so as to form the safe basis of action. A period of over five and thirty years has since elapsed; but the subject has again passed into the arena of controversy. It is neither wise nor expedient that an expression of opinion in the shape of a final verdict should be sought in the present disputatious stage of it.

"But one thing must be stated unequivocally, *viz*., that, so far as the classification of the soil and the Government share of the produce are concerned, a settlement should be finally and at once made and that all future revisions should solely depend on a manifest, steady and tangible rise in prices over a reasonable number of years so as to produce the conviction that the old order has substantially given place to the new. In my humble judgment, nothing short of this, as the minimum of lasting concession, would restore to the raiyat the benefits he once enjoyed of leaving fallow, for some years, land, impoverished by continual cultivation and of procuring at (to him) a heavy cost, grazing and fodder for cattle, and fuel, timber and other materials which he had been getting in former times without paying for them. So long as he is dependent on land alone, as he seems destined to do for a long time to come, and so long as he must look to land alone for all his comforts and conveniences—not to say, for living up to the standard almost forced upon him as a consequence of influences unknown to him in days gone by—*this is the least* to be assured and ensured to him and his children. I do not, of course, say that this will bring on the millennium, but I venture to say this, that there is little chance of happier days coming to him, unless and until this reform is wrought.

"There are some other points, my Lord, on which I would fain make a few

remarks; but I desist as I fear that I have already exceeded the limits of indulgence in making my humble representations—I will not say my criticism—on the most absorbing topic of the moment."

The Hon'ble THE MAHARAJA OF DARBHANGA said:—"My Lord, in accordance with the practice which usage has sanctioned in this Council, I desire to take advantage of the opportunity afforded by the presentation of the Budget Statement to place before Your Excellency's Government certain observations in matters of domestic and internal policy which may, I trust, meet with favourable consideration at your hands.

"It may be that I shall be compelled to trespass for some little time upon Your Excellency's time, but I venture, by way of extenuation, to plead the importance of the subjects I am about to discuss, and I am still further encouraged to proceed by the invariable sympathy and support which Your Excellency has accorded to all questions concerning the development of the resources of the country.

"In the first place, I would ask permission, my Lord, to say a few words with regard to the question of Land Settlement, and I would direct my remarks more particularly to the Central Provinces and Assam. It has been a pleasure to me to listen to the interesting speech of my hon'ble friend, Mr. Bose, and if I may say so, he has dealt with his subject in a masterly and exhaustive fashion. I fear that it cannot be denied that there is a strong feeling in certain quarters to the effect that the present policy stands in serious need of revision. The cry is not for the extension to the other parts of India of a permanent settlement similar to that which prevails in Bengal. It is felt, even by those who are the strongest advocates of the zámíndárí system, that this is a question which has been once for all decided by the Secretary of State for India. No useful purpose can be served by a futile attempt to re-open it, but, on the other hand, it is submitted that concessions may be reasonably and fairly made by Government without in any way abandoning the position they have seen fit to take up. It is universally admitted, I venture to think, that the only paying fiscal policy is that which imposes the most moderate rate consistent with the conservation of the finances of the State. I do not dwell upon this or upon other points which occur to me, for they have all been most ably elaborated by my hon'ble friend who represents the Central Provinces. But I should like to recapitulate, as briefly as possible, in the form of heads, the suggestions which I would lay before Government in this connection.

"First, the period of settlement should except in cases when waste land villages have been newly reclaimed, or when lands have been only recently opened up and brought into communication with the centres of trade, be definitely fixed at a period not less than 30 years.

"Secondly, the revenue should in no case be enhanced by more than 50 per cent. over and above the existing demand at any revision of settlement.

"Thirdly, the land revenue should in no case be more than half the total assets of the village.

"Fourthly, the Government should not draw from the landholders more than 60 per cent. of the village income including cesses and rates of all kinds.

"All these, my Lord, are points with regard to which strong feeling has been expressed with reference to the Central Provinces. In Cachar also I have reason to believe that very strong feeling has been manifested with regard to the re-settlement recently sanctioned, and I find that the grounds of opposition are almost identical with those advanced by the inhabitants of the Central Provinces, allowance being of course made for the differences caused by local circumstances and conditions of tenure. Nor is this feeling of what I must call dissatisfaction confined in Cachar to the general landholding and agricultural population. My information goes that the Indian Tea Association, representing a most influential section of the community, have also grave objection to take to the excessive nature of the uniform assessment of eleven annas per bigha which has been sanctioned on tea lands as compared with the new rates on rice lands, which range from four to eleven annas per bigha. On the general question I will do no more than call

attention to the criticisms of Mr. R. C. Dutt, whose knowledge of the country is on a par with his experienee of revenue and settlement work: but it is hardly likely that his observations can be all exaggerated and beside the mark. There must be a mean, and I would submit that that mean can be arrived at without injury to the interests of the Government and without hardship to those whose lands are assessed. I would venture to suggest that the best method of settling the difference of opinion and of placing matters upon a satisfactory footing is the appointment of a Commission. It might be presided over by the Chief Commissioners of the Provinces concerned, or in their default by the local Directors of Land Records and Agriculture; and it might be composed of two European and two native members. The grievances, such as they are, may be enquired into, and a large amount of important information would probably be collected, which the Government would find of value in making resettlements in the future. At all events, I submit that no harm can be done by the appointment of such a Commission and I am confident that, on the contrary, a considerable amount of good will result.

"I now pass on to the question of railways which occupy as usual a very important place in the Budget Statement. I notice that the Government have decided not to proceed with the construction of the Sakri-Joynagar line, but to leave it to the Bengal and North-Western Railway Company to complete. I have, of course, no objection to offer to the arrangement, but I would desire to make one suggestion in connection with it. In my opinion a limit of time should be assigned and the Railway Company should be informed that the work must be finished within that period. Unless this is done, the project will be hung up indefinitely and the development of a very promising tract of country may be needlessly delayed. If the Railway Company are unable to act up to the terms of the contract, I would suggest that the aid of the private capitalists should be invoked; and I make no doubt the Government would find that they had not to ask twice from such a source.

"Before I leave the subject I should like to add that I have observed with much satisfaction that the demand of the Bengal-Nagpur Railway upon the Famine Insurance Fund, towards meeting the charge of interest on its capital, has been reduced, owing to the improved traffic receipts and net earnings of the undertaking, to a payment of only Rs. 7,63,500 during the past year. The receipts of this Railway, it is to be hoped, will improve still further when the undertaking obtains free access on its own account to the Port of Calcutta. But it serves certain districts where cultivation is scanty and the population sparse, and it is doubtful whether the local traffic on many sections will be of much account. The question therefore arises, whether the Government should not endeavour, with the opening of the line to Calcutta, to obtain a through traffic to and from Bombay Presidency. Mineral is the traffic which at once suggest itself as likely to be of benefit to the undertaking and which, owing to the long lead, may possibly be carried at rates at which the Government regulations have hitherto prevented the Railway working, but which would be remunerative. I learn that it practically costs Rs. 11-3-0 to transport and handle a ton of coal between Assansol and Bombay *viâ* Calcutta. There is thereafter the haulage of the ghâts for distribution along the Great Indian Peninsula Railway, which must add another rupee at least, if not more, to the cost. But the obstruction that the management of the Great Indian Peninsula line have hitherto placed in the way of the traffic by the high rates of carriage they demand, stands a fair chance of removal after the 30th June, when the Government comes into possession of the Great Indian Peninsula Railway, and I would invite the Government with all respect to forthwith consider, on behalf of the European and native mining interests of Bengal, the advisability of adjusting rates so that the distribution of coal by the Railway system may come within the reach of the industry and promote the use of coal throughout the country. A transit charge of Rs. 11-3 per ton would be equal to about 1·15 of a pie per maund per mile on the land journey from Assansol to Bombay *viâ* Nagpur, and I venture to think this is a rate at which the Railway could work. I should regard it, my Lord, as one of the greatest reforms that could be brought about for the benefit of those engaged in agricultural pursuit and for the exporters of produce, if we could induce and encourage agriculturists

to restore cow manure to the soil instead of using it for fuel, and it appears to me that we could go far towards effecting this reform if we could arrange for a supply of cheap coal, or soft coke, from the coal-fields of Bengal, at a low rate of railway freight. The benefit derivable from the application of natural animal manure to the land needs no explanation, but I would direct the attention of those who may be in any way sceptical of the possibility of inducing agriculturists to change their system of disposing of cow manure, to the results that have been obtained at Poona, and to the system that the raiyats have adopted there.

"These remarks on agricultural pursuits lead me to enquire whether the time has not come when the Agricultural Department of the Government of India, and of the Local Governments might not be enlarged into something more than a mere Statistical Bureau of Land Records. Cannot the Government undertake to establish a College on a larger scale, or a Department to which agriculturists and others interested in the industrial development of this country may look for scientific information and help? It has been repeatedly proved that the initiation of scientific and practical investigations and experiments is beyond the means of individuals or even of groups of individuals, and so fully has this been recognised on the continent of Europe that it may be said the sugar, chemical, artificial indigo and the other industries established there have been brought into their present prominent position under the careful nursing and tuition of the State. In a large country like India, where the forces of nature are responsible for so many calamities, it would seem to be particularly necessary that there should be some such organisation to enquire and deal with diseases and blights, and to investigate and suggest new industries, by the production of new crops, or by the better use of the resources available. In connection with the former we have dangers besetting the prosperity of indigo, sugar-cane, betel-nut, castor oil and other crops, making it most desirable that the errors that may have been committed in cultivation or production should be corrected before competition from other countries has secured the trade. I am fully aware, my Lord, of the good work that has been inaugurated and carried out by Dr. George Watt, Director of the Economic Museum in Calcutta, and I am glad of this opportunity of giving publicity to it. But working (as I understand he is doing) practically single handed, and compelled to scour the country for cases for investigation in his laboratory, he can only do a limited amount of work. The marvel is the amount of work he has been able to undertake. Is it too ambitious an idea to picture a Bureau emerging from this most excellent foundation, having on its establishment a large staff of scientific professors and overseers, whose services might be placed at the disposal of Assocations, or of individuals, and whose chief aim and existence would be to develop the agricultural and commercial pursuits of the country? I do not presume to do any more than touch this chord, for under Your Excellency's master hand, it is not difficult to conceive the foundation of a great institution of the kind, formed on the most modern principles, and resulting in far-reaching benefits. But there is no use in growing crops that cannot be transported from locality to locality, and to the sea-board, and therefore it is equally necessary, as I have already ventured to point out, that an adjustment of the railway rates should be taken in hand if the trade of the country is to be really adequately developed.

"As an advocate of an extension of the railway system throughout India, I confess my reluctance to check any railway enterprise; but when there seems to be a difficulty in undertaking new schemes until the settled programme which the Government of India has already laid down is fulfilled, would it not be reasonable to postpone those schemes which on further enquiry appear to be less desirable? I refer especially to the hill sections and northern section of the Assam-Bengal Railway, the cost of which is apparently very much heavier than the original estimate, and the usefulness of which, owing to the character of the country traversed, is now apparently exceedingly doubtful. I need not explain this in further detail, as Your Excellency has very fortunately only recently visited the province of Assam and travelled on a large part of this line of railway. But I would beg leave to point out that the money now being devoted to the construction of that line of railway might be much more profitably spent in bringing the Bengal-Nagpur Railway into immediate touch with the coal-fields of Jherria, and in

constructing a local line by that undertaking to bring the mineral from Jherria and the Burrakar coal-fields direct to Calcutta.

"I do not wish, my Lord, to venture at any length upon the treacherous ground of the currency question, but I would say that I approve of that part of the report of the Currency Commission in which the suggestion was made that profit to be derived from the coining of silver should be suspended in order to meet the cost of acquiring a gold reserve, but it does not, however, seem to me clear (if I may say so) in what way the Government of India will decide when it is necessary to add more rupees of new coinage to the circulation so as not to hamper trade by refusing rupees for gold and notes. The Hon'ble Member in charge of the Finances states that 10½ crores of rupees have been added to the circulation this year and he looks forward to a further addition during the coming year of a comparatively small amount. Who is to decide, and how is the decision to be arrived at, as to how and when the currency is to be increased? This seems to me to be one of the most important questions associated with our currency system, and to my mind it imposes upon the Government the necessity of maintaining close relations with the commercial community to avoid inconvenience if not a catastrophe to trade. How are these relations, I would ask, to be maintained! The explanation given by the Hon'ble Member in paragraphs 32 and 33 of his statement clearly explains the reasons which have led the Secretary of State to suspend operations under the Gold Note Act (II of 1898), and must disabuse the minds of his critics of any selfish intention on his part of any coercion from the city of London as has been suggested in some quarters. But it exhibits a danger to trade associated with a managed currency and emphasises the importance of the question I have just asked.

"I have but little more to add. But I should be sorry to bring my remarks to an end without offering to Your Excellency the most sincere thanks of those whom I represent for the action of the Government in withdrawing the Telegraphic Press Messages Bill. We all know very well that if Your Excellency had insisted upon passing the Bill, the Bill would have been passed in spite of all objection and all protest: and it is on that account that we are especially grateful for the concession made. Nothing could have been calculated to give more general satisfaction than Your Excellency's frank pronouncement: and there are no two opinions that the agitation for the cheapening of the overland telegraphic tariff, which Your Excellency is so powerfully aiding, will effect far more appropriately the object of the proposed legislation than the legislation itself could ever had done. I had not the opportunity upon a previous occasion of giving expression to these sentiments, but I think I should be wanting in my duty if I failed to do so now. It is not so much legislation of which the country is in need as a systematic encouragement of commercial projects. Development and expansion are the great wants of India: and she is now to be congratulated upon having secured a ruler to whom both these objects are so deeply at heart."

The Hon'ble MR. REES said:—"My Lord, as the official representative from Madras, I may perhaps be permitted to regret that the pressure of famine charges this year has constrained the Government of India to prescribe a scale of provincial expenditure, which His Excellency the Governor of Madras in Council thinks will adversely affect the Local Administration. That regret I am sure is shared to the fullest extent by Your Excellency's Government, while the necessity is loyally accepted by the Government of Fort St. George, which I see from the Financial Statement contributes to the Revised estimates increases under Salt and Customs Revenue, to the Budget estimates a large increase under Land Revenue, savings under Plague, and in expenditure under Land Revenue, at the expense of postponing improvements, while it maintains its lead in local enterprise to which Your Excellency publicly testified in on a recent occasion by proceeding with its Local Board Railway extensions.

"In every Budget Statement for these last five years I have seen similar proofs of the general prosperity, well being and good government of the Madras Presidency, and it was without any jealousy that I witnessed last Wednesday the evident glee of my hon'ble friend on my left, on hearing from the lips of the Finance Minister the praises of the young but prosperous province of Burma.

"The Railway programme is necessarily affected like everything else by the famine, but it is extremely satisfactory that the loss on the direct Railway account has been reduced to so small a sum as 1¼ lakhs, and it must be admitted that the Railways, in spite of a regrettable deficiency of rolling stock, have again saved the situation so far as the famine campaign is concerned; while the programme of construction for the coming year is perhaps as ambitious as can be expected, seeing that it is to be carried out from funds to be borrowed in India.

"There are many items in this chapter in which Madras is closely concerned. That great undertaking, the East Coast Railway, being opened, and a suitable provision being made for the Godavery Bridge, it only remains to arrive at a satisfactory agreement as regards the working of the line, a matter still under consideration.

"The Madura-Pamban line is not, as might be inferred from the Hon'ble Public Works Member's Memorandum, to be deferred till 1901-1902, but a special grant of 10 lakhs is made for the coming year, and the lump grant of 25 lakhs for South Indian and Madras Railway (*i.e.*, Calicut-Cannanore) extensions is raised to 27½ lakhs. For the British Section of the Tinnevelly-Travancore Railway a provision of 8 lakhs is made, while His Highness the Maharaja of Travancore has advanced 17 lakhs for the construction of the section within his territory, a sum to be recouped to the Durbar, as soon as the South Indian Railway shall have raised the contemplated debentures in the London market.

"His Highness the Raja of Cochin meanwhile is constructing at his own cost the line from the Madras Railway to his capital.

"Thus by leading lives of equal dignity and simplicity amongst their own people, for whose benefit and not for their personal pleasures they expend their ample revenues, these admirable princes give practical proofs of their worthiness to be treated, in Your Excellency's happy phrase, as colleagues in the administration of the Empire.

"Madras will learn with satisfaction that the earthwork of the Vizagapatam-Raipur Railway is to be taken in hand as a famine work in Raipur. As the Madras Chamber of Commerce observes, the completion of this connection is very necessary in order to offer what are practically the remotest localities in India the advantages of the really not far distant ports of the Coromandel Coast. Twenty-five years ago when we sent a regiment from Vizagapatam to deal with a little disturbance in Bustar, no one in those parts dreamt that within the century we should be commencing a railway through its fastnesses. I believe this line will pay without a guarantee.

"The Madura tramways are delayed on account of a legal difficulty. As they will serve important agricultural and planting districts, no effort will, I am sure, be spared by the Government of India to overcome, what is apparently, a technical obstacle.

"Hon'ble Members who have preceded me have dealt fully with the famine from which it is unfortunately now clear that Madras will not be exempt, and with its effect on the finances of the Empire. I have had, and have taken, the opportunity to visit the worst centres of the great famines of 1876-77, 1896-97, and 1899-1900. Mysore, in the first, was indeed a scene of death, desolation, and despair. Certain portions of the Central Provinces, in the second, exhibited, owing to difficulties incident to the treatment for the first time by the British Government of a famine, among the backward races of this province, painful scenes, alongside active and on the whole successful efforts, to grant relief, while throughout the more advanced North-West Provinces the administration was able to cope with the problem set before it. The Central Provinces, again the most stricken part of India, in the third famine, while in certain districts not less than 33 per cent. of the whole population are on relief, an unprecedented figure, yet present a scene of such perfectly organized relief, that if a stranger without knowledge of the existence of a famine, suddenly visited the works, he would not know to what cause to attribute the activity in road-making, tank-digging and other operations of the like nature, upon which upwards of one-third of the population is employed.

"So perfect now is the system that the only doubt suggested is whether it is not too perfect. The greatest of all writers on agriculture said: 'The Father of

Heaven willed that the way of cultivation should not be easy.' The question is how far a Government which is the father and mother of the Indian people, as they freely allow, for their gratitude is hardly less than their benefits, and finds expression through the mouths of their press and their princes—how far that Government can declare that the way of cultivation shall, regardless of seasons, be easy. Of course there is apart from the all-powerful claim of humanity the practical asset, that generous relief recoups its cost in the speedy recovery of the people. We had proof of that in the last famine, and shall have it again.

" My Lord, I was somewhat astonished to hear my hon'ble friend Mr. Bose dwell on the hardships of the Central Provinces settlement, which is the lightest in India. It is also the lightest taxed province all round, the proportion to Madras, for instance, being as 22 to 41 per head of the population. Those portions moreover which are most afflicted with famine are those which are the most lightly assessed of this lightly assessed province. It is well-known that high rents do not alone produce agricultural distress. which in fact is most common in lowly rented districts. A late member of this Council, Mr. Fuller, has after most careful enquiry affirmed that the Central Provinces are no exception to this rule. The fact is, it is in the interest of the málguzár or landlord that this agitation is carried on and not in that of the cultivator. The landlord in fact is very fortunate in the sixties to have been placed in the position he now occupies. I am confirmed in this belief that this is the fact when I hear my hon'ble friend on my right support Mr. Bose. The Maharaja's benevolence and sympathy is of a catholic character. Last year I remember he made an excursion into the pushing little province of Assam. This year he makes a longer excursion into the Central Provinces. I do not mean that his sympathies are confined to the landlord class. No one has given more magnificent proof to the contrary. Still distress will never appeal to him in vain, and are not landlords a conspicuously distressed class all the world over.

" As to the causes of famine, if we must go beyond the seasons, there can be no doubt that it is very difficult to get at the assessment question. It is recorded of the Duke of Wellington that on one occasion his references to a measure before the House of Lords moved the Chancellor to say that he feared His Grace had not understood the Bill, whereupon the Duke replied that he had read the Bill once, twice. and three times, and if he did not understand it, he must be a fool. I think many people might read official reports on this subject, and not be unworthy afterwards to be classed with the Duke of Wellington.

" It would be very advantageous and acceptable to many seekers after information in India and in England if the Government of India wou'd publish not a masterly or exhaustive report, but a brief, popular memorandum exhibiting the salient features of the settlements effected in different provinces. One thing is clear that assessments have enormously decreased, though collections are much more regular than in the good old times. At any rate assessments cannot be crushing, while the rental of irrigated land is three times that of unirrigated land twice its amount. Moreover, the most affected are the most lightly assessed portions of the Central Provinces, which as a whole are more lightly assessed and taxed than any other part of the empire.

" As to famines in the past, there were then no Indian Midland, and Bengal-Nagpur, protective, no Raipur to Dhumtari, and other feeder lines. In 1818 wheat sold at Jubbulpur for four seers a rupee, and in 1832 for eight seers at Nagpur. In 18?8 one year's failure of crops produced a famine, and early in the 18th century grain more than once rose to 64 times its normal cost. The effects of famine then were lasting. Now they are temporary, and the total decrease in cultivation since the last famine in the Central Provinces is only 5 per cent.

" Yet there is room for general enlightenment, when a journal like the *Times* enquires whether the Government of India in restricting landlords in respect of raising rent, has laid upon itself a self-denying ordinance of equal obligation.

" My Lord. the status and functions of an Additional Member are somewhat elusive of definition, but it has often struck me on budget days that he might be described as one who proposes additional expenditure without suggesting additional income

"On one occasion only do I remember an exception to this rule. It was, I think, in the Session of 1895-96—at any rate I see no survivor of the members of that day present, excepting only my hon'ble colleague from Madras—that an Additional Member did point out to the Finance Minister how he might make much money. It happened, however, as is not unusual in such cases, that a transfer from another source was suggested, and that source chanced to be situated in Bengal. Whereupon the Lieutenant-Governor, the predecessor of His Honour, rose in his wrath, and smote the Additional Member, and when he had pulverised him and pounded him to atoms, the Financial Minister, though he was the man to stand by a friend, was hardly at great pains to put his ally together again. With this example before his eyes it behoves an Additional Member to be very wary. Yet I venture to think that savings might be effected in buildings in the mufassal. It does not appear that any rule of practice exists, whereby Public Works budget makers allot a certain proportion of their grants to new buildings, but I cannot help thinking a few new buildings, however unlovely in themselves, are considered to embellish an engineer's budget. The present administration in Madras markedly prefers communications to buildings, but in that Presidency and elsewhere I have seen handsome offices in small towns, providing as many cubic feet of air per individual, as amount to an obnoxious draught in the opinion of the Indian officials concerned, and are indeed far in excess of what the people usually enjoy, or really need, and perhaps more than what in this city is inhaled by the helots of Chowringhee

"Last year I ventured to say that any simplification of rules, delegation of authority, and relaxation of restrictions imposed in regard to mining applications, would greatly assist Local Governments in encouraging the introduction of foreign capital. I would now gratefully acknowledge certain important changes made in the direction indicated and would briefly refer to another matter.

"It is not often that a political officer has the honour to sit in this Council, but when a member has like myself a political charge, the fourth largest in point of population, and the fifth in revenue in India, he may perhaps be allowed to urge that as mining industries are largely developed in Native States, which are expected to adopt, and do adopt British laws and regulations in this behalf, the actual, if not immediate, effect of action taken in British India upon the mining interest in such States, should be carefully borne in mind.

"There are two subjects, my Lord, in regard to which I have asked for leave to bring in Bills, a permission which, at this stage, I cannot get. They are the Christian Converts Dissolution of Marriage Act, and the Protection of Wild Birds. I am aware that changes in the marriage laws, like holy matrimony itself, are not to be rashly or lightly undertaken; but the present procedure is so long and expensive, that converts to Christianity who, like the early Christians, are generally poor, suffer considerable hardships, and particularly Roman Catholic Christians, because they are, under the combined operation of the first-mentioned Act and of the Penal Code, deprived of the benefit of the Pauline dispensation. This privilege of the faith by the Canon law, and the immemorial usage of the Church, permitted the dissolution of a marriage subsisting between a convert and a spouse who refused to live with him or her, because of his or her conversion, by a simple process, outside the courts, lasting thirty days and costing nothing, whereas the present procedure is, to a poor fisherman for example, only less prohibitive than the private Act of Parliament for divorce procedure, which formerly obtained in England.

"With regard to the birds, the Government of India, and certain Local Governments, of whom Madras is one, desire to preserve from destruction during the breeding season, birds which are coveted for their dainty flesh, or brilliant plumage, and I hope the very moderate measure of protection suggested may be granted in order that these beautiful and useful creatures may obtain a temporary asylum outside their present only heaven, ther eserved Government forest. I venture to commend these two subjects to the sympathetic consideration of Your Excellency's Government.

"Turning to the more general features of the Budget I would express my personal obligations to the Hon'ble Finance Member for giving us a most interesting statement, for making matters of high finance as intelligible as may be to the

weaker vessels, and for the elimination of that odious but till now inevitable financial fetish 'Rx'. I would express a satisfaction, in some quarters called unholy, at the recovery of the opium revenue, which showed dangerous symptoms of decline, upon the increased grant for irrigation, on the success, so far as may be judged, at this stage of the gold policy, to which Southern India makes a practical contribution from the Mysore Mines duly acknowledged by the Finance Minister.

"As to the Military Budget, it is well known that the hon'ble and gallant member in charge neither spends an unnecessary rupee if he can help it, nor takes less than a crore if he can get it, and if so large a sum is necessary to make efficient that army which is the insurance of a vast trade and of a population of a fifth of the inhabitants of the world, who pay for it per head around about eight annas. The most expensive thing we can keep is a badly armed army, and I rejoice to see a large provision for providing the Lee-Enfield rifle, which will be repeated in succeeding years. The provisions made for increasing the number of officers and improving transport and commissariat arrangements are also eminently satisfactory, though more transport as well as more regimental officers are required.

"Already the Indian Government, unconscious itself of any extraordinary or supreme effort, can accomplish feats of rapid mobilisation, which extort the reluctant admiration of Europe.

"The subject of paragraph 15 of the hon'ble and gallant member's memorandum will attract universal attention—I mean the withdrawal of troops from certain advanced posts on the frontier as soon as militia and police corps, which are to be located at these posts, are organized. These withdrawals have commenced and have resulted in savings which will be largely increased, if this policy proves the permanent success, which is anticipated and hoped by all who have the interests of this country at heart."

The Hon'ble MR. SMEATON said :—"I desire to congratulate the Hon'ble Financial Member for such an interesting and lucid exposition of finance as is contained in the statement before us, and in particular to offer him my profound thanks for the abolition of the objectionable 'Rx.' This time-honoured symbol has been the cause of more headaches to students of Indian Finance than almost any part of the statements that have been submitted from year to year. I have a pleasant duty, my Lord, to perform in acknowledgment of a substantial concession which has been made to the mercantile community of Rangoon, but I desire to postpone performance of this pleasant duty until I mention two or three matters which His Honour the Lieutenant-Governor of Burma has desired me to lay before Your Excellency in Council. The first of these matters is in regard to the Forest Administration. Sir Frederick Fryer asks me to represent the inadequacy of the superior staff of the Forest Administration, and to point out, and I may say parenthetically that I entirely concur in the opinion which he expresses, that a little reinforcement of the Forest staff would vastly increase the annual resources and income of the Forest Department; that for every rupee spent in increasing the superior staff there would be many rupees obtained from the increased output of timber. I notice in the Hon'ble Financial Member's Statement that the Forest Administration made last year an increase of 12½ lakhs of rupees by means of an expenditure of R1,43,000. In other words, the expenditure was covered nine times over by the additional revenue derived. This, I think, tends to confirm the Lieutenant-Governor's opinion that a little increase of expenditure in the superior staff will amply repay the outlay. A remark has just been made by my hon'ble friend on my right (Mr. Rees) that an Additional Member's business is generally to recommend expenditure and propose no revenue to meet it, but, my Lord, I think perhaps I am a notable exception in this; I propose an expenditure of one rupee and on the Financial Member's own showing I may anticipate with some confidence a revenue of R9 in return. I hope therefore that Sir Frederick Fryer's recommendation may receive Your Excellency's early and favourable consideration.

"The second matter to which I am obliged to draw attention refers to the salt revenue, which I have had an opportunity of briefly mentioning to the Hon'ble

Financial Member. This, my Lord, is rather a thorny subject. In Burma there is a considerable enterprise in manufacture of local salt, chiefly by evaporation. It is a very old industry in Burma, and it pervades most of the coast districts and is found also in the interior. This industry has been of late years very much restricted indeed. Under the very reasonable pressure of the Financial Department we have greatly reduced the area in which salt can be manufactured. We have diminished the number and very materially altered the capacity of the implements which are used in manufacture, and we have raised successively twice or thrice within my own personal knowledge the rates of composition, the object being, as explained by Your Excellency in Council, to endeavour to approach the rate of duty on imported salt, which in Burma is R1 per maund of 82 pounds. If the two kinds of salt were on equal terms then nobody could find fault with the intention of imposing an equal duty on both, but at the instance of Sir Frederick Fryer, whose knowledge of the subject is unrivalled, I desire to point out that the local salt has 25 per cent. of water in it as against 8 or 10 per cent. of water in the imported salt. Therefore it is obvious that in the taxing of this salt — which is taxed in advance before it is made — you levy duty on a proportion of 25 per cent. of pure water, whereas the duty on the imported article is altogether, or nearly so, on dry salt. But then again, my Lord, the Burma salt, as has been now proved by statistics and admitted by the importers of salt from England and Germany, costs exactly double to manufacture compared with the English or German salt. Now to impose on that local manufacture a rate equal to that levied on the imported article seems to be, on the face of it, inequitable: and to use Sir Frederick Fryer's words: 'Any immediate enhancement would probably cause a collapse of the local industry;' and in his own words again: 'The Local Government could not look with equanimity on the extinction of the industry, which that enhancement of duty would probably cause.' I would simply ask here, if Your Excellency sees fit and reasonable, that any contemplated immediate enhancement of duty on the local manufactured salt in Burma be postponed, and that, if possible, the figure at which the local salt can be fairly taxed be finally determined, at say, 8 annas or perhaps 9 annas, instead of one rupee a maund, and beyond that for the future do not let the composition duty go.

"The last matter to which I wish to make a brief reference is petroleum. My Lord, last year I had the somewhat unpleasant duty of suggesting postponement of a Bill—the Petroleum Amendment Bill—because there were certain parts of it which were not suitable for a Province where petroleum is largely produced, and Your Excellency was good enough to express some sympathy with the representation which I then made. The Local Government has made proposals for amendment of the Act to meet the case of the Burma petroleum industry; and I understand that these proposed amendments have been also before the Hon'ble the Legal Member and the Hon'ble Member in charge of the Home Department; and as the effect of these amendments will be to increase the commerce in oil between Burma and the coast of India, and to help to develop this promising resource of Burma I hope that favourable consideration will be given by Your Excellency's Government to the proposed amendments of the Act. It is hoped that just as the Burma rice crop has proved, in the words of the Hon'ble Mr. Dawkins, to be a dominating factor in the markets of Europe and Asia and South America, so it is to be hoped that the Burma timber and the Burma oil may in their own respective spheres prove to be dominant factors in these markets over the same continents.

"And now, my Lord, I have the pleasant part of my duty to perform. Last year I had occasion to invite Your Excellency's attention to certain difficulties connected with the financing of the rice trade in Burma. These difficulties, to put them in a very few words, were that the mercantile community, who are engaged in this important trade, were unable to obtain Telegraphic Transfers on Rangoon in Calcutta, and that this disability rendered the financing of the trade somewhat expensive and troublesome. I represented this, but there was no sound, no intimation given to me whatever of any likelihood of a favourable consideration of the proposal I had put forward. On the contrary, the

Financial Member of that time, Sir James Westland, met me with something approaching a rebuff, and he told me and the Council that he had made an offer to the mercantile community of Rangoon, and that they had refused it. In the absence of Sir James Westland I do not wish to say anything in any way to compromise him, but I desire to repeat, what I then said, that the offer made was illusory, and I am only too glad to know that the Hon'ble Mr. Dawkins has been good enough to try with his habitual thoughtfulness to lighten the burdens and remove the difficulties of the Rangoon merchant. He has now offered what I consider an exceedingly favourable concession namely, to allow Telegraphic Transfers in Calcutta on Rangoon at the rate of one-quarter per cent. at any time, and to such an extent as may be required, provided that the tender be not less than two lakhs. I consider, my Lord, that the Hon'ble Member has made an important and valuable concession to the mercantile community of Burma for which, if they are not thankful, they ought to be. If I may make one suggestion it is that the privilege which has now been granted may be extended to Telegraphic Transfers in Bombay on Rangoon; and in respect of Council Bills I desire to ask, although I do so with great diffidence, if it would be possible hereafter, supposing the Rangoon mercantile community consented to accept half payment in gold and half in silver, on that basis to grant the issue of Council Bills in Rangoon. I make this suggestion in case possibly the Hon'ble Financial Member may be able to give it his consideration and because it is just possible that gold may prove a more popular medium of exchange in Burma than in India, in which case part payment of Council Bills in gold might be feasible and the claim of Rangoon to a share of Council issues might be realized."

The Hon'ble MR. TOYNBEE said:—" My Lord, there is one paragraph of the Financial Statement on which I wish to say a very few words. That paragraph is No. 121 on page 36. It shows the Revenue from the Sale of Court-fee Stamps and Plain paper to have risen from 321 lakhs of rupees in 1896-97, to 341 lakhs in 1900-1901, or at the rate of over 4 lakhs a year during the above quinquennial period. The above figures indicate, to my mind, a very serious drain on the resources of the people, and I therefore again venture to draw the attention of Your Excellency's Government to the importance of affording them some relief in the shape of increased facilities for the settling of their disputes out of Court. When the Arbitration Bill—which was passed into law last Session as Act IX of 1899—was before the Council, I expressed the hope that, as it only applied to the Presidency-towns, it might be looked upon as an instalment or precursor of a measure of a much wider and more far-reaching scope—*i.e.*, one which would similarly benefit the great bulk of the population. In moving that the Bill be passed, the Legal Member, the Hon'ble Mr. Chalmers, admitted that the subject was one of great importance, and that every attention ought to be given to it. I fear, my Lord, that, owing to the existing pressure of work in the Legislative Department and also, perhaps, to the extra strain on the general administration entailed by famine and plague, there is not much hope of immediate legislation on the subject But I do trust that it will not be lost sight of; and that an effort will be made, as early as practicable, to give the agricultural classes some increased facilities for settling their disputes in their own villages, and for so diverting to agricultural and material improvements, or for saving up for a rainy—or rather a rainless—day, a considerable portion of the large sums which they now spend on Court-fees for the purpose of litigation in our Courts."

The Hon'ble MR. SPENCE said:—"It had not been my intention to say anything on the consideration of the Budget, but one point has come to my knowledge which I think I may as well place before the Council. Last year Sir James Westland was good enough to give us a résume of the state of the Provincial balances. This year no such résume has appeared in any part of the Budget, and therefore it is very difficult to know exactly the state in which the finances are as far as the Presidency which I have the honour to represent is concerned. There can, however, be no doubt of this in this matter. We have no money, and we have been living on the charity of the Government of India for the last two or three years, and I think that may go on

for a considerable time to come. Famines in this country are supposed to recur at intervals of about 20 years, but I regret to say that during my service of nearly 35 years I have gone through two famines, and I am now going back to my Province to complete it by winding up, I hope, another famine. If famines come every 20 years it takes a certain period of time for the Province to recover from their effect. I can remember that when the 1866-67 famine took place it took about four or five years before the Presidency recovered its normal state. The present famine is one of such unprecedented severity that I imagine that even that period will be exceeded. If so, it is deplorable to contemplate the state to which we shall be reduced. Of course all establishments have been reduced to a condition which can hardly lead to efficiency: all improvements have been stopped, and it will be a considerable time before we shall be able to emerge from our present embarrassments. I do not know what grant the Government of India have made to the Bombay Provincial funds, but I hope that it is liberal, and that in future they will treat us with the liberality which is due to misfortunes, which are in no way due to misgovernment or inefficiency, but which have been sent to us by Providence."

The Hon'ble NAWAB FAIYAZ ALI KHAN said:—"My Lord, when dealing with the Budget Estimate of the last year we had anticipated an era of financial success, and had expressed our satisfaction that all calamities that were overshadowing this country at that time would rapidly pass away, and that our treasury would again thrive and prosper. It was conjectured and not without cause, that the two years of good harvest were ushering in a period of agricultural prosperity and that the word 'famine' would not be heard by us at least for some time to come. But that hope was doomed to cruel disappointment. While plague is making havoc in the country, poor India has once more been afflicted by a visitation of famine, which is nearly as intense, in many cases, as the greatest famines of the past ages. These combined divine visitations have so completely taken us by surprise that all our hopes for the amelioration of our financial position have been disappointed. But although we have been placed in such a critical position, we should not lose heart. We should rather jointly and collectively be prepared to combat and conquer these unexpected and lamentable evils and banish them from our country for ever and for good. I may be permitted, my Lord, to say in this connection that the precautionary measures adopted by the Government to prevent the spread of plague in the uninfected parts of the country, are, in my humble opinion, the only effective measures that could be successfully adopted. I am glad to remark here that in many cases these measures have been crowned with success, and in particular to observe that the adoption of these vigorous and effective measures have enabled our Lieutenant-Governor, Sir Antony MacDonnell, to check and prevent successfully the spread of plague and famine in the territory under his wise administration.

"My Lord, I feel that I cannot leave this subject without offering my grateful thanks, and those of my countrymen whom I have the honour to represent, to Your Excellency, who, prompted by an earnest sympathy and desire for the good of the people of this land, has lately taken so much trouble, even at the sacrifice of your own personal comfort, to visit so many plague-infected and famine-stricken areas of the country. We owe a sincere gratitude to a merciful Providence, which has placed us under the benign sovereignty of Her Majesty the Queen-Empress, who, though separated from us by thousands of miles, is always looking after us with her fostering care and attention and is ever ready to help us in our troubles. It is also a matter of congratulation to find that India has been so fortunate as to have been placed under Your Excellency's wise and intelligent rule and kind administration.

"My Lord, I congratulate our Hon'ble Finance Minister on his being able to bring forward an encouraging item of surplus in his Financial Statement. It is encouraging indeed when we take into account all the unforeseen and abnormal demands that our revenues had to meet with. Famine alone is responsible for a large portion of increased expenditure, not only in the shape of relief and charity, but also in the shape of Military expenses in India, as the cost

of food supplies for men and animals in the Army has had to be taken Rs. 47,30,000 higher than in the budget estimate of the present year.

"I shall pass on now to say a few words regarding Railways and Irrigation. Our experience, my Lord, has shown us the immense advantages that are obtained by the extension of railway and irrigation systems, as the two prominent factors and chief means of securing India from the effects of famine. As regards the former it is gratifying to see that sufficient margin has been left in the Budget Estimate for extension. I find that a capital expenditure of £4,872,000 on railways has been estimated for the next year, *i. e.*, for 1900-1901. It also appears from the statement B prepared by my friend the Hon'ble Sir Arthur Trevor that from 1st April, 1899, to 31st March, 1900, about 711 miles of new railway have been authorized. The total length of open line on the 1st April, 1900, will, therefore, be 23,780 miles, a figure much larger than the estimate of the Famine Commission in 1880. The extension of this means of communication has enabled Government to save many lives during famine which would otherwise have been lost.

"My Lord, it affords me peculiar pleasure when I find that so ample provision is made in the Budget for the extension of Irrigation. It is with great satisfaction that I see that the Irrigation grant this year is raised to a full crore. The net earnings of these productive works are increasing day by day. I may be permitted to point out in this connection that the surplus of the revised budget estimate is mostly due to Railway and Irrigation work.

"One point more, my Lord, and I am done. It was anticipated in 1899 that our current year would be an era of marked improvement in the financial condition of the country. My pleasant duty in view of a fairly large surplus, would then have been to draw the attention of Your Excellency's Government on behalf of the people whom I represent to the advisability of remitting at least some of the tax levied on landowners on account of famine insurance. But it is unfortunate that our hopes have not been realized this year, for the reason that famine and plague still hold their sway in various parts of the country. But it is fervently hoped that when the time comes that a strong and stable financial position is secured and a handsome surplus is realized, when plague and famine have disappeared from the face of India, the Government will find themselves in a position to reconsider this measure and relieve the landowners, of some portion at any rate, of this burden.

"My Lord, I will not take more of your valuable time by dwelling at length on the question of exchange and adoption of gold standard, and so I pass them over in silence.

"I may be allowed in conclusion to express the sincere gratitude of my countrymen to our Lieutenant-Governor, Sir Antony MacDonnell, for his assiduous exertions and untiring zeal for the welfare of his subjects. His Honour's earnestness in adopting effective measures for preventing plague and its colleague famine, from intruding and encroaching upon his territory, is a salient proof how sympathetic and compassionate His Honour is in advancing the welfare and better administration of that country. May I express a hope that the Government, considering his assiduous labour and wise administration of that country, will extend the term of his office in that Province for some years more. If this be done it would be a great blessing to the people of my province and also a gain to the Government.

"I may also be allowed to express my sincere regret on the departure of the Financial Member of Your Lordship's Council, the Hon'ble Mr. Dawkins, who has conducted the affairs of his Department, during his year of office, with skill and success, and with an anxious regard for the interests of all classes of the community.

"Lastly, my Lord, I should like to say a few words that relate personally to yourself. The people of this country have observed with appreciation your interest in their welfare and they cherish the hope that Your Excellency's term of office will be identified with large and statesmanlike measures of internal development and expansion. It is because I know that the public mind of my countrymen is much concerned at present with these topics, that I have tried,

to the best of my ability, to represent their views, and I hope and trust that my efforts may meet with favourable consideration at the hands of Your Excellency's Government."

The Hon'ble MR. MEHTA said :—"My Lord, I hope my hon'ble friend the Financial Member will pardon me for saying that this is really too bad of him. He just gives us a foretaste of better things and then he bids us farewell—a long farewell. Hitherto the financial statements placed before this Council have been comparative accounts of realizations of income, and of growth or saving in expenditure for two previous years, and approximate estimates based upon them for the Budget year. But there was no attempt to go into the heart of things, to discuss the sources of income and heads of expenditure with special regard to the needs, conditions, and circumstances of the country and its varied populations, or to construct a budget, to use the words of a famous Finance Minister, moulded by art on principles of science. The only thing that enlivened the dull monotony of figures in these statements were deep curses at the vagaries of exchange, when there was a deficit, and sighs of relief on the elasticity of Indian revenues, when there was a surplus. The deeper causes of financial phenomena, or the far-reaching indirect effects of financial operations, were left severely to themselves. My Lord, I venture to say that dogmatism on the stability of Indian finance can never be safely indulged till the complexity of the problem is thoroughly investigated and gauged. The several interesting discussions which irradiate my hon'ble friend's Financial Statement of this year indicate what might have been fairly expected of him, if we had succeeded in impounding him for the full term of his office. As it is, he has only succeeded in giving us a taste of the sufferings of Tantalus. When listening to the terse paragraphs, clothed in apt language and sounding almost like judicial summings up, in which he expounded the currency problems and the 16*d*. rate of exchange, it was impossible not to wish that he had gone on to furnish us with his views as to whether the measures for securing a stable exchange had cost the country anything and what, whether the deficits owing to exchange were not turned into overflowing surpluses by the difference having come indirectly from the pockets of the people, whether it was not the indirect impoverishment caused by the stoppage of the mints which perhaps intensified the inability of the people to stand the strain of the present famine. These are problems which are not only interesting in themselves, but they demand solution before it is possible to come to any useful or positive opinion about the real character and solidity of the existing state and condition of Indian revenues. But the question, which I should have liked to have seen dealt with above all others, is the question whether the financial condition of the country can be regarded as safe if, as is sometimes alleged, land in large Provinces is unable to bear the burden that is imposed upon it. Is it true that the effects of famine are hastened and intensified by the decline of staying power in the raiyat owing to over assessment? Of course nobody denies what is sometimes so passionately urged that the immediate cause of famines is failure or scarcity of rainfall. But surely it is possible to conceive that a failure of crops one year does not necessarily involve starvation, if there was some balance in hand of past years to tide over the calamity, just as a mercantile firm does not necessarily become insolvent because there have been heavy losses in one year. It is therefore a question of the most vital importance to ascertain whether it is true that there is this want of staying power, and if there is, if it is in any way due to faults in the existing systems of assessing or collecting revenue, if it is due to excess of assessment or rigidity of collection. On more than one occasion I have ventured to draw the attention of the Council to this important topic. That the raiyat is deeply in debt, scarcely any one denies. With regard to the Bombay Presidency, Sir Theodore Hope admitted in this Council that 'to our revenue system must in candour be ascribed some share in the indebtedness of the raiyat.' The Dekkhan Agriculturists' Relief Act Commission emphasized this opinion by reporting 'that there could be no question that the rigidity of the revenue assessment system is one of the main causes which leads the raiyats of the Dekkhan into fresh debt.' In answering my contention on this point on the first occasion, Sir James Westland replied that the only opinion I could cite was the opinion of a very distinguished official who retired 18 years ago. When, on the next occasion, I pointed

out that the still weightier and more matured opinion of the Commission was not 18 years' old, Sir James said 'that as the revenue-officers had admittedly powers of remission and suspension, it must be assumed that if they did not exercise them, there was no need to do so.' The answer to this is simple. These powers existed in Sir Theodore Hope's time, and when the Commission made its enquiries. And in spite of that, both these authorities, mostly official, arrived at the conclusion that rigidity of the revenue system was undoubtedly one of the causes of the raiyats' indebtedness. With regard to the question of over-assessment, it must be remembered that it is not simply a question of absolute excess of assessment, but also whether the assessment leaves a sufficient margin for saving. As was pointed out by Mr. Cotton, 'if a bare margin for subsistence alone remains, the result is that indebtedness extends year by year, and famines recur with ever increasing severity.' In one of Sir Louis Malet's minutes on Indian land revenue, he lays stress upon 'the marked absence of any adequate accumulation of capital upon the soil, and (as a consequence) of any sufficient appropriation of such capital to purposes of agricultural improvement, deficiency of stocks, of manures, often of seeds and implements,' as tending directly to a progressive pauperization of the raiyat. That these opinions cannot be altogether scornfully rejected is painfully brought home to every student of the question by a perusal of the Selections issued from time to time by Government of papers relating to the periodic surveys and settlements of talukas. It is evident that re-settlement is carried out in a most empirical fashion, without being regulated by well-ascertained and definite principles. A writer well acquainted with the matter has described the procedure of revision operations as follows. The Settlement-officer surveys the lands and generally discovers some under-measurements. A fallow piece of land here, or a rocky stretch there, or a marsh at another place, reclaimed at some cost and labour,—all such attract his attention, and the measurements are thus increased. Then he proceeds to register his reasons for enhancements. There is a railway newly built in the neighbourhood, there is an increase in the number of tiled houses and of cattle, there is a new bazar begun to be regularly held, there is a school and children, and so on and so on, till everything is included which by hook or crook can show that prosperity has increased. It is said that even sending delegates to the Indian National Congress has been used as an argument for a revision of the settlement. Then comes the mention of any canals or tanks built by Government and of the fact, if it exists, of water being found at a certain level by some raiyats who had been fools enough to dig wells. There is hardly an attempt to enquire whether the farmers themselves have shared in their outward prosperity. Then there is a speculative and perfunctory enquiry as to the general yield and the end of it is a recommendation for generally raising the assessment rate from 50 to 200 per cent. at one sweep. It will be thus seen that however conscientiously pursued, these operations are in their very nature empirical, uncertain, and indefinite. In making these remarks I do not mean to advocate a permanent settlement like that in Bengal. But it is well worth considering whether the scheme recommended by the Government of India in the time of Lord Ripon, under which assessments would be revised only in the case of a general rise of prices or of improvements made by the State at its own cost, does not deal with the question in a more reasonable and scientific manner. Under such a scheme, the 'unearned increment' would be saved to the State, but it would be automatically measured by the rise in prices which would include all the sources of its growth. My Lord, I am not putting forward these views as incapable of being controverted; on the contrary I think that they are sometimes pressed with intemperate exaggeration, and I also know that opposite views are stoutly and forcibly maintained. But, my Lord, the issues involved in a settlement of this vexed question are momentous; they involve the pressing problem of the perpetual indebtedness of the vast agricultural population of the country; they anxiously concern the grave fact admitted by the last Famine Commission that the condition of the immense majority of the agricultural labourers, who, it must be remembered, are not merely labourers, but who alternately labour for others as well as work fields on temporary leases, has seriously deteriorated; they may have a close connection with the increasing severity of recurring famines if assessments do

not leave a sufficient margin for rainless days. It may be that the views of the pessimists may be erroneous; but I believe, my Lord, they are honestly and sincerely held, and there is a sufficiently large consensus of opinion in their support to prevent them from being scouted as utterly visionary or unfounded. Under these circumstances I respectfully venture to submit, for the serious consideration of Your Lordship, if it would not be an act of provident and sagacious statesmanship to take measures for a full and exhaustive investigation of these questions, by means of a Commission empowered to deal with them in all their varied aspects. I make this suggestion, my Lord, in a spirit of earnest and sincere loyalty, not less earnest and sincere perhaps than that of those who talk more of it.

"And now, my Lord, I have only to offer a few remarks on the details of this year's Budget. I felt very grateful to my hon'ble friend when he announced that all famine expenditure for the closing and coming years was undertaken by the Government of India, though indeed I do not know how otherwise the insolvent exchequer of the Bombay Presidency at least could have met the demand. But after this announcement, it was somewhat startling to be told that the Budget year was estimated to close with a surplus of 24 lakhs, small no doubt, but still a surplus. It was difficult not to feel that with the heavy calls, direct and indirect, entailed by the severe and widespread famine that has cast its dark shadow on the land, such a result was too good to be real. There are circumstances connected with the Budget estimates which are calculated to raise serious misgivings. Land revenue is estimated to fetch one crore and 30 lakhs more than in the revised estimates for last year, and within 30 lakhs for the accounts for 1898-99 and within 50 lakhs of the estimate of the Budget estimate for what was expected to turn out a most prosperous year, *viz.*, 1899-1900. Considering the severity of the famine and the enormous loss of cattle that has taken place, is not this too sanguine an estimate, and may it not be the indirect means of pressing hardly in the matter of remissions and suspensions? It may be said, how can arrears be recovered if the raiyats are not able to pay them? The answer is that this inability need not always be absolute but is often only relative, and without always involving immediate insolvency, may mean increased indebtedness, gradual impoverishment, and reduced staying power for the future. Then, again, I do not find anything either in the statement or accounts regarding plague expenditure for the closing year or the Budget year. Besides the imperial contribution on account of plague expenditure for 1898-99, I believe that provision to the extent of about 12½ lakhs was made, so far as the Bombay Presidency was concerned, for similar expenditure in 1899-1900. There is nothing to show what has become of that amount, whether it has been absorbed in the expenditure, or whether any portion of it is intended to be distributed to the different municipalities in the Presidency as was done last year. There is another circumstance which makes the estimated surplus of 24 lakhs still more unreal. In paragraph 75 of Mr. Finlay's memorandum, referring to reduction of expenditure on Civil Works for 1899-1900, he says that 'the Civil Works savings in the other Provinces other than Assam and Burma), varying from Rs. 14,57,000 in Bombay to Rs. 5,62,000 in the Punjab, may all be taken as being the result of the efforts of the Local Governments to reduce ordinary expenditure, to provide funds for the famine and to a small extent for other provincial needs.' In paragraph 114, speaking of the Civil Works estimates for 1900-1901, he says 'large reductions have been made to help the Local Governments to secure equilibrium, in the Provincial revenues,' enumerating among others, Rs. 13,79,000 in Bombay, Rs. 10,57,000 in the Punjab, and Rs. 5,31,000 in the Central Provinces. In speaking on last year's Budget in this Council, I deplored the grave consequences of reducing Bombay Civil Works expenditure from the moderate average of 36 lakhs to less than 27 lakhs in 1897-98, and to 29 lakhs in the Budget for 1898-99. And now, for 1899-1900 and 1900-1901, it is cut down at one stroke into absolutely one half of the amount. My Lord, I cannot help saying that the prospect before this sorely stricken Presidency is one not to be contemplated without dismay, and I cannot help thinking that the 24 lakhs would be better employed in going to the help of the Bombay exchequer than in figuring as a surplus

"Gloomy as the situation thus is, I confess, my Lord, I feel some difficulty in reconciling myself to the suggestion that there might be a grant to India from the British treasury. The exchange of private charity between the subjects of Her Majesty in England and India can be open to no objection; on the contrary, it draws hearts closer together. India has gratefully appreciated the generosity of the British people in coming to the help of the afflicted by their liberal subscriptions during the famine of 1896-97 and during the present famine. But a public dole stands on a different footing and cannot fail to carry with it a sense of humiliation. In that way, India would fain appeal to England's sense of justice rather than of generosity. I never cease regretting that the Government of India had lost to the country a contribution from the British exchequer on account of the last Frontier war. It was a work of joint imperial concern, and a division of the cost would only have been just. There is still another way in which England can justly come to the help of India. While the Welby Commission is pending, I do not wish to speak of the vexed question of the appropriation of Military charges between England and India. But while the present system still flourishes, it is only just that the same principles which govern the War Office in levying charges for British soldiers from the Indian treasury from the moment of their recruitment should also govern the repayment of troops taken from India to serve abroad. It has been a matter of joy and pride to this country, as the remarkable outburst of feeling throughout the country has shown, to have been able to go to the help of England with such splendid soldiers as Your Lordship was able to despatch with such promptitude, and at the same time also to remember that the great general who is now leading them on from victory to victory belongs solely and entirely to this country. I know that both the ordinary and extraordinary cost of these troops is to be repaid out of the British exchequer. What I wish to point out, however, is that on the principles hitherto enforced against India, the cost which ought to be repaid is their entire cost from the recruiting depôt till now, except the cost of the period when they might have been engaged in actual fighting in India.

"There is one other way also in which England can justly come to the help of India, and that is, by guaranteeing her loans. My Lord, the fates of England and India are inextricably woven together, and nothing can be lost by recognizing so patent a fact by the formal seal of a guarantee. On the contrary, it would bring the two countries together in a bond still closer knit even than now."

The Hon'ble MR. IBBETSON said:—"With respect to the Hon'ble Mr. Smeaton's remarks regarding the need for additional Forest officers in Burma, I would remind him that it is only four years ago that the superior staff in that province was increased by nearly 50 per cent., and that at the present moment, supposing vacancies to be filled up, the nomination to which lies with His Honour the Lieutenant-Governor, the staff is actually above strength. We have now asked the Secretary of State to increase the annual recruitment, and hope shortly to be in a position to meet the Lieutenant-Governor's wishes. In view of the great importance of the Burma forests, every possible effort has been made to assist the Local Government, and it has, I believe, had even more than its strict share. But the fact is that every province is more or less shorthanded at the present moment. On the subject of petroleum, I need say no more than that the alterations to which the Hon'ble Mr. Smeaton has referred are at present under our consideration in consultation with the Local Government.

"My hon'ble friend the Financial Member will doubtless be gratified by the chorus of approval with which the announcement has been received that, even under financial conditions such as characterise the present year, it has been decided to increase the allotment for new irrigation works by 25 lakhs. The announcement is no doubt welcomed, not only as a provision of immediate funds, but also as an indication of future policy; and I may perhaps be allowed to say how heartily I share in the satisfaction which has been so generally expressed. As regards irrigation in the Central Provinces, I may tell the Hon'ble Mr. Bose that we have recently placed the services of an expert at the disposal of the

Chief Commissioner in order to examine the question with reference to Chattisgarh. I hear informally that he is not unhopeful of success; and if it should be found possible to work out a scheme that will stand professional scrutiny, I think I can promise that it will be sympathetically considered by the Government of India. It is the case, however, as the Hon'ble Mr. Charlu has reminded us, that no scheme of tank irrigation on any ordinary scale can ever afford complete protection, since tanks, unlike our great snow-fed rivers, are themselves dependent upon the annual rains for their supply. They are therefore apt to fail us when most needed, and it is by their utility during a fairly normal series of years that they must in the main be judged.

"The Hon'ble Mr. Mehta has quite rightly laid great stress upon the very important question of elasticity in the assessment and collection of revenue. I believe there is hardly any question which has a more intimate bearing upon the prosperity of agriculture in India; and I can assure him that it has not been overlooked by the Government of India. It is one of the branches of that great subject of Agricultural Indebtedness which has been engaging their most earnest attention for some years past. During those years much has been done towards improving the law regarding Courts of Wards and the entail of landed estates, and a substantial beginning has been made in the matter of restricting alienation of land. I may remark in passing how gratifying it is to me to find that the Hon'ble Mr. Bose, speaking in the name of the people of the province which he represents, approves of the restrictions which have there been recently imposed upon the power of alienation.

"The question of elasticity is next for consideration. The material has been collected, and is ready; but in matters of such magnitude and importance, we do well to hasten slowly. That the practical question has not been neglected on the present occasion is, I think, sufficiently apparent from the fact that the Revised estimates for the annual year are less than the Budget estimates, which were based on normal prospects, by 83 lakhs in Bombay, 35½ lakhs in the Central Provinces and 38 lakhs in the Punjab; while even the Budget estimates for next year, which again are based upon the anticipation of favourable seasons, show reductions of 16, 35 and 10 lakhs, respectively.

"As for what has been said by the Hon'ble Mr. Ananda Charlu and the Hon'ble Mr. Mehta regarding the basis of assessment, I can assure them that the policy of the Government of India has for the past eighteen years steadily tended in the general direction which they indicate as desirable. But the Government of India have always declined, and must continue to decline, to tie its own hands, or those of Local Governments, by any hard and fast rules such as are suggested by the hon'ble gentlemen, or by the Hon'ble the Maharaja of Darbhanga, and so prevent them from remedying those inequalities which must almost inevitably arise during the currency of a long-term settlement, and which it is one of the main objects of a revision of settlement to remove, or hamper them in dealing with the infinite variety of conditions which affect the assessment of land revenue.

"I hail with pleasure the remarks of the Hon'ble the Maharaja of Darbhanga regarding the development of the Agricultural Department, and his appreciation of what has already been done with limited means. The policy which he advocates is the declared policy of the Government of India, declared in a set of resolutions which were published, I think, in 1897; and two obstacles alone have prevented its more vigorous prosecution—first the financial difficulties which have for some years affected both Imperial and Provincial finances, and secondly, our inability to discover a wholly suitable and competent person for the post of Inspector-General of Agriculture, the creation of which has received the sanction of the Secretary of State. To fill this important post worthily, its incumbent will require very special qualifications, and we prefer to wait a little till the right man turns up, rather than accept anybody who does not possess them in full.

"Finally, I turn to the remarks of my hon'ble friend Mr. Bose upon settlements in the Central Provinces. And first he must allow me to acknowledge the courtesy which led him to furnish me with a copy of them beforehand, and which has not only greatly facilitated my task in replying to them, but has

also ensured to them more adequate consideration than it would otherwise have been possible to give them. He will not expect me to discuss them in detail on the present occasion, and I must not be understood to accept all his figures, or to agree with all his arguments or conclusions. The Central Provinces system of settlement has found an unexpected but able champion in the Hon'ble Mr. Rees. But I agree with the Hon'ble Mr. Bose that it would be difficult to exaggerate the nature and intensity of the calamities which have befallen the province which he represents, and especially certain portions of it, during the past few years. I agree also that it was unfortunate in the extreme that the cycle of lean years should have begun, just when the revised settlements were coming into force. Since then, some of those assessments have been subjected to a test under which any settlement, however reasonable and moderate, must inevitably have broken down.

"But I do not think that my hon'ble friend fully realises all that has already been done in the direction which he indicates. Before I made over charge of the province, the revision of settlement had been completed in one district, and begun in a second and a portion of a third. And the question whether still wider revision was necessary was under my consideration during the autumn months of last year, and was only suspended when it became clear that famine was inevitable, because I felt that it would in any case have to be reconsidered as soon as the famine was over.

"As regards settlement operations which are now in progress, or have just been completed, it must be remembered that a revision of settlement means very much more than a mere enhancement or reduction of the total assessment. It means also the accurate ascertainment of facts as they are, and the redistribution upon the basis of those facts, of the burden of rent and revenue. During the term of a thirty, or even of a twenty years' settlement, the distribution of that burden becomes extraordinarily unequal, especially where protected tenants are numerous; and if, for instance, settlement operations result in the assessment of a normal revenue amounting to 125 per cent. of that previously paid, it would be far better for a district, however depressed, that the revised assessments should be announced, but reduced by one-fifth so as not to increase the total payments, rather than that the existing unequal payments should continue to be exacted. And this is especially the case, now that the recent revision of the Central Provinces Tenancy Act has for the first time empowered settlement-officers to reduce excessive rent. The severity of assessments in the Central Provinces, wherever they are severe, is mainly due to the short-sighted action of speculative and absentee landlords, and of those who have followed their example, in screwing up rents to a pitch which it is possible to pay, only under the most favourable conditions. Hitherto, the settlement-officer has been obliged to accept those rents, and to assess upon them. He is now, for the first time, in a position to correct them.

"As regards the reduction of agricultural debt, I will only say that I agree with the Hon'ble Mr. Bose in thinking that the conspicuous success of the experiment to which he alludes was mainly due to the fact that it was worked through the people, and that local public opinion was enlisted in its favour. I should be glad if it were found possible to repeat that experiment on a wider scale. But, I am inclined to believe that any attempt to make submission to conciliation compulsory, would at once alienate public sympathy, and destroy all hopes of success. An attempt to provide a simple insolvency law of which the agriculturist would readily avail himself, was made in the Dekkhan Agriculturists' Relief Act. But its provisions in this respect have virtually remained a dead-letter.

"The problem of providing agriculture in India with capital on reasonable terms is one of the most difficult that can be conceived. Some months ago Mr. Fuller worked out a scheme which seemed to me to suggest a possible step towards the partial solution of the difficulty. It is still under the Chief Commissioner's consideration, and will doubtless reach the Government of India in due time. If it should prove practicable and acceptable to the money-lending classes, it will, I believe, be a substantial advance towards the end in view.

"When I went to the Central Provinces in the middle of 1898, I felt that the task of nursing the province through its period of convalescence after the

famine of 1897 constituted a revenue problem of no ordinary difficulty. It is needless to say how greatly the calamity of a second famine, following almost immediately upon the first, must have increased the difficulty of the task. My hon'ble friend will, however, agree with me that the matter could not be in more sympathetic or more competent hands; and his remarks, which I will take care to bring to the Chief Commissioner's notice, will no doubt assist in dealing with it. The people of the province may feel assured that, in all well-considered measures for their assistance in recovering from the calamity which has befallen them, the head of the administration will receive the most cordial support from the Supreme Government. They must remember, however, that there are two sides to this, as to most questions. And what I am going to say applies to a good deal that we have heard here to-day. On the one hand, a wise moderation—in the face of such a calamity as the present, I will say a generous leniency—is advisable, not only in the interests of the people, but also as conducing to the stability of the revenue. On the other hand, every rupee of rent that should be, but is not, imposed upon the cultivator, is so much shorn from the income of the landowner; and every rupee of revenue that should be, but is not, assessed upon the landowner, has to be made good by the general tax-payer. It is easy to win a cheap popularity by indiscriminate liberality at the expense of others; but it is not right.

"I would ask the Council to bear with me yet one moment while I cordially acknowledge the manner in which the Hon'ble Mr. Bose has referred to the efforts that are being made to save human life. I believe, with him, that the people themselves fully appreciate the splendid devotion with which Government officials and private workers, European and Native alike, are striving for their relief. I have heard the fact doubted. My Lord, I have spent a great part of my service in quiet country districts, and have always made a special point of mixing with the village population. And my firm conviction is, that though the Indian peasant is inarticulate, he is not ungrateful, and that in the depths of his dumb heart he realizes and appreciates all that is being done for him by those who are striving to save his life, not seldom at the risk of their own."

The Hon'ble SIR A. TREVOR said :—"My Lord, my task on the present occasion is for the most part the easy and pleasant one of gratefully acknowledging the testimony which has been borne by those of the hon'ble members who have referred to the subject, to the success which has attended our efforts to prevent the interests of railways and irrigation from suffering more than was absolutely unavoidable from the financial difficulties of the year. But there are a few points to which I may briefly refer.

"My friend the Hon'ble Mr. Allan Arthur has referred to short comings in the deferred Telegram service and has pointed to the necessity for spending the surplus revenue of the Department on the improvement of the service. I am afraid it must be acknowledged that it has not always been found possible to work up to the standard the Department has set for itself, and that deferred telegrams are occasionally seriously delayed. But having regard to the conditions under which they are sent, that is not surprising when the ordinary and urgent traffic is as heavy as it sometimes is. If deferred telegrams cannot be got through in the night or before the urgent and ordinary messages of next day begin to come in, they have to stand aside till next night. Thus messages put in at 10 A.M. on Monday might not get over the wires until Tuesday night, being delivered on Wednesday morning. The surplus to which Mr. Arthur refers as shown in this year's revised estimates is the result of the same sudden expansion of traffic to which the delays of which he complains are attributable. It will all be spent, and something more, next year, on the object he has at heart, the improvement of the service by construction of additional lines, provision of new apparatus, increased establishment, etc. I should explain that the cost of new lines, though it is treated as Capital expenditure, is met out of Revenue.

"I will leave it to His Excellency the Viceroy to deal with the question of our general irrigation policy, which has been referred to by my friends Messrs. Ananda Charlu and Faiyaz Ali. But in reference to Mr. Ananda Charlu's

remarks as to the importance of systematizing the maintenance and improvement of tank irrigation in Madras, I may observe that there is already a tank-restoration survey in Madras, which has been going on for some years. The tanks along each river or main drainage here are systematically reported, the various data for each being put on permanent record in a book for each system. Improvements are suggested and taken up in regular order as money is available. In fact, the system he desires is already in force. It may be susceptible of improvement. But that is a question rather for the local authorities.

"My friend the Hon'ble Maharaja of Darbhanga has referred to the postponement of the Sakri-Jainagad line. Some difficulty was experienced in finding the money for the line within our programme limits. But as I explained in the memorandum appended to the Financial Statement, the Bengal and North-Western Railway Board have come to the rescue, and have undertaken to find the money at a reasonable rate of interest, allowing it to rank as Government capital for division of profits on the combined company's and Government system which they work. This has been agreed to by the Government of India, and I hope that the line will shortly be put in hand.

"He has also referred to the question of railway rates, especially for coal, as demanding attention. I may explain that Government fixes on all lines except a few of the old Guaranteed Companies Railways and such as are independent of Government aid, certain maxima and minima, within which Railway administrations are at liberty to vary their rates as may seem to them desirable in the interests of their lines. They are quite alive to the advantages of stimulating traffic, and the less they are interfered with the better, as a rule, the public will be served. As regards coal, I may observe that neither the Companies who sell coal nor the public who buy it have so far complained of the rates. Their complaint has been more directed to the difficulty of moving the coal from the mines to the centres of trade and industry. The rates at which Railways can afford to carry depend also to some extent on the direction of other traffic. One-tenth of a pie per maund per mile is the prevailing rate. But that is sometimes reduced, with the sanction of Government if necessary, when, if not carrying coal, the wagons would be returned empty. I do not think that Government are at present called on to interfere."

The Hon'ble MAJOR-GENERAL SIR E. COLLEN said:—"In the memorandum which I laid upon the table last week I gave a full detail of the estimates with which I am specially concerned, the Indian military estimates, the Home (India) military estimates, the Military Works estimates, and the marine estimates. I do not think I need trouble the Council with any repetition of figures, but should like, if I may, to furnish the Council with an explanation regarding the increase in the budget of the coming year as compared with the budget estimate of the current year.

"The difficulty of arriving at the practical increase of military expenditure is because there are many factors in the estimates of both years which must be eliminated, in order to arrive at what may be called the permanent figure. We must take out the abnormal cost of food supplies, reduction by the absence of troops, and reduction of the provision for military operations and special services. It appears to me that the fairest way of stating the case is to say that provision has been made for improvements in the armament and organisation of the army to the extent of about 90 lakhs or £600,000; and that other increases, such as the messing allowance for the British Army, bring up the permanent increased expenditure to about one crore of rupees, or £666,666. Increases to army expenditure, comparing one estimate with another, may be classed under three heads, namely, what may be called temporary increases, which may not recur again; automatic increases, such as occur in connection with the volunteers; and special increases due to improvements in the army, in its organisation and armament, some of which must increase year by year up to a certain limit.

"The great increase to military expenditure was the effect, when fully felt, of the measures which were carried out in 1885-86-87 for augmenting the strength of the British and Native army, for the establishment of reserves,

and for the creation of coast and frontier defences, the maintenance of which is now a yearly charge. Now this increase of expenditure was the result of the deliberate conclusion of the Government of the day in consequence of the modification of our military position in India. But besides this direct cause of increase, many matters have since caused additional military expenditure, the preparation of the field army for mobilisation, increase in transport, rise in prices and wages, the effect of expeditions and campaigns on the non-effective charges, the increased cost of, and additions to, equipment and war material generally, development of the volunteer movement, and additional sanitary measures; while three items alone, the increased pay to the native army, exchange compensation allowance, and the grant of messing allowance to the British army, account for over one crore of rupees, £666,666.

"I have more than once explained in this Council what the great items of military expenditure are, and if my hon'ble colleagues will turn to paragraph 29 of my memorandum, they will see, taking the Indian military estimates, how the expenditure stands under the different grants; and if they analyse these figures, they will find that, in the effective services, out of say 15 crores of rupees, or £10,000,000, more than 14 crores of rupees, or a sum of considerably over nine millions sterling, is spent on paying, feeding and supplying, clothing, doctoring, and arming the army, while the difference is caused by the expenses of the staff and administration, attending to the education and spiritual wants of the army, and to the cost of the volunteer services.

"As to the non-effective charges, there is practically no means of reducing these; and if we turn to paragraph 38 you will find that the Home (India) military estimates are made up, besides payments to the War Office, of pay in some form or other, transport of troops to and from India, stores required by the Army in India, and various non-effective charges, such as pensions.

"I think that we are sometimes reproached that we have no great reforms to bring forward. Some of our critics would have us abolish the post of Commander-in-Chief, others tell us to abolish the Military Member of Council, while yet again these wholesale abolitionists advise us to abolish the four Lieutenant-Generals Commanding the Forces, or to abolish some particular part of the army usually, I may say a part of the army to which the critics do not belong; then we are told that we ought to reduce the British Army in India; while some say salvation is to be found in re-distributing the army and having nothing but large cantonments,—a most excellent policy, which I should like to see carried out,—but which would involve an enormous expenditure on barracks and cantonments. Great reforms have been introduced into the Indian Army during the last twenty years. The cumbrous presidential system has been got rid of and a large number of measures of improvement have been carried out. Even in the financial year that is now passing we have done a good deal, and are preparing to do more. Within the last few days, we have received sanction for the introduction of the organisation of double companies in native infantry in place of wings—a most important improvement which many of us have pressed for, for a long time. Another very considerable reform is the re-distribution of commands on the North-West Frontier which will be immediately carried out. The great reform to be accomplished is further and more complete decentralisation than has yet been effected.

"I said in my memorandum that I could not state the results of our labours to diminish clerical work and simplify our method of business in the army and its administration. But I rather forgot that we have already reduced the length of those useful documents, the military financial reviews, and since I wrote I have received a proof of the report on Ordnance Factories and I find a reduction in bulk has been made of 67 per cent. I mention this, because it is the first fruits of part of a very great reform in which His Excellency the Viceroy is not only interested, but for which he has supplied the motive power of his energy. I have explained in my memorandum how the particular military measures we have brought forward came to be proposed; but I did not explain that these measures are only part of a permanent policy which we have for many years gradually, if slowly, developed—that policy being the preparation of a

part of the Army of India for mobilization in any direction, either by land or sea; while the second part of the policy is the defence of the ports and frontiers by adequate works, and by carrying out measures to preserve the internal security of the country. Sometimes circumstances have obliged us to halt in this development At other times, we have been able to carry it forward more rapidly, but the measures of special expenditure, the re-armament of the Native army and of the mountain batteries, the development of our manufacturing power, the addition of officers to the Native army, the re-organisation of horse, field, and mountain batteries, with a view to facilitate mobilisation, the conversion of existing heavy batteries into more powerful units, improvement of the transport—I am afraid I have dwelt upon the necessity for this several times in this Council—and the provision of military light railways, etc., form an important part of this continuous policy, and we feel that, when these improvements have been carried out, we shall have made a great step forward.

"I should like to say one word as to what our mobilisation system is—it is the preparation of a force for movement, equipped in every possible detail. It means an immense amount of labour and an endeavour to foresee every kind of requirement. It is ten times more difficult than the mobilisation which continental nations are able to effect, because, not only have our troops to traverse long distances, but we are not able to distribute our troops rigidly and permanently in time of peace. One result of having a definite aim and standard is that we do possess large reserves, and manufacturing power for equipments and warlike stores. The possession of these equipments and reserves not only enabled us to send off at once the force for South Africa, but it has enabled us to meet large demands from the War Office.

"A great deal has been said recently to the effect that the Government take no interest in the Volunteer Force in India, and that this force is, in fact, in the cold shade of officialism. I am concerned that there should be any feeling of this kind, for I can assure the Council it rests on no foundation. I know Your Excellency takes great interest in the volunteer force of India—a force which has contributed a small but effective contingent to the army in South Africa, and for myself I am one of a very small body of veteran volunteers, as I was a volunteer 40 years ago, beginning my military education in that post, and I have done everything in my power to foster the movement.

"In the first place, I will deal with the question to which my hon'ble friend Mr. Allan Arthur alluded—the re-armament of the volunteers. The Government are most anxious that the volunteers should be re-armed, but we cannot do everything at once. It is, as will be readily understood, a matter of great importance that the Native troops of the field army should be re-armed with the magazine rifle, and this we shall now commence to do from our reserves, supplemented by the arms which are coming from home. The desire is to re-arm the volunteers, immediately after that portion of the Native army which is detailed for the field army has been armed with the magazine rifle, and I think that, if the volunteers consider the question dispassionately, they would understand why this plan has to be followed. They will certainly be re-armed before the remainder of the garrison of India, which is not in the field army, receives the magazine rifle.

"I find that in the last ten years many concessions have been made, which have involved expenditure. An annual grant is given to assist volunteer corps in the construction of rifle ranges; reservists are allowed to count towards the authorised band allowance; mounted volunteers are allowed to purchase cast horses at a small price; an educational allowance is granted to schools for efficient cadets; money grants are made to volunteers in lieu of rations during camps of exercise; ammunition for match shooting is issued at cost price; the horses of mounted corps are rationed at the State expense during camps of exercise, instead of this being charged to the capitation grant. The grant for camps of exercise has been raised; an annual grant is made of R20,000 to help the volunteers in their field days; an annual grant of R30,000 is made for volunteer buildings, such as armouries, head-quarters, etc.; loans at a favourable rate of interest have been issued to volunteer corps; volunteers have been placed

under more favourable conditions regarding the grant of wound pensions and widows' pensions. The capitation rate of R10 is passed to recruits who fail in their first year but qualify as reservists; outfit allowances are granted to volunteer officers on first appointment for the purchase of their swords and revolvers; an increased capitation of R10 is granted to mounted volunteers and the same to artillery volunteers, while infantry volunteers who are trained in gun drill receive an extra amount of R10. Volunteer officers are granted a decoration and volunteers long service medals; and the children of volunteers are admitted to the Lawrence Asylums. I venture to think that we can hardly be said to have entirely failed in our duty to the volunteers.

"I have had on previous occasions in this Council to defend military expenditure in India, although, indeed, to my mind it requires no defence, when we remember that the military expenditure of India is only about 5 per cent. of the great trade of this country, which I venture to think is not an extravagant insurance. The criticism which has been passed has sometimes been full-bodied in its flavour, sometimes of a very mild character. On this occasion I confess I am glad to know that the continuity of hostile criticism has been broken, and that my colleagues approve of the military policy of the Government. The Hon'ble Mr. Mehta made a remark on the method pursued in respect to the charges on account of troops lent to the Imperial Government. Now I would ask his attention to the despatch of the Government of India of 1896, on the Suakin charges, which has been published as a blue book. In that despatch a full exposition was made of the view entertained by the Government of India, and for my part I can only say that I regard those views as equitable. I am given to understand that at last the report of Lord Welby's Commission is to be published, and I do not think I ought to forestall the opinion of that Commission by expressing my own. I think that is all I need say with reference to the observations which have been made on the subject of military expenditure by my Hon'ble Colleagues.

" My Lord, when speaking in this Council, two years ago, of the frontier campaigns of 1897, I mentioned how the great chieftains of the Native States had vied with each other in placing their Imperial Service Troops at the disposal of the Government of India, and in offering their swords for service in the field. But still more remarkable has been the exhibition of the loyalty of the princes and people of this country, during the progress of the war in South Africa—a war which we feel assured that great Indian soldier, Lord Roberts, will conduct to a conclusion which will give that country lasting peace. All must appreciate the necessity for carefully thought out plans and preparation, but it is not only upon these, or upon the existing numbers of our Indian Army, that we rely for the security of India. We rely also on the resources of the empire at large; and we rely upon the enormous potential strength which we possess in the martial races of this country.

" It was in the same speech that I alluded to the achievements of Sir William Lockhart. I was with him in the last act of the drama of the war of 1897, at the last jirga of the Afridis, and again at that remarkable scene at the Peshawar railway station when they came to bid him farewell; and I well recollect the impression it made on me when one of them stepped forward and said: 'We have fought against you—the next time we shall be on your side, and your enemy shall be ours.' What can be more striking than that the Afridis should have offered their services for South Africa? What can be more touching than the message from 'Your Afridis,' which came to Sir William Lockhart in his last illness? No words of mine can express the loss which the Indian Army has suffered. I do not speak of personal sorrow, but of the withdrawal of the present and living influence of a great soldier, high-minded and chivalrous, experienced in war, to whom the whole army looked up with affectionate reverence. But, my Lord, the name of Lockhart will long be remembered in the Punjab and on the frontiers of India. May his bright example animate the younger men to follow in his footsteps,—and although we may have disappointments and the result may be slow of accomplishment—may his example teach them how the wild tribesmen can be led to look upon us as friends, and thus add to the strength of the Indian Army. The martial strength of India—prepared at all points—lies in the loyal faith of her

sons in their leaders—among whom history will afford a high place to the name of my friend of so many years, and our colleague in this Council.

"My Lord, death has laid his hand on another eminent soldier, the senior officer on the active list of the Indian Army, one who was formerly a member of this Council, and afterwards Commander-in-Chief in India. I speak of Field-Marshal Sir Donald Stewart. His distinguished career has ended, full of years and honour, but up to the last he was a power in the council of the empire. So long as the Indian Army produces such men as those who have just passed away, so long will it maintain its position as a potent factor in that greater Imperial Army which will, in the future, embrace still more closely all the constituents of military power in the widespread empire of our Sovereign."

The Hon'ble MR. DAWKINS said:—"I will begin by addressing myself first to the observations of my friend the Hon'ble Mr. Allan Arthur, whose willingness to place his advice and knowledge at the disposal of Government I should like to take this opportunity of cordially acknowledging.

"In discussing the history of this season in the Financial Statement I remarked that the Exchange Banks had not brought out as much money as usual before Christmas to India, they having had profitable employment for their funds at home, and that this, together with other reasons, contributed to the rush for telegraphic transfers after the New Year, and the decision, which was in consequence forced upon the Secretary of State, to limit transfers by raising the rate. It has been essayed to qualify my remark by some figures supplied to the Hon'ble Mr. Allan Arthur to prove that the Exchange Banks brought out not less but more money than usual before Christmas. My hon'ble friend has had the courtesy to show me those figures. I have tried to have them checked, a laborious task, from the registers of the Comptroller-General, and I only received the results last night, but I regret to say that I cannot accept the figures supplied to him as absolutely correct. And there are other elements to be taken into consideration, and other ways by which the Exchange Banks bring out money besides Council drafts, so that I doubt whether this form of comparison, even if I accepted the figures, would be conclusive. However, any discrepancies in these figures do not really matter much; nor could they invalidate my main argument, which was, and is, that, as the Exchange Banks very naturally and properly employ their money out of India when they can employ it out of India more profitably than in India, their assistance to Indian trade cannot be depended upon as an absolutely certain factor. This is a reason which contributes to the undue reliance of trade on Government, and indeed this year the Exchange Banks themselves wanted to have an assurance that they could borrow money from the Government, a demand that might reasonably be held to indicate that, even if the funds they were bringing out were equal in actual amount to those brought out in previous years, they were not proportionately sufficient with reference to the demands of this year. Then, again, the insufficiency of funds here when rates fell in London and set free money to seek employment in India resulted in a rush for telegraphic transfers mainly on the part of the Banks which led to the Secretary of State's action in raising the rate. I do not think I need justify or explain the Secretary of State's action. His reasons, and they are convincing, are given in the Despatch published in last Saturday's *Gazette.* I must say, with all deference, that this incident seems to me to have been exaggerated out of all shape and proportion. My hon'ble friend still seems to hanker after the idea that the Secretary of State should bind himself down to a maximum rate. Why should the Secretary of State give an undertaking that may be illusory? If the circumstances of this year repeated themselves, would my hon'ble friend deny that it was the first duty of the Secretary of State to ensure the stability of our currency? That there will be a practical maximum, I think, with the experience of this year to guide us in future, is fairly certain. My hon'ble friend would like to fortify that certainty, and to provide for a regular automatic conversion of gold into rupees by so amending the Gold Note Act of 1898 when it is prolonged, as Government has undertaken to do, by empowering the Government of India to issue notes on

rupees against silver in transit purchased by gold in London tendered under the Act. This would be definitely providing for the instant conversion of gold received into silver; for the more immediate supply of rupees for the presentation of gold, which I may say, in answer to the Hon'ble Maharaja of Darbhanga, is the measure of the coinage of silver. I may say that personally I have much sympathy with my hon'ble friend's suggestion though, at the same time, there is something to be said against introducing any change into the Act until we have had somewhat longer experience of gold as legal tender. I think I ought also to beg my hon'ble friend not to dangle the profits on silver too conspicuously before the eyes even of a most virtuous Government. Once let these profits become a determining factor in your action then goodbye stability. However, I am certain his valuable suggestion for amending the Act II in the direction I have described will receive every consideration at the hands of Government.

"My hon'ble friend has also referred to the question of giving the Banks access to the Paper Currency Reserve in India. He must excuse me if I do not go fully into a question which is now under the consideration of the Secretary of State. But I fear that personally I do see on this question eye to eye with him. Nor can I for one moment understand or accept his statement that the Presidency Banks are the only Central Banks in the world that receive no assistance from the Paper Currency, or that 'in all countries with the exception of England the Currency can be readily expanded by issuing fiduciary paper.' We all hear a good deal of German expansion in these days, but my hon'ble friend is really anticipating a colossal expenditure, by seeing that exceptional institution, the Imperial Bank of Germany, which works under conditions that do not exist in India, painted generally over the globe.

"I am afraid the change in the entry under the Famine Insurance grant from Reduction to Reduction or Avoidance of Debt has failed to commend itself to the Hon'ble Kunwar Sir Harnam Singh. Yet I submit it is quite clear and has a reason. If, *ex-hypothesi*, we have to find three crores for Railway construction, and instead of borrowing three crores only borrow two crores and provide one from the unappropriated balance of the famine grant, surely we avoid debt. My hon'ble friend further suggests that an unappropriated balance should be invested in a separate fund, a suggestion in which I understand he is supported by the Hon'ble Mr. Ananda Charlu. I really cannot see the advantage of this. You would, on the one hand, invest a crore raised by taxation, and you would, with the other hand, borrow a crore, the interest on your investment balancing the interest you pay on your loan. The only imaginable advantage of such a plan would be if, when famine came, Government could not find funds to meet famine expenditure, — an almost inconceivable state of things. This is not the case. My hon'ble friend also views with some misgiving the cashing of postal orders in Presidency-towns in gold among a people accustomed, for centuries, I understand him to say, to the exclusive use of silver coins. History hardly bears my hon'ble friend out in this latter assertion. Gold used to circulate till fifty years ago pretty freely in Southern India, and to some extent in Bengal. Indeed, when Lord Dalhousie demonetised gold, he received some earnest protests against his action, curious enough reading they are, from the native community. I think the Notification need cause no misgiving. We did not issue it till people had themselves shown their desire for gold by voluntarily taking over £130,000. We are therefore proceeding gradually. Nor does my information tally with my hon'ble friend's as to sovereigns being sold in the bazar with a batta. I have made a good many inquiries. I was told that this was the case at first, but has now ceased to be the case, and that sovereigns are passing freely. And the fact of their circulating freely is corroborated by the evidence of the Director-General of the Post Office. Very few complaints, and those only in the first three days, I think, were reported to the Director-General as being made to the payment of postal orders in sovereigns. Since the order came into force £34,000 have been paid out by Post Offices in Calcutta, £13,500 in Bombay, £3,500 in Madras, and over £1,000 in Rangoon. The Currency Offices have also continued to pay out gold, though, as was to be expected, some gold has been returned to them. The further issues of gold from Currency Offices since

March 10th, when the amount was £130,700, to March 24th, have been £113,500, making a total of £244,200. The Presidency Banks have also issued gold in payment of Government cheques to the extent of, oddly enough, another £113,000. The issues to the public, as the Post Offices draw gold either from the Banks or Currency Offices, are represented by the sum of the last two figures, £358,000, taken by the public since we began to offer gold on January 15th.

"The Hon'ble Mr. Smeaton has raised two questions on behalf of Burma. The first relates to the incidence of the duty on local salt, paid in the form of what is called composition on vessels used in its manufacture. There appears to be considerable diversity of view on this subject in Burma, and much doubt as to whether in any case the local industry is not doomed. The Financial Commissioner himself, I think, has expressed an opinion that the extinction of the industry, if gradual, would not do harm. But the position of the industry is complicated by the question of the Government fisheries, though I believe that any difficulties in this connection could be got over by adopting the Madras system of special issues of salt for fisheries at privileged rates. However, the Government has no intention of going about to compass the extinction of a local industry. But I am not sure that the question will not soon arise of raising the salt-tax in Burma to the same rate as in the rest of India. The problem before it is so to raise and adjust the duty on local salt as to enable it to compete fairly with, but not to be protected against, imported salt paying a tax at one rupee per maund. For I think it must be recognized that the local duties are in some places too low. We have an instance of the composition duty in Bassein working out at five annas per maund. Well this gives a very barren allowance for water with a vengeance. I cannot quite convince myself—I hope I do Burma no injustice—that if anything there is not a shadow of a desire there to give the duties just a little gentle protectionist turn in favour of their local salt. That suspicion is fortified by the desire to reduce or keep the duty low because the cost of production is high. You don't vary the tax on cotton because one mill works cheaper or is nearer a railway than another. But the subject is one still under the consideration of the Government of India.

"With regard to the second point, I am glad to learn from my hon'ble friend that the arrangement now made for giving telegraphic transfers in Calcutta or Rangoon at a fixed commission of ½ per cent. has given satisfaction. I believe Rangoon will find that the arrangements will satisfy all requirements. To grant Council Bills on Rangoon is impracticable; and I shrewdly suspect that the Hon'ble Mr. Smeaton's Rangoon clients know this, but threw in this demand to make sure of getting the transfers. I am afraid the payment of Councils half in gold and half in silver would not get over the difficulty. My hon'ble friend desires to complete the facilities for Rangoon by giving transfers not only in Calcutta, but in Bombay. I doubt whether this, will be found necessary in practice. But there is no reason against the extension of the arrangement, though the commission to be paid in Bombay may have to be somewhat higher than in Calcutta.

"The Hon'ble Mr. Mehta propounds certain interesting questions which certainly could not be exhausted in this debate. Mr. Mehta asks, if I heard him aright, whether 'deficits owing to exchange were not turned into overflowing surpluses by the differences coming from the pockets of the people,'—a somewhat cryptic sentence. I understand Mr. Mehta by this to suggest that though a declining exchange may have embarrassed Government, yet it may have increased the popular wealth. I think if Mr. Mehta will look at the annual returns he will find that the largest trade returns are by no means coincident with the lowest or with a falling exchange. In fact, it is difficult to establish any relation between a low exchange and large exports, and the people who urge the plausible theory of a depreciated rupee stimulating exports have a very bad quarter of an hour when they come to look at statistics. Like some other plausible theories, this theory does not well stand confrontation with facts. Mr. Mehta also means, I think, that the enhancement of the rupee may operate to some extent as an indirect tax on producers by lowering prices. This is a most intricate and difficult question. The facts, as we know, seem to point to

the enhancement having had little or almost no effect of the kind. But, assuming the appreciation of the rupee had had such an effect, that effect measured in rupees would certainly be made less than the direct taxation to which Government would have been obliged to resort if, for instance, we had an *11d.* rupee to-day.

"The Hon'ble Mr. Metha is also somewhat disposed to challenge our small surplus of twenty-four lakhs as fictitious. He thinks we have taken land-revenue too high next year, and so I think does the Hon'ble Sir Harnam Singh, that we have not allowed sufficiently for the depression of the people and the loss of cattle. This may be a matter of opinion. But I can assure my hon'ble friend that the estimates have been cautiously framed by the Revenue and Finance Departments in consultation with Local Governments, and with good rains next year we expect to see them justified. For his own Presidency we have accepted without any modification the estimates of the Local Government. Mr. Metha asks for some figures of plague expenditure. He correctly states that in the Budget Estimate of 1899-1900 provision to the extent of about 12½ lakhs was made for direct expenditure on plague in Bombay, and asks what became of that amount, whether it was 'absorbed.' I don't know about its being absorbed, but it was duly spent, indeed more than this was spent, for the Imperial Government made a contribution to Provincial Revenues of 12½ lakhs for plague account, and in addition a special contribution of about a lakh, to cover the cost of the Research Laboratory. Its distribution or otherwise among the Municipalities is a question for the Government of Bombay. I may with advantage lay on the table a statement showing the direct expenditure on plague in the Revised Estimate of 1899-1900, and the Budget Estimate of 1900-1901 :—

Direct expenditure for the prevention of plague.

	Revised Estimate, 1899-1900. R	Budget Estimate, 1900-1901. R
India	2,50,000	2,17,000
Central Provinces	1,22,000	1,21,000
Assam	12,000	15,000
Bengal	5,42,000	3,75,000
North-Western Provinces and Oudh	4,92,000	3,10,000
Punjab	1,31,000	59,000
Madras	5,87,000	3,73,000
Bombay	15,72,000	15,38,000
TOTAL	35,08,000	30,08,000

"It is also a complaint that Civil Works in Bombay have been cut down. I am afraid when famine and plague are raging you cannot carry on everything else on a normal scale. If you have heavy doctor's bills to pay in a private house, you are often reduced to curtail some customary expenditure. But Mr. Mehta has an absolutely dogged and rooted objection to our small surplus. If he cannot make it disappear in some other way, he has, at any rate, one last way of polishing it off—a final Happy Despatch. Give it to Bombay, he cries. Now I have every sympathy for the sore trials—and very sore trials they are—of the Western Presidency, but assuredly, as the French say, the appetite does come by eating. Bombay is receiving from Imperial Funds 248 lakhs, all she asks for on account of famine, and over 34 lakhs for a general grant-in-aid, for other objects, including plague, some 283 lakhs in all. And Mr Mehta wants to try her digestion further with our little surplus.

"The Hon'ble Mr. Spence has brought to notice that there is no account given in the Financial Statement of the Provincial balances. I am afraid I must acknowledge that there is this omission, but I can only say that the entry of the Provincial balances as regards very many of the Provinces have been so entirely fictitious that we thought it was hardly worth putting it in. I have no doubt that in another year, when this entry will become, as I hope it will become, less fictitious it will be duly put in by the Department.

"In conclusion, after conveying my thanks to my colleagues in this Council for their kind language in reference to myself, there remains one other pleasant duty before me, and that is to express my most sincere thanks to the Members of the Finance Department for the hearty co-operation and support accorded to me during this year. And above all my thanks are due to the Secretary, Mr. Finlay, whose loyalty, knowledge, and zeal are above all recognition, and who has most ungrudgingly in every way given to me of his best."

His Excellency THE PRESIDENT said:—"I should like to thank Hon'ble Members for the readiness which they have shown to act upon the suggestion which I ventured to make at the beginning of this sitting, namely, that such parts of their proposed speeches as dealt with matters of a technical character, or were likely to extend to unusual length, should be taken as read, and should be laid upon the table for subsequent publication in the Gazette.

"In closing this last debate of the present Session of Council, I am constrained to admit that it has not been a Session very prolific in legislation. It has not, for that reason, been, in my opinion, any the worse. On the contrary, I think that we opened the Session with too full a wallet. Our Session is, owing to the conditions of our life at Calcutta, necessarily limited in duration. All the stages of legislation, after the preliminary enquiries and introduction of the various Bills, have practically to be got through in the space of three months. In the case of small or uncontentious measures this is enough, and more than enough. In the case of an important measure, which has been long debated, and has probably only reached the stage of legislation after years of previous discussion, it may also be sufficient. But I doubt if it is sufficient in cases where several important measures may be simultaneously on the Agenda paper, and where, in the course of examination of the Bills themselves, acute difference of opinion may be developed, or alterations may be made in a Bill in Select Committee or elsewhere that radically affect its original character. In such cases I would sooner be charged with undue caution than with extravagant haste. We are free in India from the particular temptation that impels Governments to legislate at all hazards in the British Parliament, namely, the desire either to fulfil the promises sometimes rashly given upon platforms at a previous election, or to establish a better record than their political opponents for the purposes of the ensuing one. Being free from these temptations, and having no standard of action beyond our own sense of responsibility, and of the public needs, I think that it behoves us to legislate sparingly, to look very closely to the quality, and not too much to the quantity, of our output, and, while very jealously guarding the duty of Government, which is to lead public opinion, and in no way to abrogate the supreme authority vested in us—at the same time not to push our measures through with undue precipitation, above all, not to give to any party or interest the idea that its views have been imperfectly considered, or contemptuously brushed aside.

"For these reasons we have, during the present Session, postponed the Assam Labour Bill, upon which we did not receive, until too late a date, all the replies that we had asked for; and the Coal Mines Bill, in which amendments so substantial were introduced in Select Committee, that we felt it desirable again to consult the Local Governments, before proceeding further with the Bill. It was on similar grounds that I announced the withdrawal of the Press Messages Bill ten days ago. Now there may be some people who may make this series of postponements a source of reproach, and may interpret them as a sign of weak or distracted counsels. I do not think that, at any rate in the present case, there would be the slightest justification for such a reproach. Speaking for the rest of my colleagues as well as myself, I can truthfully say that we have acted only after careful deliberation and in the public interest; and I believe that our decision has been ratified by public opinion, and has been acceptable to the majority of Hon'ble Members who sit upon this Council. For my own part, I say unhesitatingly that, in proportion as our Legislative machinery in India is prompt and powerful in its action, and is free from many of the clogs that impede legislation in England—so should it only be employed with much forethought and deliberation. That does not mean for a moment that Government must never pass unpopular Bills. All legislation is unpopular with somebody; and I have seen enough of Parliamentary life to have heard the most salutary measures denounced as iniquitous at the time of their introduction, and to have seen Statesmen and

Governments savagely abused for the passing of Acts which were afterwards extolled as their principal title to fame. I daresay, therefore that this Council in my time will pass some Bills that will be stoutly resisted and roundly assailed. All I hope is that we shall not be guilty of the particular vice of legislation in a hurry.

"Passing from these general considerations to the discussion in which we are at present engaged, it will, I am sure, be the opinion of all who heard the Hon'ble Mr. Dawkins last Wednesday, that he placed before us a clear and even luminous statement, dealing with a large variety of subjects, and a great mass of figures, with the easy confidence that betrays the hand of the master and wins the confidence of the pupil. I am sure that we all of us regret that we shall not listen to many more such statements from his lips, and that the Government of India will not profit in future years by Mr. Dawkins' wide experience and expert counsel. He is unfortunately leaving us, after a too brief period of Indian service. During that time he has had to contend with circumstances representing a transitional phase in our financial history; and he has further seen all prospect of a notable Budget, of a large surplus, of great schemes, of a sensible relief of taxation—in fact, all the legitimate aspirations of a financier—stolen from him by the sad famine against which we are now struggling. One by one, therefore, his Spanish castles have been dissolved in thin air, and he has been compelled to present a curtailed programme and a stern business statement, in which, if there is nothing startling or sensational, it is yet a matter of sincere congratulation, not merely that equilibrium is maintained, but that a slight surplus is even estimated for the forthcoming year. Nevertheless, in his year of office Mr. Dawkins has not failed to leave his mark, and it will be found to be a durable mark, upon our financial history and system. He has successfully inaugurated the new era under which the sovereign has become legal tender in India, and stability in exchange has assumed what we hope may be a stereotyped form. This great change has been introduced in defiance of the vaticinations of all the prophets of evil, and more especially of the particular prophecy that we could not get gold to come to India, that we could not keep it in our hands if we got it here, but that it would slip so quickly through our fingers that we should even have to borrow to maintain the necessary supply. As a matter of fact, we are almost in the position of the mythological king, who prayed that all he touched might be turned into gold, and was then rather painfully surprised when he found that his food had been converted into the same somewhat indigestible material. So much gold, indeed, have we got, that we are now giving gold for rupees as well as rupees for gold, *i.e.*, we are really in the enjoyment of complete convertibility—a state of affairs which would have been derided as impossible by the experts a year ago. Mr. Dawkins has further introduced several useful reforms in the method of stating our accounts. That delusive column that appeared to represent Loss by Exchange has vanished. The dreadful and bewildering symbol of Rx. has been politely bowed out of existence. I remember last year, when still a newcomer from England, and before I had become accustomed to the multiplicity of Indian financial symbols, being considerably puzzled at the occurrence in the same statement of no less than five different methods of computation, *viz.*, Rupees Tens of Rupees, Pounds Sterling, Lacs, and Crores. Now, I have never myself understood why finance, because it is complex, need also be made obscure. But Mr. Dawkins is one of the few financiers whom I have found willing to subscribe to that elementary proposition. A useful step has also been taken by him by which the only public works that will in future be charged against the Annual Famine Grant, or as it is sometimes called, Famine Insurance Fund, of 1½ crores —will be works that are designed and executed exclusively as a protection against famine. This does not mean that such works can be brought up to the full margin of the grant, for protective public works are necessarily limited in number. What it does mean is that the allocation of the grant for such famine protective purposes as are available will be more easily traceable, the unappropriated balance being devoted as now to avoidance of debt. Perhaps in this respect we may be able to carry correct definition even further in the future. During his term of office Mr. Dawkins has further adopted a liberal policy in his attitude towards banking and other enterprise in this country; and if he has not been here long enough to carry to a final conclusion the important question of

banking amalgamation or reform, he has appreciably expedited the solution of the problem, and has facilitated the labours of his successor by the free and fearless discussion which he has inaugurated, both in private conference and in public despatch, upon this momentous issue. Finally, in the reply to which we have just listened, Mr. Dawkins has shown an ability to meet the criticisms which have been passed upon his Budget in the course of this debate which renders it a cause of additional regret that this is the last occasion on which we shall listen to a similar performance from him.

"Such are some at any rate of the services which have been rendered by our retiring Finance Member. I now pass to an examination of certain features in the Budget, and of the observations that have fallen from some of my Hon'ble Colleagues this afternoon.

"It has been made abundantly clear that the main source of disturbance in the calculations, both of the past and the ensuing financial year, has been famine. But for famine Mr. Dawkins would have had a great surplus, and might have introduced what is generally known as a popular Budget. Let me endeavour to give you an idea of the extent to which this cyclonic disturbance has affected, and is still affecting, India. I put on one side for the moment the fact which is known to you ,all from the weekly Gazette, that we are now engaged in relieving in one form or another, nearly 5,000,000 persons, more than the entire population of many not inconsiderable States. Such a thing has never been heard of before in the history of Indian or indeed of any other famine. How greatly this famine transcends in importance its predecessor may be illustrated by the fact that in the Central Provinces, the centre of the deepest scarcity, both in the famine of 1897 and now, whereas at the height of the 1897 famine, *i.e.*, at the close of the month of May, less than 700,000 persons were in receipt of relief, on the present occasion, 1½ million of persons are already receiving relief at the end of March. In one district alone, that of Raipur, over 30 per cent. of the whole population are upon relief, *i.e.*, 500,000 persons, out of a total of 1,600,000, are being supported by the State. In four districts of Bombay between 20 and 30 per cent. of the entire population, in three districts of Berar 20 per cent, and in the Ajmer-Merwara Division 20 per cent., are on relief.

"But let me represent the severity of the affliction to you from another point of view. I see it sometimes stated, and the critics of British rule in India are very fond of this argument, that the real causes of recurring famine are not the failure of rain, the exhaustion of the soil, or the loss of crops, but the pressure of land taxation and the drain upon the resources of the people. Now I cannot pause to-day to discuss the question of land assessments. We have listened to some interesting observations on the subject from Mr. Bose, the Maharaja of Darbhanga, and Mr. Mehta. What they have said will have the earnest attention of Government. But I may point out, in terms of pounds, shillings, and pence, exactly what a great Indian drought does involve in the destruction of agricultural wealth; and those who hear the figures may then judge how far any revision or modification of our revenue system, putting aside the question whether it be or be not desirable or feasible, would of itself alone enable an agricultural population to stand the shock of a calamity at once so sudden and so devastating.

"The wheat crop of India averages 6 million tons, worth at least £24,000,000. This year the estimates received from the provinces point to a crop of about 3,000,000 tons. Even if we allow that the money value of these 3,000,000 tons in a famine year is greater than in an ordinary year, we yet cannot put the losses of the Indian agriculturist on this one crop alone at less than from £8,000,000 to £10,000,000. Take another great staple crop—cotton. The Indian cotton crop averages in value £12,000,000 sterling. This year its outside value does not exceed £5,000,000, or a loss of £7,000,000 sterling. A third great crop is oilseed, namely, linseed and rapeseed. It ordinarily covers 18 millions of acres. In the present year this crop is practically non-existent outside of Bengal, the North-Western Provinces, and Oudh.

"These losses, great as they are in relation to the annual produce of India,

as a whole, are still greater in relation to the produce of the famine region, to which they are practically confined. I will take the case of a single province. A very careful return of this year's harvests of food-grains has just been received from Bombay. On a very moderate computation, the loss to the cultivators in that Presidency, as compared with the value of the harvests in preceding years, has been £15,000,000. They have also lost about £4,000,000 on their cotton crop. What they have further lost in the matter of cattle it is impossible to conjecture, but the figures must be enormous.

"These facts appear to me to be sufficient of themselves to explain how it is that the present famine is so terrible, and the distress so great; and how impossible it would be for any Government to anticipate the consequences of a visitation of nature on so gigantic and ruinous a scale.

"Now let me turn to the financial aspect of the famine. The cost of famine to the Government of India is incurred in a number of different ways, in direct famine grants to the Local Governments, in the decrease of revenue arising from suspensions and remissions, in indirect expenditure, and in increase of prices. Summarising these heads, I find that the cost of the present famine, partly estimated, partly already incurred, will be somewhat as follows. Famine relief in the past year, 308¼ lakhs, in the ensuing year, 500¼ lakhs; loss of revenue in the past year, 236 lakhs, in the ensuing year, 121 lakhs; compensation for dearness of provisions and increase in cost of food-supplies in the past year, 37 lakhs, in the ensuing year, 71 lakhs, or a grand total of over 12¾ crores, or nearly 8½ millions sterling. To this should be added the temporary cost of other direct charges, such as loans to Native States, amounting in the past year to 48 lakhs, in the ensuing year to 75 lakhs, and agricultural advances amounting to 37¾ and 20 lakhs in the two years, respectively.

"So much for the financial aspect of famine. Perhaps the figures of cost, when viewed alongside of those of the numbers of persons affected, and the loss of crops involved, may give to the public some sort of idea what a great famine in India means. That to some extent its magnitude has already been realized in England is, I think, clear from the liberal contributions that are now pouring in upon us from British sources. I am confident that I shall not err if I take advantage of the present opportunity to express our united acknowledgments to the Lord Mayor of London, in particular, and to the Lord Mayors and Mayors of other great towns in Great Britain and Ireland, for the patriotic readiness with which they have inaugurated the various relief funds, and also to the generous British public for the splendid manner in which, in the midst of all their distractions, they have remembered our sorrows, and are, weekly and daily, giving of their substance for India's relief. We have done our best for them in respect of their war; and they are nobly repaying the obligation in respect of our famine. Nor must we fail to include in our thanks those British Colonies in both hemispheres who are once again showing a most practical sympathy with our misfortunes; and whose union with the mother-country and with her great Asiatic dependency, whether it be for the purpose of conducting a war, or for that of alleviating the suffering of the masses—strikes a harmonious and resounding note at the dawn of a new century, which will re-echo throughout the world.

"When in the month of December last a warning Circular was issued by the Government of India concerning relief tests and relief distribution, apprehension was expressed in some quarters, that its purport might be misunderstood by the Local Governments, who might thereby be led to restrict relief to a dangerous degree, and to read into the cautious utterances of the Supreme Government, a hint that relief *must* be contracted, and expenditure curtailed, however urgent the requirements of the people. The Circular has now been in operation for three months. The numbers upon relief are in themselves sufficient to show how little ground there was for the apprehensions which I have quoted. On the other hand, we know from the replies of Local Governments that our insistence on the proper application of tests and precautions, and on the limitation of relief to the strict necessities of the case, was greatly needed; and that our warning has led to very desirable reforms. We are satisfied from the reports as to the health and general condition of the people in the distressed tracts which we constantly receive that sufficient relief is being

given, and we also have the best of reasons for believing that, had not the conditions of relief been made more stringent, and had not additional precautions been applied, the State would now be engaged in the support of many who were by no means at the end of their resources.

"There remains one more test which I should like to apply to our famine-relief system. I refer to the test of the deathrate. I have called for the figures, and I have been astonished at the number of famine-stricken provinces and districts in which the mortality is scarcely at all in excess of the normal. In the Central Provinces, there is only a single district in which the excess is so marked as to attract attention. I saw a letter a day or two ago from a visitor to the worst area in that province, and he reported that there was little to distinguish the persons upon relief-works from labourers engaged upon Government work in ordinary times. I understand the same impression to be borne out by the personal experience of Mr. Rees. Contrast these facts with the shocking mortality in the last famine. In some of the districts of Bombay, in Berar, and in Ajmer, where the deathrate has risen, the chief cause of the deaths attributed to privation is the enormous influx of destitute refugees from the neighbouring Native States, where the same perfection of relief-works, and the same care for the life of the people do not exist. I am afraid that in many of these States deaths from starvation are numerous. Jaipur is managing its own relief generously and well; but in January 1,250 deaths from starvation were reported, mostly wanderers from Marwar. In the same month, 250 starvation deaths were reported from Kotah. In Udaipur, which has been very backward, there were 1,100 starvation deaths in January, and 3,250 in February. I might quote other and similar cases. The problem in Native States is a difficult one, arising from the want of experience of the Durbars, the complete novelty to many of their number of the principle itself of State-relief, the lack of organization, and the wild character of some of the hill tribes. Many of the Native princes have shown wonderful energy and public spirit. But the real efficacy of the system adopted by the Government of India is best shown by contrasting it with that which prevails in adjoining tracts not directly under British administration. The experience of such a famine as this [illegible] on is enough to extinguish for ever the fallacy that these visitations are less severe in their incidence, or less calamitous in their result in Native territory than they are in British India. The figures and facts prove irrefutably an entirely opposite condition of affairs.

"Now in connection with Famine, there are two classes of remedial or preventive measures frequently suggested to us, about which I should like, at this stage, to say a word. The employers of labour in India are in the habit of saying—'Here we are in great straits for want of labour in our mines, our factories, or our mills. On the other hand, only a few hundred miles away are thousands of able bodied persons, who are only being saved from starvation by the intervention, and at the cost of Government. Why does not Government spare its own pocket, and at the same time help us, by moving these people from where they are not wanted to where they are? Nothing, indeed, can sound more simple on paper But nothing is more difficult in practice. In the first place, human labour, and particularly native labour, is not like a cartload of bricks, or gravel, or stones, which can be taken up here and dumped down there, wherever you please. In the second place, we and our officers have too much to do in time of famine to be able to convert Government into a sort of vast Emigration Bureau. For such a purpose is wanted a close enquiry into the conditions of labour, the organization of transport, protection of the labour when transported, and so on. If we undertake to move these large batches of men, we shall also, if the experiment proves a failure, be held responsible, and shall have to bring them back again. In all likelihood very many of them would die on the way. Now that is not primarily our business. It is emphatically a case in which capital should help itself, and should not shift its own responsibility on to Government. It is the business of Government to lend every assistance in its power, and that I would most gladly do. But I should like to see the employers of labour a little more willing to help themselves. I know that, if I were one of their number, and were in need of labour, I would have my agents out at once, travelling here,

there, and everywhere, and picking out the stuff that I wanted in suitable provinces and localities.

The second suggestion that is frequently made to me, I admit as a rule from the outside of India, where I am afraid that a good deal of ignorance of the actual position prevails, is that the obvious method to stop famines is to introduce irrigation. Some of these writers seem to plume themselves upon the originality of the idea, and to be unaware that such a thing as irrigation has ever been heard of in India, or has been so much as attempted here. They do not seem to realize that irrigation has been going on in India for quite a considerable number of years, that about 19 millions of acres in India are already under irrigation, and that upon the works so undertaken has been spent a capita outlay of no less than 25½ millions sterling. Worthy people write me letters based upon the hypothesis that any Indian river which ultimately discharges its waters into the sea is really so much agricultural wealth gone astray, which somehow or other the Government of India ought to have got hold of at an earlier stage, and turned into crops and gardens. Now I have had a very careful estimate made out for me of the extent of *fresh* ground in the whole of India which we are likely to be able to bring under cultivation, either by new irrigation projects, or by extensions of existing systems. Under the head of Productive works, *i.e.*, works which may be expected to yield a net revenue that will more than cover the interest on the capital outlay, the estimated increment is about 3½ million acres, and the estimated outlay between 8 and 9 millions sterling. Under the head of Protective works, *i.e.*, works which will not pay, and which inasmuch as thay constitute a permanent financial burden on the State, can only be undertaken in exceptional cases, and then as a rule do very little towards the prevention of famine, we contemplate spending about 10 lakhs a year, and shall probably in this way about double the area of 300,000 acres which is covered by that character of work at the present time. It seems therefore that the total practicable increase to the irrigable area of India under both heads will not amount to much more than 4,000,000 acres. This increase will, of course, be of value in its addition to the total food-supplying area of the country, in the employment of labour thereby given, and in its effect upon prices in time of famine. But I am afraid that it cannot be expected to secure immunity from drought to districts now liable to famine, or to help directly their suffering inhabitants. Indeed, when a desert tract is brought under cultivation, a stimulus is given to the growth of population, and more mouths have in time to be fed. The fact remains that the majority of the irrigation-works that were most feasible, or most urgently required as protective measures against famine, have now been carried out, and that there is not in irrigation that prospect of quite indefinite expansion with which the popular idea sometimes credits it. At the same time, I am so much in agreement with the general proposition which has received a good deal of support from many quarters in the course of the present debate, that irrigation should be encouraged, both because of the extension thereby given to the growth of food-supplies in this country, and because, in the case of what are known as Productive works, of the extraordinarily remunerative character of the capital outlay, that I have inaugurated, since I came to India, a definite and, as I hope, a permanent extension (so long as we can find the works to undertake) of our Irrigation programme. In my predecessor's time, the annual Irrigation grant amounted to 75 lakhs. Last year I persuaded Sir James Westland to increase this; and in the financial year just expired we have spent 90 lakhs, some of it being directly applied to the provision of labour in famine districts; while during the forthcoming year, in spite of the general curtailment of our programme owing to famine, I have prevailed upon Mr. Dawkins to fix the Irrigation grant at 100 lakhs, or one crore of rupees. I am hopeful that generosity in this respect will not be a misplaced virtue, either in the direct returns that it will bring in, or in its general effect upon the prosperity of the country. For the reasons that I have named, I doubt whether irrigation can continue to do as much in the future as it has done in the past, owing to the gradual exhaustion of the majority of the big schemes. Still even if our sphere of action is less grandiose and spacious than in bygone days, I believe that, for a long time to come, and certainly during my day, we shall find more than enough to occupy our funds with smaller and less ambitious designs.

"I pass to the question of military expenditure. The principal military incident of the past year has of course been the campaign in South Africa, to which we have lent a force of rather over 8,000 British officers and men from India, as well as some 3,000 Natives for non-combatant services. Now, I myself should have been glad if the British Government had seen their way to employ some of our gallant Native regiments, infantry, and perhaps still more cavalry, as well; and at an early stage in the war, I made the offer, on behalf of the Government of India, to send a large force. I should have been willing to send 10,000 men. I believe that had the offer been accepted, it would have provoked an outburst of the heartiest satisfaction in this country, where the manifestations of loyalty have been so widespread, and, in my opinion, so conspicuously genuine. You must not imagine for a moment that the Home Government were indifferent to the offer, or were unconscious of the great display of patriotism in India that would have more than justified its acceptance. They were as well aware of these facts, and as grateful for the spirit displayed, as has been Her Majesty the Queen-Empress, who, throughout the war has not ceased to press upon me her desire that I should lose no opportunity of testifying her admiration for the devoted loyalty of the Indian princes, the Indian army, and the Indian people. Nor did the refusal of the offer involve the slightest slur upon the Native army. It was refused for more reasons than one. It was thought undesirable to import any racial element into the contest. The British on one side were engaged in fighting the Boers on the other; and, had other combatants been engaged, it might not have stopped at Indian forces. There was the further consideration that, had Great Britain transferred a portion of her great Indian army to fight her battles in South Africa, an impression might have been produced that her own strength in white men was not sufficient for the strain of a second-class campaign; an impression which might have had unfortunate consequences in its effect upon a local population perpetually hovering on the verge of revolt. For these reasons the offer was declined.

"Now, it cannot be expected for one moment that a war so momentous—revolutionising all our ideas—and not ours alone, but those of the entire world—upon questions of armament, of tactics, and of the whole science and practice of warfare—should pass by without leaving a direct impress upon the military policy of India, as it will do upon that of every military power in the globe. A storm has taken place in the great ocean, the commotion caused by which will be felt thousands of miles away on every beach and shore. Here, as elsewhere, we shall require to set our own house in order, to overhaul our military machine, and to profit by the lessons learned. We have already set to work to do it. Do not imagine that these sorts of reforms can anywhere be undertaken without an additional outlay. The first result of the Transvaal war will, I firmly believe, be an increase to the budget of every military nation in the world. If two small republics, however rich in money and in guns, could stand up for four months against the main strength of the British army, and could put the British nation to an expenditure which, before the entire bill is paid, may be nearer to 100 millions than 50, are we to stint the annual expenditure that may be required to protect this vast Empire of India, as large as the whole of Europe without Russia, against the infinitely more formidable dangers by which it may one day be threatened? I venture to say that no sterner critic, and no more uncompromising foe of extravagance, or of levity in military expenditure, has ever entered the offices of the Government of India than myself. But at the same time, as head of that Government, I know my responsibilities, and, if my colleagues and I are convinced that the military protection of India against the perils by which she may be menaced absolutely require that this or that expenditure should be incurred, we shall not flinch from undertaking it. My greatest ambition is to have a peaceful time in India, and to devote all my energies to the work of administrative and material development, in which there are so many reforms that cry aloud to be undertaken. I see no present reason why those aspirations should be interrupted or destroyed. But I do not wish or mean to place myself in a position in which later on, should the peril come, public opinion shall be able to turn round upon me and say, 'We trusted you; we would have given you what you asked for the legitimate defence of India. But you neither foresaw the future, nor gauged the present; and yours is the responsibility of failure, if failure there be.'

"I say then that I see no chance of a reduction in the military estimates for some time to come. There are many respects in which we can save, or in which expenditure can be overhauled, scrutinised, and cut down. In the present and following year, we shall make a very considerable saving in consequence of the Frontier Policy which has been inaugurated during the past 12 months, and in the withdrawal of regular troops serving beyond our administrative frontier. There are many such fields of possible reduction. But the sum total of these economies is small in relation to the heavy items of expenditure that cannot possibly be escaped. Take re-armament alone. Sir E. Collen has told us in his Memorandum that the cost of re-arming the Native army and Volunteers in India with a Magazine rifle will amount to 1⅓ crores by itself, and yet who would urge for a moment that the expenditure should not be undertaken, or should be unduly delayed? If we are spending over 12 crores in two years, as I have remarked in an earlier part of my speech, in saving 50 millions of people from the peril of death by starvation, shall we grudge the crores that may be required to save 300 millions of people from the perils—almost worse than death—of disorder, and anarchy and chaos that might ensue were the British arms on or beyond the frontiers of India at any time to experience a serious disaster? Let not any one carry away the idea that because for a few months, or even for a year, we have been able to spare 8,000 of our British troops for Africa, the British garrison in India can be permanently reduced by that amount. There can be no more complete or foolish illusion. Because a man lends for a night the watchdog that guards his house to a neighbour who is being attacked by robbers, does it, therefore, follow that his own house will be able to get on in future without protection? There is always some risk in denuding India of any considerable portion of her garrison. That risk is greater or less according to the conditions of the time, and the attitude of neighbouring powers. It was present upon the present occasion, and the late Commander-in-Chief and I, in deciding to lend to Her Majesty's Government a certain number of troops for South Africa—and here let me remark in passing that the papers have been wrong in speaking of the demands or orders of Her Majesty's Government seeing that the latter have never done, and could not do, more than ask us to lend what we might be willing to spare—took upon ourselves to run that risk. But because we are likely to surmount it successfully on this occasion, would it be statesmanship to make the risk permanent?

"I wonder if those persons who employ this curious argument would have said that, if we had been able to accept the offers of the various Native Princes who so loyally proffered their personal services to the campaign, it was a proof that India could get on permanently without those Chiefs; or, supposing we had sent 10,000 or 20,000 Native troops to South Africa, that the Native army ought, therefore, in future, to be reduced by that number. Let no one, therefore, be taken in by this sort of argument. These are not days when the military strength of any empire is likely to be reduced. They are not days when the military strength of the Indian Empire can with safety be reduced. If Lord Dufferin could hold 14 years ago that the present armed strength of India, which was raised by him to its present total, was necessary for the preservation of order in this great country, for the fulfilment of our engagements, and for the protection of our boundaries, will any sensible man be found to tell me that anything has occurred since, whether it be in the experience of warfare in South Africa, or whether it be in the events that we hear of from day to day in Central Asia and on the borders of Afghanistan, to prove that we can now fulfil our obligations with less? No, there are two great duties of Imperial statesmanship in India. The first is to make all these millions of people, if possible, happier, more contented, more prosperous. The second is to keep them and their property safe. We are not going, for the sake of the one duty, to neglect the other. We would prefer to discharge our responsibility,—and it is no light one—in respect of both. With these remarks I will bring the present debate to a close, and will now adjourn this Council *sine die*.

J. M. MACPHERSON,
Secretary to the Government of India,
Legislative Department.

CALCUTTA;
The 30th March, 1900.

APPENDIX I.

Note by the Hon'ble MR. ALLAN ARTHUR.

In paragraphs 32 and 33 of the Financial Statement, the Hon'ble Member gives certain reasons for the Secretary of State's notification stopping Telegraphic Remittances under the Gold Note Act, and among other matters mentions that the season opened without the assistance of the money that is usually brought out before Christmas by the Exchange Banks. Now it seems to me that the season opened with much heavier remittances from England than has been the case any time during the last six years, and I give the figures showing the sales of Council Bills during the three months October to December for these years :—

	Rs.	
1894	6,46,26,000	
1895	7,49,27,000	
1896	3,88,30,000	
1897	1,23,000	(Councils stopped).
1898	6,29,14,000	
1899	8,02,65,000	

The total Council Bills offered by the Secretary of State in December last amounted to Rs. 175 lakhs, of which the Exchange Banks took Rs. 157 lakhs, while the total tender during December amounted to Rs. 9,92,87,000, the percentage given each week being 5 %, 13 %, 79 % and 100 %. In addition to Council Bills the Exchange Banks brought out money in the shape of sovereigns, and from the returns of the Paper Currency Department we find that between 22nd November and 22nd December last gold to the value of 94¾ lakhs was tendered in exchange for notes or rupees, whereas no additions of the kind were made to the currency during the last month of the preceding five years.

In fairness to the Exchange Banks I feel bound to give these figures, but I do not think any good purpose would be served by discussing further the point as to whether the India Office were or were not justified in making the notification referred to. I think, however, that good might come if I were to point out what was the result of that notification as applied to Indian trade. So far as I can make out the figures from the market reports, the amount of gold and of sovereigns shipped in consequence of the action of the Secretary of State was over £500,000. This was more than the trade of the country required, and Government has suffered through this temporary over-financing by Exchange having declined to a point under 1*s.* 4*d.* Had it not been for the action of the India Office, money would have come out only *as required,* and Exchange would probably have remained near import gold point, instead of having advanced as it did a short time ago to 1*s.* 4⅜*d.* and having declined as it has recently done to under 1*s.* 4*d.*, to the great harassment of trade, and in complete opposition to the declared currency policy of the Government of India which the Hon'ble Member states to be the maintenance of Exchange between two given points, *viz.*, 1*s.* 4$\frac{5}{32}$*d.* and 1*s.* 3⅞*d.* The general idea here is that if the notification had not been made, Exchange would not have gone above gold import point, and the fact that the Secretary of State was able after his notification to sell telegraphic transfers freely seems to indicate that the notification was unnecessary.

It was with considerable regret that I was informed by the Hon'ble Member last week in reply to a question of mine that it must be distinctly understood that the prolongation of the Gold Note Act implies no undertaking on the part of the Secretary of State to sell remittances under the Act at any specified rate. In other words, there is no certainty that Exchange may not at some future period be again forced up to above gold import point, and I would suggest that the refusal of the Secretary of State to declare a maximum rate under the Gold Note Act may be taken as a sign of weakness, and that if the Government expect any efficacy for their currency measures any sudden retreat from the situation they have taken up cannot fail to constitute an unsolid foundation in the public view.

I cannot think that the Viceroy and the present Financial Member will be satisfied with a currency system that is not somewhat better than anything India has ever had before. On 23rd January of last year His Excellency said : "Relief from the financial uncertainty and the fluctuations which have so long hampered the Government and interfered with trade by a scheme of currency reform which shall give stability to our monetary system is, in my opinion, the first step, though I am far from saying the sole step, towards the economic and commercial revival of India"

and again on 12th February :—

"British capital is therefore a *sine quá non* to the national advancement. I believe it is sound policy to desire that India should become one of the chosen fields of investment, and that this great and expanding dominion should attract some portion of that wealth which appears to be equally at the disposal of petty venal Republics in the Western Hemisphere and of moribund kingdoms in the Eastern."

If British capital is to be attracted to India it seems to me that the Government of India should do everything in their power to minimize fluctuations in Exchange, so that capital may flow freely between England and India with the least possible risk of loss on the return opera-

tion. And I would submit that it will be entirely in the general interests if the announcement which was made last week by the Hon'ble Member in regard to the rate for transfers under the Gold Note Act be reconsidered, so that in the future we shall be spared from the unnecessary fluctuations of the past few months.

At the close of paragraph 33 of his statement the Hon'ble Member points to the difficulties which Indian trade is likely to run into if the Banks and Merchants trust to Government always to meet their demands from its resources instead of supplying themselves with funds. And the Secretary of State makes a similar remark in the last paragraph of his despatch of 1st instant. I agree with the Secretary of State and the Hon'ble Member so far as to say that it is only on special occasions and at prohibitive rates that assistance should be expected from State resources. But the Government of India should bear in mind that they are responsible for the laws and regulations under which money can be imported from abroad or manufactured locally, and, if the Government of India for reasons and objects admirable in themselves, place exceptional restrictions on the expansion of the currency and by their own action enlarge and reduce at times the local supply of money, then I think the Banking and Commercial communities have a right to expect that Government will be prepared to assist them temporarily to overcome the difficulties caused by exceptional legislation or State regulations. In all countries, with the exception of England and India, the currency can be readily expanded to meet temporary requirements by the simple and cheap expedient of issuing fiduciary paper money. But in England and India Government has decreed that the currency can only be expanded against a deposit of gold; this exceptional restriction works fairly well in England because London can obtain gold without much delay from Paris or Berlin or New York, but in India 3 weeks or more must elapse before gold can be imported and in the absence of gold no fresh money can be issued except under the Gold Note Act. Council telegraphic transfers have saved India from many monetary panics, but they do not expand the currency. They merely transfer currency from the Government Treasuries to the money market. They are limited on the one side by the requirements of the Secretary of State and on the other by the amount spareable from the Government of India's cash balance for remittance to the Secretary of State. When the demand for money exceeds these limits or when the demand is for fresh currency it can only be met expeditiously by the Gold Note Act or some similar arrangement. I do not blame the Government of India for saying there shall be no expansion of the currency in the absence of a deposit of gold; although England is the only other country in the world where such a restriction exists, but I ask the Government of India to make allowance for the distance of India from the central markets for gold and to arrange to issue fresh currency in India on receipt of the gold in London as provided under the Gold Note Act, and, if the Gold Note Act is to be operative, I think it is highly necessary that there should be some maximum at which the Secretary of State will undertake to give rupees in exchange for gold to an unlimited extent, which facility, I take it, will only be availed of at times of extreme pressure.

To make the system work smoothly for Government, it would probably be well for them to take power to purchase silver for coinage purposes against gold paid in London under the Act, as otherwise they might have the difficulty they have lately experienced of not having sufficient rupees in the Paper Currency Reserves to meet all demands. If they had had this power recently it seems to me that it would have been quite unnecessary to have stopped Transfers under the Gold Note Act; the Government would have made a handsome profit on the purchase and coinage of the silver, and in accordance with the recommendations of the Indian Currency Committee could have placed the amount of that profit in gold to a special reserve account for the strengthening of their Currency Policy, and the gold would have been kept in London at a time when it was wanted there instead of being locked up at sea for 3 weeks or more, and locked up afterwards in the Indian Paper Currency Reserve.

So important is it in the interests of the trade of India and of the Government of India that an easy means of remittance from London to India, such as has been provided by the Gold Note Act during the last two years, should be provided permanently that I have ventured to give my views at some length. I should like to make further a few remarks on the kindred question of the inelasticity of the local central banking funds. Here again all that Government are asked to do is to afford relief from difficulties which they themselves create. In referring to the quantitative theory the Hon'ble Member says that although variations in the quantity of currency circulating may have little effect in Western countries amply equipped with credit money, the quantity of currency being supplied and offering in the Indian market must have an effect in regulating its value in exchange with other commodities, and I presume I may add that variations of the quantity of money in the loan market will have an equally great effect on the rate of interest. This being the case is it not a matter for great regret that Government should withdraw from circulation and lock up a larger amount of money during the busy season when trade demands are heavy than during the slack season, and is it not desirable in the public interest that the scarcity of money thus caused should be relieved by an increase of the Government deposits with the Presidency Banks during the busy season, when this can be done without risk or inconvenience to the State? I understand that Rs. 8 crores are considered an ample working balance with which to work the Treasuries and that a reserve of Rs. 2 crores is deemed ample to meet emergent demands on Government, and all that is asked is that during the busy season the deposits in the Presidency Banks will be enhanced whenever the total cash balances exceed Rs. 10 crores. Then again the Presidency Banks are the only Central Banks in the world which receive no assistance from the Paper Currency. The

Presidency Banks hold a portion of the cash balances, but the Bank of England holds all the cash balances and in addition to this it has power to issue fiduciary notes to the extent of over £16 millions. This is a fixed issue, but all other Governments are still more generous to their central banks and give them power to expand their fiduciary issues freely in order to enable them to meet on easy terms all legitimate demands for local accommodation. The Government of India, for reasons which I approve of, have resolved to issue the Paper Currency themselves and to appropriate all the profit thereby obtained; but they must admit that by so doing they have deprived the central banks of the power that all other central banks, with the exception of the Bank of England, possess of expanding their resources easily and cheaply in order to meet exceptional demands for accommodation, and it is not surprising that under these circumstances the central banks of India ask for some support from the Paper Currency Reserve.

The Bank of Bengal has advocated that the Presidency Banks should be given access to these Reserves upon certain restrictive terms in times of extreme pressure. The Hon'ble Member recently pointed out the difficulties that occurred to him in acceding to this suggestion, and while there is no doubt a great deal in what he said, I venture to think that the facility asked would be so seldom availed of, perhaps never at all, that the suggestion should not be finally rejected. The knowledge that there is an effective last resort in India would be an immense assistance to those who are responsible for the financing of the internal trade of the country, and with the additional Banking capital, which there is little doubt will come before long to the country, the dangers, which the Hon'ble Member foresaw if this facility were granted, may not really be so great as he anticipated.

The 28th March 1900.
